**MERRICONEAG BALL TEAM WINS FROM COLONY.**

VICTORY FOR THE HOTEL NINE LAST FRIDAY BY GOOD TEAM WORK.

Varied Notes of the House Guests and Doings.

The Merriconeag base ball team won a decisive victory over the Colony team last Friday on the Colony grounds by a score of 14 to 11. Much interest was displayed in the game as it was the first the former team had won for some seasons, but they had the goods and with Thomas in the box and Capt. Tracy Peck, Jr., behind the bat they put up as good an exhibition of ball as has been seen here for many a year. The features of the game were the batting of Hamlin of the Merriconeags, who made a single, two 2 base hits and a 3 base hit out of five times at bat. The routing of Dr. W. A. McCandless of the Colony was also a feature. The Colony team was forced to use three pitchers during the game which was umpired in a very professional manner by Mr. John R. Cummings of New York, who is a guest here. Every batter on the Merriconeag team got at least one hit. The latter team was weakened by the absence of William J. Ryan, who sprained his ankle while practicing during the morning. The Colony batters got some hits off Thomas in the first three innings but were unable to find him after that until the ninth, when they got three runs. Peck's catching and throwing was worthy of mention also. The following was the make-up of the team: Hamlin, 1b; Payson, 2b; Thomas, p; Howard, cf; Sharon, rf; Peck, c; Bartlett, 3b; Margraf, lf; Collins, ss. The Colony played with their regular men using Ridgway, Lord and Brown in the box.

Accident At Harpswell Center Sunday.

The crowds that patronize this resort are getting noticeably larger as August draws on. The Merriconeag House had refused accommodation to 330 parties who applied by letter and 75 personally up to July 27. Shall we see a 100 room house there next year?

The sale of fancy articles at the Auburn Colony hall last Wednesday evening netted about \$130.00. The amount was considerably swelled by the slick auctioneering of Mr. R. M. Hubbard, who proved the truth of Barnum's famous assertion many times during the sale. Some painting by local artists went at high prices as Mr. Hubbard commended them as genuine productions by some of the old masters. Mr. J. A. Blake, president of the Colony Association, presided at a table as did also Mr. E. W. Baxter the treasurer.

Mr. J. A. Blake has returned from a few weeks spent in Vermont on business.

Dr. J. S. Kingsley has returned to his cottage from a trip to Monhegan the past two weeks.

Mrs. Mysenburg and Miss Sallie Block of St. Louis are being entertained by Hon. E. L. Pickard at his cottage. Mrs. Mysenburg and Miss Julia Pickard are intimate friends, having travelled extensively together in Europe several years ago. The former has been spending the summer at Provincetown, Mass.

Dr. W. E. Paul of Beacon street, Boston, is stopping at his father, Mr. E. W. Paul's cottage here. He was one of the judges at the yacht and motor boat races Saturday.

The house boat Wm. F. Miller of Boston has been here again the past week. She was at anchor last season for a few days. The knockabout Lethe which won the third class race Saturday is an auxiliary craft to this boat.

The handsomely fitted steam yacht Ethelma of Providence, was in the harbor Tuesday night. Her electric lights and search lights were turned on the Point, while she answered with similar lights a display of colored fire at the Merriconeag House.

Mr. Jordan White and family and Mr. Elmer White and family, who are summering here sailed up to New

FIRST REGATTA OF THE SOUTH HARPSWELL YACHT CLUB SATURDAY.

Cheemaun First in Motors; Sheerwater, Packard and Lethe Each Led Their Class in Sailing.

It is getting to be the usual thing for the yacht races at South Harpswell, which are usually held each season in August, to start in with either a fog or a flat calm on the first day of racing. Last Saturday looked at dawn to be no exception, in fact the fog was thicker than even the most pessimistic had predicted. Things were doing at the new club house landing, however, for there was a chance for the morning motor boat races should the fog lift a little during the forenoon.

The ladies had decorated the little club house with bright flags and some soft rugs and reclining chairs made the place look very comfortable. A punch bowl and glasses inside were suggestive of still more comfort, though thus early in the day the bowl was lacking its "flow" which was to be added later.

Commodore Spaulding, Vice Commodore Sherman and Dr. Austin, the Fleet Surgeon, were on hand early and had their motor crafts tuned up, when at about ten o'clock the bay cleared of fog, and the morning races were called by the signal gun from Fleet Capt. Currier's launch, in which the judges were already snugly ensconced, flanked by buckets of iced ginger ale and boxes of cigars. The course was right in sight of the point, four times around the bell buoy off Little Birch Island. The race was governed by local rules, but future races will be decided according to Power Boat Association rules. The following was the result, the corrected time being calculated approximately from a trial heat.

Boat	Start. ed.	Finish- ed	Elapse- ed time	Cor. time
h. m. s.	h. m. s.	h. m. s.	h. m. s.	h. m. s.

Sheerwater	10:25:00	12:17:48	1:52:48	1:46:32
Wawa	10:25:10	12:20:02	1:54:52	1:50:22
Auco Bow Bow	10:25:00	Withdraw		
Canacum	10:25:00	Withdraw		
Lethe	10:25:10	Withdraw		

The courses for the first and second class yacht races were from the starting line off the pier round the bell buoy, thence to Whaleboat Ledge buoy and return, for the third class boats. The first and second class sailed around Sand Island buoy after passing Whaleboat Ledge buoy making thence to the bell buoy and finish line. This course measures about nine nautical miles.

The Sheerwater owned by Commodore Spaulding was alone in the first class as several nearby yachts were away for the day. This fast boat did a pretty performance, going over the course in a light breeze in remarkably short time. The second class brought out only two starters, but the third was interesting with five yachts jockeying for position. At the turn of the buoy at Whaleboat some clever work was done by the Lethe and the Florence, also the Stappinsal III. Some of them must have scraped paint on the red stick and booms and bowsprits were in dangerous proximity.

The Macedonian Circle of Kings Daughters will hold their annual sale and fair at Hamilton hall, Friday evening. It is understood the entertainment will be furnished by local summer residents.

It was rather discouraging for the summer visitor who arrived at Center Harpswell Saturday for a vacation and had his leg broken Sunday from a kick by a frightened horse. You may have guessed the cause—an automobile. Dr. Littlefield attended the case.

Mr. Irving Farmer and family of Farmington and Mr. and Mrs. J. W. Taylor of Freeport are at C. E. Conner's Bay View cottage. They have spent several seasons lower down on this point.

The Kings Daughters Circle of the Congregational church at Harpswell Center held a fair and supper last evening which was largely attended.

Fire balloons from Chebeague Island attracted attention Tuesday night. They sailed over to the number of six having made the six mile

passage safely. Mr. H. G. Lord will arrive at his mother's cottage here about the twentieth. He is a superintendent for the Newark, N. J., Street Railway Company.

Whist experts at the cottages of the Colony are sharpening their wits to defeat Dr. Walter Paul and Mr. Sanger who have issued a general challenge. It is said that Messrs. Paul, Sr., Pickard, Blake and Baxter have a good fighting chance if they can get the cards coming their way. Mr. E. F. Packard is also known as an expert at the game.

Dr. E. F. Packard of Boston has been at the Packard cottage since Monday. He has not visited South Harpswell for two seasons.

Mr. Osceola Currier and a party in the launch Seminole visited Gurnet Bridge Tuesday. The motor launch Canacum also went with Dr. McCandless and family on board. It was rather a strenuous trip for both boats as the channel is not extremely well marked at the upper end and both touched bottom once or twice at places where the tide runs swiftly.

