### APPENDIX E

## Report of the Commission on Taxation of Intangible Property

To His Excellency, Hon. Carl E. Milliken, Governor of Maine: Dear Sir:

In submitting the following report upon the question of taxing intangible property the Committee wish to extend their thanks to you for the confidence reposed in requesting them to undertake the performance of so important a duty. They also wish to avail themselves of this opportunity to express their appreciation of the generous courtesy and valuable aid that has been extended to them by everyone with whom they have had occasion to confer. They also desire to extend a special expression of thanks to Professor Bullock of Harvard, Hon. Zenas W. Bliss of Rhode Island, and to Mr. McIntire, the able and versatile Chairman of our own Board of State Assessors, for the courtesy of interviews granted by these gentlemen and for the valuable material and aid furnished at their hands. We are indebted to Mr. McIntire for the statistics regarding our own State and for many pertinent suggestions.

With this report they also submit in separate form the communication of Charles J. Bullock of Harvard University; of Zenas W. Bliss, Chairman of the Department of State Taxation of Rhode Island; of Professor Catlin of Bowdoin College; of Professor Wolfe of Colby College; of A. J. Williams, Secretary of the Wisconsin Tax Commission; of Clement F. Robinson of Portland; of Henry A. S. Ives, Secretary of Minnesota Tax Commission; of Allen C. Girdwood, Secretary State Commission of Maryland; of Bertrand G. McIntire, Chairman Board of State Assessors, Maine; and a copy of the Report of the Tax Commission from each state from whom one has been received. For further reference, they suggest the reports, found

#### LEGISLATIVE RECORD APPENDIX—FEBRUARY 14, 1917 255

in the State Library, of the National Tax Association, and especially the proceedings of the Third and Ninth Congress where will be found a very full discussion of the question of taxing intangible property.

Respectfully submitted.

A. M. SPEAR. CHAS. S. COOK. KENNETH C. M. SILLS. HUGH R. CHAPLIN. OBADIAH GARDNER.

Report of the Committee, informally requested by Governor Milliken to consider a scheme for the taxing of intangible personal property, in accordance with the provisions of the amendment of the Constitution, authorizing the Legislature to levy a tax upon this class of property at such a rate as it might deem wise and equitable.

Theocritus being asked which was the most cruel of all beasts answered: "Among the beasts of the wilderness, the bear and lion; among the beasts of the city, the publican and the parasite . . ." The publican of old was an object of aspersion. He was regarded as an outlaw in the Roman provinces and barred from the temple and churches in the time of Christ. From that day to this, the tax gatherer, the visible representative of the taxing power, has been regarded with disfavor and sometimes with reproach. This attitude of the world toward the impositions of taxes is due to two causes. First, the payment of a tax in any form, however necessary and just, is not popular. Second, inequality, discrimination and injustice have resulted from the methods employed in levying the public revenue. The first cause of hostility we may never hope to eradicate, while human nature remains normal. The second cause we may never hope to fully remove, as no workable scheme of taxation can ever be devised that will do exact justice; but we may hope to lessen the hardship by the adoption of a system that will work out more approximate equality. Public contribution is a necessary burden. The power of taxation is a sovereign right essential to the existence of government. Deny it and confusion will follow order, and license displace law.

### 256 LEGISLATIVE RECORD APPENDIX-FEBRUARY 14, 1917

But the use of this sovereign power is based upon the theoretical rule that every kind of property should bear its proportionate part of the public burden. Accordingly, we meet at the threshold certain well defined premises underlying the principles of taxation, namely: (1) The constitutional provision: "That the legislature shall never in any manner suspend or surrender the power of taxation." (2) "That State and local government must be maintained for the benefit and protection of society." (3) That the State must provide for the collection of sufficient revenue to sustain these institutions. (4) That additional revenue is constantly needed to meet the increasing demands of industrial, educational, charitable, agricultural, financial and transportation development, support of State and quasi public institutions and the many other unforeseen and necessary requirements of modern civilization. (5) That this new expense and demand for more revenue are matters wholly within the sovereign power. (6) That this increased burden logically and necessarily leads to search for new sources of income and new schemes of taxation, otherwise the increase of rate would become intolerable. But this assertion may appear inconsistent, as the unamended constitution provides that all property, real and personal, not exempt, is taxable. This is theoretically true, but the fact remains that the constitutional requirement, and the laws enacted to carry it into effect, are so persistently and effectually evaded, and so much property is untaxed, that a constant demand has been made that these evasions be checked and the burdens more equally distributed.

