Editorial

Once again the students of G. I. present a school paper to the public. We have two purposes in trying to start another paper: first, to give those interested an idea of what the students are doing in the way of scholarship and athletics, and, second, to gain some knowledge and experience in writing, financing, and publishing such a paper. Whether or not the Greely Annual is worth the trouble of publishing it the readers must judge; but, at any rate, it has fulfilled in a large measure its main purposes.

The students have worked hard for the paper, but their efforts could have accomplished nothing were it not for the whole-hearted support of the advertisers. Does it not seem reasonable that those who are willing to support a school paper so liberally with advertisements will also be ready to give good trades to their customers? You support us by supporting our advertisers.

REPAIRS OF THE SCHOOL BUILDING

When we returned to school last September, we noticed that a number of repairs and improvements to the building had been made during our absence. The desks and woodwork in the main room had been varnished, the assembly hall had been repapered, and recently a number of new seats had been purchased. A new lavatory had been installed in the girls dressing room and the baseball grandstand had been repaired. We wish to take this opportunity to thank the Trustees for their efforts to make our surroundings more pleasant.

Although many repairs have been made to the school building, very little has been done to our gymnasium. It is badly in need of repair and should be shingled. We hope that in the near future it may be put into better condition.

M. E. H. '25

BOYS' AND GIRLS' CLUBS

A subject which has recently received much attention in Maine is the boys' and girls' agricultural and home-making clubs, which are supervised by the University of Maine, and carried on in co-operation with the United States Department of Agriculture. Members of three different clubs of this kind attend G. I.

The purpose of these clubs is to give boys and girls some training in agriculture and home economics, and to develop an interest in these subjects. Since the purpose of the clubs is distinctly educational, and the clubs are so closely related to school work, they may well be discussed here.

There is no doubt that the work of the clubs is highly practical and beneficial to the members. Each member is required to carry out a project in agriculture or home economics similar to those in school work. From this project he or she gains not only several dollars, but also a large amount of useful knowledge and experience, to say nothing of the good times of club activities, such as the meetings, Field Day, or the County Contest.

PHYSICAL TRAINING AT GREELY INSTITUTE

Greely Institute although a small school furnishes quite a few sports. This keeps the boys and girls interested in school. No one can play any of the games of G. I. if they are not up in their studies.

The athletics that Greely Institute offers are, boys' baseball, tennis and girls' and boys' basket ball. We are also planning to start a girls' hockey team. I think this will be a great benefit to the girls, as the only game girls have out of doors is tennis and only four can compete in this at a time. The boys out-door sport is baseball and they have a chance to get a lot of exercise as they may all play at once.

The students of G. I. have a chance to get plenty of exercise in the winter, as they have basket ball practice two nights in a week and also physical training each day.

M. E. R. '26

REPORT ON HOME ECONOMICS CLASSES

The class of '28 in home economics began their season with cooking. They first canned corn and tomatoes and made jelly. Their next course in cooking was the preparation of a breakfast, which was served later in the season; next they prepare a dinner. This ended their nine weeks course in cooking.

The next course which they were to take up was sewing. They began their sewing by making undergarments.

The sophomores also took up cooking for the first nine weeks and are now taking up sewing.

The junior and senior classes have had text book work on dietetics. This has proved very beneficial to the class.

L. Y. K. '25

AGRICULTURE I and II

When school opened this fall there were nine students in the agricultural class, two sophomores and seven freshmen with H. E. Howard as instructor.

We have taken up two subjects,—“Animal Husbandry” and “Farm Crops.”

We have made some trips to farms where crops are raised on a large scale and also where pure bred cattle and horses are raised and we got a good idea of the best animals and farm crops.

We have done some shop work, each one in the class has built a bulletin box and sent to different experiment stations for bulletins. We have also built two saw horses and a seed sample rack, besides a good many small things around the school and gymnasium.

We have also tested some milk for some of the townspeople. This was very interesting and is also very useful to know. R. F. B. '27

WORK DONE IN AGRICULTURE III and IV

We started the year with a good class consisting of three juniors and five seniors.

