LABOR MARKET DIGEST

January Data

March 2007

2006 Year-End Employment Review

Maine's economy created 3,000 net new nonfarm wage and salary jobs in 2006, as the average annual number of jobs increased to 614,700. This was an improvement from 2005 when the number of nonfarm jobs was unchanged from the prior year, but the 0.5 percent rate of job growth in 2006 was well below the national rise of 1.8 percent.

Service-providing industries continued a long-term pattern of growth, adding 3,300 net new jobs, primarily in the health care and social assistance (+1,500); administrative, support, and waste management services (+900); accommodation and food services (+600); and professional, scientific, and technical services (+500) sectors.

Goods-producing industries continued their downward trend, shedding 300 net jobs in 2006. The job losses were primar-

ily in the manufacturing sector, which declined for the eighth consecutive year. The largest manufacturing job losses were in the paper (-500), wood product (-400), and transportation equipment (-200) manufacturing industries. The construction (+700) and natural resources and mining (+100) sectors added jobs.

Among the three metropolitan areas, the Lewiston-Auburn area posted the fastest job growth in 2006 at 1.0 percent, followed by the Portland-South Portland-Biddeford area with 0.6 percent growth. The Bangor area experienced a job loss of 0.3 percent, primarily due to the Georgia Pacific paper mill closure in Old Town. Job growth in nonmetropolitan areas (the rest of the state), matched the statewide average of 0.5 percent, in spite of Bank of America's closure of several call centers in rural communities.

¹ Civilian labor force, employed, and unemployed estimates are by place of residence. Current year estimates are preliminary; year-ago estimates are revised. Items may not add due to rounding. All data exclude members of the Armed Forces.

² Total employment includes nonfarm wage and salary workers, agricultural workers, unpaid family workers, domestics, the self employed, and workers involved in labor disputes.

³ People are classified as unemployed, regardless of their eligibility for unemployment benefits or public assistance, if they meet all of the following criteria: 1) they were not employed during the survey week; 2) they were available for work at that time; and 3) they made specific efforts to find employment some time during the prior four weeks. Persons laid off from their former jobs and awaiting recall and those expecting to report to a job within 30 days need not be looking for work to be counted as unemployed.

⁴ The unemployment rate is calculated by dividing the total number of unemployed by the total civilian labor force and is expressed as a percent.

⁵ Bangor; Lewiston-Auburn; Portland-South Portland-Biddeford; Portsmouth, NH-ME; and Rochester-Dover, NH-ME are Metropolitan Statistical Areas. Augusta, Brunswick, Rockland, Sanford, and Waterville are Micropolitan Statistical Areas.

⁶ Adjacent metropolitan and/or micropolitan statistical areas that have a specific level of economic integration, but still retain separate identities.

⁷ Maine portion of the area which includes towns in both Maine and New Hampshire.

Area Analyst's Corner

Central Maine Merrill Huhtala (207) 287-1262

A fire at **Slate's Restaurant** in Hallowell put about 60 employees out of work. The owner plans to re-open. ♦ **Washburn & Doughty Associates**, a commercial ship builder in East Boothbay, is planning a multi-million-dollar expansion into Bucksport that could create up to 200 new jobs. ♦ The **Work Ready** credential program, a partnership of the Central/Western Maine Workforce Investment Board and Skowhegan area businesses, will train underemployed workers in "soft" or "applied" skills beginning in March. ♦ **Mid-State Machine Products** is expanding into Waterville, with the intent of creating 70 new jobs there and 20 additional jobs at their Winslow headquarters. Mid-State has partnered with Kennebec Valley Community College and the Maine Quality Center Training Program to train new workers.

Western Maine Gerard Dennison (207) 753-9045

The **Brunswick Composite Training Center** opened and welcomed 26 students for a three-day introductory composites session, the Brunswick Times Record reported. ♦ A new 191,000 square-foot **Wal-Mart Store** will be built in Lewiston. The store should provide between 380 and 425 jobs. ♦ The owners of the former 150-year-old **Robinson Mfg. Co.** woolen mill in Oxford plan to turn it into a residential and retail village, with a marina on Thompson Lake.

North/East Maine Craig Holland (207) 941-3076

Lowe's Home Centers Inc. representatives signed 15 deed and easement transfers earlier this month to buy land on outer Wilson Street in Brewer for a new store. The retail and garden center should open later this year. The store is expected to employ 180 to 200 people, with 80 percent of those full-time. ♦ **Domtar Inc.** officials announced that a paper machine will be shut down for the month of March. Company officials are crunching the numbers now, but it could involve upwards of 90 employees. The mill has about 500 employees. ♦ **Millinocket Regional Hospital** is being partially renovated to produce a new wellness and physical therapy center. That work is due to finish by mid-March.