SECOND ANNUAL FIELD DAY CARNIVAL AT CHEBEAGUE.

All Events and Races Went off on Schedule Time in Charge of Efficient and Hustling Committee. Hotels and Cottages Handsomely Decorated.

SWIMMING EVENTS MONDAY. FIREWORKS IN EVENING.

Tuesday the Big Day For Field Sports. Chandler's Band Rendered Inspiring Music Both Days.

Nature smiled her prettiest greeting to the early morning waking-faces of the dwellers on Chebeague island Monday morning, ushering in the second annual field day with a blaze of sunshine, an invigorating breeze and a promise of ideal weather for the long planned water sports to which the day was to be devoted.

Young and old, permanent resident, summer sojourner, cottagers and hotel boarders all were awake early, eager for the grand program of entertainment which had been provided after careful planning by the committee, that the preferences of all might be given due consideration. That all were more than satisfied with the entertainment offered them was evinced as much by the happy countenances and general spirit of interest and pleasure as by the words of appreciation generously expressed as each event was contested and as the day's joys closed with a brilliant illumination in the evening.

The dawn's first streaks in the eastern sky were a signal to hotels, cottages, and stores to assume their decorations and the buildings were all soon festively arrayed in bunting hangings, strands of golden rod and myriad Japanese lanterns. Never before was the island so prettily garbed nor did the houses ever develop such keen rivalry for success in the several competitions. Each of the principal hotels had selected its colors and these were conspicuous in flags, ribbons, streamers and devoted to every imaginable use. The pennants of the largest houses were Hill Crest, red with white letters; The Hamilton, dark blue with white letters; The Summit, light blue with white letters; Hamilton Villa, dark blue with white letters; Orchard Cottage, gray with red letter; Island View, violet with white letters and Bay View, red with blue letters.

General sociability and convivial entertainment characterized the early forenoon. The band, Chandler's Military band and orchestra, first regiment, N. G. S. M., arrived at Littlefield's landing on the 11.15 boat. The line of march was quickly formed and the band headed a gaily-clad procession, in which over 300 participated, to the Summit House, where a flag raising was the next event on the program. At the unfurling of the flag the band played "The Star Spangled Banner," after which Thomas J. Bissell, secretary of the general arrangements committee led a grand chorus in chanting the first two verses of "America."

The Hamilton colors then took right of way and the procession wended its way to the Hamilton. Here the delegation from each of the houses cheered lustily for its own hotel and a three-times three was given for the Hamilton and for the field day committee.

At 2.15 p. m., gathered a concourse of nearly 500 enthusiasts, who thoroughly enjoyed the following program which was rendered on the lawn in front of The Hamilton.

March—Fusillier, Heed Overture—Mysora, Wettge Song—Trombone Solo, Blanke Mr. B. L. Greely, Blanke Waltzes—Wedding of the Winds, Hall Intermezzo—Iola, Moret Selection from Fantana, Hubbell Caprice—The Whistler and His Dog, Pryor Medley—Overture Remicks, Hits No. 2, Lampe Intermezzo—Flying Arrow, Holyman Finale—Light and Gay Galop, Laurendeau C. M. Brooks, director.

During the concert Mr. William G. Hill, rifle expert, gave a half hour's exhibition of fancy shooting at flying targets and other special targets. His work was generously applauded, as he had a handicap in the strong wind, which interfered with the most delicate shots. His closing shot at a marble thrown in the air smashing it to bits with the first cartridge was to the hosts with the performance and "brought down the house."

The bathing beach was the next scene of operation. Aquatic sports held the attention of a monster gathering and the mishaps and prowess of the performers in the water won frequent bursts of applause. Each event was closely contested and the successful participants were given cheers by the rooting parties from their respective houses. After careful consideration the judges announced the following summary:

In the evening between the hours of 7.30 and 9.30 o'clock residents on Great Chebeague and a large number of guests from other islands of Casco bay divided their time and attention between amuseur and spectacular delights. At the Hill Crest hotel the band discoursed the following stirring program, well applauded:

March—Always Forward, Missud Overture—Neptunes Carnival, Stimson Romance, Trombone Solo, Bennett Mr. B. L. Greely, Bennett Waltzes—Golden Sunset, Hall Intermezzo—Moonlight, Moret Selection from the Explorers, Lewis Caprice—Happy Heine, Lampe Medley—When the Whip-poor-will Sings Marguerite, Helf & Hageer Valse Leute Azuree, A. DeGaney C. M. Brooks, director.

On the large lot adjacent, an exceptionally excellent display of fireworks was given under the supervision of W. H. Chase of Portland, representing the Eastern Arms & Cycle company. Rockets, roman candles, red fire and huge pinwheels were set off between a number of very pretty and unique set pieces, several of which were designed especially for

Chebeague's celebration. Then all dispersed for their several headquarters found in praise and appreciation of "one of the happiest days of their life," to be rested for an early rising and fuller enjoyment of the field events and great ball which were arranged for.

THE SECOND DAY.

It seemed as if the sports of Monday were but an appetizer for Tuesday's events. At an early hour cottagers and hotel visitors were out in full force displaying their respective colors, and coaching their representatives in the competitions. At 9 o'clock the call was sounded for the initial track event which was promptly responded to and from that hour until after five o'clock participants and spectators were alike keen for interests of individual competitor and house teams.

Miss Nina Bissell had the honor of winning the first race and from the time she broke the tape yards ahead of her field in the fifty yard dash the Hill Crest athletes kept piling up points until they had aggregated a grand total of 50 with the Hamilton and Summit House tied for second honors with 21 points to their credit. The potato, barrel, pipe and sack races were keenly enjoyed—the rivalry in each event was intense and the winners in every instance were cheered most lustily.

A pretty exhibition of high jumping was given by John B. Thomes of Portland, who broke the State intercollegiate record at Bowdoin meet last June. He kindly consented to try a few times at the bar above five feet and without rest between jumps, cleared it clearly at 5 feet, 7 inches. This is by no means the best performance this clever athlete is capable of in competition, as he is probably the best amateur jumper in New England. His work deserved and received vigorous applause.

The band did yeoman service during the day and everything combined to make the field day a perfect one. The program of pleasures closed with a grand ball in the evening at the Hamilton, an account of which will be found in an adjacent column.

large dining room is often crowded to its utmost capacity by these transients.

On Saturday a raffle was organized here among the guests, the prize being a Cluny linen lace luncheon cloth. Many tickets were sold, and some excitement was manifested, for the prize was a very handsome piece of work. There was a small fancy dress ball and masque in the parlors Friday night in which only eight or ten couples participated. A good time was enjoyed by the dancers despite the small number present.

The government boat Henry Wilson ran ashore on Cushing's Island at a point just inside the channel separating that island from Peak's, Saturday morning. The fog was extremely thick at the time, and the captain missed the buoy. As the tide went out, she was left high and dry on the rocks, and it looked as though it would be difficult to get her off, but at high tide in the middle of the afternoon, the revenue cutter Woodbury started her off without much trouble. **SNIVELY WAS THE AUTHOR**

The "Pond Island Story," one of the best short stories having the breath of Casco Bay that we have ever published, was credited in our last issue to A. D. Snively by mistake. The author is Mr. A. D. Snively, who is summing at Easley Island, who kindly donated it to our columns.

**Government.**

Formerly the business of confining the plain people to their proper political function of paying the taxes was managed by means of a standing army, but as men became more enlightened, and easier to fool, it was at length possible to resort to the cheaper device of constitutional government.