The first of the year we took up surveying which was an interesting study. The class went in pairs and with the use of the instruments it has surveyed the campus. When this was done a map was drawn showing the buildings, trees, and baseball diamond.

The next thing we took up was timber estimating which was very interesting. We estimated a number of different trees and strips of woods.

On October 13, the annual school fair was held which was conducted by the two agriculture classes. There was a good exhibition of vegetables which were raised by the pupils of the two classes, also a good exhibit of fancy goods and cooked foods. In the evening there was an entertainment which was a success.

A short time ago a man from the U. S. Department of Agriculture came here and gave us a demonstration on judging hay which was very profitable to those who attended the demonstration.

Since then we have been taking up farm management. A. H. C. '26

SENIOR CLASS

The Senior Class met early in the year, and elected the following officers: President, Kenneth Packard; Vice President, Forest Doughty; Secretary and Treasurer, Hazel Hoey.

As this is our last year, we are bending our energies to the raising of funds for Graduation. The Senior Class conducted a home cooked food booth at the School Fair. This was a success. On the 11th of December, the Senior Class gave "The Courtship of Miles Standish," with the following characters:

Miles Standish	<i>Warren Fogg</i>
John Alden	<i>Kenneth Packard</i>
Priscilla	<i>Marie Larsen</i>
Elder	<i>Arthur Montague</i>

Our class has not had many socials or other activities as yet, but we hope to do more in the spring. M. E. H. '25

CLASS OF '26

We have let the following pupils hold these offices throughout the three years. Harris Corey, President; Ella Ross, Vice President; Belmont Adams, Secretary and Treasurer.

On October 12, 1924, the day of the third annual fair, we managed a hot dog booth and in the following evening conducted a social. We had very good success with the two.

We have purchased our class rings and like them very much.

Total number in our class this year is twelve. M. E. R. '26

SOPHOMORE CLASS

We elected as our class officers this year the following: President, Frances Winslow; Vice President, Richard Blanchard; Secretary and Treasurer, Florence Emery.

At the school fair held last fall, October 12, 1924, we sold ice cream and candy, clearing over five dollars. The first of the year the Sophomores gave a reception for the Freshman Class, which met with success. So far we have held three class meetings. R. E. T. '27

FRESHMAN CLASS

So swiftly have the months flown by that it hardly seems possible that January is here again, and with it new resolutions to start right. The Freshman class is made up of fourteen pupils. There are six girls and eight boys. The officers of our class are very bright and capable: President, Mister Stanwood R. Searles, an equally good Vice President, Mister Earl Watson, while Miss Winifred A. Shaw holds the position as Secretary and Treasurer.

The high honor pupil of our class is one and there are three honor pupils. In our treasury is \$6.10 earned from the freshman booth at the School Fair. We had a flower garden where for ten cents you could find and fish for a present well worth the money. We are very proud of our success but hope to have better. W. A. S. '28

REPORT ON FLAG POLE COMMITTEE

The Flag pole committee consists of five members, who were chosen by the school, and a member from the alumni, being Mr. Walter Barter, as chairman. The members who were chosen from the school are as follows: Shailer Hayes, Marie Larsen, Donald Barton, Stanwood Searles and Howard Emery, Secretary and Treasurer.

The object of this committee is to obtain money to secure a new flag pole, which we think a great necessity at G. I.

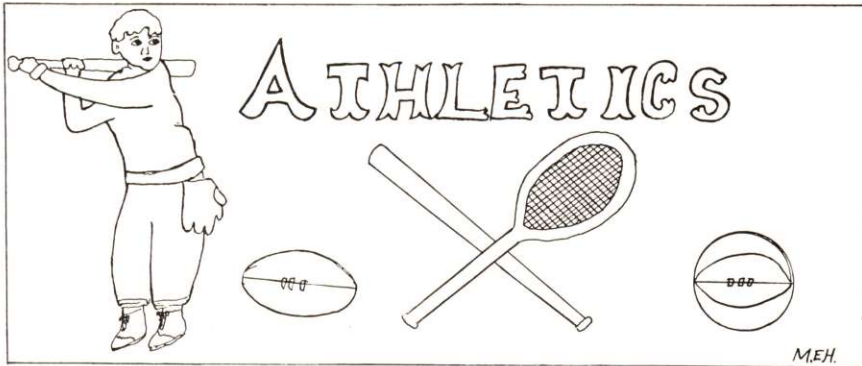

We decided to give a supper and an entertainment to raise the required amount, and with the co-operation of the scholars and the alumni we cleared quite a large sum of money, and we are hoping to make more later in the season. M. K. L. '25

