AUTHORIZATION

Maine Revised Statutes 1964, Title 26, §§ 42, 43, 46: "The Bureau shall collect, assort and arrange statistical details relating to industrial pursuits in the State. He (the Director) may cause to be printed and distributed bulletins that shall be of public interest and benefit to the State."

COVERAGE

This survey, insofar as possible, is of universal coverage for Maine manufacturing establishments ranging from the single proprietorships to the largest corporations. Reports covering 2,427 establishments were received since the original mailing in April of 1992. Of these, 164 either did not operate or went out of business during 1991. Final tabulations, according to major breakdown, will appear as usual in the next Census. These tabulations will include any late reports which are not included in this Census.

Taking into consideration the nature of the Maine economy and the extent of coverage in this survey, the data contained in the <u>Census of Maine Manufactures 1991</u> represent a comprehensive and valid statistical analysis of the Maine manufacturing economy.

James H. McGowan Director Bureau of Labor Standards

CENSUS OF MAINE MANUFACTURES 1991

The Research and Statistics Division of the Bureau of Labor Standards gratefully appreciates the contributions made by others toward this publication.

Thanks are due:

To Maine's manufacturing businesses for their cooperation in the collection of Census data, which makes this publication possible;

To the staff of the Bureau of Employment Security's Division of Economic Analysis and Research for their cooperation in providing the employment and wage data herein.

Prepared by:

Research & Statistics Division

Barbara A. Chenoweth, Statistician

Robert W. Leighton, Statistician

Maine Production Value

In 1991, Maine's gross value of manufacturing product decreased for the first time in more than five years. It fell 5.3 percent from 1991 to \$10,798.9 million from a value of \$11,406.1 in 1990. This was the biggest drop since 1985 when the value of product fell 5.2% from 1984. In constant dollars (using the Producer Price Index as a deflator), the value of Maine manufactures dropped 6.0 percent in 1991. (See Appendix F.)

Figure 1. Value of Manufactured Product in Current and Constant Dollars

Maine 1981–1991

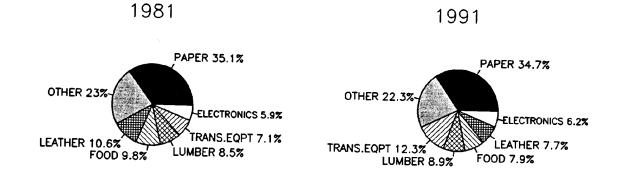

The gross value of product for Durable Goods fell 6.2 percent (\$3,859.3) in 1991. Major reductions were in the Transportation Equipment group which decreased \$99.8 million (7.0%); Electronic and Other Electrical Equipment group which decreased \$90.6 million (11.9%); and the Stone, Clay & Glass group which decreased \$23.1 million (18.1%).

Only the Lumber & Wood Products group experienced a small increase of \$7.5 million (0.8%) while the Fabricated Metals group remained virtually unchanged from 1990 at \$257.4 million.

The gross value of product for Nondurable Goods decreased 4.8 percent in 1991 to \$6,939.6 million. The largest declines occurred in the Paper group which fell \$229.8 million (5.8%), the Food group which decreased \$73.5 million (7.9%), the Leather group which decreased \$38.1 million (4.4%), and the Textiles group which decreased \$30.3 million (7.6%). The Chemicals group increased \$17.4 million (18.3%) while the Rubber & Plastics group showed a small increase of \$9.5 million (2.7%).

Figure 2. Value of Manufactured Product, Percentage by Major Industry Group
Maine 1981 & 1991

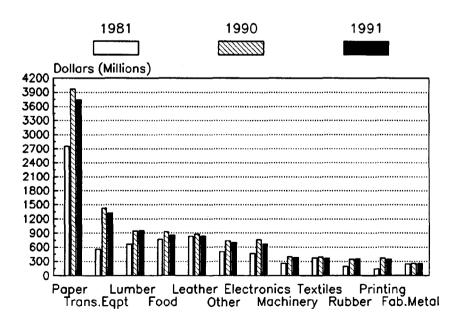

NOTE: The reclassification of some establishments into different Standard Industrial Classifications contributed to some of the change in value of product in the Precision Instruments and the Chemicals groups rather than changes in the specific industries.

The Paper industry continued to dominate the State's manufacturing economy with a \$3,741.8 million value of product and a 34.7 percent share of total product value in 1991. The Transportation Equipment group followed with a value of \$1,329.4 million which was a 7.0 percent decrease from 1990. The Lumber & Wood Products group was next with a \$955.1 million share of the manufacturing value and was one of only three industries to experience an increase over 1990.

The only industries to have percentage gains in value of product in 1991 were Chemicals, Rubber & Plastics, and Lumber & Wood Products with increases of 18.3 percent, 2.7 percent and 0.8 percent, respectively.

The industries with the largest percentage decreases in value of product were the Precision Instruments, Stone, Clay & Glass, and Electronic & Electrical Equipment groups with 25.6 percent, 18.1 percent and 11.9 percent, respectively.

