No state in the country has more to offer the fisherman than Maine. Maine has more trout and landlocked salmon waters than one could fish in a lifetime devoted exclusively to angling. It has variety that ranges from well-stocked trout and salmon lakes, literally in the dooryards of towns and cities, to countless wilderness waters accessible only by canoe or pontoon-equipped plane. It offers the four leading species of fresh water game fish in abundance; eastern brook trout up to eight pounds; landlocked salmon up to 18 pounds; lake trout (togue) up to 25 pounds and small mouth black bass up to seven pounds. More than that, it is possible to catch trout, salmon and togue in the same lake and all four species in the same locality!

Fish in Maine this summer! Plan your angling vacation from the suggestions in this booklet. If you want specific information on any locality, or on any question not covered in the following pages, please write us or visit our Portland headquarters, for any assistance you may desire.

STATE OF MAINE PUBLICITY BUREAU
FISHING IN MAINE

By HENRY S. BEVERAGE

A brief booklet telling what species you will find, when and where to fish, and how much it will cost.

Fourth Edition

A Publication of the
STATE OF MAINE PUBLICITY BUREAU
3 St. John Street, Portland, Maine
An afternoon of wet fly fishing, followed by an hour of dry fly fishing at sunset, produced 24 trout, the largest three and one-half pounds. That was on Kennebago. The following afternoon, trolling on Mooselookmeguntic, the scribe and his guide had 27 strikes and netted 14 salmon, the largest four pounds.

July? Well, a personal experience was so satisfying that it has been calendared as an annual event. In one day, on the upper St. John river, with a late start, a long mid-day rest and an early camp, we brought 52 trout, one weighing three and one-half pounds, to the side of the canoe.

One doesn’t look for bang-up fishing in August but a fellow named Rogers will tell you that the best trout fishing of the 1940 season was during that month, in some of the small ponds north and east of Moosehead. August is small pond month all over Maine and the native square-tails come to flies, or bait, as well as they do in the early part of the season.

If you wanted to know about Maine fishing in September you could ask a trio of New York anglers what they found in a small stream within a long stone’s throw of Portland. Being honest, they would tell you how they took ten trout apiece, averaging ten

inches, in an hour of fly-fishing that was faster than any they had enjoyed during the entire season. Or you could ask Herb Welch, or Needahbeh, what they think of the September fishing in Big Pleasant Lake; or Bert Quimby’s opinion of September fly fishing in Kennebago.

The foregoing are merely a few personal experiences and first-hand observations of Maine fishing last year, from the time the season began with the “ice-out” date on Sebago until the rods were put away late in September. Those experiences do not begin to indicate the possibilities of all-season angling in Maine, but they do prove that The Fellow We Fish With is right—it is not so much a question of “when” as “where” and “how”.

While we were making the foregoing observations thousands of other anglers in Maine were catching trout, landlocked salmon, togue, small-mouth black bass, perch and other species of inland fish all over Maine.

What better proof that Maine fishing is an all-summer sport could be found than the records of the 30 prize specimens of trout, landlocked salmon, togue and bass caught by members of Maine’s exclusive “One That Didn’t Get Away Club”? With the exception

TROUT, SALMON and BLACK BASS FISHING

JESSIE M. BICKFORD, Mgr.

Telephone Connection OAKLAND, MAINE
of April, when few waters were open, big fish were landed every month of the season; eight in May, seven in June, nine in July, four in August and two in September.

The thought we hope to leave with you is that catching fish in Maine is not a question of the week or month. They are caught from the time the season opens until it closes. Weather, of course, is an important factor, but as much as we'd like to forecast that it simply can't be done.

To be sure, Maine angling does have its high spots, but some of those are when least expected. An acquaintance of ours, who fishes Sebago consistently, had his best salmon fishing, trolling streamers flies on the surface, in August last year. Why? He found the fish and learned how they were feeding.

**Best Periods**

But landlocked salmon fishing, generally speaking, may be better for the fly-fisherman in May or June. For the fellow who has no objection to fishing deep the silver and green acrobats can be taken throughout the summer.

Cabins with bath, Illustrated folder Rooms in main lodge
Trout fishing may be faster, for the trolling enthusiast and the streamer fly caster, the first two weeks after the ice disappears from the lakes. But there are plenty of anglers who will tell you, and prove it, that they have had better sport in Maine in June, July, August, or September than in May.

