But all these services were forgotten;

What gloom was in the duke's chamber that night we need not say; what grief to find his white hairs dishour approaching that was to carry him to The Conference of the Cong. Church the fatal block. But there was another was held in the village last Tuesday and chamber that night that was as full of ing with pain, and tormented, as we may suppose, with the upbraidings of an uneasy conscience. Fretful irritable and uneasy conscience. Fretful, irritable, and unsubdued it was the king who was now at wrestling with death. With trembling hands his wife administered the opiates recommended to sooth his pain; the page at the door counted the cries of anguish without a sigh of compassion; and silently the physician went through the ceremony of feeling the pulse, and could give no prospect of recovery. Here were two men, the tyrant and the victim, both struggling with the terrible hour. Gray dawn began to light up the turret tops of the Tower; it also rest-ed on the roof of the palace at Westminster. The early morn was to see the Duke of Norfolk fall before the stroke of the executioner; but before that time a surer blow fell upon the exhausted tyrant. A hurried noise of feet sounded at the prisoner's door—the key is turned—a voice gives him the news—the king is dead, and the duke was saved. It shows how completely these cruelties were the work of the individual king, that his cease was the signal for the abrogation of a law; the sentence was never carried into execution, and in peace and quiet, the remainder of the emancipated prisoner's days

Whooping Cough, Common and Spasmodic Goughs, even to Actual Consumption, owes its most perfect results by being strictly confined to that law of simples which makes results perfect. Its opposite to most preparations is that it may be taken, without the least restraint, every hour in the day if necessary, without producing neusea or prostration. In its preparation neither opintes nor expectorants are allowed to disturb the natural law, and as seon as its work is done on the Throat and Lungs, it then becomes a peautiful and perfect Tonic. CONSTIPATION OR COSTIVENESS.

No one of the "many ils flesh is heir to" is prevalent, so little understood, and so much neglected as costiveness. Often originating in carelessness, or sedentary habits; it is regarded as a slight disorder of too little consequence to excite anxiety, while in reality it is the precursor and companion of many of the most fataland dangerous diseases, and unless early eradicated it will bring the sufferer to an untimely grave.—Among the lighter evils of which costiveness is the usual attendant are Headache. Colic, Rheumatism, Foul Breath, slies and of frightful diseases such as malignant Fevers, Abcesses, Dysentary, Diarræa, Dyspensia, Apoplexy, Enilepsy, Paralysis, Hysteria, Hypochondriasis, Melancholy and Insanity, first indicate their presence in the system by this alarming symptom. Not unfrequently the diseases named originated in Constipation, but take on an independent existence unless the cause is eradicated in an early stage. From all these considerations it follows that the disorder should receive immediate attention whenever it occurs, and no person should neglect to get a box of Cephalic Pills on the first appearance of the complaint, as their timely use will expelled the insiduous approaches of disease and No one of the "many ills fesh is heir to" of the complaint, as their timely use will ex-pel the insiduous approaches of disease and destroy this dangerous foe to human life.