Constitutional government cleverly defeats the will of the people by the people's own authority. It is called so because its chief instrument is a constitution, or covenant, which the people are induced to bind themselves by when they are in a transcendental mood and don't know whether they are afoot or on horseback, and which is couched in such terms as to preclude its amendment to the disadvantage of the existing order.

Sometimes it is deemed expedient to have an elective legislature to flatter an ancient prejudice against taxation without representation, a judiciary for small thieves, and an executive to watch over the national honor, but these things are not essential.

Under constitutional government nations have attained to a commercial prosperity hitherto unknown, and if that doesn't raise its superiority beyond question, what will?—Life.

**Carlyle's Bad Shilling.**

A farmer in Manitoba wears on his watch chain a blackened metal disk with an interesting history. Thirty years ago the farmer was a ticket agent in the railway station in Dumfriesshire, England. One day Thomas Carlyle took a ticket for a short run by rail and laid down a shilling. The clerk, eager to obtain a souvenir of the famous countryman, secured the coin. Ultimately, although sorely against the grain, he was driven to part with the treasured Carlyle shilling. But it would not stand the ring test. Somebody had palmed off on the "sage of Chelsea" a spurious shilling.

**POSTAL HIGHWAYS.**

**Good Roads Needed for Prompt Mails.**

The plan of co-operation for the improvement of public roads instituted several months ago among the Postoffice Department, the Department of Agriculture and various state highway officials is developing satisfactory results, writes the Washington correspondent of the New York Tribune. A letter received at the Postoffice Department from the State Engineer and Surveyor of New York states that a bulletin is to be issued furnishing directions and suggestions for the guidance of town officials having care and authority over public highways in the State of New York, and that it is desired to publish therein the requirements of the department relative to the establishment and continuance of rural delivery routes. Assistant Postmaster General De Graw has communicated with State Engineer Van Alstyne, and hopes to secure co-operation of the New York State road officials in the general movement for good roads.

The requirements of the department concerning establishment and maintenance of rural delivery routes include as conditions precedent to the establishment of a route that roads shall be in good condition, unobstructed by gates, and that there shall be no unbridged creeks or unfordable streams. These requirements have resulted in the expenditure of many thousands of dollars all over the country in road improvements and bridge building by communities which desired the benefits of rural delivery of mail. Failure to maintain roads covered by rural routes in condition to be traveled with facility and safety at all seasons of the year is considered sufficient cause for withdrawal of rural delivery service from a community.

The plan of co-operation referred to includes forwarding to state road commissioners reports from rural carriers concerning the condition of roads on rural routes; also that postmasters shall ascertain the condition of roads in the vicinity of their postoffices and forward reports directly to the state officials. In Illinois the State Highway Commission has sent out a list of questions to be filled in by rural carriers, giving information relative to the highways which they traverse in delivering mail. Information as to the methods used in keeping roads in repair is also being disseminated in this manner. The State Road Commissions of Wisconsin and Missouri joined in this movement some months ago, and are now actively co-operating with the departments. Postmaster General Cortelyou and his assistants believe the rural delivery service can render great assistance in the important mat-

ter of improving the public highways, and hope within a short time to have the co-operation of all state road officials.

**The Uses of Oil.**

Every person requires a certain amount of oil in his food in order to be healthy. Our ancestors lived, to a large extent, on olives, peanuts, chestnuts and other nuts containing oils. The present generation uses too little oil in its diet. This can be taken in the shape of the pure expressed olive oil, or an emulsified salad dressing, or by eating nuts, olives, etc. It may be a matter of choice how the system gets its oil, but a certain amount is essential to the enjoyment of good health. The good results of the habitual use of the above articles in the diet are soon shown, especially where persons are inclined to colicky indigestion and constipation.

Doctors will do well to instruct their patients to use pure olive oil in moderate doses, also as a dressing for salads. Various kinds of nuts have a high dietic value, because of the oil which they contain, and can be used to advantage. When patients incline to consumption, pure cod liver oil ranks at the head of oily substances, but the lesser oils can also be taken in moderation.

Nature furnishes us many cures for the successful treatment of diseases. If we will but study her methods instead of following fads. The result will be greater progress in building up resistance and immunity to disease.—Boston Cultivator.

**Prosecuted for Sneezing.**

Great public interest is being manifested in the case of a man who has been prosecuted for sneezing in a public street. The hero of the incident is one Johann Furtmann, a resident of Muhlhausen, a small town in Prussian Saxony. Furtmann, who is highly respected by his fellow citizens, sneezed somewhat loudly in the main street at Muhlhausen. A policeman arrested him on a charge of creating a disturbance. The local police authorities prosecuted Furtmann on a charge of gross misdemeanor and rendering himself a public nuisance. After a lengthy trial Furtmann was acquitted. The police authorities appealed against the decision, and a new trial is necessary. Furtmann announces that he will call medical evidence to prove that a polypus in his nose prevented him sneezing less loudly than was the case when the arrest occurred.

particulars with visions of another hero wearing a Carnegie medal. "How did it happen?" said the man addressed.

"Well, we all got aboard Mr. Sweet's boat to go over to the mainland, and I noticed she wasn't much used to the water. I supposed she could swim, but she was so bewildered that she didn't appear to make a motion. After we got to the Point, I got her in the boat and she was quiet enough the rest of the way. She's been half wild ever since I bought her, and that's the reason I was taking her over to Pettingill's to exchange her for one of his Jerseys."

## A Farmed Out Highway.

The railroads, by all the laws of the nations, is quite as much a highway as is a wagon road. But instead of levying direct taxes for keeping up the rail-highways (as do the people of Prussia, Austria, Switzerland and other countries) we Americans "farm out" the power of taxation to private individuals organized as a railroad corporation. The old kings farmed out the power of ordinary taxation to their favorite barons in the same way. The instrument that conveys this power upon a railroad company is a "charter." It gives the railroad company the right to operate the rail-highways and to charge a freight rate (at tax) for doing it. Railroad presidents and directors are thus by appointment made the people. For railroads are not now and never were, private property like a farm or a grocery store. They are highways.

The first essential of a tax is that it shall be just. To establish that point the Anglo-Saxon people have shed rivers of blood; our English ancestors revolted against the old barons who taxed both unequally and extortionately. Our American progenitors tossed the British tea into Boston harbor and fought from Lexington to Yorktown to establish the principle of fair taxation.—McClure's.

## Twins Aged Seventy-One.

Meyer and Isaac Abrahams, probably the oldest twins in Illinois, celebrated their seventy-first birthday and the fifty-seventh anniversary of their arrival in Chicago, says the Chicago Chronicle. They declared that they were as hale and hearty, also as lively, as they were in the '50s. "We came to Chicago in 1857," said Meyer, "when the town was a mere village compared to the present Chicago, but I knew it was going to be a great place even then." "No you didn't," interposed Isaac. "I remember mighty well in the summer of '54, when you said that this place would never amount to a hill of beans." "Well, that was because I had just been swindled on my farm that lay where the Rock Island station stands now. That man certainly overcharged me—\$8 an acre, when!" And thus the old twins argued on of times during which few men now in Chicago were living, to say nothing of buying farms. The birthday celebrations, which were attended by the families of the twins, were held at the home of Meyer Abrahams, 613 South Canal street, where he has lived for 43 years. Isaac Abrahams is an attorney and can still be found pleading cases in the justice courts. The twins were born in Germany and came to the United States, accompanied by their mother and father, in 1845, and have resided here ever since.