STUDENT COUNCIL

The Student Council is a student body composed of two members from each class: Senior, Lydia Kimball and Warren Fogg; Junior, Harris Corey, President and Daisy White, Secretary and Treasurer; Sophomore, Hilda Porter and Shailer Hayes; Freshman, Grace Libby and Earle Watson. Each class chooses its two members when they enter as freshmen and they hold this office throughout their four years.

The object of this organization is to keep the building and campus in good order. Also to settle disputes that might arise between the scholars and teachers.

It has proved very useful in such cases. I think it is helpful to the school and I hope it will accomplish larger and better things in the future. D. M. W. '26

BOYS' ATHLETICS AT G. I. FOR 1924-25

Athletics at Greely have been a success so far this year. The school opened in September with bright prospects of a basket ball team. Our first squad is composed entirely of experienced men, and the second team are doing good work as substitutes.

The men are lined up at the present time in the following positions:

First Team	Second Team
L. F. D. Barton	L. F. B. Adams, R. Blanchard
R. F. H. Corey	R. F. S. Searles
C. K. Packard	C. R. Ross
L. G. A. Burdin	L. G. U. Hincks
R. G. H. Emery	R. G. S. Hayes

The second team is not arranging any games this year but is working to the best of its ability for the benefit of the first team.

At present the schedule of the first team is as follows:—

November 1.	G. I. Alumni	here	won	22-16
November 7.	New Gloucester	here	won	26-20
November 14.	Windham	there	won	30-14
November 21.	Lewiston Celtics	here	won	28-22
November 29.	Lewiston Celtics	here	lost	20-30
December 5.	Windham	here	won	30-19
December 12.	Gorham High	there	lost	17-21
December 26.	Portland Boys' Club	here	lost	24-33
January 2.	Brunswick High	there	lost	31-59
January 10.	New Gloucester	there	lost	20-21

January 16.	Scarboro High	there
January 23.	Freeport High	here
January 30.	Scarboro High	here
February 13.	Porter High	there
February 20.	Sabattus High	there
February 27.	Gorham High	here
March 6.	Freeport High	there
March 13.	Porter High	here

Not only in basket ball does G. I. produce a good team but some excellent baseball men have been developed. Last year we used practically a green team and won a cup which was put up between Windham, New Gloucester, Pennell, and Greely. We will have nearly all of the men back this year and expect to turn out quite a baseball machine when we have a little practice.

Last fall we played two games with Yarmouth high but lost both games. Yarmouth had a team of experienced men and were in fine condition to walk away with our young team but as we held them to a small score each time we thought ourselves lucky.

No arrangements have been made for any games next year but we are going to work hard for a winning team. K. N. P. '25

Note: The four schools just mentioned have started track teams. Nothing much has been done yet, but a track meet was held last spring, and a cross country race last fall.

THE BENEFIT OF ATHLETICS

Athletics benefit one in many ways, but the most important benefit is quick thinking. This helps anyone to take advantage of any opening which may occur. There are a great many chances, both in athletics and in work.

Another benefit of athletics is teaching one to use fair play. During athletic contests one has to use fair tactics, and the use of them then makes one use them in later life.

Still another benefit is learning to control the temper. This is also very important. H. H. E. '26

GIRLS' ATHLETICS

The Girls' Basketball Team opened its season Nov. 7 with the following full schedule.