Figure 3. Value of Manufactured Product by Major Industry Group Maine 1981, 1990 & 1991

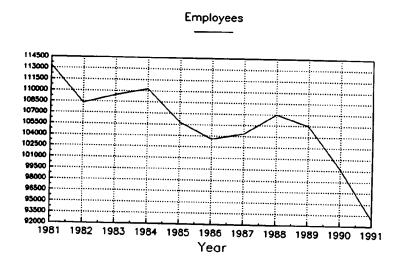

Manufacturing Employment

Employment in Maine manufacturing decreased for the third consecutive year falling 6.8 percent, from 99,682 workers in 1990 to 92,940 in 1991. Employment in Durable Goods dropped 8.9 percent to 41,791 employees while employment in Nondurable Goods dropped 4.9 percent to 51,149. Although the decrease was widespread, there were four groups that accounted for over half of the reduction: Transportation Equipment, Electronic Equipment, Paper, and Machinery with employee losses of 1,559 (10.2%), 889 (10.4%), 885 (5.1%) and 837 workers (19.5%) respectively. There were no employment gains in any of the major industrial groups during 1991.

Figure 4.

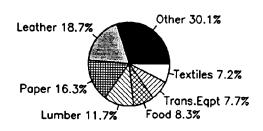

Manufacturing Employment Maine 1981–1991

The Paper industry continued to be the largest employer with 16,569 employees or a 17.8 percent share of the overall manufacturing employment. Transportation Equipment employed 13,737 workers (14.8%) followed by Lumber & Wood Products which employed 10,354 workers (11.1%).

1981

1991

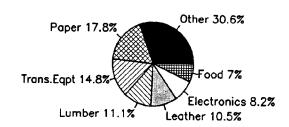

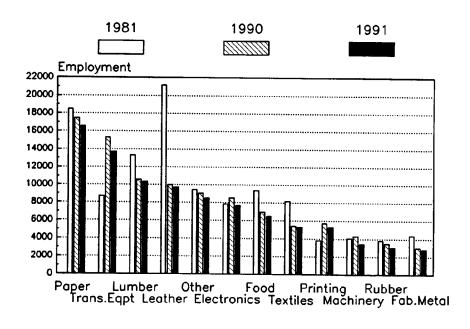

Figure 6.

Manufacturing Employment by Major Industry Group Maine 1981, 1990 & 1991

The percentage breakdown of employment by gender is essentially unchanged from 1990. Males made up 69.5 percent (64,626 employees) of Maine's manufacturing work force and females made up 30.5 percent (28,314 employees). Employment of males decreased in 1991 by 6.4 percent (4,415) while employment of females decreased 7.6 percent (2,327).

Union Coverage

The number of unionized manufacturing workers in Maine fell 6.8 percent in 1991 to 27,159 members. This was due primarily to decreases in the Transportation Equipment, Lumber & Wood Products, and Paper groups which lost 763, 537, and 365 union employees respectively.

The percentage of unionized manufacturing remained the same as 1990 at 29.2 percent of the overall manufacturing employment.

Of all unionized manufacturing workers in the state, 45 percent were in the Paper industry. This industry also had the highest reported proportion of unionization with 73.8 percent of all paper workers covered.

The Transportation Equipment and Textiles groups followed with a 27.6 percent (7,508 of 27,159) and 4.9 percent share (1,342 of 27,159), respectively, of all unionized manufacturing workers.

Figure 7.

Manufacturing Employment Percentage Covered by Union Contracts Maine 1981 & 1991

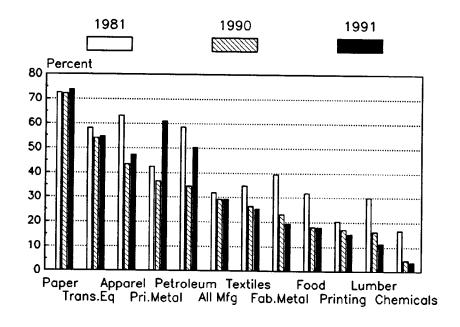

1981

1991

Figure 8.

Manufacturing Employment by Major Industry Group, Percentage Covered by Union Contracts Maine 1981, 1990 & 1991

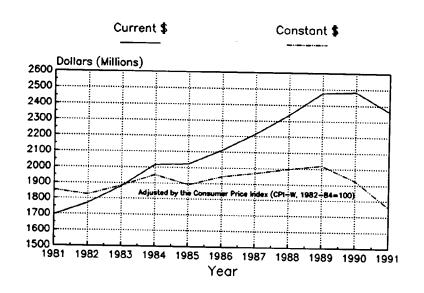

Gross Wages

Gross wages in Maine manufacturing decreased 4.9 percent from \$2,483.2 million in 1990 to \$2,361.9 million in 1991. The Paper industry accounted for 25.8 percent of the overall manufacturing wages in the state, paying out \$610.1 million in gross wages. This was the highest of any manufacturing industry although it was a decrease of 5.6 percent from 1990. The Transportation Equipment group and Electronic & Other Electrical Equipment group followed with \$416.7 million and \$204.2 million paid, and accounted for 17.6 percent and 8.6 percent, respectively, of the overall gross wages paid.

Significant dollar decreases in gross wages in 1991 occurred in the Paper industry, which fell \$36.2 million (5.6%) and Transportation Equipment which decreased \$26.0 million (5.9%).

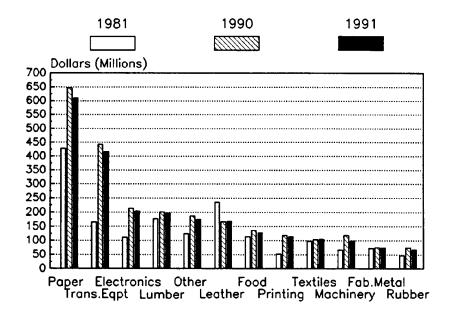

Figure 9.

