Appendix G. Comment Form	63

Introduction

The purpose of the Census of Maine Manufactures is to provide economic data to track changes in the value of goods produced, foreign imports and exports, and capital expenditures by manufacturers in the state. The data is used by city and state planners, economic developers, economists, students, business owners and others who are interested in economic data. Special studies from Census data are available upon written request Bureau Director.

Authorization

Maine Revised Statutes 1964, Title 26, §§ 42, 43, 46: "The Bureau shall collect, assort and arrange statistical details relating to industrial pursuits in the State. He (the Director) may cause to be printed and distributed bulletins that shall be of public interest and benefit to the State."

Coverage

The annual survey covers all Maine manufacturing establishments. For the 1996 Census, reports were received from 2,396 establishments. Of these, 318 either did not operate or went out of business during 1996. Final tabulations, including any late reports which are not included in this Census, will appear in the next Census.

The data contained in the Census of Maine Manufactures 1996 represent a comprehensive and valid statistical analysis of the Maine manufacturing economy.

The Bureau of Labor Standards gratefully appreciates the contributions made by others toward this publication.

Thanks are due:

To Maine's manufacturing businesses for their cooperation in the collection of Census data, which makes this publication possible;

To the staff of the Department of Human Services, Office of Data, Research and Vital Statistics for their cooperation in providing the population estimates.

To the staff of the Department of Labor, Division of Labor Market Information Services for their cooperation in providing the employment and wage data herein.

Alan C. Hinsey

Director

Bureau of Labor Standards

The contents of this publication are considered to be in the public domain and may be reproduced without permission. We do request, however, that appropriate citation be made.

Maine Production Value

The product value is the primary measure of the state's manufacturing activity. It is the selling price of all goods manufactured or processed (including sales value of inventories) during a calendar year.

Prior to 1996, Maine experienced four straight years of growth. In 1996 the product value for Maine's manufacturing establishments decreased 1.8% (\$242.1 million) to \$13.0 billion. Adjusting for inflation (using the Producer Price Index [PPI] as a deflator), the constant dollar value of Maine manufactured product declined 3.0%. (See Appendix F for a discussion of actual and adjusted data.) See Figure 1.

Figure 1. Value of Manufactured Product
in Actual and Adjusted Dollars
Maine, 1986-1996

Durable Goods

Durable goods are manufactured products designed to withstand wear and decay over time, such as appliances, transportation equipment, and furniture. The gross value of durable goods in 1996 rose 3.4% (\$167.9 million) over 1995. Notable increases occurred in Transportation Equipment, which increased 3.5% (\$51.4 million) and Lumber & Wood Products, which increased 2.9% (\$34.7 million). The only decrease in durable goods occurred in Primary Metals, which decreased 3.6% (\$1.6 million).

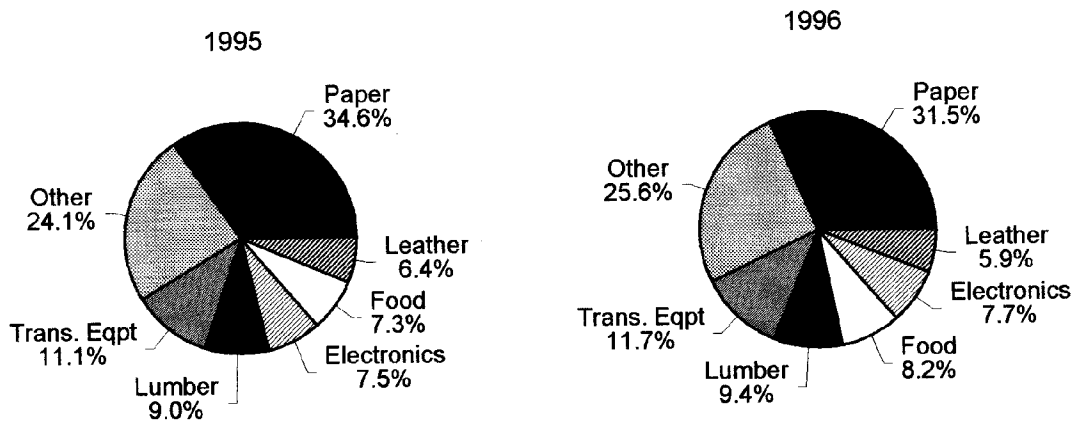

Nondurable Goods

Nondurable goods are manufactured products that generally have a shorter life expectancy than durable goods (e.g., food, textiles, and paper products).

The gross value for nondurable goods, as a whole, decreased 4.9% in 1996, down \$410.0 million from 1995. The largest percentage gains in product value were in the Miscellaneous group with a 24.1% increase (\$12.0 million) and the Chemicals industry with a 17.9% increase (\$54.8 million) in 1996. By far the largest dollar gain in 1996 was in the Food industry which increased by \$95.5 million (9.9%). On the other hand, Petroleum & Coal Products was down 13.4% (\$6.3 million) and the Paper industry was down 10.3% (\$470.5 million). The Leather, Rubber & Plastics, and the Textiles industries also had decreases of 8.3% (\$69.6 million), 6.3% (\$30.0 million), and 4.2% (\$21.7 million) respectively. See Figure 2.

Figure 2.

