The Maine Seed Potato Program

Certification Program:

A staff of six seed potato specialists, with years of experience in both field and tuber inspection, conduct our certified seed inspection program. Our regular seed potato specialists each has an area with which they are thoroughly familiar, and they work very closely with the 121 growers who produce Maine Certified seed potatoes.

Florida Test:

All seed lots produced in Maine must successfully pass a post-harvest test for the seed to be certified. The number of samples from each seed lot submitted for testing depends upon the seed class and the number of acres grown. Specific requirements for the test may be found under Certified Seed Regulations on page two. These tests are conducted by the Division of Plant Industry on a farm owned by the Board in Dade County, Florida, for a fee of \$115 per sample for Foundation class seed and \$140 sample for Certified class seed.

Generation Program:

Maine has a limited generation program that restricts production of seed potatoes to six years in the soil. Generation three seed potatoes are not eligible for certification but can be sold as seed for tablestock or processing use. This requires that Maine seed growers constantly update their source of seed in order to provide the most vigorous, disease free seed potatoes possible.

Maine Seed Potato Board:

Legislation was passed in 2009 transferring oversight of this Board from the Department of Agriculture to the Maine Potato Board. The group consists of eight members plus the Commissioner of Agriculture or his designee, and is responsible for guiding Maine's seed improvement work. For sixty-five years at their isolated Porter Farm, the Board has produced foundation and nuclear seed for sale to Maine's Seed potato growers.

"Rules Relating to Certification of Seed Potatoes":

All regulations applicable to Certified Seed Potatoes are in the Department of Agriculture's "Rules Governing Certification of Seed Potatoes in the State of Maine." Copies are available upon request from the Division of Plant Industry, Maine Department of Agriculture, Food and Rural Resources, State House Station #28, Augusta, Maine 04333. These rules are also located at the following website:
www.mainelegislature.org/legis/statutes/7/title7ch401sec0.html.

Bacterial Ring Rot:

The # symbol printed after the generation number of a seed potato lot in this directory denotes said seed potato lot passed all the requirements of the Maine Seed Potato Certification Program but was produced on a farming operation on which Bacterial Ring Rot was detected in 2012.

Generation Designations used in this booklet:

Prefix to Generation number: G - Generation, N - Nuclear
Suffix to Generation number: Seed potatoes are given an abbreviated designation to indicate the origin of the source of the seed.

AB - Alberta	NE - Nebraska
CO - Colorado	NB - New Brunswick
FL - Florida	ND - North Dakota
ME - Maine	NY - New York
MD - Maryland	PA - Pennsylvania
MI - Michigan	PEI - Prince Edward Island
MN - Minnesota	QU - Quebec
MT - Montana	SK - Saskatchewan
WI - Wisconsin	

Field Generations for Seed Potato Shipments:

On January 1, 2002 The Potato Association of America recommended that North American Seed Potato Certification programs use a uniform Generation designation, in addition to their regular Generation designation. The designation "FY", which stands for "Field Year", has been added to the regular generation designation on tags and bulk certificates. "Field Year" represents the number of years the seed has been produced in the soil. See the following

examples: N1	=	FY1
N2	=	FY2
N3	=	FY3
N4	=	FY4
G1	=	FY5
G2	=	FY6
G3 (Grow out)		

Limitation of Warranty:

The Maine Department of Agriculture, Division of Plant Industry and its employees **MAKE NO WARRANTIES OF ANY KIND**, either express or implied, including the **IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE**, as to the quality of the seed or quality of the crop produced from the certified seed potatoes. Certification represents only that the seed potatoes were inspected and certified in accordance with the requirements of Maine Laws and Rules Governing the Certification of Seed Potatoes in the State of Maine.

Intellectual Property Rights:

Certain varieties may be protected under plant variety protection (TM), (PVP) utility patent, or other intellectual property laws. Productions of these varieties may require a license or other permission of the variety owner and it is the responsibility of producers to ensure that appropriate permissions are obtained. Any information provided in this directory regarding the protection of specific varieties is provided for informative purposes only and is not intended to act as a substitute for official sources of such information.

