The Workforce Development System implementation of workforce development programs. Picture, by setting a tone of collaboration, and by educating policy-makers and the public.

Guiding Principles
- Must be easy to understand and navigate.
- Provides the means for personal and economic security and job satisfaction.
- Learners, citizens, workers, and family and community members.
- Everyone should be a lifelong learner.
- Skilled workers are essential to economic growth.
- Success will be backed up by a world-class workforce development system.

The challenge of the Workforce Pillar is to provide state-of-the-art skill upgrade to incumbent workers, as well as new workers, to ensure that they can take full advantage of new technologies and the ever-changing skill demands of our future workforce. NSAI partners have united to:
- Create and employ new programs, develop and update curricula, and initiate innovative ways to deliver just-in-time training now and in the future.

The Maine Jobs Council

Letter from Chair and Director

Sincerely,

Budget

Maine Jobs Council
January-December 2007

San Francisco, CA 94111

Maine's North Star Alliance Initiative is an industry focused economic development initiative devised to create and sustain new jobs. It is the result of a partnership organized by the NSAI, which has united over 100 business leaders and executive agency heads to catalyze regional economic development initiatives in Maine.

A Partnership to Transform the Workforce and Economy of Coastal Maine for Ten-County Coastal Maine.

Maine's North Star Alliance Initiative was created in 2006 with support from the Department of Labor, the Maine Jobs Council, the Economic Development Administration, and the Maine Department of Economic and Community Development. Coordinated by the Maine Department of Labor, the Maine Jobs Council, and the Department of Economic and Community Development, the initiative works with business leaders across the state to identify workforce and economic development opportunities that will strengthen Maine's communities and its economy.

The LiLA Program's vision is to scale across Maine and potentially replicate countrywide. The LiLA Partnership in Maine was inspired by CAEL, the Council for Adult and Experiential Learning, in connection with the U.S. Department of Education.

The LiLA Partnership is a creative model that will improve access to education and career planning services for workers and employers. The LiLA Partnership is a public-private partnership that includes employment services, education and training services, business and community organizations, and state government agencies. The LiLA Partnership is a network of agencies and organizations that are committed to improving access to education and career planning services for workers and employers.

The Maine Jobs Council in the performance of its responsibilities as a policy committee.

The Service Delivery Committee assists the Maine Jobs Council in the performance of its responsibilities as a policy committee.

The Policy Committee reviews the Local Workforce Investment Board, Tri-County Workforce Investment Board, Western Workforce Investment Board, and Coastal Counties Workforce, Inc. The Policy Committee reviewed the Local Area with an analysis of their respective plans, and identified the roles and responsibilities assigned the workforce boards.

The Policy Committee reviewed the Local Workforce Investment Board, Tri-County Workforce Investment Board, Western Workforce Investment Board, and Coastal Counties Workforce, Inc. The Policy Committee reviewed the Local plan to ensure that goals, objectives, and transition issues, needs and successful transition outcomes and on the infrastructure expenditures were aligned.

The Policy Committee reviewed the Local Plan for subsequent discussions amongst the workforce boards.

The Policy Committee reviewed the Local Plan to ensure that goals, objectives, and transition issues, needs and successful transition outcomes and on the infrastructure expenditures were aligned.

The Policy Committee reviewed the Local Plan to ensure that goals, objectives, and transition issues, needs and successful transition outcomes and on the infrastructure expenditures were aligned.
