Albion 2d April 1830

Dear Sir,

Yours of the 26 ult. containing a copy of a resolute of the legislature, and agency for me, under it is received.

Also this day a letter conveying a commission of Justice to me. Receiving the commission has caused one to inquire for some one to qualify civil officers and I find there is no one near here except Daniel Lee who is called at home.

Be good enough to mention the subject to the governor, if I could recommend Jedediah W. Hathaway or John McMullin or better, I can be very respectfully yours in John Q. Denison.

P.S. I regret the appointment of Mr. love, he would do well in an office, but is not the man of that energy of character which a sheriff ought to possess.

In relation to my account, I am much obliged to thy good Council. I have never had a disposition to spare the public, but the force of circumstances has made me unfortunate. I did not create the evil, still the legislature have thrown the burden on me, and any one who knows my business must see that I have lost three dollars there. I have gained one—

I am uncertain under the present resolve how the
present to have the expenses are to be paid. Whether the
Indian one to have the good or not, or amount of sales, I shall
endeavor to give the residue a reasonable and equitable con-
struction, leaving the ultimate decision to the government.
I have notified Mr. Burton of any appointment with
permission that he will recommend it to the Indian
Ducan.