After June 21 catching black bass is largely a matter of knowing where they can be found, plus reasonable proficiency in the arts of plug or bug casting, or bait fishing. From June 1 to June 21 bass may be taken only on a fly and the limit, to be killed, is three a day.

Togue, the fighting characteristics of which are disregarded by too many anglers, are an all-season game fish. They can be taken on light surface tackle in mid-summer as well as on heavy deep water rigs, if one knows where. And never let anyone convince you that a togue on light tackle, in May or mid-summer, isn’t a fighter. If you want your hands full get hooked to a four or five pounder on a flyrod. We didn’t have half the trouble with a four pound trout on a four ounce rod that we did with a five pound togue on a six ounce salmon rod.

F. PERLEY FLINT, Proprietor
Maine wilderness; the Fish River chain of lakes in Aroostook county; Grand Lake in Washington county; and Green Lake and Nicatous Lake in Hancock county.

Maine landlocked salmon run from one pound to 20 in weight. The record last year tipped the scales at 12½ pounds. The average was probably about three. Four, five and six pound salmon are not uncommon and anyone who gets one of those five pound aquatic acrobats on the end of a line has a busy half hour ahead.

Landlocked salmon are an inland species of Atlantic salmon and they are fully as spectacular, pound for pound, as their sea-going ancestors. They equal or surpass the brilliance and pugnacity of the black bass. And if beauty means anything, well, only the eastern brook trout surpasses Salmo Sebago in that regard.

Methods of catching landlocked salmon vary with the season, with the locality, and with the angler. Early fishing on most waters will find the fishermen about evenly divided between trolling smelts or shiners “sewed” on single hooks, and streamer flies. And if you tried to learn which of these two methods is most effective you would soon be lost in an unfathomable maze of contradictions. Both methods are highly successful in the early season.

Twenty-one individual log cabins with living room, sleeping rooms and baths. One central dining room for all, and a large office for recreations. Telephone and telegraph service. Fine canoe trips and many woods trails. Boats and canoes to let. Rates reasonable. Send for booklet and map. Christian clientele.

RUEL E. HOLDEN, Prop.

JACKMAN, MAINE
Later, as the surface water becomes warm, salmon seek lower and colder levels. Then the best method is one that will get the bait or lure down to the level of the fish. Sinkers, metal or weighted lines, spoons and spinners, accomplish this very effectively.

But there are times, even in mid-summer, when salmon can be taken on surface tackle, either by casting or trolling. In the early morning or late afternoon the fish seem to be nearer the surface than during the day. In general, however, the best of the summer landlocked salmon fishing will be with tackle that drags the bait well below the surface of the lake.

Fast Water Fishing

If you are one of the many anglers who has always dreamed of an Atlantic salmon fishing trip, and found it out of reach financially, may we suggest that you try a substitute in fast-water landlocked salmon angling?

Even a moderate size Maine salmon hooked on fly-fishing tackle in the tumbling waters of Rapid River, Moose River, the East

Outlet of Moosehead, the pools between the lakes in the Rangeley chain of lakes, Kennebago stream, the Fish River thoroughfares or numerous other salmon streams will duplicate, perhaps surpass, the thrill of playing an Atlantic salmon on heavier tackle. Game-sters in any situation, Maine landlocked salmon are at their best in fast water.

There is, too, Atlantic salmon fishing to be had in Maine. The famous Bangor Pool on the Penobscot River affords excellent fishing in some years. But the Denny's and Narraguagus rivers, in Washington county, have been more consistent producers in recent seasons. The latter gives promise of becoming a fine salmon river and may equal the former this year. Excellent runs of "black" salmon can be expected in both of these rivers early this season.

Maine Trout

The state of Maine has more trout waters than all of the eastern states combined and it is one of the very few states where these beautiful game fish can be caught in large lakes and ponds. In addition, Maine offers some of the finest stream trout fishing to be

ROCKWOOD, MAINE
found anywhere. If Maine rivers are less famous than the Brule, the Brodhead and the Beaverkill it is only because they have been less publicized.