Certified Seed Regulations

FIELD INSPECTION REQUIREMENT:

Fields entered for Certification shall receive at least two field inspections spaced approximately one month apart. A third, and additional inspection for Bacterial Ring Rot will be made after the second inspection and before the completion of harvest.

FIELD INSPECTION TOLERANCES:

Maximum tolerances during field inspection are as follows:

	1st Inspection	2nd Inspection
Leaf roll	2%	1%
Mosaic	3%	2%
Total Virus	3%	3%
Varietal Mixture	1%	1/4%

Bacterial Ring Rot, Potato Spindle Tuber Viroid and Root
Knot NematodeNo Tolerance

Any field, which according to the Maine Department of Agriculture's sampling methods exceeds the maximum field inspection tolerances will be rejected from Maine's Seed Potato Certification Program.

POST-HARVEST TEST REQUIREMENT:

All varieties will be required to be tested to meet final certification. All plots of all varieties producing seed to be planted for certification next year MUST be tested. This requirement is waived for Nuclear 1 seed potatoes, any variety or seedling grown on an aggregate of no more than a total of 1 acre entered into the certification program or any variety or seedling grown on an aggregate of .01 acre or less, providing that such seed potatoes are not sold as seed during the year that the requirement is waived.

- Certified Seed Class - Each post-harvest test sample of 400 tubers may represent no more than 40 acres. Only lots showing 5% or less total virus (Mosaics and Leafroll) will be designated as Certified Class seed potatoes.
- Foundation Seed Class - Each post-harvest test sample of 400 tubers may represent no more than 15 acres. Only lots showing 1/2% or less total virus (Mosaic and Leafroll) will be designated as Foundation Class seed potatoes.
- Nuclear - All nuclear seed lots, except nuclear 1*, must be post-harvest tested. Post-harvest test samples of 400 tubers may represent no more than eight acres for Nuclear 2 and no more than fifteen acres for Nuclear 3 and 4. Only lots showing 1/2% or less total virus (Mosaic and Leafroll) will qualify for the Nuclear designation. *(Nuclear Seed 1 may be tested upon request of the producing grower. N1 seed lots shall consist of 4 tubers per 100 plants for each variety produced. Post-harvest test samples of 400 tubers may represent no more than three acres.)

SHIPPING POINT INSPECTION:

In order to receive State of Maine seed potato tags or bulk shipping certificates, Maine Certified and Foundation seed potatoes are required to be inspected by an authorized Maine Seed Potato Specialist at the time of packing and must meet the requirements of the Maine Seed Potato Grade. Maine's seed potato grade is among the strictest in the country, even surpassing grade requirements established by the federal government. Seed potatoes, which fail to meet the requirements of the Maine Seed Potato Grade will not be considered certified and will not be issued seed potato tags or bulk shipping certificates.

2012 Seed Certification Potatoes in Maine

Below are the varieties and acreage of each which have met all field requirements for certification in Maine as prescribed by the Commissioner of Agriculture. (This does not include Aroostook Farms or growers own seed plots.) All lots are subject to a further inspection at time of grading. Certification tags will be issued by the Seed Potato Specialists for lots which meet the official grades for Maine Certified Seed and will receive final certification only after the Florida Test showing 5% or less virus diseased plants.

From Tissue Culture to Field Production A Pure Line For Your Success

Have you ever heard the adage that how you were raised affects who you are today? The same is true of seed potatoes. What kind of upbringing did your potato seed have? If you got seed from the Maine Seed Potato Board you can rest assured that it was started from tissue culture in a lab in Masardis, Maine. It has not been exposed to plant material from any other source. Everything produced on the farm comes from tissue culture on the farm.

When your goal is hardy seed and higher yields, go with Certified Maine Seed, an integral part of the Maine and U.S. potato industries.