Southern Maine Gerard Dennison (207) 753-9045

Sweetser, the social service agency based in Saco, will be laying off approximately 40 workers by the end of March. In doing so, it will also be closing children's residences in York, Sanford, Kennebunk, Saco, Gorham, and Belfast. ♦ **L.L.Bean** of Freeport will be leasing space in Southern Maine and returning its sole manufacturing to the state. The exact location had not been announced, but the company has invested approximately \$1 million for new sole-making equipment. Once in operation this coming fall, the venture will employ 8-to-10 shoemakers.

Maine Unemployment Rate 4.4 Percent in January

State Labor Commissioner Laura Fortman announced that the preliminary seasonally-adjusted January unemployment rate for Maine was 4.4 percent, down from 4.6 percent for December and 4.5 percent for January 2006. The national unemployment rate for January was 4.6 percent.

“Between 2005 and 2006, the Maine labor market improved,” said Commissioner Fortman. “Starting out the new year, this trend continued as the number of Maine residents employed increased, unemployment declined, and the number of nonfarm jobs grew between December 2006 and January 2007.”

The total number of seasonally-adjusted nonfarm wage and salary jobs rose by 1,900 between December and January to 617,100. Between January 2006 and January 2007 the total number of nonfarm wage and salary jobs rose by 2,900. Over-the-year job gains were recorded in health care and social assistance; trade, transportation, and utilities; professional and business services; leisure and hospitality services; construction; and local government. Job losses were primarily in manufacturing, with additional losses in other services and financial activities.

Other New England states reporting a seasonally-adjusted unemployment rate for January include New Hampshire, 3.7 percent; Vermont, 4.0 percent; Connecticut, 4.4 percent; Rhode Island, 4.7 percent; and Massachusetts, 5.3 percent. The adjusted national rate for January was 4.6 percent, up from 4.5 percent for December and down from 4.7 percent for January 2006.

The not-seasonally-adjusted Maine unemployment rate for January was 5.2 percent, up from 4.5 percent for December and unchanged from 5.2 percent for January 2006. The unadjusted national rate was 5.0 percent for January, up from 4.3 percent for December and down from 5.1 percent for January 2006. Not-seasonally-adjusted January unemployment rates for Maine counties ranged from 3.4 percent for Cumberland County to 8.8 percent for Washington County (see graph).

Not-seasonally-adjusted nonfarm wage and salary jobs in Maine declined by 25,100 between December and January. Seasonal job losses were recorded in retail trade, leisure and hospitality services, and construction. State and local government and private educational services jobs fell due to seasonal reductions in nonprofessional school staff and college work study students.

¹ Hours worked and earnings data are computed based on payroll figures for the week including the 12th of the month for manufacturing production workers. Average hourly earnings are calculated on a gross basis, and include such factors as premium pay for overtime and shift differential, as well as changes in basic hourly and incentive rates of pay. Average weekly earnings are the product of weekly hours worked and hourly earnings.

Footnotes: From page 6.

¹ Nonfarm wage and salary employment estimates include all full- and part-time wage and salary workers who worked during or received pay for the pay period which includes the 12th of the month. Domestic workers in private households, proprietors, the self-employed, and unpaid family workers are excluded. Estimates measure the number of jobs by industry. Current month's estimates are preliminary; prior month and year-ago estimates are revised. These estimates are benchmarked to March 2006. As a measure of reliability, the March 2006 benchmark revision for total nonfarm wage and salary employment was 0.4 percent higher than the original sample-based estimate.

² Regular teachers are included in summer months whether or not specifically paid in those months.

* Where an employment estimate is not entered, either the data is not available in sufficient detail for publication or is nondisclosable by law.

(cont. from page 1)

Taking a longer-term perspective, 2006 was the third consecutive year the rate of nonfarm job growth in Maine lagged national growth. Prior to 2004, Maine had outperformed the nation for six straight years.

The job gain in nonmetro areas in 2006 was only the second in the last five years, and it was the first year since 1999 that the growth matched that of metropolitan areas. The disparity in growth between metro and nonmetro areas increased after the 1990s. Between 2000 and 2006, nonfarm jobs were up 5.1 percent in metro areas compared to a 1.2 percent decline in nonmetro areas. As a result of the growth disparity, half of all nonfarm jobs in Maine are now in the three metropolitan areas.

Nonfarm employment estimates are revised in the first quarter of each year for the previous two years. Final 2005 and revised 2006 estimates by month are available on our web site at www.maine.gov/labor/lmis.

After six consecutive years of outperforming the nation, Maine nonfarm job growth has lagged national growth each of the last three years

The rate of job growth continued to decline in the Portland-South Portland and Bangor areas on 2006, but increased in the Lewiston-Auburn area and non-metro regions (average annual change in nonfarm jobs)