Value of Manufactured Product Percentage by Major Industry Group Maine, 1995 & 1996

The Paper industry has long been the economic leader in Maine's manufacturing community. With a total product value of \$4.1 billion in 1996, it was down \$470.5 million from 1995. The Transportation Equipment group followed with a total product value of \$1.5 billion, an increase of \$51.4 million over 1995. The Lumber & Wood Products group was again third with a \$1.2 billion value of product, an increase of \$34.7 million over 1995. Leather is the only major industry that is heading for production values below 1986 levels. See Figure 3.

Manufacturing Employment

Employment in Maine's manufacturing sector fell 1.9% in 1996, to 86,434 workers. Employment in the durable goods industries overall only increased by 79 workers from 39,973 in 1995 to 40,052 in 1996. Lumber & Wood Products lost 334 workers (3.2%), while the Furniture and Transportation groups gained 156 (13.4%) and 143 (1.3%) workers respectively. The nondurable goods industries experienced a decrease of 1,723 (3.6%) from 1995 to 46,382 workers in 1996. The largest decrease was in the Leather industry which declined by 1,486 workers (16.1%). The Rubber & Plastic group was down by 249 workers (8.0%). Chemicals had the only substantial increase with 167 additional employees, a gain of 11.1%. See Figures 4, 5 and 6.

Figure 4.

The Paper industry continues to employ the largest percentage of manufacturing employees in the state with 16.3% of the work force. Transportation Equipment has moved up to be the second largest employer (13.0% of the work force), while Lumber & Wood Products and Leather have slipped into third and fourth places respectively.

Comparing the employment figures in 1986 to those in 1996, there were 17,128 fewer employees overall in manufacturing in 1996; that was a decline of 16.5%. The largest decreases were in the nondurable goods sector which was down 13,242 employees (22.2%). The most notable of these were: Leather - down 4,774 (38.2%), Paper - down 3,384 (19.4%); Apparel - down 2,306 (19.4%); Textiles - down 1,882 (28.4%); and Food - down 1,641 (20.4%). In the durable goods sector, the biggest employment decreases were in the Lumber & Wood Products industry - down 3,416 (25.3%) and the Electronic Equipment industry - down 2,167 (22.5%). Increases from 1986 were most notable in Transportation Equipment - up 1,281 (12.9%) employees; Printing & Publishing - up 587 (11.7%); and Precision Instruments, included in the Other category, increased 445 (77.9%).

Union Coverage

In 1996 there were 20,557 union employees in Maine's manufacturing community; down 540 (2.6%) from 1995. The largest decline was in the Paper industry which lost 1,079 union workers (11.5%) even though its total employment was not reduced. The largest increases were in the Printing & Publishing trade which added 472 (56.5%). The Apparel industry added 152 (23.6%) and the Transportation Equipment industry had 145 (2.4%) additional union workers. Since 1986, with few exceptions, the percentage of union enrollees has slowly declined. Unionized employment made up 29.5% of the manufacturing work force in 1986. It was down to 24.0% in 1995 and 23.8% in 1996. The largest percentage decreases since 1986 have been in Fabricated Metals, down 58.6% (452 employees); Food down 42.9% (900 employees); Petroleum down 35.8% (what's interesting about this industry is that the number of union employees was only down by 10 but its total employment increased by 40.8%); Apparel down 34.4% (1,853 employees); and Paper down 23.4% (5,192 employees). See Figures 7 and 8.

Gross Wages

Gross wages in Maine manufacturing increased slightly in 1996, up 2.3% (\$57.8 million) from 1995 to \$2.6 billion. Almost 84% of that increase came from three industries. The Paper industry made up 38.9%, paying out \$22.6 million more in wages than in 1995; next was Transportation Equipment, making up 22.7% of the increase (\$13.1 million); then Electronic Equipment, 22.7% (\$12.7 million). At the same time the Consumer Price Index (CPI) rose 2.9% to 154.1, so the gap between actual and adjusted wages continued to grow. See Figure 9.

Figure 9.

Gross Manufacturing Wages
in Actual and Adjusted Dollars
Maine, 1986-1996

The Paper industry accounted for 24.8% of all manufacturing wages in the state, paying out \$649.8 million in gross wages. Transportation Equipment paid \$405.1 million in actual gross wages and Electronic Equipment (except computers) paid \$238.2 million. Six industries experienced decreases in gross wages during 1996. Leather paid \$18.7 million less (10.9%) in 1996. Fabricated Metals paid \$4.1 million (4.4%) less and Lumber & Wood Products paid \$0.7 million (0.3%) less than in 1995. The Rubber & Plastics, Primary Metals, and the Petroleum & Coal Products industries also paid less in gross wages in 1996. They are included in the 'Other' category in Figure 10. See Figure 10.

Figure 10.

- * Electronic Equipment (except computers)
- * Fabricated Metals

Average Wages

In 1996, the average yearly wage for Maine manufacturing workers increased \$1,222 (4.2%) to \$30,278. In the same period the annual average Consumer Price Index, which measures the changes in the price of a fixed market basket of goods and services, rose 2.9% (4.3 points). (See Appendix F.) As a result, Maine manufacturing workers experienced a 1.3% increase in buying power. See Figure 11.

Figure 11.