## Snake Blew the Steam Whistle.

A rattle snake crawled upon the boiler of the sawmill here sometime last night to keep warm. To escape the heat when steam was being raised this morning the serpent wound itself around the rope attached to the steam whistle. Its weight was sufficient to cause the whistle to blow continuously. The people of the village, thinking the mill was on fire, hurried thither with buckets and found Irving Durnill, the engineer, shaking with fear. He had seen the snake and was afraid to enter the engine room. Sam Sterling procured a shotgun and killed the reptile, which measured three feet in length.—Martinsburg despatch to the Baltimore Sun.

## Diamond Romance.

Brazil has been called the "land of diamonds," and her mines are among the richest in the world. Negro laborers working in the gold mines of Serro de Frio in the early part of the eighteenth century collected the "shining pebbles," which they used as counters in their crude card games. Struck by their brightness and geometrical forms, a Portuguese officer forwarded specimens to Lisbon, where the Dutch consul pronounced them diamonds.

Most houses on the bay overcrowded! What next?

Couldn't have been better days for the big field day!

Promises are good for many new cottages next season.

Weren't the costumes "swell" at the big ball at The Hamilton?

We saw roses blooming on Bailey Island last Tuesday, Aug. 15—pretty good, eh?

Orders for the Breeze this week show an increase of 24 percent. Guess we're growing—watch us!

A new stunt—last week a 15 year old Bailey Island youth swam across from Orr's Island with his clothes on—that's going some!

Seen our Tourists' Register? It's a popular institution and may help you to find very congenial friends—better look it over.

Did you ever see so many healthy looking young women as are on the islands of the Bay. It's better than medicines and doctor's bills every time.

Every steamer brings those who en-thuse about the beauties of the Bay—they have thought our words of commendation "bluff"—now they are converted and believers.

Another well-deserved compliment to our steamer pursers. Two traveling men this week told us they are "the nicest men" they ever met serving in that capacity, and they didn't know at that one-half the courtesy they show Casco Bayites.

GLORIOUSLY SUCCESSFUL.

"O there shall be feasting and music And the cares that infest the day Shall fold their tents as the Arab And as silently steal away."

The island of Great Chebeague has observed its second grand field day. A two-day event and it would seem sufficient to say it was gloriously successful. Greater appreciation must, however, be given to those, whose earnest endeavors so co-operated to accomplish this much desired result. To the committee who had the big event in charge must fullest gratitude be manifest. Chebeague has ever been noted for its public spiritedness—yet never has any board of directors labored so tirelessly that others—all might be the happier. The list of events was varied and conducted with all possible dispatch, fairness in competitions and thoughtful consideration for the individual.

Again most favorable comment be expressed of the disinterested endeavors of the competitors in the athletic events. All could not win—let us hope it was always the best man who did win—that, at any rate, seemed to be the spirit actuating all. There was individual rivalry and house-rivalry but withal a genial good fellowship, a sportsman-like spirit of fair play for all which made each event an unalloyed pleasure and profit to participants and witnesses alike.

Nor must it be forgotten to whose generosity must we be thankful for the "materia prima" which gave a basis for the "forma substantialis" of the celebration. Those whose purse-strings were pulled wide open to defray necessary expenses must have felt fully satisfied when they saw the happiness of heart which each countenance reflected. All were happy—must it not have been sufficient recompense for those who created that happiness?

To one and all whose presence encouraged the athletes, to those whose house decorations lent color to the days' outing, to each whose own happiness led them to share their joy with others, we, the Breeze, the organ of Casco Bay speak for the committee and for the Island of Great Chebeague, appreciation—gratitude—and the hope that next season will see another and if possible even more enjoyable and enjoyed observance. As was the cry on Monday and Tuesday: "What's the matter with Chebeague? Chebeague's all right! What's all right?—Chebeague! !"

PLYMOUTH ROCK'S CRACK.

Its Origin Involves a Unique and Ridiculous Bit of History.

Plymouth has been called the cradle of New England. It is on the coast, thirty-eight miles south of Boston, and is a thriving and prosperous New England town, with good schools and churches, and town hall, and shops of all kinds, and comfortable homes.

On the flat strip of land that runs for miles up and down the shore of the bay, the diminutive white houses of the fishermen are crowded close together. In the centre of the same flat land-strip, flanked on both sides by the fishermen's homes, is a large, open square forty yards from the water-front. Here stands Plymouth Rock, the first sight of which gives one a mental shock, for, no doubt, fancy has pictured an immense boulder rising grandly out of the sea; but, instead, the visitor sees only an oblong, irregularly-shaped, gray sandstone rock twelve feet in length and five feet in width at the widest point, and two at the narrowest. Across one part runs a large crack which gives to Plymouth Rock a highly artificial appearance. The origin of this crack is a bit of unique history, and bears evidence to the early differences that at times divided the inhabitants into two factions.

For a long time there waged spirited and bitter wrangling between the opposing parties, and it even settled down upon the much-cherished Plymouth Rock, which one party declared ought to be removed to a more worthy position in the town square, and the other wranglers protested it should not be moved an inch from its position, even though they had to guard it with their pikes and guns.

Finally, the stronger faction drew up their forces around Plymouth Rock, and in attempting to move it up the hill split it asunder, which seemed a bad omen for those who had attempted such a thing, until an ardent Whig leader flourished his sword, and by an eloquent appeal to the other zealous Whigs convinced them that they should not swerve from their plan of carrying the rock to a place in the town square.

"The portion that first fell to the ground belongs to us," he cried; "and that we will transport with all care and diligence to its proper home."

Twenty yoke of oxen drew the Whig section of Plymouth Rock up the hill, amid the shouts of the throng that pushed forward around the liberty pole which was to mark the new site. The ceremony of dedicating the rock in its new position was very impressive, and the people stood with bared heads, and in reverent tones chanted their high-pitched psalms in token of thanksgiving.

In the town square this part of Plymouth Rock remained for more than half a century, when a committee of the council resolved to move it back to its original position, and join it, as best they could, to the other half. Accordingly, in 1834, on the morning of the Fourth of July, the Plymouth Rock had been re-united in all seriousness to its long-estranged portion, and the union made complete by a mixture of cement and mortar.

Today four granite columns support a canopy of granite that offers Plymouth Rock an indifferent protection against the rain and the sun, and serves to keep back, in some measure, the thousands of sight-seers that come to Plymouth with only one object in view, namely, to press up around the iron bars, and to gaze through them at the revered rock, on which they see the single inscription, cut in the middle of its face in long, plain figures, "1620."

The rock is surrounded by a high iron railing composed of alternate boat hooks and harpoons, and inscribed with the illustrious names of the forty men who drew up the Pilgrims' compact on board the Mayflower that November day as they sighted the coast that henceforth was to be their home.—From Cornelia Hickman's "A Visit to Plymouth Rock," in St. Nicholas.

Survival of the Fitter.

Two plumbers were in a bank building the other day, when an explosion of gas wrecked the structure. Several people were killed, but the plumbers simply were blown out of the window and picked themselves up unhurt.—St. Paul Pioneer Press.

Paper-Bag Housekeepers

By Winifred Black.

PAPER-BAG housekeeper came and told me her troubles this morning while I was sitting on the porch watching the finches building a snug nest in the swaying vines.

"What in the world are we all going to do?" she said "I'm just about crazy trying to get something that my husband will eat. I wish the old newspapers would stop telling me what awful things everything is made of. It doesn't help it any to know all about it; so what are we going to do—live on air?"

"Now, there's sausage. I had sausage for breakfast this morning, and not a bite of it would my husband touch. Then I sent out and got some ham and eggs cooked, and he nibbled a little at the eggs, but wouldn't even look at the ham. Last night I had catsup on the table, and my husband made me have it taken away again. He wouldn't touch the jelly cake at lunch because he said he didn't know what the jelly was made of, and not a bite of pie or any kind of pastry will he eat since he's read about the lard. I don't know how we are going to keep from starving."

