Dear Walter:

Enclosed please find an application for a machinery and explosives permit for our Claim #86-1 adjacent to our Alder Pond Project. As ice conditions have been unsafe till this recent cold spell we have not been planning to conduct any work on the ice. This has changed and now while the ice is thick enough we will be doing some work. This application is not timely but in the past we have been able to call on you to get things done in a hurry for us. If we could get a verbal O.K. to begin some work the middle of next week it will allow us to hit the ice with some good conditions. Thank you for our help in this matter.

Sincerely,

A handwritten signature in cursive script that reads "Chris Mattson".