Gross Manufacturing Wages in Current and Constant Dollars Maine 1981–1991

In 1991, the only major increase in gross wages occurred in the Chemicals group which increased 27.8 percent (\$7,479.0 million) but this was due more to changes in the Standard Industrial Classifications of some companies than actual changes in wages or employment. There were also small increases in: Textiles, \$1,335.8 million (1.3%), Leather, \$2,268.7 million (1.4%), and Miscellaneous, \$1,163.0 million (10.8%) manufacturing industries.

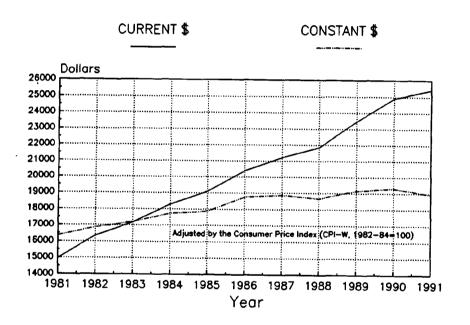

Figure 10. Gross Manufacturing Wages by Major Industry Group Maine 1981, 1990 & 1991

Average Wages

The average yearly wage for Maine manufacturing workers increased by \$502 (2.0 percent) to \$25,413 in 1991. By comparison, the annual average Consumer Price Index rose 4.1 percent between 1990 and 1991. (See Appendix F.) As a result, Maine manufacturing workers had a 2.1 percent decrease in buying power.

Figure 11. Average Manufacturing Wages in Current and Constant Dollars
Maine 1981–1991

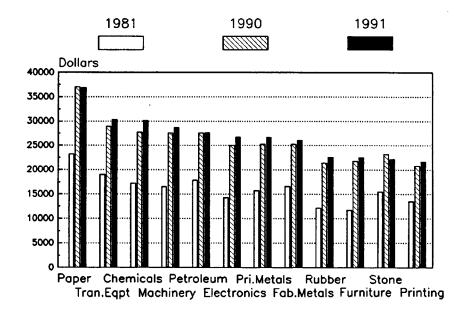

The Paper industry again had the highest reported average wage, \$36,824, which was 144.9 percent of the Maine manufacturing average for 1991. The Apparel industry had the lowest average wage, \$14,354, or 56.5 percent of the overall average.

The highest percentage increases in average wages for 1991 occurred in the Chemicals, Miscellaneous, and Electronic Equipment groups which rose 8.4 percent (\$2,344), 7.6 percent (\$1,223), and 6.7 percent (\$1,674), respectively.

The only industries to have decreases in the average wages were Precision Instruments, 14.6 percent (\$3,371), Apparel, 5.4 percent (\$813), Stone, Clay & Glass, 4.5 percent (\$1,034) and Paper, 0.6 percent (\$207).

Figure 12. Average Manufacturing Wages by Major Industry Group Maine 1981, 1990 & 1991

Capital Expenditures

Capital expenditures for 1991 were down 41.1 percent to \$462.6 million which is a decrease of \$322.6 million.

Capital expenditures for Durable Goods decreased 21.6 percent from 1990 to \$128.3 million in 1991. This was due in large part to the \$16.9 million (36.5%) reduction in the Lumber & Wood Products group and also reductions in Machinery, \$6.7 million (46.2%) and Transportation Equipment, \$4.2 million (9.8%).

The only increases in capital expenditures were in the Primary Metals group with an increase of \$500,000 (47.3%) and the Furniture group, which was also up \$500,000 (26.1%) from 1990,

Capital expenditures for Nondurable Goods fell 46.2 percent to \$334.3 million in 1991. The largest drop was in the Paper group which was down \$292.9 million (54.3%) from 1990. Other decreases were in Printing & Publishing, \$4.5 million (35.1%), Textiles, \$2.7 million (20.5%), Petroleum & Coal Products, \$800,000 (42.5%), Miscellaneous, \$600,000 (61.2%) and Apparel, \$60,000 (5.1%).

The four groups that showed increases in capital expenditures were Food (\$6.2 million), Chemicals (\$3.0 million), and Rubber & Plastics and Leather each with \$2.5 million.

Figure 13.

Capital Expenditures in Manufacturing in Current and Constant Dollars Maine 1981–1991

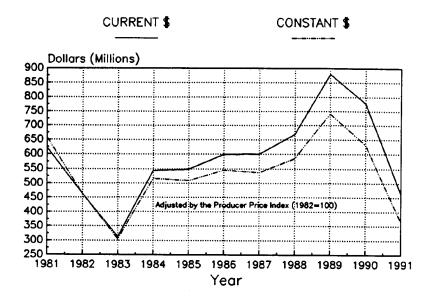

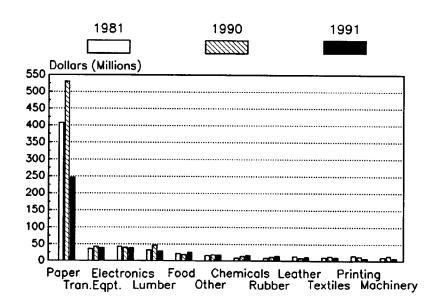

Figure 14.

