LABOR MARKET DIGEST

January Data

March 2008

Personal Income in Maine Rises in 2007

Total Personal Income

Total personal income in Maine increased 5.3 percent between 2006 and 2007 to \$44.4 billion. This compares to a national growth rate of 6.2 percent and a New England gain of 6.1 percent. Personal income is the sum of income received from earnings from work; dividends, interest, and rent; and transfer payments. Slower income growth in Maine was primarily due to slower growth in earnings from work and dividends, interest, and rent.

Wage and salary disbursements from work, which are the largest source of personal income, increased 4.8 percent in Maine between 2006 and 2007. All major nonfarm industries, with the exception of nondurable goods manufacturing, registered total earnings increases. The fastest rate of growth was recorded by management of companies and enterprises at 2.2 percent. Educational services workers were second with an increase in earnings of 15.7 percent, followed by arts entertainment, and recreation workers

(9.9 percent). Earnings in nondurable goods manufacturing edged down by 0.1 percent over the year.

Per Capita Personal Income

Per capita personal income equals total personal income divided by the total population.

*Per capita personal income in
Maine rose 5.1 percent between
2006 and 2007 to \$33,722.*

*This was the 27th highest rate of
increase among the 50 states and
slightly below the national
growth rate of 5.2 percent.*

The Maine 2007 per capita personal income ranked 35th of all states compared to 36th in 2006.

Maine per capita personal income stood at 87 percent of the national average in 2007. Per capita personal income in the other New England states ranged from 95 percent of the national average in Vermont to 140 percent in Connecticut.

¹ Civilian labor force, employed, and unemployed estimates are by place of residence. Current year estimates are preliminary; year-ago estimates are revised. Items may not add due to rounding. All data exclude members of the Armed Forces.

² Total employment includes nonfarm wage and salary workers, agricultural workers, unpaid family workers, domestics, the self employed, and workers involved in labor disputes.

³ People are classified as unemployed, regardless of their eligibility for unemployment benefits or public assistance, if they meet all of the following criteria: 1) they were not employed during the survey week; 2) they were available for work at that time; and 3) they made specific efforts to find employment some time during the prior four weeks. Persons laid off from their former jobs and awaiting recall and those expecting to report to a job within 30 days need not be looking for work to be counted as unemployed.

⁴ The unemployment rate is calculated by dividing the total number of unemployed by the total civilian labor force and is expressed as a percent.

⁵ Bangor; Lewiston-Auburn; Portland-South Portland-Biddeford; Portsmouth, NH-ME; and Rochester-Dover, NH-ME are Metropolitan Statistical Areas. Augusta, Brunswick, Rockland, Sanford, and Waterville are Micropolitan Statistical Areas.

⁶ Adjacent metropolitan and/or micropolitan statistical areas that have a specific level of economic integration, but still retain separate identities.

⁷ Maine portion of the area which includes towns in both Maine and New Hampshire.

Area Analyst's Corner

Central Maine Merrill Huhtala (207) 621-5196

Construction has begun on a new port-of-entry border station in Sandy Bay Township. When completed in 2010, the \$26 million facility will be home to the **U.S. Customs and Border Protection Agency**. ♦A new **Target** store opened at Augusta Crossing. The store employs 130 full- and part-time workers, and houses a **Pizza Hut** and **Starbucks**. ♦**Athenahealth, Inc.**, took possession of the former MBNA Phase I complex in Belfast. Planned upgrades include new cubicles, carpets, security cameras, electronics, and telecommunications lines. Recruiting for future job openings has begun.

Western Maine Gerard Dennison (207) 753-9045

Bath Iron Works received a \$1.4 billion contract to build the first ship in the Navy's next class of destroyers. The contract will help BIW avoid layoffs after it completes its current project, six ships in the DDG 51 class, also known as the Arleigh-Burke family. ♦**Parkview Adventist Medical Center** in Brunswick will soon close its maternity ward after almost 50 years because of an aging population, competition, fewer patients, and the approaching closing of the Brunswick Naval Air Station. BNAS employees and families account for some 30 percent of the patient load in the maternity ward, which opened in 1959. About 19 employees will be affected by the ward closure.

North/East Maine Craig Holland (207) 941-3076

Miller's Department Store in Millinocket abruptly closed its doors, laying off approximately 25 workers. Miller's was the region's primary department store, with the next closest of any size being Wal-Mart in Lincoln. ♦Officials at the **Aroostook Medical Center** are planning a \$3 million expansion that will include a new outpatient services center. The center, expected to open by January 2009, will offer expanded hours and basic laboratory and imaging services. ♦Plans are in place for the construction of a **Hamp-ton Inn** to be located in Presque Isle. The inn is expected to bring 35-45 jobs to the area.