Average Manufacturing Wages
in Actual and Adjusted Dollars
Maine, 1986 - 1996

Paper industry workers received the highest reported average wage. Paper industry employees were paid an average of \$46,107, which was 152.3% of the Maine manufacturing average for 1996. Miscellaneous industry workers (SIC 3999) received the lowest average wage among manufacturers in 1996, earning an average of \$18,721 for the year, which was 61.8% of the overall average for manufacturing employees.

The largest percentage increase in 1996 manufacturing wages was in the Stone, Clay & Glass industry which increased by 8.4% or \$1,986; Leather increased 6.2% or \$1,144; Apparel increased 5.6% or \$1,010; and Electronic Equipment, except computers, increased 5.2% or \$1,591. There were three industries that experienced a drop in average wages: Petroleum & Coal Products decreased 6.5% (\$2,131), Fabricated Metals decreased 4.2% (\$1,230), and Primary Metals dropped 0.6% (\$202). See Figure 12.

* Primary Metals
* Fabricated Metals
* Stone, Clay & Glass

Capital Expenditures

Capital expenditures are those funds used for new structures or improvements to existing structures and money spent for new or used machinery and equipment. Capital expenditures in 1996 were \$710.7 million, down 2.7% from 1995.

Capital expenditures for durable goods were down 27.6% (\$78.7 million) with the Electronic Equipment group spending 56.3% (\$75.8 million) less than in 1995. Machinery, including computers, decreased its spending by 38% (\$10.8 million). Minimal increases were seen in Lumber & Wood Products and Transportation Equipment, which increased their capital expenditures by 8.3% (\$6.3 million) and 15.5% (\$3.6 million) respectively.

Capital expenditures for the nondurable goods division increased 13.2% (\$58.8 million) with most of that being spent by the Paper industry. The Paper industry increased its capital spending by 36.5% (\$107.6 million). The only other increases were in the Miscellaneous and the Petroleum & Coal Products groups, with additional expenditures of 31.2% (\$.3 million) and 28.0% (\$.2 million), respectively. The largest reductions in capital expenditures were in Printing & Publishing, which spent 54.2% (\$15.1 million) less than 1995; Textiles which spent 42.3% (\$12.8 million) less; and Food which decreased its spending by 26.0% (\$9 million). See Figures 13 and 14.

Foreign Imports

In 1996, imports used in Maine's manufacturing process decreased 10.8% (\$80.3 million) from 1995 levels. The largest decrease in imported goods occurred in the Paper industry, where spending was down \$94.1 million (22.1%). The largest increases in import spending were in the Leather industry 31.2% (\$19.7 million) and in Chemicals, 26.5% (\$11.9 million). See Figure 15.

Figure 15.

Imports Used in Manufacturing by Major Industry Group Maine, 1992-1996

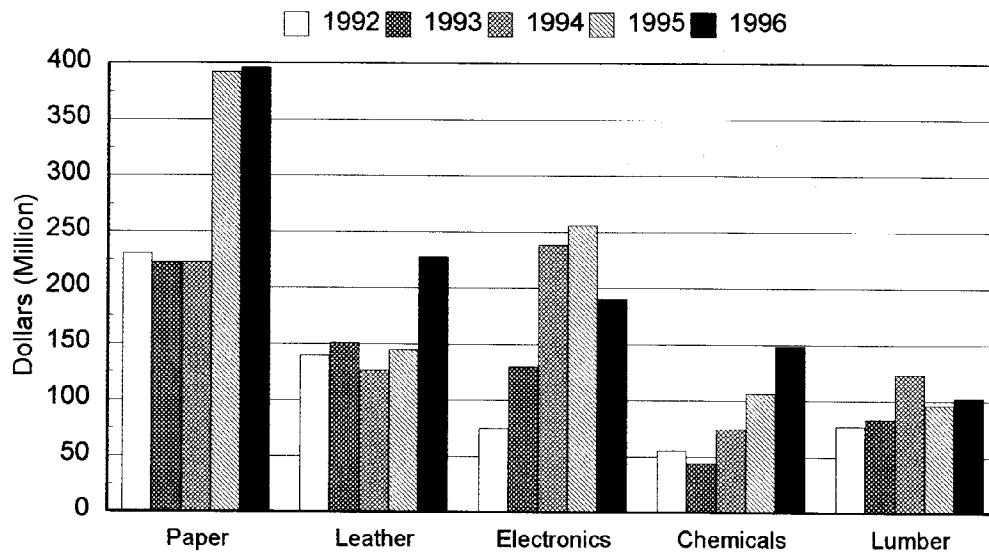

Foreign Exports

In 1996, manufactured goods exported to countries outside the U.S. were up 1.0% (\$13.3 million) over 1995. The Leather industry had the greatest dollar increase overall with \$83.0 million (57.6%) over 1995. The Chemicals industry increased its exports \$42.1 million (39.8%), Lumber increased \$6.0 million (6.3%), and Paper increased its exports \$3.9 million (1.0%) over 1995. The largest decrease in exports was in the Electronic Equipment industry, which decreased \$65.5 million (25.6%) from 1995.

See Figure 16.

Figure 16.

Manufactured Exports by Major Industry Group Maine, 1992-1996

Value of Manufacturing Product by County Group

The state of Maine is divided into five county groups: I-95 Corridor, Eastern, Midcoast, Northern, and Western. (See Table 4 for listing.)