Capital Expenditures in Manufacturing by Major Industry Group Maine 1981, 1990 & 1991

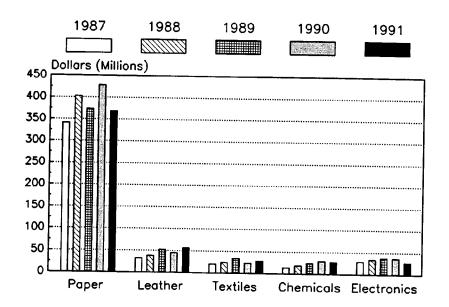

Foreign Imports

Imports used in the manufacturing process in 1991 decreased 9.0 percent (\$58.1 million). The largest decrease was in the Paper group, which fell 13.8 percent from \$427.9 million to \$368.9 million. The only other significant reduction in import spending was in the Electronic Equipment group which dropped 26.4 percent to \$27 million.

Substantial increases in import spending were in the Leather group and Transportation Equipment group with increases of 27.6 percent (\$12.3 million) and 299.0 percent (\$9.7 million), respectively.

Figure 15. Imports Used in Manufacturing by Major Industry Group Maine 1987–1991

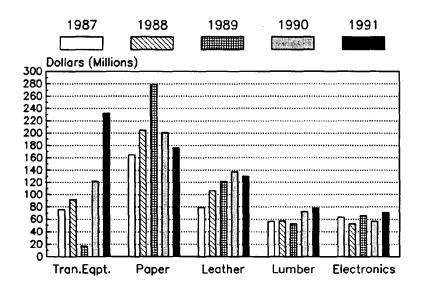

Foreign Exports

Goods worth \$908.3 million were exported to foreign countries by Maine manufacturers in 1991. This was a 19.0 percent increase (\$145.3 million) over 1990. This change was due primarily to the Durable Goods group where seven of nine industries had increases. Transportation Equipment rose 90.0 percent from \$122.2 million in 1990 to \$232.3 million in 1991. Other notable changes were in the Machinery group and the Electronic Equipment group with \$14.5 million and \$13.5 million increases, respectively.

Nondurable Goods showed a 2.2 percent (\$9.6 million) overall reduction in exports for the year. The only sizable decrease occurred in the Paper industry with 12.4 percent (\$24.9 million) less in exports than in 1990. Figure 16 illustrates the five leading industries in exports in 1991 to locations outside the U.S.

Figure 16.

Manufactured Exports by Major Industry Group Maine 1990–1991

Value of Manufacturing Product by County Group

For 1991, the I-95 Corridor remained the top producing area although there was a \$479 million (6.8%) decrease in value of product. (See Table 4.) Cumberland, Penobscot, and York counties each recorded over one billion dollars in manufactured product but still suffered declines from 1990 of 10.6 percent, 4.6 percent and 2.4 percent respectively.

The Western group of counties was the second leading area with a \$2.29 billion value of product. This was also the only group to show an increase (1.6%) in product value over 1990.

Since 1981, the areas with the largest percentage increase in product value were the Western area (47.6%), the I-95 Corridor (39.0%), and the Eastern area (33.9%).

APPENDIX A

Technical Notes and Definitions

AVERAGE GROSS WAGES is the figure obtained by dividing GROSS WAGES by the TOTAL EMPLOYMENT.

CIVIL DIVISIONS are geographical units of government. Major civil divisions are counties; minor civil divisions are cities, towns, plantations, and townships.

ECONOMIC AREAS are defined in Appendix C.

EMPLOYMENT is the number of employees reported in each month, as of the payroll period including the 12th of the month, averaged at the establishment level over the full twelve months.

ESTABLISHMENT is defined as a single physical location where industrial operations are performed; it is, therefore, a place of business rather than a legal entity or company which may have units in many locations. Where appropriate (e.g., logging operations) combined reports have been assigned to no specific civil division, merely to the county in which said principal location is found. A small number of multi-county operations report on a statewide basis.

EXPENDITURES FOR PLANT MODERNIZATION AND EQUIPMENT (or Capital Expenditures) is the actual amount spent during the survey year and planned for the two succeeding years for three categories: New Structures and/or Additions or Alterations to Existing Structures, Purchase of Existing Structures, and Purchase of New or Used Machinery or Equipment. Land costs are excluded.

FOREIGN TRADE - EXPORTS is the sales value of goods manufactured at an establishment that were shipped to foreign countries either directly or via out-of-state agents. **IMPORTS** is the cost of materials imported from foreign countries for use in the manufacturing process at an establishment.

GROSS WAGES shows total earnings during the calendar year of all employees before deductions, as reported to the Maine Bureau of Employment Security for Unemployment Insurance taxes. Before 1976, executives were excluded and wages were reported directly to the Bureau of Labor Standards. Because various fringe benefits such as payroll taxes, insurance, etc. paid by employers, are excluded, this data does not represent total labor costs on the part of the employer.

SPECIAL STUDIES from Census data are available upon written request to James H. McGowan, Director, Bureau of Labor Standards, State House Station #45, Augusta, Maine 04333-0045. The Bureau reserves the right to reject any request or to charge for costs incurred.

STANDARD INDUSTRIAL CLASSIFICATION (SIC) The Standard Industrial Classification system as compiled by the Executive Office of the President. Office of Management and Budget, was used to determine the industry title applicable to each establishment. Descriptions of major industry groups may be found in Appendix B. Each establishment has been classified according to its <u>principal</u> activity.

VALUE OF PRODUCT is the net selling price of all goods manufactured or processed during the calendar year. If industrial operations were on a contractual basis, the total of amounts received for contract work or services performed has been included.

WORKERS UNDER UNION CONTRACT is the number of workers organized under a union contract and/or a collective bargaining agreement. It represents the number from one representative payroll period; the comparative figure for NUMBER OF WORKERS is an average for the year.

