## Foreclosure Survey Reports Improvement: Declining Foreclosure Initiations Year-over-year and Past Due Loans Declining in 1<sup>st</sup> Quarter 2013

Gardiner – Bureau of Financial Institutions' Superintendent Lloyd P. LaFountain III announced today that foreclosures initiated during the 1<sup>st</sup> quarter 2013 declined by 25% year-over-year from 85 in the 1<sup>st</sup> quarter 2012 to 64 in the 1<sup>st</sup> quarter 2013. However, foreclosures initiated in the 1<sup>st</sup> quarter 2013 increased slightly from the low 4<sup>th</sup> quarter 2012 level of 52, which represents the lowest reported level since 3<sup>rd</sup> quarter 2010.

The Bureau has been surveying the 31 state-chartered banks and credit unions regarding foreclosure activity on a quarterly basis since October 2006. The data is limited to the 31 financial institutions that have been state-chartered from the end of 2006 through March 2013. It does not include data from entities not regulated by the Bureau, such as federally-chartered banks, federally-chartered credit unions and mortgage companies licensed to do business in Maine. The most recent data covers January through March 2013.

At the close of the 1<sup>st</sup> Quarter 2013, of the 60,000 first-lien mortgages held by Maine's 31 state-chartered banks and credit unions, 314 loans were in-process of foreclosure. This level remains generally unchanged compared to most quarter-end data throughout 2012, except 3<sup>rd</sup> quarter 2012 when a high of 347 loans was reported as in-process of foreclosure.

Completed foreclosures declined marginally both year-over-year and quarter-to-quarter, from 47 at 1<sup>st</sup> quarter 2012 and 46 at 4<sup>th</sup> quarter 2012, to 42 at 1<sup>st</sup> quarter 2013. Loans dropping-out of the foreclosure process, including negotiated resolutions and short sales, fell 36% from 36 in the 4<sup>th</sup> quarter 2012 to 23 in the 1<sup>st</sup> quarter 2013, the lowest level of the last six quarters.

A decline in past due loans may indicate fewer foreclosure initiations in coming quarters. The number of 1<sup>st</sup> lien mortgage delinquencies, both early and serious delinquencies, declined in 1<sup>st</sup> quarter 2013. Early delinquencies (less than 90 days past due) dropped from 888 loans in the 4<sup>th</sup> quarter 2012 to 824 loans in the 1<sup>st</sup> quarter 2013 or 15 basis points from 1.52% to 1.37%. However, the early delinquency ratio is higher than the 1<sup>st</sup> quarter 2012 level of 1.29%. More serious delinquencies (90 days or more past due) dropped from 576 loans in the 4<sup>th</sup> quarter 2012 to 514 loans in the 1<sup>st</sup> quarter 2013 or 13 basis points from 0.98% to 0.85%. Unlike the early delinquency ratio, the serious delinquency ratio is lower than the 1<sup>st</sup> quarter 2012 level of 1.02%.

Superintendent LaFountain reiterated that "foreclosure activity, while remaining above prerecession levels, does not pose a threat to the stability of Maine's state-chartered financial institutions."