The I-95 Corridor continued to be the top producer with over \$8 billion dollars of manufactured product in 1996. York, Cumberland, Penobscot, and Androscoggin counties each produced over one billion dollars in manufactured product even though the total amount for the region was down \$31 million from 1995. The Western group of counties had \$2.7 billion worth of manufactured product, which was \$5.5 million less than 1995. The largest dollar gains were in Franklin, York and Cumberland counties with increases of \$146.6 million (21.7%), \$145.6 million (8%), and \$108.4 million (6%), respectively. The largest decreases were in Oxford county which had a drop of \$138.7 million (18.2%), Washington county which had a drop of \$117.1 million (23.2%), and Kennebec county which decreased \$108.4 million (18.2%). See Figures 17-19.

Figure 17.

Value of Manufactured Product
by County Group
Maine, 1986, 1995 & 1996

The V.P. (value of product) Index is a measure of the rate of change in the manufacturing production beginning from a common base of 100. The Eastern area (which had the sharpest rate of upward change in 1995) had the sharpest rate of decline in 1996, down 24 points. The Northern area was down 2 points. The I-95 corridor, Western, and Midcoast areas all had negligible changes as illustrated in Figure 18.

APPENDIX A

Technical Notes and Definitions

ACTUAL DOLLARS (Real) are dollars that have not been adjusted for inflation and reflect the actual value.

ADJUSTED DOLLARS (Constant) are a measure of the cost of goods or services with the effects of inflation removed.

AVERAGE GROSS WAGES is the figure obtained by dividing GROSS WAGES by the TOTAL EMPLOYMENT.

DURABLE GOODS are manufactured products designed to withstand wear and decay; e.g., furniture, metals, machinery, transportation equipment.

EMPLOYMENT is the number of employees reported in each month, as of the payroll period including the 12th of the month, averaged at the establishment level over the full twelve months.

ESTABLISHMENT is defined as a single physical location where industrial operations are performed; it is, therefore, a place of business rather than a legal entity or company which may have units in many locations. Where appropriate (e.g., logging operations) combined have been assigned to no specific civil division, merely to the county in which said principal location is found. A small number of multi-county operations report on a statewide basis.

EXPENDITURES FOR PLANT MODERNIZATION AND EQUIPMENT (or Capital Expenditures) is the actual amount spent during the survey year and planned for the two succeeding years for three categories: New Structures and/or Additions or Alterations to Existing Structures, Purchase of Existing Structures, and Purchase of New or Used Machinery or Equipment. Land costs are excluded.

FOREIGN TRADE - EXPORTS is the sales value of goods manufactured at an establishment that are shipped to foreign countries either directly or via out-of-state agents. **IMPORTS** is the cost of materials imported from foreign countries for use in the manufacturing process at an establishment.

GROSS WAGES shows total earnings during the calendar year of all employees before deductions, as reported to the Maine Bureau of Employment Security for Unemployment Insurance taxes. Before 1976, executives were excluded and wages were reported directly to the Bureau of Labor Standards. Because various fringe benefits such as payroll taxes, insurance, etc. paid by employers, are excluded, this data does not represent total labor costs on the part of the employer.

NONDURABLE GOODS are manufactured products that have a shorter life expectancy than durable goods; e.g., food, textiles, paper products, leather.

STANDARD INDUSTRIAL CLASSIFICATION (SIC). The Standard Industrial Classification system as compiled by the Executive Office of the President, Office of Management and Budget, is used to determine the industry title applicable to each establishment. Descriptions of major industry groups may be found in Appendix B. Each establishment has been classified according to its principal activity.

VALUE OF PRODUCT is the selling price of all goods manufactured or processed (including inventories) during the calendar year. If industrial operations were on a contractual basis, the total of amounts received for contract work or services performed has been included.

WORKERS UNDER UNION CONTRACT is the number of workers organized under a union contract and/or a collective bargaining agreement. It represents the number from one representative payroll period; the comparative figure for NUMBER OF WORKERS is an average for the year.

Appendix A (Continued)

Shown below is a copy of the 1996 Census of Maine Manufactures form mailed to Maine's manufacturing establishments in February, 1997.

Maine Department of Labor
Bureau of Labor Standards
45 State House Station
Augusta, Maine 04333
Telephone No. 207-624-6446

IMPORTANT: The filing of this report is required of all manufacturers and processors in the State of Maine under Title 26, Secs. 42, 43, 46, RS 1984. Penalties for failure or neglect to file are \$25 to \$100 fine, imprisonment up to 30 days or both. When, for any reason, it is impossible to furnish exact answers to any inquiry, make the best possible estimate and add the letter "E" to indicate so. Please read the instructions on the back of this report.