"Why don't you make your own sausage and your own catsup and your own jelly and try out your own lard the way your mother used to do?" I asked innocently; "and the bread—can't your cook bake?"

"Good gracious!" said the paper-bag housekeeper, "my cook can't make any of those things."

"Bake 'em yourself," said I. "Why not?" And the woman stared at me as if she thought I had gone crazy.

And yet that woman bothers all her neighbors to death running around and telling them her troubles because she hasn't enough to do to keep her out of mischief.

A woman who can afford a good cook can afford to pay that cook for making a few of the things the paper-bag housekeeper and I were talking about, and a woman who can't afford a cook ought to be delighted to make them herself.

If I were a man and my wife insisted on having an imitation dinner sent home in a paper bag, as so many women do insist on doing, I'd bring her home a little imitation money to pay for that dinner once in a while.

What's happened to all the home-made bread? How long is it since you ate any home-made sausage? Who bakes the pastry at your house—the cook or the baker?

The plain, disagreeable fact is that the average American woman doesn't know any more about the real duties of a housekeeper than a pushcart man, and she's too indolent and too indifferent to learn.

Every butcher and grocer shop nowadays has a "home cooking" department, and you can't get within ten feet of the counter, without standing in line for your turn.

I stood and watched a line of women buying "home cooked" macaroni and "home cooked" beans and "home cooked" hash and "home cooked" mince-meat the other day till I wondered what on earth was the matter with the modern home and the modern home maker, that all the "home cooking" has to be done in a shop.

Talk about an industrial revolution! Some day the men of this country will rise in a "decent cooking" revolution, and then perhaps there'll be some chance of knowing what you are eating at your own table.—New York American.

..A.. Simple Question That Isn't Answered

By Joseph R. Buchanan.

WHAT is a workingman? Put another way, Who constitute the working classes?

Simple as this query may appear, it really has no generally accepted answer. Taken literally he who works is a workingman. But how much of his time must be devoted to work to place him in the working class? And must his own labor be necessary to his maintenance?

There are those who would say that a workingman is one who works for wages. But suppose he is president of an insurance company and receives a salary—not wage—of \$50,000 per annum.

Why, there are clerks and office men who receive a munificent "salary" of from \$10 to \$30 per week, who indignantly repudiate the idea that they are workingmen—that they belong to the working classes.

You can't draw the line between those who work with their hands and the "brain workers," because it takes some "brains" to work with one's hands. And those who sit still and allow the wheels in their skulls to do all their work are very very scarce.

But the funniest thing in this connection is the average business or professional man, who in one breath says, "Why, I am a workingman myself," and in the next asks, "How far do these workingmen, with their everlasting kicking, intend to push us?"

In Leeds, England, they are having some trouble in trying to find a satisfactory answer to the question, "What Constitutes a Workingman?" A special rate of fare is fixed for workingmen who ride on the street cars of Leeds.

They have tried to decide in the courts who are entitled to use the workingmen's tickets, and the local legal mind has been much exercised over the question. But nothing definite has been decided in the matter.

However, the tramway conductors have adopted a rule for their guidance. If a man wears a collar he is not accepted as a workingman, and must pay the higher rate. If his neck is bare or he wears a muffer he is entitled to the privilege of a cheap ticket.

That rule wouldn't work very well in this country, where the mechanic or the laborer is frequently as well dressed as the merchant on the seat beside him, and collars are as common as coats.

No, that test will not do—for us, at any rate. We will have to leave the question for settlement until the time comes when honest industry will rank higher than it now does—with some folks—as a measure of a man's fitness for favor.—New York Evening Journal.

The Farmer's Individualism

By L. H. Bailey.

FARMING is virtually the only great series of occupations that is unorganized, unsyndicated, unmonopolized, uncontrolled, except as it is dominated by natural laws of commerce and the arbitrary limitations imposed by organization in other business.

In a time of extreme organization and subordination of the individual, the farmer still retains his traditional individualism and economic separateness. His entire scheme of life rests on intrinsic earning by means of his own efforts.

The scheme in most other businesses is to make profits, and these profits are often non-intrinsic and fictitious, as, for example, in the habit of gambling in stocks, in which the speculator, by mere shrewdness, turns over his money to advantage, but earns nothing in the process and contributes nothing to civilization in the effort. If the farmer steps outside his own realm, he is met on one side by organized capital and on the other by organized labor. He is confronted by fixed earnings. What he himself secures is a remainder left at the end of a year's business.—The Century.

Telephones and Rural Life.

The wide extension of the use of the telephone in city and country is one of the most remarkable phenomena of our day. The report published in Monday's Sun shows that in 1902 there were in the United States 3,400,000 telephones and some six billions of messages were sent. There are three classes of systems—the commercial, the mutual and the "independent farmer, or rural," the last-mentioned having a mileage of 49,965 miles. The general use and advantages of the 'phone in cities are well-known, but few city people are aware of the extent of its use in rural districts or of the many ways in which it has modified the conditions of country life. Like the locomotive the 'phone "annihilates distance." It economizes time and locomotion by dispensing thus with many obstacles to business and social intercourse. One of the advantages of great moment is the effect of the telephone in improving the conditions of farm life, making the country attractive to persons who could not endure the isolation and dullness of rural existence as it was formerly. Rural crime is more easily kept under, now that the country is cobwebbed with telephone wires. The report notes, for example, the assistance given by the 'phone to constables and sheriffs in suppressing the tramp nuisance.—Baltimore Sun.

### Cousin's Island

The people of the Island Home cottage feel that they have been highly favored in having such perfect weather during the entire two weeks of their stay. They appreciate it especially as the weather in Boston since they left for the Island has been very disagreeable.

None have enjoyed themselves more than the children of the party. On Wednesday evening they entertained the older people with a little performance consisting of tableaux, songs and recitations, given in their tent which was pitched in front of the piazza. The proceeds from the two cent admission were invested in marshmallows which were toasted over a bonfire the next evening and were indeed quite a treat.

Mr. George Barry of the Hovey company, Boston, was in charge of the affair and proved himself a most efficient manager. The task was no trifling one, for Mr. Barry has proved himself a jack of all trades since his arrival. He is without exception the most unique man that ever visited the island and those who have not made his acquaintance have certainly lost a golden opportunity.

Cliff Island

On Wednesday night of last week there was a lively game of "Ghenquyns Uhp" at the "Spruce Gum Shanty." The score was hotly contested, and there wasn't a dull minute in the game. Those present were: Mr. Andrew Field, A. D. Clemens, "Billy" Coyle, Ned and Fred Pollister, Elizabeth and Minette Downes and Alma Pollister.

David Coyle has decided to change the name of the "Cute Cottage," where he is spending the summer, to "Help-yerself Hut."

It was perfect weather here on Sunday, and many tourists spent the day on the island, nearly all the cottagers having visitors to dinner.

Mr. and Mrs. W. W. Gardner of Everett, Mass., are at one of A. F. Black's cottages for the summer.

C. M. Cobb is doing a rushing business at his ice cream and soda fountain stand these hot days.

Mr. and Mrs. William Bloodgood and daughters, Ethel and Jeannette of Montclair, N. J., are at Cliff cottage, where they will probably stay until the middle of September.