The one great source of complaint, however, against the administration of our tax laws, has been that real estate and tangible personal property have had to bear an inequitable share of the burden of taxation for the reason that the assessment of intangible personal property is very small in proportion to the assessment of these other classes.

Although the evasion of taxation by intangible personal property is not authorized by law, it is tolerated in fact, and condoned by common consent because of common knowledge that the average income received by the holders of this class of property averages under five per cent, while the average rate of taxation is between 2% and 3%, to be exact,—2.395%, and

### LEGISLATIVE RECORD APPENDIX—FEBRUARY 14, 1917 257

that the collection of this rate, taking nearly one-half the income, leaving an average of but little over  $2\frac{1}{2}\%$ , renders this class of property nearly worthless as an investment, and works a great hardship upon the holder. This fact, itself, speaks, and offers ample proof that the system of taxation that seeks to impose such a burden on this kind of property on the one hand, and, in consequence, drives it into hiding on the other, is unjust, improvident and ineffectual, imposing an unnecessary burden upon visible property and practically exempting invisible property; and that it is so regarded is amply shown not only by the consensus of expert opinion and practical investigation, wherever the matter has been the subject of consideration, but also by the history of tax legislation in our own state.

In order to define the issue, it should be here noted that we have nothing whatever to do with the question of taxing real estate and tangible personal property, as these are not affected by the recent constitutional amendment; but only with the advisability or inadvisability of changing the method of taxing intangible personal property; and that all the authorities discuss this one issue, and tend to show a general condemnation of any system of taxation that seeks to impose upon intangible personal property the same value and same rate, that it lays upon the other classes of property, and to support the contention that intangible personal property, wherever it is permitted, should be classified and taxed at a different rate.

As the authorities here quoted refer to the system which they condemn as "a general property tax," it should also be borne in mind that our present method is in all respects "a general property tax" and that the quoted criticisms of such a tax apply directly to our method. We wish further to say that by use of the term "tax expert" we do not mean one who has made a hobby of the question and studied it to support a fad, but one who is skilled upon the subject of economics of which taxation is a department.

Among the great authorities on taxation Charles J. Bullock, Professor of Economics at Harvard University, is generally acknowledged to be the most eminent. He says of the general property tax system: "It places the tax payer in the position of circumventing the law, and does not foster habits of good

### 258 LEGISLATIVE RECORD APPENDIX—FEBRUARY 14, 1917

citizenship; the latter is the cause of fearful demoralization. Here, again, official documents abound in testimony to the evils of the system. It is declared to be 'debauching to the conscience and subversive to the public morals — a school of perjury promoted by law'; it 'puts a premium on perjury and a penalty on integrity'; it 'debauches the moral sense,' produces 'widespread demoralization' and encourages 'evasion and dishonesty.' This is severe, but no one familiar with the facts can doubt its truth."

This statement, varied in phraseology, may be taken as a standard of the terms in which the general property tax is condemned. To the same effect may be cited Professor Edwin R. Siligman of Columbia University, another great authority; Professor Richard T. Ely; the U. S. Industrial Commission; the Massachusetts Tax Commission of 1908; U. S. Supreme Court in Pacific Express Co. v. Serbert, 142 U. S. 351; B. G. McIntire, Chairman of our Board of State Assessors. Every tax authority with whom we have conferred and every communication received upon this particular question have answered in the same way.

Nor in the time found for research upon this phase of the case have we been able to find a single authority that approves of the system of a general property tax.

