A class of maladles prevail to a fearfet extent in community dooming at least 100,000 youth of both sexes annually to an early grave. Those discases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, Relaxation, and Exhaustion: Marasmus or wasting and consumption of the tissue of the whole body, shortness of breathing or hurried breathing on ascending a hill or a flight of its reacters, vitates the stars, great pulpitation of the Heart, asthm. stairs, great palpitation of the Heart, Asthm Bronchitis and sore Throat; shaking of the hands and Limbs; aversion to society and to business or study; dimness of Eyesight loss of Memory; dizziness of the head; Neu-

other glands of the body, as Laucovikea or Fleur Albus, &c.; likewise Epilepsy, Hystoria, and Nervous Spasm.

Now, in ninety nine cases out of every one hundred all the above named disorders, and a host of others not named, as consumption of the Langs, and the most insidious and wily form of Consumption of the Spinal Nerves, known as Tabes Dosales, and Tabes misentierea. Hence the want of success on the part of old school practice in treating symptoms only.

Dr. Andrew Stone, Physician to the Troy Lang and Hygienic Institution, is now as

gaged in treating this class of modern maladies with the most astonishing success.—

The treatment adopted by the Institution is new; it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The incitities of cure are such that patients can be cured at their homes, in any part of the country from accurate description of their case, by letter, and have the medicines sent them by mail or express.