Thursday afternoon John Stone took a small party for a sail in his trim knockabout, Iris, to Peaks Island. The party went to the maine at the Gem and enjoyed the show there immensely. They were be-

CLIFF ISLAND

The "discovery" of Cliff Island only a few years ago brought to the notice of the summer visitor one of the most romantic and beautiful of the Casco Bay group. An outside island, for years, it escaped special notice, and only recently has it known the advantages of steamboat travel. The natural beauty of "Cliff" is remarkable. Containing perhaps from 500 to 800 acres, in length some two miles by an average width, perhaps, of half a mile. A high hill or cliff extending the whole length, and nearly in the center, it presents a great variety of scenery. Here are dense woods of spruce suggesting the wilds of northern Maine. Romantic cliffs with huge overhanging crags.

Whose threatening mass, Lies tottering o'er the hollow pass. As if an infant's touch would urge its headlong passage down the verge. Along its gentle slopes are pastures green, with clusters of young spruce and fir, more beautiful than the work of the most skillful landscape gardener. Open glades, beyond which the combination of rocks, ferns and evergreens, is of exquisite beauty, while Old sea worn rocks along the shore Give back the ocean's ceaseless roar. But along the shore also occasionally is found a sheltered cove, providing a good boat landing, while on the outside of the island at the head of a large cove or bay is an elegant sandy beach, where the water is unusually warm for this section, and where the dread undertow is unknown.

From the ridge or cliff, a wonderfully broad and beautiful vision meets the eye, away to the northwest are seen the blue crests of the White mountains, while the green slopes of Foreside and Yarmouth are in nearer view. In the other direction lies the broad expanse of the great Atlantic. The coast line takes in Cape Elizabeth at the south and Sequin's light on the north, while beautiful Casco Bay, with its multitude of green islands lies almost at your feet.

Only a few generations ago two families, the Pettigills and the Griffins, were the principal owners and residents, and these names prevail here today. The permanent residents of the island are typical New England coast fishermen, hardy, upright, honest, of whom it is said, "Their word is as good as their bond."

Although ten miles from Portland city hall, the island is within the city limits, and the city has provided a substantial wharf, and exceptionally good roads, so far as built, and is ready to extend them as needed, while the Harpswell steamboat line provides four trips each way daily, rendering the island easily accessible.

From Boston a delightful night's sail on the steamer Gov. Dingley or Bay State, an early morning sail of an hour among the islands of Casco Bay brings one to "Cliff" in season for breakfast, while the new and well-kept hotel, "The Ancelesco" gives opportunity for a short or long stay upon this delightful island.

A number of cottagers are already located here, and others are coming, while the Cliff Island Improvement society just organized will doubtless prove a powerful factor in making this a delightful summer home.

On Wednesday night there will be a masquerade dance at the Casino.

Canal Revival. Consul Hamm of Hull, writes a comprehensive account of the English canal system, supplementary to his article in Daily Consular and Trade Reports of Feb. 16. A royal British commission of sixteen persons is investigating the canals with a view to their improvements. The fact that is drawing attention to these waterways is the part German inland waterways are playing in the transportation problem of that country. A German railway car costs \$62.50 per ton of load room, whereas the Rhine iron barges cost but \$12.50. The motive cost of propulsion is also much less by water. Mr. Hamm's report is replete in further details, and can be read or copied at the bureau of manufactures.—U. S. Consular Reports.

Dogs Used to Smuggle Laces. Some clever ruses to outwit customs authorities along the French frontier have been revealed by the capture of a dog. Before making use of this dog as a lace-carrier, the smuggler crossed the border often with him, so that the customs officers might know the animal. Then he clipped the dog's coat close, wrapped around his body yards of costly lace and covered the whole with fur like the dog's coat. For five years this dog carried Brabant lace without awakening suspicion. Then a "friend" of the smuggler notified the authorities, who shot the faithful animal. It leaked out that dogs are used for this purpose all along the frontier.

Pigeons are also used for smuggling. Women's watches are sent from Lugano, in Switzerland, into Italy tied to the feet of homing pigeons.

Home—and Lottie! Dan Joyce, that staring man with the haggard, boyish face, at whom the other passengers had glanced so often, gripped his teeth to keep back a shout—or a sob. Home! For him, the gap in those white cliffs looked like the gate of a paradise. Dear England—after two and a half years in the Australian bushland! London, and then—his precious Lottie, waiting for him all these dull months!

He would catch the pale, slight figure by surprise in the strong brown arms, and tell her that love alone had drawn him back six months before his allotted time, and how it had secretly almost broken his heart to leave her to her lonely nurse's routine, with only his old chum Ferrars to watch from a distance that no harm befel her. Only his love—not because of that incredible letter that had reached him in the wilds two months ago!

He was clutching it now. He would tear it up and throw the pieces at her feet. Her tired eyes would fill and brim over; she would sob out on his shoulder that she had written it on a wild, inexplicable impulse, when the loneliness of life seemed too heavy to bear. Yes! He had not once doubted it. His quiet, trusting Lottie!

No, there was some strange mistake that would be puffed away in a moment. Ferrars would have whispered the word of comfort for him! Ferrars, the actor, was the one man living whom he had cared to trust with his heart's deepest longing. For that last brief letter that her fingers had penned had been one to crush and brutalize any man not so sure of the woman he had asked to wait!

"My Dear Mr. Joyce—I shall not be able to write again. You will think it hard, for a time, maybe, but you would think still less of me as a woman if I let you go on hoping and looking forward. Against my will my feelings have gradually changed. I shall only ask you, as a man, not to cause unnecessary pain by ever trying to see me again. I hold you to that. Good-bye.—Lottie Haynes."

Oh, to see her lips quiver close to his own again!—to kiss away all the haze of misunderstanding! "Lottie! Lottie!" he was whispering to himself all the way.

London—Amies street—the house itself—at last! One minute more! \* \* \* It passed. He was turning away, quite steadily, but with a queer pallor under his tan. Miss Haynes was gone away to some hospital, they told him, staring curiously; that was all they knew. Lottie had promised never to give up that room of hers until he came to take her from it as his dear wife. She had gone, leaving no clew.

Ten minutes more and he had rung the same old bell. "Oh, yes, Mr. Ferrars is still with us! We knew he expected some friends, but he is not at home yet—" She hesitated.

"Thanks—thanks! Archie won't mind me waiting!" he said, clearing his husky throat. And he found himself going dazedly up the stairs.

An then presently he drew in his breath sharply. A sudden buzz of voices below; men laughing and chattering. Now they were coming up—Archie leaping on ahead. He could pick out the old careless, rich voice that he would know among thousands. Then suddenly the door was pushed back and Ferrars stood there. Ferrars, not changed an atom!—the old smile on his dark, keen, good-looking face.

It died out. Dan Joyce had sprung, his hand out, that husky "Archie, old fellow!" warm and broken on his lips. But that was all. In the dying light all the blood had seemed to drain from Ferrars' face and left it gray; he stood like a thing of stone. For a full minute, while that muffled laughter came in from the next room, life seemed to have no meaning, and then Ferrars had closed the door and held it fast.

"You!" he staid out. "You here—back in England! What—what—"

"I'm sorry," Dan whispered. "I never meant to give you that shock. Archie, she—she's gone! Gone!" His voice broke, he reached out again, gropingly.

"Dan! I thought of you as thousands of miles away, and—to see you standing in my room!" The hand fell away. He stood back as if scarcely breathing, his face turned.

"Where is she?" Dan asked thickly. "I came—I came home because I couldn't live longer without her. Tell me that, if you know, and I'll go. Where's my Lottie?"

"I do know." He had tiptoed to the door and clicked the key. When he turned there was sweat on his forehead, as after a great mental ordeal. "Dan, I do know—and can't help you. Now you know why I have not written lately—I could not. I heard—I heard there was another man. What could I do when she asked me, on my honor, never to tell you where she had gone? I promised; I had to. I can't break my word to a woman!"