But it might be said that tax experts become theorists and are not always practical in their conclusions and recommendations; but in answer to this it may be said that not only do the eminent authorities above quoted condemn this system but a careful investigation will show that the practical men who comprise the tax commissions in the different states of the Union are, so far as we have been able to discover, unanimous in their concurrence in the opinion of the tax experts upon this question. Also, the abandonment of this system and the adoption of new methods of taxing intangible property to be found in Massachusetts, Rhode Island, Pennsylvania, Maryland, Wisconsin and Minnesota and the agitation in most of the other states in favor of a reform, all support the conclusion that the general property tax plan should go.

Except for the purpose of showing the broad field of expert and practical opinion upon this question, it would be unneces-

### LEGISLATIVE RECORD APPENDIX—FEBRUARY 14, 1917 259

sary to go aside for argument, as the history and development of tax legislation in our own state are both interesting and instructive upon the desirability, or otherwise, of abandoning the general property tax plan and adopting some new method of taxing intangible property, for the first time made permissible under the recent constitutional amendment. It is unnecessary to go into detail to call to mind the opposition with which every progressive tax movement in this state has been met by the classes of property to be affected. Reference will be made to but a few of the more important efforts which have been made from time to time to reach property and business that were not bearing their proportionate share of the public burdens. Years ago it was proposed to tax the railroads upon the basis of their mileage and gross earnings. All possible arguments were made against it, and particularly against the scheme, which was elastic and could be stretched, whenever proper, to increase the revenue from this source of taxation. The law, however, was passed, but the opposition did not cease until met with an adverse decision of the Supreme Court of the United States. Yet this law, although increasing the rate from time to time, has operated fairly to both the railroads and to the people. The proposed laws for the taxation of insurance companies, telephone companies, telegraph companies, of corporate franchises, of express companies, were all enacted in the face of arguments offered to show not only that the various schemes were impracticable, but that the tax, itself, was unjust and burdensome. And when the inheritance tax law was proposed it was met with strenuous opposition.

Yet, notwithstanding the predictions to the contrary, these laws, improved from time to time by amendment, have all operated smoothly and equitably and produced a very large amount of income to the state and municipalities that would otherwise have been levied on visible property, already taxed to the limit, and no prudent person would for a moment suggest their abolition. Similar opposition is voiced by many at the present time to either an income or level rate tax on intangible property.

It is also clearly apparent that the accomplished action of our state in its tax legislation unerringly points to the disapproval by our own people, of the general property tax. Prior

#### 260 LEGISLATIVE RECORD APPENDIX-FEBRUARY 14, 1917

to 1875 our Constitution required only the taxation of real estate. Under this provision even tangible personal property was evading and escaping its fair proportion of taxation. To remedy this wrong, in 1875 an amendment was adopted compelling the taxation of personal estate. From that time to this tangible personal property has been generally taxed. The amendment was intended to and did include all personal estate, tangible and intangible. But the same difficulty at once arose, regarding the discovery of intangible property after 1875, that had prevailed in regard to finding tangible personal property before 1875. Hence forthwith began an agitation for the adoption of some change in the law that would make compulsory the disclosure of intangible property. This agitation may be said to have culminated in 1891 when the Maine House of Representatives by a large majority passed a drastic listing bill, which was defeated in the Senate by only one vote and that given by one who believed in the bill but yielded to the great pressure brought to bear before the vote. We particularly refer to this spirited contest for the purpose of introducing the contention of the participants upon the one side and the other.

The urgent argument at this time in favor of the listing measure was that such a law would compel the disclosure of stocks, bonds, money at interest and other securities, to taxation like other property. The potent argument against the listing bill, at this time, by the holders, large and small, of intangible property, was, that the then rate of taxation would be disastrous to small holders, without other sources of income for a living, and unfair to large holders, and that such a change should be made in the fundamental law as would permit of the imposition of such a small rate as would enable the small holder to live and the large holder to have a fair return.

These two arguments, which agitated the whole state at the time, have been before the people for 25 years, in the meantime pressing their respective reasons for approval upon the voters, until in 1913 the argument for a change in the Constitution prevailed, and authority was finally given for classifying intangible personal property for the purposes of taxation, as might seem "equitable" and "wise," and the holders of intangible property had attained at last the relief they had advocated and sought for 25 years.