CENSUS OF MAINE MANUFACTURES 1996

I. ESTABLISHMENTS COVERED IN THIS REPORT			
If this report covers two or more establishments in different locations, please give approximate percent of operation in each.			
(City or Town name if different from mailing address)	(County)	(Number of Units)	(Approximate % of Operation)

II. DESCRIPTION, QUANTITY, AND VALUE OF PRODUCT					
A. Description of Principal Products Produced (List Items Separately)	B. Principal Materials Used for Each Product Listed	C. Was Material used Produced in this Establishment?		D. Quantity Produced Indicate Unit Measure (e.g. tons, lbs., cords, cartons, etc.)	E. Gross Value of Product (Omit Cents)
		Yes	No		
1.					\$
2.					
3.					
4.					
5.					
6. All Other Products					
7. Receipts for work done by you on material owned by others, etc. (Contract or Job work)					
8. Receipts for custom work, repairing or installation of your own product (Sales of scrap, waste recovery)					
9. Re-sale of purchased products not manufactured or processed by you					
10. TOTAL OF LINES 1-9					

III. CAPITAL EXPENDITURES (excluding land costs)	Amount Actually Spent in 1996	Amount of Planned Expenditures for	
		1997	1998
A. New Structures, Additions, or Alterations to Existing Structures	\$	\$	\$
B. Purchase of Existing Structures			
C. Purchase of New or Used Machinery and Equipment			

IV. EXPORTS - IMPORTS (Foreign Trade)	
A. Estimated Value of Exports \$	B. Estimated Value of Imports \$

V. UNION STATUS	
Is this establishment organized under a union contract and/or collective bargaining agreement? <input type="checkbox"/> No <input type="checkbox"/> Yes	
If Yes, please fill in the following:	
Name of Union	
Number of workers covered by union contract	

VI. TEMPORARY CONTRACT LABOR												
The object of this question is to determine the number of temporary contract workers contracted through employment agencies used in manufacturing in a manner that is as close as possible to that used to report regular employees. The monthly number of workers should be for the week including the 12th of the month.												
Total cost of temporary contract labor purchased during the year: \$												
	JAN	FEB	MAR	APRIL	MAY	JUNE	JULY	AUG	SEPT	OCT	NOV	DEC
Male												
Female												
Total												

Appendix A (Continued)

VII. DEFENSE RELATED ACTIVITIES

1. Does any of your production include work done for the defense industry? Yes ☐ No ☐
2. What percentage of your gross value of product is defense related? _____ %
 - a. Produced under contract with Defense Dept. Agencies? _____ %
 - b. Produced under subcontract with other defense contractors? _____ %
3. How does your company expect to respond to declining defense orders?
New products _____ Downsize _____ Not applicable _____
New markets _____ Other _____

VIII. PURCHASING AND SALES ACTIVITIES

1. What percentage of your total annual purchases are from companies located in Maine? _____ %
2. What percentage of your total annual sales are made to companies located in Maine? _____ %

INSTRUCTIONS and EXPLANATION NOTES

GENERAL: If this establishment has been sold to others, or has gone out of business, return this form with the name and address of the successor, if any, and the date of such sale or discontinuance. This schedule must be filed to reflect manufacturing operations during the year even though addressee discontinued business during or after that year. **PARTIAL YEAR REPORTS ARE REQUIRED.** New firms organized or beginning operations during the year must also file.

The purpose of this report is to determine the condition of industry in the state for the calendar year under consideration and it is clear that the inclusion in our tabulation of reports for establishments filed under a fiscal year basis which do not reflect calendar year data can only operate to defeat this purpose. It is necessary therefore that this report be prepared to reflect calendar year operations, subject to this consideration: If, in the considered judgment of the responsible authority in the reporting manufacturer's organization, the financial data called for in the schedule do not materially differ, whether on a calendar or fiscal basis, fiscal year figures will be accepted as representative of the calendar year operations. **HOWEVER, THE NUMBER OF CONTRACT WORKERS AND COSTS SHOULD BE REPORTED ON A CALENDAR YEAR BASIS IN EVERY CASE.**

ITEM I: List cities or towns in which the establishments are located. Also indicate the number of establishments or separate production units located at that city or town which are covered or included within this report. If any change has taken place in the name, address, or location please make the necessary changes on the address label.

ITEM II: Describe and list separately your products as fully as possible in column (A). In column (B) indicate the basic materials used to make each item, and in column (C) check whether the basic materials were produced in the same establishment. Indicate in column (D) the quantity produced and also the unit of measure (example: cubic feet, cords, thousand board feet, quarts, gallons, pounds). In column (E) state manufacturer's selling value at this establishment of all goods produced during the year whether sold or not. **DO NOT** consider your annual sales as representing your product value unless they are identical. Sub-item 7 is found principally in the textile finishing, apparel, logging, and lumbering industries where certain operations are performed on materials owned by others - total receipts for such work should be reported.

ITEM III: The purpose of this inquiry is to determine the amounts invested or to be invested in the physical productive capacity of the State's manufacturing industries. It is highly important that we have an indication of the planned investment as well as that which has already been effected. The figures are confidential and released only in summary form.

ITEM IV: A. Enter the estimated sales value of goods manufactured at this establishment that were shipped to foreign countries, either directly or via out-of-state agents.

B. Enter the estimated cost of materials imported from foreign countries for use in the manufacturing process at this establishment.

PLEASE READ INSTRUCTIONS - If you have further questions, please contact this office.

Appendix B

Major Industry Descriptions, 1987 Standard Industrial Classification Manual

THE DIVISION AS A WHOLE

The manufacturing division includes establishments engaged in the mechanical or chemical transformation of materials or substances into new products. These establishments are usually described as plants, factories, or mills and characteristically use power driven machines and materials handling equipment. Establishments engaged in assembling component parts of manufactured products are also considered manufacturing if the new product is neither a structure nor other fixed improvement. Also included is the blending of materials, such as lubricating oils, plastics, resins, or liquors.

