Truck Driver (Tractor-Trailer)	84	4.50	6.07	10.75	6.31			

Average Wage: The weighted average computed by multiplying each rate by the number of workers receiving that rate then dividing by the total number of workers in the trade.

Mediam Wage: Literally, the middle rate, that is no sever than half the workers in a trade earn loss and no nere than half the workers arm in excess of this figure.

SOURCE: Burequo of Employment Security, Olivision of Economic Analysis and Research, Monfarm Wage and Salary Employment (for September 1984 employment data).

TECHNICAL NOTES

Rates shown in this publication should not be confused with rates used in any general or specific area determination. There are two asjon differences between this data and the determined nates. The industry groups differ significantly. For this publication, the Standard Industrial Classification (SIC) system Rajor Industry Groups are used. Prevailing uang determinations, on the other hand, cross SIC groups. Also, no rate is set for a trade having less than 10 workers statewide, but data is shown here for trades with fewer than 10 workers if it was judged to be usable and did not violate confidentiality restrictions.

BUREAU OF LABOR STANDARDS Research and Statistics Division

Maine Construction Wage Rates 1984

The Maine Construction Wage Survey is conducted annually under the Prevailing Wage Rate on Construction Projects Law. The major purpose of the survey is to provide accurate hourly wage rates by trade for State-funded construction projects. The 1984 survey had an initial mailing to 828 construction firms. Data from 532 respondents was used to produce the 1985 wage determinations and, subsequently, this publication. There were 150 unused reports having fewer than five employees during the survey period. The remaining 28 received, but not used, were out of business or no longer operating in the State of Maine. The data shown is based on 9,900 workers or about 46% of the 21,600 employed in the Construction Industry

The industry-wide average hourly wage for 1984 was \$7.43. This is slightly higher than the 1983 average of \$7.13. The overall higher average wage is due to an increase in the average hourly rates in approximately two-thirds of the occupations.

> AVERAGE WAGE RATES BY MAJOR INDUSTRY GROUP, 1982-1984

	Average Wage				
	1984	1983	1982		
Construction Industry	\$7.43	\$7.13	\$7.25		
Building Construction	7.13	7.59	7.42		
Highway & Heavy Construction	6.73	6.10	5.85		
Special Trades Construction	8.11	8.02	8.57