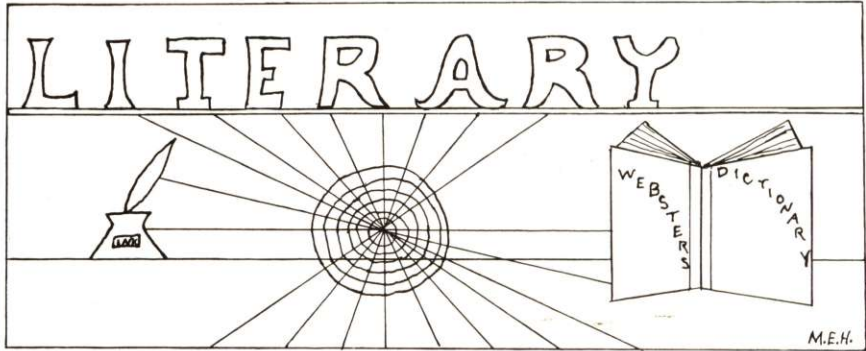

- November 7. New Gloucester High at Greely.
November 14. Windham High at Windham.
December 5. Windham High at Greely.
December 12. Gorham High at New Gloucester.
January 2. Gorham High at Greely.
January 10. New Gloucester High at New Gloucester.

There has been a lack of material for a team and a lack of attendance at practices that has kept the team back somewhat, but although we have not been victorious in all our games, the team is improving under the coaching of Miss Marjorie Merrill.

The following is the line up:

- L. F. Ella Ross, *Manager*
R. F. Hazel Hoey, *Captain*
J. C. Hilda Porter
S. C. Winifred Shaw
L. G. Frances Winslow
R. G. Thelma Strout
Sub. Grace Libby

H. E. H. '25

THE PROFESSOR'S TRIP

First I want to introduce myself. I am Professor Sylvanus De Humphry Chiles. I am sure you must have all heard of me sometime in the last few years, for I have been very prominent in the public eye, if I do say so myself. In the first place I have a much sought after position as the President of the College of Hyperbole, which as you know, is very famous and is situated at Antithesis, Metonymy. Two years ago I put before the world a great improvement, an invention which helped advance humanity greatly. This was a device used to polish tulip bulbs before planting them. The next thing that I invented was a machine for uncurling lettuce leaves. My best and most recent help to this race was — but then, I must stop talking about myself and tell about my trip.

It all began with my greatest friend a very fine man indeed, Professor Winkle by name, suggesting that we try out a new machine, which is a combination of a balloon and an aeroplane, by taking a trip to Mars. This seemed to me a very sane and interesting thing to do, so I agreed at once. As soon as we could get our outfits together we started. During the first part of the journey the traffic was rather bothersome, but as we got farther away from the Earth it grew less and less, until there was no one in sight but ourselves, however, this pleasant solitude did not last long for after five or six hours travel we came in sight of Mars, and the traffic seemed to be worse than ever.

As we wished to reach Mars as soon as possible, we were going at rather a good rate of speed, and did not notice what a commotion we were causing until a strange looking man sailed up to us in an apparatus that looked something like a motorcycle, only it had

wings on it, and told us in a harsh, rude tone that we were exceeding the speed limit and would have to come with him to the station house. I could have jumped out of my seat with the joy of it, for he had spoken in English! English! and I, Professor Sylvanus De Humphry Chiles, had, after studying two weeks on the subject bet Professor Winkle fifty rubles that the people at Mars spoke English. Now I had not only won this huge sum of money, but I had also attained great honor as the winner. At last, part of my ambitions had been reached. This I was thinking as Professor Winkle conversed with the man, who, I noticed, was very strange looking. Why! his mouth was where his nose was supposed to be and his nose was where his mouth was supposed to be. This I thought was surely unusual. Finally, after a long argument, Professor Winkle persuaded the officer to overlook our error, and rewarded him magnificently with a postage stamp.