One does not have to be an expert with the jointed bamboo and tiny feather or hair lures to catch trout, and big ones, in Maine. The simplest trolling outfit with a streamer fly or baited hook will, and does every season, take trout up to six pounds. Moosehead, the Rangeleys, Kennebago (fly-fishing only), Roach Pond, some of the Belgrade lakes and Spencer Lake are a few of the good all-season trout waters.

Later, the streams and rivers are excellent producers and there are so many small trout ponds in Maine that it would only be confusing to attempt to list them all.

The Allagash, the St. John, Aroostook and Washington county trout streams are, generally speaking, available only to those who can make trips of more than a week's duration. Under no circumstances should one undertake the St. John River trip, or the Allagash, without a guide who knows the river and can keep posted on water conditions. Low water, on the upper St. John, may necessitate dragging a canoe for miles, and that's no way to spend a fish-

ing vacation. High water may be hazardous except to experienced river canoemen.

But it is not necessary to make long trips into the wilderness in order to catch trout in Maine. They are found everywhere; in small brooks that may be fished from the banks or waded with hip rubber boots; in small ponds and larger lakes, many of which are within a half hour’s drive from populous towns and cities; and in large streams and rivers navigable by a boat or canoe.

Records of the Maine Department of Inland Fisheries and Game show that more than 2,500 waters are stocked with trout each year, a majority of the fish being near-legal length when liberated. In many cases, trout are over the legal length when stocked. This annual program insures improved fishing each year.

There is trout fishing in Maine for everyone, whether his idea of angling is to walk quietly along the bank of a tiny stream that winds its way through peaceful farming country, troll or still-fish from a boat or canoe in one of Maine’s countless lakes, rough it on a wilderness canoe trip, or float dry flies on waters reserved exclusively for the devotees of the feathered lures.

Black Bass

If your idea of the supreme thrill in fishing is to pit your skill against the ferocity of a black bass that is fast to a plug or feathered hook then Maine has much to offer. All of the coastal and central counties are dotted with small mouth black bass waters. There are numerous bass lakes in the western part of the state; the Belgrade region has long been famous for its excellent bass fishing and so has Sebago and other smaller ponds nearby. In recent years many anglers have “discovered” what they call the finest bass fishing in the country in Hancock and Washington counties, in eastern Maine.

In mid-summer it is easily possible to combine bass fishing with trout and salmon angling in the same locality. No state except Maine offers a combination of bass, trout, togue and salmon fishing within a radius of a few miles.

Non-Game Fish

Although many anglers class as non-game fish such species as white perch, yellow perch, pickerel, whitefish and smelts they

nevertheless furnish many hours of sport. And anyone who has caught white perch, pickerel and whitefish will agree that they furnish plenty of action.

White perch, which may be caught in large numbers, and in numerous waters, by trolling or still-fishing, are fast, gamey fighters and there are few finer fish on the table. A three or four pound pickerel, such as are commonly caught in many ponds, is a miniature muskellunge and no apologies are necessary for his fighting instinct. A whitefish will fight nearly as hard as a landlocked salmon, sometimes harder and longer than a trout. Smelts, those big silvery fellows a foot long or more, are not classed as game fish. But rolled in corn meal, fried in fat, well, there are few fish that equal them as a delicacy. Yellow perch are not fighting fish, but the ease with which they may be caught and their excellence as pan fish make them an attraction to many anglers.

SEBOEIS, MAINE
labyrinth of bays, coves and inlets with numerous islands offshore, affords excellent ocean and shore fishing from mid-June to late September.

Although schools of giant tuna, which are most abundant in July and August, may be Maine’s most publicized ocean fishing attraction the bluefins are by no means the only salt water species plentiful off the coast. There are pollock, as gamey as any of the inland species; there are those beautiful, streamlined mackerel, small cousins of the tuna; there are cunners to be caught off the rocky shores; striped bass off the beaches and in the fresh water inlets; and there are cod and haddock offshore.

Some day the world record tuna may be landed in Maine. In fact, fish larger than the present rod and reel record have been harpooned in Casco Bay, and it needs only the smile of Lady Luck to bring the rod and reel record to the Pine Tree State.

Maine’s fame as a tuna fishing center has been growing steadily in recent years. Suitable boats and experienced guides are now available at several points on the coast and many of them are fully equipped with tackle for fishermen who do not have their own.