#### LEGISLATIVE RECORD APPENDIX—FEBRUARY 14, 1917 261

But it is the significance of adopting the amendment as an interpretation of the popular will and change in public sentiment, that becomes important upon the question whether the amendment shall now be carried into effect. After this long period of agitation, this amendment must be regarded as giving expression, not only to the long continued wish of the intangible property owners, but to the deliberate judgment of all other property owners.

We think it is fairly shown that the history of taxation in this state points directly to the conclusion, that it is the expectation of the people that such legislation shall follow as will make operative the recent amendment. This amendment reads: "But the Legislature shall have power to levy a tax upon intangible personal property at such rate as it deems wise and equitable, without regard to the rate applied to other classes of property." The words "wise" and "equitable" in the amendment are also significant and by necessary implication convey the legislative condemnation of the old provision. The logic of the amendment is this: All property, real, personal and intangible, ought to pay some tax. Intangible property was required to pay too much tax. It ought to pay only an "equitable" and "wise" tax. Therefore, the old tax was "inequitable" and "unwise," and ought to be changed and the legislature is hereby authorized to make the change.

If this be so, then follows the inquiry, What is the process by which it can be done? To leave the present system at it is absolutely defeats the purpose of the amendment and leaves the situation exactly where it has been for 40 years. Therefore, inaction will not do. If action is to follow, what ways are open? We are able to discover but two workable plans by which the amendment can be carried into effect; one the imposition of an income tax; the other a classified property tax, or level rate of, say 3 or 4 mills, on all kinds of intangible personal property not exempt. One or the other of these methods not only accords with the expressed wish of the people but also represents the past contention of the intangible property holders.

But various matters are to be taken into consideration in the proposal to abandon the old system and to adopt a new one.

One of importance in connection with the proposal of an income or level tax on intangible property is the question of their revenue producing capacity. It is an argument carrying some weight that, without reasonable expectation that the new method of imposts would soon return a revenue substantially equal to that yielded by the old, the arguments in favor of a change would be subject to challenge.

It is evidently impossible to predict with absolute certainty what amount of revenue an income or level rate tax an intangibles would product. But we are not without evidence from which strong inferences may be drawn. Several states have for a longer or shorter time employed one or the other of these systems of taxation. The first trials of the income tax were failures dues, as is said by those who studied their effects, to want of proper administration. But the Federal income tax law, and its administration, became a great educator upon this question, and this system is now regarded with more favor.

In efforts to obtain information in connection with all matters coming within the duties of your committee they proposed certain questions, more particularly as inquiries to our own citizens, among which was the following: "To be considered in connection with the proposal of an income or level rate tax on this class of property is the question of its revenue producing capacity. In 1916 the average rate of state, county and town taxation on all property including this class of property was 2.395%. This year \$14,698,666 intangibles were taxed and therefore yielded a revenue of \$352,033.05. In your opinion: (1) How much intangible personal property, including exemption, is owned in this state?"

It is at once obvious that the amount yielded at the above per cent is in excess of the actual receipts, as this class of property is invariably found in the taxing jurisdictions which impose the smallest rates. The exact returns can be found by a mathematical calculation upon the rate and amount of this class of property assessed in each town.

Your committee not only has sent these questions to residents of our own state but to tax commissioners in other states where the level or income rate has been adopted, as well as to Prof. Bullock with whom two of your committee had a personal

interview, in which they found he was not only conversant with the tax yielding capacity of the level rate and income tax laws of the states that have adopted these methods, but perfectly familiar with the tax laws of Maine, and with the facts and figures contained in the reports of our Board of State Assessors. We therefore quote his opinion upon this point and reasons therefor. While we shall append his full report upon all the questions suggested, his answer upon the point now involved is so concise, comprehensive and pertinent that we feel justified in quoting it in full at this time.

"III. In estimating the financial results of a flat tax at the rate of three mills it is necessary to allow first of all for the fact that the \$14,698,000 of intangibles taxed in 1916 probably paid upon an average somewhat less than the average rate of taxation in Maine. As a rule it will be found that there is almost none of this property on the tax rolls in the districts where the tax rates are highest; that about half of the intangibles now taxed are in Portland where the tax rate is, according to last accounts, slightly less than the average for the state; and that outside of Portland the largest accumulations as a rule are found in places where tax rates are less than the average.