Although a large crowd had gathered around us, we managed to get away from them with little difficulty. We finished the remainder of our journey with no interruption and reached land in about ten minutes. We landed with no trouble and what we did, we went in search of a restaurant. This we found shortly, and we both then enjoyed some very fine ham and eggs. When we had finished our repast we decided to go out to see the sights but when we learned that the national anthem was "How Dry I Am," Professor Winkle and I hustled back to the Earth much disappointed. The last we saw of Mars was the speed cop behind us, a mere speck in the distance. W. A. S. '28

THIRD ANNUAL SCHOOL FAIR

A school and community fair was held at Greely Institute Gymnasium on Monday, October 13, 1924.

The students of Greely Institute brought exhibits of Agriculture and Home Economics.

A few people of the community also brought exhibits and ribbon prizes were given.

According to the usual custom the different classes had their own booths. The Seniors having first choice decided to have home cooked food. At the Juniors' booth frankforts were sold. The Sophomores decided on ice cream and candy, and the Freshmen had a flower garden.

During the fair a horse-shoe contest was carried on for both boys and girls. There were prizes offered for the best throwers.

There was a short entertainment given in the evening, which consisted of several tableaux, singing by the Boys' Club and selections from the Mandolin Club.

The prize winners were announced at this time.

A short social was held afterwards and was much enjoyed by all.

F. A. W. '27

THE CROSS COUNTRY RACE

Oct. 24, 1924.: Tomorrow we go to New Gloucester,
To run a cross country race.
Whate'er it may cost her,
Greely must keep the pace.

Oct. 26, 1924: We have been to New Gloucester;
We have fought the good fight.
That we haven't exactly lost her
Gives us much delight.

Though Windham won the game,
Though Pennell's score was second:
Yet Greely did well just the same,
For Greely third was reckoned.

New Gloucesters' runners weren't so fast,
For Gloucester's score was last but one.
Yarmouth High was fifth and last;
Greely beat Yarmouth when the race was run.

—B. W. A. '26

A STRANGE ADVENTURE

One fall day I went out in the woods to gather nuts. After wandering around for awhile I decided to go home. Walking along the little winding path I happened to glance up and saw a big mosquito flying toward me. I dodged behind a big tree, he missed his aim and stuck his long tongue into the tree. Seeing his tongue sticking through the tree, I pinched it so he could not draw it out. Mr. Mosquito had to stay where he was.

Ten years later I happened to be walking through the same woods. It was in the spring and having to cross the little stream which was

near the large tree where I had killed the mosquito I tried to find the little bridge but it must have been washed away because I could not find it. Seeing the huge mosquito skull hanging in the tree I walked over and took it down and carrying it over to the stream, got into it and with a stick rowed across. Just at this I was called to breakfast and my huge mosquito skull disappeared.

A. S. V. '27

GEOMETRY

This is one of my bugbears,
A subject I'll never see through,
For there's just as much sense in this study
As there is in a chinaman's queue.

Mr. Winslow stands at the blackboard
And tries very hard to explain,
But when we get through with the lesson
He thinks his efforts are vain.

He talks about bisecting angles,
And scolds until he is hoarse;
He hopes to stir our ambition
And get us well on in our course.

But he thinks his efforts are fruitless
When we meet the next day in our class;
When he sends us all to the blackboard,
There's none of us who pass.

—M. E. R. '26

THE WOMAN HATER

Now Abe's a jolly, good fellow,
A good time he never will miss;
But it riles his wonderful temper,
When the girls ask him for a kiss.

One night to his anger and sorrow
Three girls conquered him in the hall.
They asked him if he wouldn't be generous,
And give a kiss to them all.

Now this didn't suit Abe a bit
And to them he angrily cried,
"You girls make me sick, and never again
Will I take one of you for a ride!"

Right then Abe swore off from all women;
No matter how hard they would tease
Though they followed him round like sly little mice,
They couldn't do one thing to please.

But Abe found that it wasn't his nature
To keep away from the girls,
And in just about twenty-five minutes
He was joking and pulling their curls.

—R. E. T. '27

Alumni

CLASS OF 1921

Clara Porter is working in Portland.
Philip Barton is driving a taxi.
Lloyd Brydon is attending N. H. State College.
Myron Leighton is attending N. H. State College.
Ruth Kemp is attending N. H. State College.