The materials processed by manufacturing establishments include products of agriculture, forestry, fishing, mining, and quarrying as well as products of other manufacturing establishments. The new product of a manufacturing establishment may be "finished" in the sense that it may be "semi-finished" to become a raw material for an establishment engaged in further manufacturing. For example, the product of the copper smelter is the raw material used in electrolytic refineries; refined copper is the raw material used by certain electrical equipment manufacturers.

The materials used by manufacturing establishments may be purchased directly from producers, obtained through customary trade channels, or secured without recourse to the market by transferring the product from one establishment to another which is under the same ownership. Manufacturing production is usually carried on for the wholesale market, for interplant transfer, or to order for industrial users, rather than for direct sale to the domestic consumer. (The two digits listed below represent the major manufacturing divisions.)

20 FOOD AND KINDRED PRODUCTS: This major group includes establishments manufacturing or processing food and beverages for human consumption and certain related products, such as manufactured ice, chewing gum, vegetable and animal fats and oils, and prepared feeds for animals and fowls.

22 TEXTILE MILL PRODUCTS: This major group includes establishments engaged in performing any of the following operations: (1) preparation of fiber and subsequent manufacturing of yarn, thread, braids, twine, and cordage; (2) manufacturing broad woven fabric, narrow woven fabric, knit fabric, and carpets and rugs from yarn; (3) dyeing and finishing fiber, yarn, fabric, and knit apparel; (4) coating, waterproofing, or otherwise treated fabric; (5) the integrated manufacture of knit apparel and other finished articles from yarn; and (6) the manufacture of felt goods, lace goods, nonwoven fabrics, and miscellaneous textiles.

This classification makes no distinction between the two types of organizations which operate in the textile industry: (1) the "integrated" mill which purchases materials, produces textiles, and related articles within the establishment, and sells the finished products; and (2) the "contract" or "commission" mill which processes materials owned by others. Converters or other manufacturing industries; establishments which assign materials to contract mills for processing (other than knitting) are classified in nonmanufacturing industries; establishments which assign yarns to outside contractors or commission knitters for the production of knit products are also classified in this Group.

23 APPAREL AND OTHER FINISHED PRODUCTS MADE FROM FABRICS AND SIMILAR MATERIALS: This major group, known as the cutting-up and needle trades, includes establishments producing clothing and fabricating products by cutting and sewing purchased woven or knit textile fabrics and related materials, such as leather, rubberized fabrics, plastics, and furs.

Included in the apparel industries are three types of establishments: (1) the "regular" or insider factories, (2) contract factories, and (3) apparel jobbers. The regular factories perform all of the usual manufacturing functions within their own plant; the contract factories manufacturing apparel from materials owned by others; and apparel jobbers perform the entrepreneurial functions of a manufacturing company, such as buying raw materials, designing and preparing samples, arranging for the manufacture of the garments from their materials and selling of the finished apparel.

Custom tailors and dressmakers not operating on a factory basis are classified in Retail Trade; establishments which purchase and resell finished garments but do not perform the functions of the apparel jobbers are classified in Wholesale Trade.

Appendix B (Continued)

24 LUMBER AND WOOD PRODUCTS, EXCEPT FURNITURE: This major group includes logging camps engaged in cutting timber and pulpwood; merchant sawmills, lath mills, shingle mills, cooperage stock mills, planing mills, and plywood mills and veneer mills engaged in producing lumber and wood basic materials; and establishments engaged in manufacturing finished articles made entirely or mainly of wood or wood substitutes. Certain types of establishments producing wood products are classified elsewhere. For example, furniture and office and store fixtures are classified in Major Group 25; musical instruments, toys, and playground equipment, and caskets in Major Group 39. Woodworking in connection with construction, in the nature of reconditioning and repair, or performed to individual order, is classified in nonmanufacturing industries.

25 FURNITURE AND FIXTURES: This major group includes establishments engaged in manufacturing household, office, public building, and restaurant furniture; and office and store fixtures. Establishments primarily engaged in the production of millwork and wood kitchen cabinets are classified in Major Group 24; cut stone and concrete furniture in Major Group 32; laboratory and hospital furniture in Major Group 38; beauty and barber shop furniture in Major Group 39; and woodworking to individual order or in the nature of reconditioning and repair in nonmanufacturing industries.

26 PAPER AND ALLIED PRODUCTS: This major group includes the manufacture of pulps from wood and other cellulose fibers and from rags; the manufacture of paper and paperboard; and the manufacture of paper and paperboard into converted products, such as paper coated off the paper machine, paper bags, paper boxes, and envelopes. Certain types of converted paper products are classified elsewhere, such as abrasive paper in Major Group 32; carbon paper in Major Group 39; and photosensitized and blueprint paper in Major Group 38.

27 PRINTING, PUBLISHING, AND ALLIED PRODUCTS: This major group includes establishments engaged in printing by one or more of the common processes, such as letter press, lithography, gravure, or screen; and those establishments which perform services for the printing trade, such as bookbinding, typesetting, engraving, photoengraving, and electrotyping. This major group also includes establishments engaged in publishing newspapers, books, and periodicals, regardless of whether or not they do their own printing. News syndicates are classified in Service Industries, and textile printing and finishing in Major Group 22.