"You must—and will," Dan whispered, never moving. His blue eyes, staring past, seemed to see nothing. "I left her in your keeping, as my one friend on earth. You could have told me, for my life's happiness—and here. You'll tell me now, because, night or day, I shall never rest until I have it from her own dear lips that woman's love—Lottie's love—would die like that."

A long silence. Dan was not quite sure—there seemed to come a thick

mist over everything—but he believed that Ferrars had slipped from the room in that nameless pause. He knew nothing more for certain until Ferrars' hand closed upon his shoulder. Ferrars' voice itself seemed to come from a distance.

"Here, then, take this. I've written it; I've not told you—not broken my word literally. I can't stay to talk to-night; I have to be at the theatre by seven, and my friends are waiting. She's staying there, at that address, with friends, not far off. Send this telegram to her with your own hands."

"I tried to spare you pain by keeping silence. She won't see you—of that I'm certain; so this is supposed to come from a friend of hers, asking her to be at the main park gate by 9 o'clock, on a life and death matter. It's quiet there—the gates close at dusk. Say nothing as to how you found out, and don't go near the house itself. Simply wait, and call here to-morrow to tell me. Old chap, it would be cruel to wish you luck!"

Some word rose in Dan's throat, but it was not sound. He pressed the other's hands and went out. Almost unconsciously he dispatched the telegram.

Nine o'clock! A thin powder of snow was falling. Past 9! He stood on there in the grip of the cold lethargy because there seemed nowhere to go—nothing more to live for. And then, Lottie! Over there, about to cross the white roadway, came the dear slight figure that had moved through his many dreams. He wanted to leap forward, to shout her name; he could only stand rigid.

She had paused, looking around. Only the curb railing was between them. Then she had seen him, and given the thrilling little cry for which he waited. She realized! To her he was a ghost from a dead past. He could just make out the deathly whiteness of her face in the surrounding gloom. She had quivered back; she was going without a word—out of his life for ever!

"Lottie! Lottie, dear hear me! One word—if you ever loved me!"

"Not one—no, not one!" She faltered it faintly, but with determination that went to his heart.

"Don't come near me—I am not worth it! It was not—not like you to stoop to such a trick with a weak woman!"

"Hush! I won't move; I am not going to frighten you, dear! Only let me speak quietly; only tell me what it all means!" He stood motionless on his side of the iron railing. She had changed—yes! There was something in her attitude to-night, in her chilling resolution, that he had never known in the old days. His Lottie!—yet not the Lottie who had clung to him and bade him be strong and brave for her sake.

"If you knew what I have suffered you would forgive me this," he said, imploringly quiet. "It's all a mist; I know nothing except that I have done nothing to forfeit your love. I had your cruel letter and would not believe it; I came back home to tell you so. You never meant those words. Lottie, you can't—you won't—say that you have given to some other man what you gave to me—all that I held precious in life. I worked for you out there; I waited, for your future's sake; I never will believe that you turned from me of your own accord, knowing that I prayed for you on my knees every night—that I—"

It quavered off. His effort had been made. He caught at the rail and put a hand to his eyes. She was looking down as if in deepest shame, but without a visible tremor.

"It is too late," she said in the same faint, cold way. "I—did not realize you would take it so to heart. There is no need to make a scene here; I am known, and—and I ought not to have been trapped by a trick like this. No, I can't tell you any more than I wrote. I don't ask you to forgive me, but just to forget me. If you persist now, I—I must go still farther away and give up my work here. But if you're the man I think, you'll go back and find some better woman who will repay you for all. I dare not stop; I must say good-by."

"Good-by." The man's lips echoed it in a far-away whisper. His staring eyes saw nothing now. The lump in his throat could not be gulped back this time. Only once his hand wavered out, as if in hopes of touching hers, but the dear figure in gray had gone.

Ten o'clock! A groping, haggard figure, he found himself back at the house where Archie Ferrars lived. In that front room the gaslight still burned, but no one was there. He moved to and fro with simply the dull idea that he had come to say "good-by" before he turned back to that lone life in the bush. All unconsciously it was that he took up a newspaper lying there; vaguely his strained eyes focused a blue-pencil mark around one paragraph. He read and reread as a child might have done.

Successful male impersonators are legion; but it is rare, indeed, that we find the man who can don woman's garb, and don with it the graceful charm and femininity essentially exclusive to the tender sex. Mr. "Archie" Ferrars has evidently made a careful study and mastered the subtleties of a difficult role. Not a few among his appreciative audien-

at the Ambigu last night were less skeptical as to the artist's real sex incidentally, we understand that any such doubts are dispelled by the fact that Mr. Ferrars is shortly to be married to a charming lady who

He heard a knocking at the hall door below. And then a voice—low, clear, sad. A woman's voice; the voice that had answered him not an hour ago—Lottie's voice! Here!

He stumbled across. He had heard the maid answer that Mr. Ferrars was at home. He stood rooted a hand to his forehead, staring out. Was it real? Should he wake presently in a sweat to find himself still upon the ocean liner? For a door on that lower landing had opened, and Ferrars' pale, clear-cut face looked out. Ferrars, unconscious of his return to the house, had been in that other room all the while. And Ferrars had called anxiously down.

"Miss Haynes, is it? Why, dear, what has brought you here? What is the matter? I was not well—I did not go to the rehearsal to-night. How strange you look! Come this way—sit down—tell me—you must!"

Flat to the wall the listening man shuddered back as Ferrars leaped up the stairs, sprang in, set the gas blazing, and reached out for a chair.

"No—no!" It was the same dear voice, but trembling and somehow different; it went through Dan's brain with a strange thrill. "I could not rest—I was going straight on to the theatre to find you." She paused. Framed there in the doorway so close she seemed to drain her hands together.

"He is back!" came her whisper. "He is back in England—in London! He was seen only this afternoon. He went to my old address, some one told me. He looked ill and troubled. No, no—let me think."

Archie I can't—I can't be your wife yet. I think of him still—I must, whatever he has done, however faithless he may have been to me out there. You don't know; you couldn't understand a woman's heart. Oh, it would break if I thought he had come back to realize the love he had thrown away—come back to find me another man's promised wife! I wrote that letter. Yes, you made me; but something told me that a true woman would have waited to know from his own lips that he had met a woman he loved better. I have lived in agony, and I wouldn't tell you you had won my promise when all seemed so dark and bitter."

"Lottie!" It broke in a moan from Dan's lips. "Lottie! He is here! Yes; here for love of you!"

He stood there, his shaking arms put out. All was silence. The cry in her throat seemed to be frozen. Ferrars, his friend, had reeled back, and cowered away as from a descending death-blow. Only his lips worked soundlessly as Dan Joyce took his second step, his finger pointing, his voice suddenly strong and calm.

"I know. I know now! What have you done? Now! What have you written, to blacken my struggling life in her eyes? What part was it you played to-night—you, the actor—as the last vile resource of a man in extremity? The part that that paper says you play with such rare success?"

There was no answer. He waited for none. He turned his voice going soft. "Lottie! The light has come—heaven meant this to happen. An hour more and I should have lost you—lost you to this man who has sunk himself body and soul to win you away in my absence—this man who could veil himself in angel's uniform as a nurse—as your own self, to crush me with a lie! You never doubted me; you were blinded, as I was blinded to-night, by the genius of a villainian."

"You wrote!" came the weak breath in that pause. Her filmed eyes looked past at a something too deep to be understood. "You wrote twice, saying that you wished to release me. I was crushed; I had no one to turn to. And yet—and yet—oh, Dan!"