Excellent facilities are also available for those who come to Maine in their own sport fishing craft.

Although tuna begin appearing in Maine coastal waters late in June and do not leave until late September the most popular fishing period is from the middle of July until the middle of September. Weather conditions, of course, have considerable effect on tuna fishing and it is best to plan for a two weeks' stay, or make advance arrangements to come when the weather and fishing conditions are considered to be satisfactory by the boatman with whom you make tentative reservations.

No license is required for salt water fishing in Maine.

Tackle Requirements

The more than 40,000 tourist anglers who come to Maine each year bring almost as many varieties of fishing tackle; ranging from inexpensive steel rods, low-priced reels and cotton lines, to feather-light bamboo creations with other equipment to match. To answer...
briefly the question of what you need for tackle for Maine angling it might be said that it should fit the kind of fishing you plan to do—and your pocketbook. A few extra days added to your vacation may be more pleasurable and more productive of fish than an equal amount spent for extra tackle.

Maine fishing, except for salt water species, may be divided roughly into three methods: bait fishing, from a boat, canoe, or the bank of a stream or lake; trolling, dragging a bait or lure from a moving boat or canoe; and casting, flies or plugs.

Inexpensive tackle is perfectly satisfactory for bait fishing. Trolling requires a better grade rod, either steel or bamboo, a reel holding 100 yards of 16 or 18-pound test line, medium heavy gut leaders and snelled hooks or streamer flies.

Fly casting and bait casting equipment is too well standardized to require suggestions. It may be well to add, however, that fly fishermen can be sure of finding an excellent assortment of lures, especially streamers, in nearly every Maine sporting camp. And the advice of guides and camp proprietors is frequently helpful in selecting patterns best suited to the locality and season.

Accommodations

Accommodations for anglers are varied. In some localities you will find comfortable farmhouses turned into miniature sportsmen’s hotels; in other regions, especially at Moosehead and the Rangeley lakes, large hotels welcome visiting anglers. But in most localities you will make that unique Maine institution, the sporting camp or lodge, your headquarters. These camps, many of them log cabins with full conveniences including telephone service, are on the order of a huge club, the members having private cabins for living quarters with a large central lodge serving as dining room and office. Rates vary from $3.00 a day up, the average being $5.00, with many camps offering reductions for a full week’s stay.

Unfortunately, it is not possible to give definite information on the dates that fishing will begin in the thousands of Maine inland waters. That depends entirely on the whims of Mother Nature. There have been winters when Sebago Lake did not freeze and was open to fishing April 1. There have been other years when it did not clear until May. But the average opening date for Sebago, first

---

**Scraggly Lake Camps**  
PATTEN, MAINE

4½ miles from auto road, buck board service. 6 log camps well-equipped. Good fishing all summer, trolling and fly fishing. Lake trout up to 12 lbs. Good size brook trout. Lake, river and pond fishing. Salmon in May and June. Special rates for family.

One of the best hunting sections in Maine

Open May 1-Dec. 1  Rates $4.00 day; $25.00 weekly

BILL KILGORE

DO YOU REALLY WANT GOOD FISHING from May to September?

**Yerxa’s Square Lake Camps**

On Square Lake in the famous Fish River Chain in Aroostook County has the answer for landlocked Salmon and Trout. The best of food and modern cabin accommodations. Catalog from J. P. Yerxa, Houlton, Me., Guerette, Me., after May 1.

“Ask the Man Who Has Fished There”
of the big lakes to clear, isn’t far from the middle of April. Moosehead, the Rangeleys, the Aroostook waters and eastern Maine lakes are normally from three weeks to a month later than Sebago. Any sporting camp or hotel from which you contemplate early fishing will notify you immediately when the ice is out of the waters you plan to fish.

Maine has so many fishing waters in its more than 33,000 square miles of area that no general list of fishing regulations could cover them all. There are, therefore, numerous local and sectional rulings, all of which are covered in the handbook of regulations which will be sent you on request.

**Fishing Licenses**

3-day license, (consecutive days).......................... $1.65
15-day license effective for 15 days from date of issue..... 3.15
Season license, (calendar year).......................... 5.15
Junior license, (10 to 16 years, calendar year).............. 1.15
Ladies are required to purchase a license.