28 CHEMICALS AND ALLIED PRODUCTS: This major group includes establishments producing basic chemicals and establishments manufacturing products by predominantly chemical processes. Establishments classified in this major group manufacture three general classes of products: (1) basic chemicals, such as acids, alkalies, salts, and organic chemicals; (2) chemical products to be used in further manufacture, such as synthetic fibers, plastics materials, dry colors, and pigments; (3) finished chemical products to be used for ultimate consumption, such as drugs, cosmetics, and soaps; or to be used as materials or supplies in other industries, such as paints, fertilizers, and explosives. The mining of natural rock salt is classified in mining industries. Establishments primarily engaged in manufacturing nonferrous metals and high percentage ferrous alloys are classified in Major Group 33; silicon carbide in Major Group 32; baking powder, other leavening compounds, and starches in Major Group 20; and artists' colors in Major Group 39. Establishments primarily engaged in packaging, repackaging, and bottling of purchased chemical products, but not engaged in manufacturing chemicals and allied products, are classified in trade industries.

29 PETROLEUM REFINING AND RELATED INDUSTRIES: This major group includes establishments primarily engaged in petroleum refining, manufacturing paving and roofing materials, and compounding lubricating oils and greases from purchased materials. Establishments manufacturing and distributing gas to consumers are classified in public utilities industries, and those primarily engaged in producing coke and byproducts in Major Group 33.

30 RUBBER AND MISCELLANEOUS PLASTICS PRODUCTS: This major group includes establishments manufacturing from natural, synthetic, or reclaimed rubber, gutta-percha, balata, or gutta siak, rubber products such as tires, rubber footwear, mechanical rubber goods, heels and soles, flooring, and rubber sundries. This group also includes establishments primarily manufacturing tires, but establishments primarily recapping and retreading automobile tires are classified in Services. This group also includes establishments engaged in molding primary plastics for the trade, and manufacturing miscellaneous finished plastics products. The manufacture of elastic webbing is classified in Major Group 22; products made of elastic webbing and garments made from the rubberized fabrics in Major Group 23; and synthetic rubber in Major Group 28.

31 LEATHER AND LEATHER PRODUCTS: This major group includes establishments engaged in tanning, currying, and finishing hides and skins, and establishments manufacturing finished leather and artificial leather products and some similar products made of other materials. Leather converters are also included.

Appendix B (Continued)

32 STONE, CLAY, GLASS AND CONCRETE PRODUCTS: This major group includes establishments engaged in manufacturing flat glass and other glass products, cement, structural clay products, pottery, concrete and gypsum products, cut stone, abrasive and asbestos products, etc., from materials taken principally from the earth in the form of stone, clay, and sand. When separate reports are available for mines and quarries operated by manufacturing establishments classified in this major group, the mining quarrying activities other than those of Minerals, ground or treated, are classified herein with the manufacturing operations.

If separate reports are not available for crushing, grinding, and other preparation activities of Minerals, ground or treated, these establishments are classified in Mining.

33 PRIMARY METAL INDUSTRIES: This major group includes establishments engaged in the smelting and refining of ferrous and nonferrous metals from ore, pig, or scrap; in the rolling, drawing, and alloying of ferrous and nonferrous metals; in the manufacture of castings and other basic products of ferrous and nonferrous metals; and in the manufacture of nails, spikes, and insulated wire and cable. This major group also includes the production of coke. Establishments primarily engaged in manufacturing metal forgings or stampings are classified in Major Group 34.

34 FABRICATED METAL PRODUCTS, EXCEPT MACHINERY AND TRANSPORTATION EQUIPMENT: This major group includes establishments engaged in fabricating ferrous and nonferrous metal products such as metal cans, tinware, hand tools, cutlery, general hardware, and nonelectric heating apparatus, fabricated structural metal products, metal forgings, metal stampings, ordnance (except vehicles and guided missiles), and a variety of metal and wire products not elsewhere classified. Certain important segments of the metal fabricating industries are classified in other major groups, such as machinery in Major Groups 35 and 36; transportation equipment, including tanks, in Major Group 37; professional scientific and controlling instruments, watches and clocks in Major Group 38; and jewelry and silverware in Major Group 39. Establishments primarily engaged in producing ferrous and nonferrous metals and their alloys are classified in Major Group 33.

35 INDUSTRIAL AND COMMERCIAL MACHINERY AND COMPUTER EQUIPMENT: This major group includes establishments engaged in manufacturing industrial and commercial machinery and equipment and computers. Included are the manufacture of engines and turbines; farm and garden machinery; construction, mining, and oil field machinery; elevators; metalworking machinery; special industry machinery; computer and peripheral equipment and office machinery; and refrigeration and service industry machinery. Machines powered by built-in or detachable motors ordinarily are included in this major group, with the exception of electrical household appliances.