APPENDIX B

Major Industry Descriptions, 1987 SIC

THE DIVISION AS A WHOLE

The manufacturing division includes establishments engaged in the mechanical or chemical transformation of materials or substances into new products. These establishments are usually described as plants, factories, or mills and characteristically use power driven machines and materials handling equipment. Establishments engaged in assembling component parts of manufactured products are also considered manufacturing if the new product is neither a structure nor other fixed improvement. Also included is the blending of materials, such as lubricating oils, plastics, resins, or liquors.

The materials processed by manufacturing establishments include products of agriculture, forestry, fishing, mining, and quarrying as well as products of other manufacturing establishments. The new product of a manufacturing establishment may be "finished" in the sense that it may be "semi-finished" to become a raw material for an establishment engaged in further manufacturing. For example, the product of the copper smelter is the raw material used in electrolytic refineries; refined copper is the raw material used by certain electrical equipment manufacturers.

The materials used by manufacturing establishments may be purchased directly from producers, obtained through customary trade channels, or secured without recourse to the market by transferring the product from one establishment to another which is under the same ownership. Manufacturing production is usually carried on for the wholesale market, for interplant transfer, or to order for industrial users, rather than for direct sale to the domestic consumer.

20 FOOD AND KINDRED PRODUCTS: This major group includes establishments manufacturing or processing food and beverages for human consumption and certain related products, such as manufactured ice, chewing gum, vegetable and animal fats and oils, and prepared feeds for animals and fowls.

22 TEXTILE MILL PRODUCTS: This major group includes establishments engaged in performing any of the following operations: (1) preparation of fiber and subsequent manufacturing of yarn, thread, braids, twine, and cordage; (2) manufacturing broad woven fabric, narrow woven fabric, knit fabric, and carpets and rugs from yarn; (3) dyeing and finishing fiber, yarn, fabric, and knit apparel; (4) coating, waterproofing, or otherwise treated fabric; (5) the integrated manufacture of knit apparel and other finished articles from yarn; and (6) the manufacture of felt goods, lace goods, nonwoven fabrics, and miscellaneous textiles.

This classification makes no distinction between the two types of organizations which operate in the textile industry:

(1) the "integrated" mill which purchases materials, produces textiles, and related articles within the establishment, and sells the finished products; and (2) the "contract" or "commission" mill which processes materials owned by others. Converters or other manufacturing industries; establishments which assign materials to contract mills for processing (other than knitting) are classified in nonmanufacturing industries; establishments which assign yarns to outside contractors or commission knitters for the production of knit products are also classified in this Group.

23 APPAREL AND OTHER FINISHED PRODUCTS MADE FROM FABRICS AND SIMILAR MATERIALS: This major group, known as the cutting-up and needle trades, includes establishments producing clothing and fabricating products by cutting and sewing purchased woven or knit textile fabrics and related materials, such as leather, rubberized fabrics, plastics, and furs. Included in the apparel industries are three types of establishments: (1) the "regular" or insider factories, (2) contract factories, and (3) apparel jobbers. The regular factories perform all of the usual manufacturing functions within their own plant; the contract factories manufacturing apparel from materials owned by others; and apparel jobbers perform the entrepreneurial functions of a manufacturing company, such as buying raw materials, designing and preparing samples, arranging for the

Custom tailors and dressmakers not operating on a factory basis are classified in Retail Trade; establishments which purchase and resell finished garments but do not perform the functions of the apparel jobbers are classified in Wholesale Trade.

manufacture of the garments from their materials and selling of the finished apparel.

APPENDIX B (Continued)