"Come to me," he whispered. "It is all dawned now. I never wrote that. My real letters have not reached you. Look! He has played many parts, trusting that I should never come back in time; but to-night he has played his last. Come to me, Lottie! Only believe, and love will bring the light."

Next moment he stood in the grip of a happiness that paid for all. Two soft hands had framed his face; a slight breast heaved against his own; a trembling figure was locked within his arms, and he knew for certainty that a woman's love, once given, can never be taken away. In that sweet pause Ferrars had stolen from the room—perhaps from the house, but neither knew it. The dawn of truth, after that long darkness, blotted out all else. Dan Joyce had come into his kingdom.—Robert Halifax, in Tit-Bits.

**Ruined Hunting Countries.**  
The "physical features" of a hunting country change in an extraordinary manner. Some districts which were considered first rate for the purposes of sport, have been so completely spoiled by railways, wire-fencing, and building and drainage, that in spite of the "fashionable" character they retain, a stranger in search of sport must be a simpleton to go and hunt in them.—Country Gentleman.

There was no full moon in the whole of February, 1866. According to astronomers, this will not occur again until the year 2,499,962.

## GUINEAS AS "GAME" BIRDS.

Served as Quail or Pheasant in Hotels and Few Can Tell Difference.

"When game goes out of season by reason of the game laws, the guinea fowl man gets his innings," said an experienced fowlinger discussing new openings in his trade.

"In habits and instincts the guinea resembles the wild birds much more than it does the ordinary domesticated fowl," he added, "while its flesh is dark meat, very solid and plump—and of a flavor 'classy' resembling that of a quail. For that reason it is the best substitute for game fowl yet discovered, and that at a fourth of the price asked for the more expensive luxury. At this time of year the old guineas are in market and find ready demand because of the absence of wild meats, while just before the opening of the game (spring) guineas will come in to sell either in propria persona or as quail."

"Much that is sold by poultrymen as guinea, by the simple metamorphosis of the oven becomes game. I could name at random a half dozen large hotels in which young guineas are placed regularly before patrons who ordered partridge. It is impossible to secure the latter, which yet figure on the menu, and none but an epicure can detect the difference of flavor. Some farmers sell almost exclusively to expensive hostellers, which pass the birds off, respectively, as quail or pheasant, according to size."

"The export trade in guineas, too, is by no means inconsiderable, as several thousand head are shipped to England from American farms every year. These are almost entirely the old fowls—that is, those which have reached full growth."

"Among the many points in favor of guinea poultrying is the fact that the young are hatched out at a time of year when artificial warmth or expensive buildings are not required. The expense of feeding the old fowls too, is hardly one-half of that required for chickens in like quantity."

—New York Press.

## WORDS OF WISDOM.

One way to be good is to be sick and bed.

A man is always vain enough to believe he isn't.

Marriage wouldn't be so serious if it didn't last so long.

When a girl has a beau she talks about it as if he were fifty.

A man who won't lie to his wife about his bad habits is a brute.

There is more fun in being sick abed than visiting your wife's relatives.

Automobile clothes will never be as useful for other things as yachting outfits.

Some boys are able to earn their livings in spite of their college education.

It's awful poor judgment to tell a girl she is pretty when another one can hear you.

A man has to give up a lot of other bad habits to be able to afford the automobile one.

If a girl is dressed in pink it's a sign she is going somewhere with a red-headed man.

Living in the suburbs is a sort of training for the place you may have to live in in the next world.

A woman feels she has a right to nag just the way a man does that he has a right to come home late nights.

A trip abroad is a nice thing to brag about, but the real enjoyment of it is getting home to good things to eat.

There is hardly any surer way to live to be very old than to be rich and have a lot of poor relatives waiting for you to die.

If a man doesn't try to cheat somebody at something, sooner or later he gets the reputation for being queer in the head.

Why should anybody think it queer that women should be so fond of pet dogs when we see the kind of men they can love?

If a man absent-mindedly calls his wife by somebody else's name he'd better get a high fever to account for it right on the spot.—From "Reflections of a Bachelor," in the New York Press.

## Man vs. Beef.

The lunch counter man walked in airily, took his usual place, and gave his customary order. "Fine day, gentlemen," he said gayly. "I've got a poser for you to-day. See you'll guess first. Why's a man like beef?"

"Always wanted," panted the waiter, slapping down the portion before him.

"And wanted worst when it can't be had at all," added a young man who had several maiden aunts, and whose recollections of the strike menu were vivid.

"Generally tough," growled a man with his elbows in the air as he struggled valiantly with a refractory stew.

"Often gets too much done," ventured the dude, hunting in all his pockets for a coin to match his check.

"Variable in price," offered the politician.

"Greatly improved by a good roast," laughed a stout farmer who was rapidly disposing of a huge red slice.

"Very ingenious, gentlemen, all of your answers, but not quite right. My answer is, a good one—roast, steak, or man—is very rare."—M. C. Kittredge, in Lippincott's Magazine.

**Bridges and Beauty.**  
If the two hideous structures which span the Thames at Charing Cross and Cannon street for the use of the South Eastern Railway were removed London would now have a succession of bridges from Putney to the Pool that might suffer a comparison with the bridges of Paris, Rome and Venice. The new bridge at Vauxhall, which was opened last Saturday, is not so handsome as its neighbor at Westminster, nor so gauntly picturesque as the "auld brig" immortalized by Whistler, which it supplants. It has, however, a strong and solid beauty of its own, and lies slenderly and gracefully across the water like a gigantic twig bent over it. It is the first bridge which has been built by the County Council, and will, therefore, be the first bridge over which the despised tramway will have free access. It will restore to this part of London some of its old prestige as a pleasure resort, and we may see a revival of the Vauxhall Gardens of the Restoration time in a fine park and pleasureance. The bridge almost lies at the door of Lambeth Palace, the residence of the Archbishop of Canterbury, and with this hoary old pile as a centrepiece there are unique opportunities for an improvement of the district.—Washington Star.

## Steamboat Men You Know.

William H. Cook, the popular engineer of the steamer *Sebasco-degan*, is widely and favorably known to all patrons of the Harpswell line. Mr. Cook served his apprenticeship with the Knickerbocker Steam Towing Co. After receiving his papers his first assignment was with the steamer *Frederick N. Wilson*, since which he has served on the following boats: *C. A. Warren*, *Madeline*, *Percy V. Pejepscot*, *Mineola*, and for four years at his present post. He is an expert machinist and a valuable man for this line.

### NOTES OF THE DAY.

(Continued from page 2.)

Those "three cheers for our Willie" when he brought his steamer to the landing must have been heard in Portland and some of the summer girls made their escorts pretty envious by telling what a "lovely man" he is.

"The d— dog" was ubiquitous. He "queered" several races, caused "Tom" Bissell to take lots of exercise and culminated his misdeeds by threatening the ladies' costumes at the ball and freeing a youngster for about an hour.

The landlords—they were hospitality personified. Nothing was too good for their guests, no movement for the field day success that they did not push.

Uncle James Hamilton says it was "the time of his life" and even Capt. Ben "never saw the like of it."

Those long-stemmed pipes and those house flags are treasured souvenirs. They will decorate many a den and college room during the winter months.

Chebeague's prowess has enthused Bustin's Island's sturdy athletes. They have challenged Chebeague to a dual meet for Saturday. Indications

are that the gauntlet must lie for a week, but it will be taken up, all right.

Several South Harpswell launch parties joined the merry throng last Tuesday evening on Chebeague—this neighborly spirit is "the thing."