36 ELECTRONIC AND OTHER ELECTRICAL EQUIPMENT AND COMPONENTS, EXCEPT COMPUTER EQUIPMENT: This major group includes establishments engaged in manufacturing machinery, apparatus, and supplies for the generation, storage, transmission, transformation, and utilization of electrical energy. The manufacture of household appliances is included in this group, but industrial machinery and equipment powered by built-in or detachable electric motors is classified in Major Group 35. Establishments primarily engaged in manufacturing instruments for indicating, measuring, and recording electrical quantities are classified in Major Group 38.

37 TRANSPORTATION EQUIPMENT: This major group includes establishments engaged in manufacturing equipment for transportation of passengers and cargo by land, air and water. Important products produced by establishments classified in this major group include motor vehicles, aircraft, guided missiles and space vehicles, ships, boats, railroad equipment, and miscellaneous transportation equipment such as motorcycles, bicycles, and snowmobiles. Establishments primarily engaged in manufacturing mobile homes are classified in Major Group 24.

38 MEASURING, ANALYZING, AND CONTROLLING INSTRUMENTS, PHOTOGRAPHIC, MEDICAL, AND OPTICAL GOODS; WATCHES AND CLOCKS: This major group includes establishments engaged in manufacturing instruments (including professional and scientific) for measuring, testing, analyzing, and controlling, and their associated sensors and accessories; optical instruments and lenses; surveying and drafting instruments; surgical, medical, and dental instruments, equipment, and supplies; ophthalmic goods; photographic equipment and supplies; and watches and clocks.

39 MISCELLANEOUS MANUFACTURING INDUSTRIES: This major group includes establishments primarily engaged in manufacturing products not classified in any other manufacturing major group. Industries in this group fall into the following categories: jewelry, silverware and plated ware; musical instruments; toys, sporting and athletic goods; pens, pencils, and other office and artists' materials; buttons, costume novelties, miscellaneous notions; brooms and brushes; caskets; and other miscellaneous manufacturing industries.

NOTE: More detailed definitions may be obtained directly from the Standard Industrial Classification Manual, 1987 Revision.

Appendix C

Geographic Definitions of Labor Market Areas

This publication has included a tabulation entitled "Economic Areas" (now called Labor Market Areas), since 1954. This series consists of 35 areas which were delineated on the basis of commuting patterns and population density. Only those towns with manufacturing businesses are listed below. A complete listing of the Maine Labor Market Areas can be found in the 1996 Maine Employment Statistical Handbook. It can be ordered by mailing a request to Maine Department of Labor, Labor Market Information Services, Attn.: Publications Unit Manager, 20 Union St., Augusta, ME 04330-6826. There is a charge for the publication. Effective January 1994, the metropolitan and nonmetropolitan areas were redefined. Care should be exercised in making comparisons of these 35 areas with the earlier areas as there have been changes made in many of the regions.

Civil divisions are geographical units of government. Major civil divisions are counties; minor civil divisions are cities, towns, plantations, and townships. The civil division with the largest populations is in bold letters, and the civil division with the most workers employed in manufacturing is underlined. The minor civil divisions contained in the areas are as follows:

Area No.	1995 Population	Town
1	37,717	<u>Berwick</u> , Eliot, Kittery, S. Berwick, York
2	40,843	Alfred, Lebanon, Limerick, N. Berwick, <u>Sanford</u> , Shapleigh, Waterboro
3	64,229	Arundel, <u>Biddeford</u> , Dayton, Kennebunk, Kennebunkport, Lyman, Saco, Wells

Appendix F

Actual and Adjusted Data Comparisons, 1995-1996

The data on the following table has been adjusted using two major price indexes published by the U.S. Department of Labor, Bureau of Labor Statistics. The Value of Product data is adjusted by the Producer Price Index, (formerly the Wholesale Price Index) using a base year of 1982 = 100 unless noted. Wage data is adjusted by the Consumer Price Index for Urban Wage Earners and Clerical Workers and the base year is 1982-84 = 100. The adjustments made are based on the annual average for the respective index.

The Consumer Price Index is a monthly statistical measure of the average change in prices in a fixed market basket of goods and services. The CPI is based on prices of food, clothing, shelter, fuel, drugs, transportation fares, doctors' and dentists' fees, and other goods and services that people buy for day-to-day living. The quantity and quality of these items is kept essentially unchanged between major revisions so that only price changes will be measured. Prices are collected from over 18,000 tenants, 24,000 retail establishments, and 18,000 housing units for property taxes in 85 urban areas across the country. All taxes directly associated with the purchase and use of items are included in the index.

Though the CPI is often called the "Cost-of-Living Index", it measures only price change, which is just one of several important factors affecting living costs.

CPI-W

1995 Annual Average = 149.8

1996 Annual Average = 154.1

Producer Price Indexes measure average changes in prices received in primary markets of the United States by producers of commodities in all stages of processing. The sample used for calculating these indexes contains about 2,800 commodities produced in the manufacturing, agriculture, forestry, fishing, mining, gas and electricity, and public utilities sectors. The universe includes all commodities produced for sale in commercial transactions in primary markets in the United States.

To the extent possible, prices used in calculating Producer Price Indexes apply to the first significant commercial transaction in the United States, from the production or central marketing point. Price data are generally collected monthly, primarily by mail questionnaire. Most prices are obtained directly from producing companies on a voluntary and confidential basis. Prices generally are reported for the Tuesday of the week containing the 13th of the month.