- 24 LUMBER AND WOOD PRODUCTS, EXCEPT FURNITURE: This major group includes logging camps engaged in cutting timber and pulpwood; merchant sawmills, lath mills, shingle mills, cooperage stock mills, planing mills, and plywood mills and veneer mills engaged in producing lumber and wood basic materials; and establishments engaged in manufacturing finished articles made entirely or mainly of wood or wood substitutes. Certain types of establishments producing wood products are classified elsewhere. For example, furniture and office and store fixtures are classified in Major Group 25; musical instruments, toys, and playground equipment, and caskets in Major Group 39. Woodworking in connection with construction, in the nature of reconditioning and repair, or performed to individual order, is classified in nonmanufacturing industries.
- 25 FURNITURE AND FIXTURES: This major group includes establishments engaged in manufacturing household, office, public building, and restaurant furniture; and office and store fixtures. Establishments primarily engaged in the production of millwork and wood kitchen cabinets are classified in Major Group 24; cut stone and concrete furniture in Major Group 32; laboratory and hospital furniture in Major Group 38; beauty and barber shop furniture in Major Group 39; and woodworking to individual order or in the nature of reconditioning and repair in nonmanufacturing industries.
- 26 PAPER AND ALLIED PRODUCTS: This major group includes the manufacture of pulps from wood and other cellulose fibers and from rags; the manufacture of paper and paperboard; and the manufacture of paper and paperboard into converted products, such as paper coated off the paper machine, paper bags, paper boxes, and envelopes. Certain types of converted paper products are classified elsewhere, such as abrasive paper in Major Group 32; carbon paper in Major Group 39; and photosensitized and blueprint paper in Major Group 38.
- 27 PRINTING, PUBLISHING, AND ALLIED PRODUCTS: This major group includes establishments engaged in printing by one or more of the common processes, such as letter press, lithography, gravure, or screen; and those establishments which perform services for the printing trade, such as bookbinding, typesetting, engraving, photoengraving, and electrotyping. This major group also includes establishments engaged in publishing newspapers, books, and periodicals, regardless of whether or not they do their own printing. News syndicates are classified in Service Industries, and textile printing and finishing in Major Group 22.
- 28 CHEMICALS AND ALLIED PRODUCTS: This major group includes establishments producing basic chemicals and establishments manufacturing products by predominantly chemical processes. Establishments classified in this major group manufacture three general classes of products: (1) basic chemicals, such as acids, alkalies, salts, and organic chemicals; (2) chemical products to be used in further manufacture, such as synthetic fibers, plastics materials, dry colors, and pigments; (3) finished chemical products to be used for ultimate consumption, such as drugs, cosmetics, and soaps; or to be used as materials or supplies in other industries, such as paints, fertilizers, and explosives. The mining of natural rock salt is classified in mining industries. Establishments primarily engaged in manufacturing nonferrous metals and high percentage ferrous alloys are classified in Major Group 33; solicon carbide in Major Group 32; baking powder, other leavening compounds, and starches in Major Group 20; and artists' colors in Major Group 39. Establishments primarily engaged in packaging, repackaging, and bottling of purchased chemical products, but not engaged in manufacturing chemicals and allied products, are classified in trade industries.
- 29 PETROLEUM REFINING AND RELATED INDUSTRIES: This major group includes establishments primarily engaged in petroleum refining, manufacturing paving and roofing materials, and compounding lubricating oils and greases from purchased materials. Establishments manufacturing and distributing gas to consumers are classified in public utilities industries, and those primarily engaged in producing coke and by-products in Major Group 33.
- 30 RUBBER AND MISCELLANEOUS PLASTICS PRODUCTS: This major group includes establishments manufacturing from natural, synthetic, or reclaimed rubber, gutta-percha, balata, or gutta siak, rubber products such as tires, rubber footwear, mechanical rubber goods, heels and soles, flooring, and rubber sundries. This group also includes establishments primarily manufacturing tires, but establishments primarily recapping and retreading automobile tires are classified in Services. This group also includes establishments engaged in molding primary plastics for the trade, and manufacturing miscellaneous finished plastics products. The manufacture of elastic webbing is classified in Major Group 22; products made of elastic webbing and garments made from the rubberized fabrics in Major Group 23; and synthetic rubber in Major Group 28.
- 31 LEATHER AND LEATHER PRODUCTS: This major group includes establishments engaged in tanning, currying, and finishing hides and skins, and establishments manufacturing finished leather and artificial leather products and some similar products made of other materials. Leather converters are also included

APPENDIX B (Continued)

32 STONE, CLAY, GLASS AND CONCRETE PRODUCTS: This major group includes establishments engaged in manufacturing flat glass and other glass products, cement, structural clay products, pottery, concrete and gypsum products, cut stone, abrasive and asbestos products, etc., from materials taken principally from the earth in the form of stone, clay, and sand. When separate reports are available for mines and quarries operated by manufacturing establishments classified in this major group, the mining quarrying activities other than those of Minerals, ground or treated, are classified herein with the manufacturing operations.

If separate reports are not available for crushing, grinding, and other preparation activities of Minerals, ground or treated, these establishments are classified in Mining.

- 33 PRIMARY METAL INDUSTRIES: This major group includes establishments engaged in the smelting and refining of ferrous and nonferrous metals from ore, pig. or scrap; in the rolling, drawing, and alloying of ferrous and nonferrous metals; in the manufacture of castings and other basic products of ferrous and nonferrous metals; and in the manufacture of nails, spikes, and insulated wire and cable. This major group also includes the production of coke. Establishments primarily engaged in manufacturing metal forgings or stampings are classified in Major Group 34.
- 34 FABRICATED METAL PRODUCTS, EXCEPT MACHINERY AND TRANSPORTATION EQUIPMENT: This major group includes establishments engaged in fabricating ferrous and nonferrous metal products such as metal cans, tinware, hand tools, cutlery, general hardware, and nonelectric heating apparatus, fabricated structural metal products, metal forgings, metal stampings, ordnance (except vehicles and guided missiles), and a variety of metal and wire products not elsewhere classified. Certain important segments of the metal fabricating industries are classified in other major groups, such as machinery in Major Groups 35 and 36; transportation equipment, including tanks, in Major Group 37; professional scientific and controlling instruments, watches and clocks in Major Group 38; and jewelry and silverware in Major Group 39. Establishments primarily engaged in producing ferrous and nonferrous metals and their alloys are classified in Major Group 33.
- 35 INDUSTRIAL AND COMMERCIAL MACHINERY AND COMPUTER EQUIPMENT: This major group includes establishments engaged in manufacturing industrial and commercial machinery and equipment and computers. Included are the manufacture of engines and turbines; farm and garden machinery; construction, mining, and oil field machinery; elevators; metalworking machinery; special industry machinery; computer and peripheral equipment and office machinery; and refrigeration and service industry machinery. Machines powered by built-in or detachable motors ordinarily are included in this major group, with the exception of electrical household appliances.
- **36 ELECTRONIC AND OTHER ELECTRICAL EQUIPMENT AND COMPONENTS, EXCEPT COMPUTER EQUIPMENT:** This major group includes establishments engaged in manufacturing machinery, apparatus, and supplies for the generation, storage, transmission, transformation, and utilization of electrical energy. The manufacture of household appliances is included in this group, but industrial machinery and equipment powered by built-in or detachable electric motors is classified in Major Group 35. Establishments primarily engaged in manufacturing instruments for indicating, measuring, and recording electrical quantities are classified in Major Group 38.
- 37 TRANSPORTATION EQUIPMENT: This major group includes establishments engaged in manufacturing equipment for transportation of passengers and cargo by land, air and water. Important products produced by establishments classified in this major group include motor vehicles, aircraft, guided missiles and space vehicles, ships, boats, railroad equipment, and miscellaneous transportation equipment such as motorcycles, bicycles, and snowmobiles. Establishments primarily engaged in manufacturing mobile homes are classified in Major Group 24.
- 38 MEASURING, ANALYZING, AND CONTROLLING INSTRUMENTS, PHOTOGRAPHIC, MEDICAL, AND OPTICAL GOODS; WATCHES AND CLOCKS: This major group includes establishments engaged in Manufacturing instruments (including professional and scientific) for measuring, testing, analyzing, and controlling, and their associated sensors and accessories; optical instruments and lenses; surveying and drafting instruments; surgical, medical, and dental instruments, equipment, and supplies; ophthalmic goods; photographic equipment and supplies; and watches and clocks.
- 39 MISCELLANEOUS MANUFACTURING INDUSTRIES: This major group includes establishments primarily engaged in manufacturing products not classified in any other manufacturing major group. Industries in this group fall into the following categories: jewelry, silverware and plated ware; musical instruments; toys, sporting and athletic goods; pens, pencils, and other office and artists' materials, buttons, costume novelties, miscellaneous notions; brooms and brushes; caskets; and other miscellaneous manufacturing industries.