"In Massachusetts repeated investigations have shown that the taxable intangible property exceeds by from 10 to 50% the value of our real estate. (For the latest investigations see Report of Special Commission on Taxation of 1916, pp. 57-58.) In Maine the proportion of intangibles is probably smaller, but so too is the amount of real estate value. In Massachusetts the value of our real estate amounts to \$1000 per capita, while in Maine the value of real estate is somewhat around \$500 per capita. It would be safe to estimate that the taxable intangible property in Maine is one-half the value of the real estate. This assumes a proportion less than half as great as the proportion which obtains in Massachusetts, and moreover, applies such proportion to an amount of real estate values which is only onehalf as great per capita as the amount of real estate values in Massachusetts.

"In Maine the assessed value of real estate belonging to residents was \$265,000,000 in 1915. Real estate was probably not assessed at more than two-thirds of its real value upon an aver-

age, and the United States Census estimates that the assessed value was about 73% of the true value. In order to be conservative, we may estimate that the assessed value was as much as 75% of the true value, and upon this basis may estimate that the true value of real estate belonging to residents was \$350,-000,000. One-half of this amount, or \$175,000,000, would probably be a very conservative estimate of the taxable intangible property in the State of Maine. A three-mill tax strictly enforced should bring in \$525,000 from this class of property. This figure might be reduced 25% to allow for contingencies, and we should still have a total that exceeds the tax collected today from intangible property at the full local rate. This estimate is made on a basis which seems very conservative, and allows for the fact that much intangible property is exempt from taxation. For instance, in Massachusetts our figures allow for the fact that mortgages on Massachusetts real estate are exempted, so that our method of calculation allows for the exemption of mortgages on Maine real estate."

Clement F. Robinson of Portland, secretary of the Tax Commission of 1907, and one of the most diligent and accomplished tax students in this state, and who has had peculiar advantages for gaining information, in the valuable response he makes upon the inquiries sent out and which will be appended in our report in full, in regard to the prospects of revenue under one or the other of the plans suggested, says: "As you suggest, in your letter, I am not in a position to know what revenue the new form of tax would yield, but I would state that it is my conviction that many times the present assessment of this form of property would be reached, under either form of tax. I should not be surprised if the ownership of intangible property, including exemptions, in this state, equals the entire ownership of all other kinds of property. Answering your second question under the head of "Revenue," I would say that I think this class of property would voluntarily respond to either the flat rate tax or the equivalent income tax. Such has been the experience of other states, and if the administrative provisions of the law were adequate, no responsible banker or lawyer would advise a client or customer to attempt to dodge the tax."

Some of the members of the committee had an interview with Hon. Zenas W. Bliss, Chairman of the Board of Tax Com-

missioners of Rhode Island. Mr. Bliss is a former Lieutenant Governor of Rhode Island, has had a long and intimate experience with the finances of the state and has been for some years chairman of the department of taxation. As a student of taxation and an official in the practical administration of the tax laws of his state, Mr. Bliss was not unfamiliar with the tax laws of Maine. Upon the question of revenue his statement, as will be seen, is carefully considered and conservative. He savs: "Your average rate is so high that it probably absorbs at least 50% of the income from the intangibles taxed, and while this is to be deplored from the standpoint of justice, and an equitable distribution of the tax burden, the amount of reenue received is very substantial; \$352,033-05/100 could be obtained only by increasing the tax base approximately six times if the rate is 4 mills, and eight times if the rate is 3 mills. In other words, the amount of intangibles would have to increase from approximately \$15,000,000 to 90 or 120,000,000 dollars, according to whether your rate was 4 or 3 mills in order to get the same revenue you now receive from that source. To discover and list such an amount of intangibles is a task of considerable proportions, and in the hands of local assessors without State supervision of a very positive character would not be readily accomplished, if at all. With ample supervisory powers vested in a competent State Board, in my opinion, the task would be accomplished without much difficulty, and within a reasonable time."