CLASS OF 1922

Gerald Packard is working in Connecticut.
Lucretia Laughton is now Mrs. Wilbur Buxton.
Verona Brydon is attending Normal School at Farmington.

CLASS OF 1923

Anders Larsen is working at Falmouth Foreside.
Elna Larsen is teaching school in Portland.
Guy Burnell is at home.
Ernest Peterson is at home.
Floyd Crocker is attending Gray's Business College.
Thomas Hincks is at home.
Thelma Watson is working in Portland.

Clifton O'Connor is working on a railroad.
 Dorothy Hayes is teaching school.
 Myra Chadbourne is teaching school.
 Katherine Doughty is attending Gray's Business College.
 Helen Powell is at home.

CLASS OF 1924

Harold Bragg is at home.
 Elsie Brydon is working for Rines Bros. in Portland.
 James Hicks is attending Northeastern University.
 Robert Merrill is attending Northeastern University.
 Christine Nelson is attending Gray's Business College.
 Inez Morrill is at home.
 Hazel Baston is teaching school.

Jokes

In Chemistry Class.

Mr. Howard, "Ross, don't pour that liquid in there."
 Ross, "I wasn't going to."
 Mr. Howard, "You looked as if you were."
 Ross, "I may look funny, but I ain't."
 Callie, "I don't give a darn!"
 Barton, "Come, Callie, no profanity, there's men present."

In Dom. Arts Class II.

Frances Hulit, as usual, was laughing. Miss Kingsley said to her, "Miss Hulit, what is so funny?"
 "Nothing," was the quick reply.
 Miss Kingsley, "Well, I wish you would stop laughing at *me*, and pay attention to what I'm saying."

Heard in French Class.

Miss Kingsley, "Monsieur Hayes, read and translate the sixth sentence."
 Hayes, "Le samedi est le septieme jour de la semaine. Er—Saturday is the—er—seventeenth day of the week." He wonders why everybody laughed.

In Girls' Chemistry Class.

Mr. Howard, "For next lesson study your appendix and find out what is in them."

Heard in Arts III and IV.

Instructor, "Miss Doughty, from what kingdom does milk come?"

Miss Doughty, "Vegetable." Perhaps she was thinking of milk weed.

Mr. Winslow speaks of "the habit that the boys and girls of today have of powdering their faces, bobbing their hair, etc." No offense to the principal, but all loyal boys should actively resent such an outrageous accusation of their sex.

Mr. Winslow in Geometry Class, "An isosceles triangle has two equal legs, but that doesn't prove I'm an isosceles triangle!"

JUST IMAGINE—

Rachel Winslow and Carolyn Jordan on a teeter board.

Forest Doughty at school five days in one week.

Grace Libby not making eyes at the boys.

Pearl McLaughlin and Thelma Strout separated for one minute.

Hilda Porter with light curly hair and blue eyes.

Mr. Winslow calling his daughter, Frances, a "Timid Little Girl."

Leslie Shaw not being Grace—ful.

Don Barton with his mouth shut.

Abe Montague as a woman hater.

Shailer Hayes not sitting with a girl.

Harris Corey with a dress on.

Mr. Winslow with "a pug nose."

Carolyn Jordan shimmying.

Hazel Hoey carrying a Burdin on her shoulders.

Ola Watson missing a dance.

Hazel Hoey not having a date.

Carolyn Jordan playing basket ball.

Ruth Tame keeping quiet five seconds.

Richard Blanchard making up faces.

Shailer Hayes trying to be a hero in the girls' eyes.

Ruth Tame raising the Old Dick instead of the Old Harry.

There is a little boy
Who goes to our school.
He is anything but an angel.
He acts more like a fool.

He has a little girl
Flossie is her name.
She lives a long ways off,
But he gets there just the same.

He's getting kind of footsore now,
For he often has to walk,
And when he gets there in the evening,
All he does is sit and talk.

Now I've told you all I know
And it certainly is enough,
For that little Kenneth Packard
Is surely very tough.