NOTE: More detailed definitions may be obtained directly from the Standard Industrial Classification Manual, 1987 Revision.

APPENDIX C

Geographic Definitions of Economic Areas

This publication has contained a tabulation entitled "Economic Areas" since 1954. This series consists of thirty-one areas which were delineated on the basis of population and manufacturing employment cross-sectional evaluation. Only those towns with manufacturing businesses are listed below. A complete listing of the Maine Labor Market Areas can be found in the 1990 Maine Employment and Earnings Statistical Handbook. In 1987, a major reorganization of the economic areas was completed. Care should be exercised in making comparisons of these thirty-one areas with the earlier areas as there have been changes made in almost all of the regions.

The civil division with the largest population is in bold letters, and the civil division with the most workers employed in manufacturing is underlined. The minor civil division contained in the areas are as follows:

Area No.	1990 Population	Town
1	47,962	Berwick, Eliot, Kittery, N. Berwick, S. Berwick, Wells, York
2	36,115	Alfred, Lebanon, Limerick, Newfield, Sanford, Shapleigh, Waterboro
3	54,507	Arundel, Biddeford, Dayton, Kennebunk, Kennebunkport, Lyman, Saco
4	215,281	Buxton, Cape Elizabeth, Cumberland, Falmouth, Freeport, Gorham, Gray, Hollis, N. Yarmouth, Old Orchard Beach, <u>Portland</u> , Raymond, Scarborough, S. Portland, Standish, Westbrook, Windham, Yarmouth
5	24,268	Baldwin, <u>Bridgton</u> , Brownfield, Casco, Cornish, Denmark, Fryeburg, Hiram, Limington, Naples, Parsonfield, Porter
6	62,082	<u>Bath</u> , Bowdoin, Bowdoinham, Brunswick , Durham, Georgetown, Harpswell, New Gloucester, Pownal, Topsham, West Bath, Woolwich
7	88,141	Auburn, Greene, Lewiston, Lisbon, Mechanic Falls, Poland, Sabattus
. 8	22,643	<u>Boothbay</u> , Boothbay Harbor, Bremen, Bristol, Damariscotta, Edgecomb, Jefferson, Newcastle, Nobleboro, S. Bristol, Southport, Whitefield, Wiscasset
9	40,798	Appleton, Camden, Cushing, Friendship, Hope, North Haven, Owl's Head, Rockland , Rockport, St. George, S. Thomaston, Thomaston, Union, Vinal Haven, Warren, Washington, Waldoboro
10	25,801	Buckfield, Greenwood, Harrison, Hebron, Lovell, Minot, <u>Norway</u> , Oxford, Paris, Stoneham, Sumner, Sweden, Waterford, West Paris, Woodstock
11	9,439	Leeds, Livermore Falls, Turner
12	58,003	<u>Augusta</u> , Farmingdale, Gardiner, Hallowell, Litchfield, Monmouth, Randolph, Readfield, Wayne, W. Gardiner, Windsor, Winthrop, Richmond
13	20,562	Andover, Bethel, Canton, Dixfield, Hanover, Hartford, Magalloway Plt., Mexico, Newry, Parkertown Twp, Peru, Roxbury, <u>Rumford</u>
14	26,341	Avon, Carthage, Chesterville, Coburn Gore, Eustis, Farmington , <u>Jay</u> , Kingfield, New Sharon, New Vineyard, Phillips, Rangeley, Strong, Temple, Wilton
15	51,867	Albion, Belgrade, Benton, China, Clinton, Mount Vernon, Oakland, Sidney, Vassalboro, <u>Waterville</u> , Winslow
16	26,064	<u>Belfast</u> , Belmont, Brooks, Freedom, Islesboro, Liberty, Lincolnville, Monroe, Montville, Morrill, Northport, Palermo, Prospect, Searsmont, Searsport, Stockton Springs, Swanville, Troy, Waldo