Southern Maine Gerard Dennison (207) 753-9045

Naples voted to authorize two **Tax Increment Financing (TIF)** districts aimed at improving the Route 302 corridor. ♦The United States Navy has been accepting proposals from developers for renovating the former 265,000 square-foot prison at the **Portsmouth Naval Shipyard** in Kittery. The Navy envisions converting the prison into offices, laboratories, a hotel, or a conference center as potential uses for the facility. ♦The **Olympia Companies**, based in Portland, are seeking a 75-year lease in order to proceed with the Maine State Pier Project. The company has requested this time frame, which varies from the usually granted 30-year leases for submerged land, in order to secure necessary private funding.

¹ See footnotes 1 and 2 on page 7. The Information industry is not suitable for seasonal adjustment because it has very little seasonal and irregular movement. Source: see page 2.

Maine Unemployment Rate 5.0 Percent in January

State Labor Commissioner Laura Fortman announced that the preliminary seasonally-adjusted January unemployment rate for Maine was 5.0 percent. The national unemployment rate for January was 5.1 percent.

“Labor market conditions were little changed between December and January,” said Commissioner Fortman. “The unemployment rate edged up from 4.9 percent in December to 5.0 percent in January and the number of seasonally-adjusted nonfarm jobs was down 600.”

The drop in the number of seasonally-adjusted nonfarm wage and salary jobs between December and January was the result of a loss of 800 government jobs. This job loss was primarily temporary due to a larger-than-normal seasonal reduction in the number of college work study students and nonprofessional school staff due to school holidays. Private sector jobs rose slightly (up 200).

Between January 2007 and January 2008 the unemployment rate increased from 4.5 to 5.0 percent as employment growth slowed. The total number of seasonally-adjusted nonfarm wage and salary jobs increased by 1,200. Over-the-year, the largest job gains were recorded in professional and business services, health care and social assistance; retail trade, and leisure and hospitality services. Job losses were registered in

manufacturing, financial activities, and construction.

Other New England states reporting a seasonally-adjusted unemployment rate for January include New Hampshire, 3.5 percent; Massachusetts, 4.5 percent; and Rhode Island, 5.7 percent. The adjusted national rate for January was 4.9 percent, down from 5.0 percent for December and up from 4.6 percent for January 2007.

The not-seasonally-adjusted Maine unemployment rate for January was 5.9 percent, up from 5.0 percent for December and 5.4 percent for January 2007. The unadjusted national rate was 5.4 percent for January, up from 4.8 percent for December and 5.0 percent for January 2007. Not-seasonally-adjusted January unemployment rates for Maine counties ranged from 3.9 percent for Cumberland County to 11.2 percent for Washington County (see graph).

Not-seasonally-adjusted nonfarm wage and salary jobs in Maine declined by 26,900 between December and January. Seasonal job losses were recorded by retail trade, leisure and hospitality services, and construction. State and local government and private educational services fell due to seasonal reductions in nonprofessional school staff and college work study students.

¹ Hours worked and earnings data are computed based on payroll figures for the week including the 12th of the month for manufacturing production workers. Average hourly earnings are calculated on a gross basis, and include such factors as premium pay for overtime and shift differential, as well as changes in basic hourly and incentive rates of pay. Average weekly earnings are the product of weekly hours worked and hourly earnings.

Footnotes: From page 6.

¹ Nonfarm wage and salary employment estimates include all full- and part-time wage and salary workers who worked during or received pay for the pay period which includes the 12th of the month. Domestic workers in private households, proprietors, the self-employed, and unpaid family workers are excluded. Estimates measure the number of jobs by industry. Current month's estimates are preliminary; prior month and year-ago estimates are revised. These estimates are benchmarked to March 2007. As a measure of reliability, the March 2007 benchmark revision for total nonfarm wage and salary employment was 0.05 percent higher than the original sample-based estimate.

² Regular teachers are included in summer months whether or not specifically paid in those months.

Total personal income is the income received by all persons from all sources, that is, from participation in production, from government and business transfer payments, and from government interest. Personal income is the sum of net earnings by place of residence, rental income of persons, personal dividend income, personal interest income, and transfer payments. Net earnings by place of residence is earnings by place of work—the sum of wage and salary disbursements (payrolls), other labor income, and proprietors' income—less personal contributions for social insurance, plus an adjustment for residence. Personal income is measured before the deduction of personal income taxes and other personal taxes.

Per capita personal income is personal income divided by the resident population as of July 1.