APPENDIX C (Continued)

Area <u>No.</u>	1990 <u>Population</u>	Town
17	44,086	Bar Harbor, Blue Hill, Brooklin, <u>Bucksport</u> , Castine, Cranberry Isles, Dedham, Deer Isle, Elisworth , Franklin, Gouldsboro, Hancock, Lamoine, Mariaville, Mount Desert, Orland, Penobscot, Sedgwick, Sorrento, Southwest Harbor, Stonington, Sullivan, Surry, Swans Island, Tremont, Trenton, Winter Harbor
18	50,393	Anson, Athens, Bingham, Cambridge, Canaan, Caratunk Plt., Detroit, Embden, Fairfield, Harmony, Hartland, Highland Plt., Jackman, Madison, Moose River, New Portland, Norridgewock, Palmyra, Pittsfield, Rockwood Strip, St. Albans, Skowhegan, Smithfield, Solon, Starks, The Forks Plt., West Forks Plt.
19	20,243	Bradford, Carmel, Charleston, Corinna, Corinth, <u>Dexter</u> , <u>Dixmont</u> , Hudson, Newburg, Newport, Stetson
20	81,316	Bangor, Brewer, Eddington, Hampden, Holden, Kenduskeag, Old Town, Orono, Orrington, Veazie, Winterport
21	7,031	Bradley, Greenbush, Greenfield, Lagrange, Milford
22	26,991	Alexander, <u>Baileyville</u> , Baring Plt., Beals, Calais , Cherryfield, Columbia Falls, Cutler, Danforth, E. Machias, Eastport, Jonesboro, Jonesport, Lubec, Machias, Machiasport, Millbridge, Pembroke, Perry, Princeton, Steuben, T36 MD, Topsfield, Waite, Wesley
23	1,988	Beaver Cove Plt., Greenville,
24	14,906	Abbot, Brownville, <u>Dover-Foxcroft</u> , Guilford , Milo, Monson, Parkman, Sangerville, Sebec, Wellington
25	12,766	Burlington, Chester, Enfield, Howland, Kingman Twp., Lee <u>Lincoln</u> , Mattawamkeag, Passadumkeag, Prentiss Plt., Springfield, Winn,
26	11,044	East Millinocket, Medway, Millinocket
27	5,187	Crystal, Island Falls, Oakfield, Patten, Sherman, Smyrna, Stacyville
28	9,198	Haynesville, <u>Houlton</u> , Linneus, Monticello, Orient, Reed Pit., Weston
29	9,365	Allagash Pit., Eagle Lake, <u>Fort Kent</u> , Frenchville, St. Agatha, St. Francis, St. Johns Pit., Wallagrass Pit., T11 R14, T14 R15
30	35,451	Ashland, Blaine, Bridgewater, Caribou, Easton, Ft. Fairfield, Mapleton, Masardis, Nashville Plt., Oxbow Plt., Perham, Portage Lake, <u>Presque Isle</u> , Wade, Washburn, Westfield, Woodland
31	7,848	<u>Madawaska</u> , Van Buren

NOTE: Since the 1990 population data is unavailable for some unorganized townships, the area population in some instances may be slightly understated. Population data is from Census '90, Data for Governmental Units (an extract from the PL94-171 redistricting file for Maine) provided by the Maine Department of Labor, Bureau of Employment Security, Division of Economic Analysis and Research. (1991 census data is unavailable at this time.)

APPENDIX D

Census of Maine Manufactures by Major Industry Group, 1986–1990

APPENDIX F

Raw and Adjusted Data Comparisons, 1990-1991

The data on the following table has been adjusted using two major price indexes published by the U.S. Department of Labor, Bureau of Labor Statistics. The Value of Product data is adjusted by the Producer Price Index, (formerly the Wholesale Price Index) using a base year of 1982 = 100 unless noted. Wage data is adjusted by the Consumer Price Index for Urban Wage Earners and Clerical Workers and the base year is 1982-84 = 100. The adjustments made are based on the annual average for the respective index.

The Consumer Price Index is a monthly statistical measure of the average change in prices in a fixed market basket of goods and services.

The CPI is based on prices of food, clothing, shelter, fuel, drugs, transportation fares, doctors' and dentists' fees, and other goods and services that people buy for day-to-day living. The quantity and quality of these items is kept essentially unchanged between major revisions so that only price changes will be measured. Prices are collected from over 18,000 tenants, 24,000 retail establishments, and 18,000 housing units for property taxes in 85 urban areas across the country. All taxes directly associated with the purchase and use of items are included in the index.

Though the CPI is often called the "Cost-of-Living Index", it measures only price change, which is just one of several important factors affecting living costs.

CPI-W

1990 Annual Average = 129.0 1991 Annual Average = 134.3

Producer Price Indexes measure average changes in prices received in primary markets of the United States by producers of commodities in all stages of processing. The sample used for calculating these indexes contains about 2,800 commodities produced in the manufacturing, agriculture, forestry, fishing, mining, gas and electricity, and public utilities sectors. The universe includes all commodities produced or imported for sale in commercial transactions in primary markets in the United States.

To the extent possible, prices used in calculating Producer Price Indexes apply to the first significant commercial transaction in the United States, from the production or central marketing point. Price data are generally collected monthly, primarily by mail questionnaire. Most prices are obtained directly from producing companies on a voluntary and confidential basis. Prices generally are reported for the Tuesday of the week containing the 13th day of the month.