We expect to receive many more replies to the questions sent out, which will be attached to this report, and regret that they have not come in time to enable us to refer to them specifically. At the present time, however, we have not only the information derived from experts and tax commissioners, who have given the subject the most careful and thorough study, but the experience of several states which have adopted the one system or the other. To these sources it may be useful to further allude for conclusions drawn from an exhaustive study of the practical operation of these methods as revenue producing agents.

We wish particularly to refer to the report of the committee on taxation appointed by the Massachusetts legislature in 1907

to investigate the subject of taxation and to codify, revise and amend the laws relating thereto, as this commission had upon its staff nine of the strongest men of Massachusetts including Prof. Bullock, the eminent authority already referred to. In their report they show a most thorough and careful examination of the tax laws of Pennsylvania and Maryland which at this time had adopted level rate plans, and of the results of the operation of these plans. Their chief concern in their investigation regarded the practicability of substituting either the income or level rate plan of taxing intangibles for the general property tax.

Among the important inquiries which they felt called upon to make was one touching the revenue producing capacity of the new method as compared with the old. This is shown by the amount of intangible property discovered by the assessments following the change in the law. Regarding Pennsylvania, while their report goes into every detail, it is only necessary here to consider the summaries to illustrate the working of the law in this regard. A table is compiled showing that the amount of intangible property locally assessed in Pennsylvania in 1885 under the old rate was \$145,000,000; in 1907 under the level rate, \$1,014,000,000. About one-half this amount was assessed upon mortgages.

In speaking of receipts from intangible property the Massachusetts report says: "From 1886 to 1890 the receipts averaged \$300,000 per year, this amount being somewhat less than usual, because considerable sums were withheld by corporations pending the outcome of litigation. From 1891 to 1895 the receipts averaged \$1,130,000; from 1896 to 1900 they averaged \$1,260,000; from 1901 to 1905 they averaged \$1,530,000; and in 1906 amounted to \$2,352,000. Here, as in the figures showing the results of the tax upon intangible property assessed locally, we find a healthy and normal increase."

Maryland adopted the level tax of 3 mills in 1896, with a state tax of 1.6 mills, making a total tax of 4.6 mills or \$4.60 per \$1000, on intangibles. In regard to Maryland the Massachusetts commissioners say: "The experience of Maryland is as interesting and instructive as that of Pennsylvania . . . No statistics are obtainable for the entire state; but the bulk

of this property undoubtedly is held in the city of Baltimore, and in that city complete statistics are available." Without giving the whole table it is sufficient to say that the assessed value of securities taxed in the city of Baltimore in 1896 was \$6,000,000; in 1907, \$150,900,000, an increase of 2500%. This deduction follows: "In 1896, when these securities were taxed at the full local rate, which was then about \$20 per \$1000, the assessment was not more than \$6,000,000. The following year, when the tax was reduced to about \$4.60 per \$1000, the assessment increased more than ninefold. Since that time the assessment has nearly trebled, and Baltimore is now taxing twenty-five times as much of this class of property as it taxed in 1896 at the highest rate."

It should be here noted that the intangible assessments did not cover as broad a field of securities, as is done in the other states, employing an income or flat rate. The Massachusetts report records the further deduction: "It shows that people will voluntarily return for taxation at a reasonable rate far more property than the most arbitrary dooming law can place upon the assessment list." For more complete reference see Report of the Commission on Taxation, for Massachusetts of 1908.

Since 1907 Minnesota and Rhode Island have adopted the flat rate and Wisconsin and Massachusetts the income tax. Minnesota may be regarded as a commonwealth sufficiently analogous to the State of Maine in its agricultural, industrial, manufacturing and financial institutions, and in the general characteristics of its people, to warrant the use of its taxing instrumentalities as a fair criterion for the use of similar methods in Maine. Outside of Minneapolis and St. Paul, neither state has any very large cities and each, as a whole, may be regarded as consisting of a rural population.

The Minnesota law was changed in 1910 and provides for a flat rate of 3 mills and requires a list on oath. The following table shows the result of the operation of this method of taxing intangibles:

Comparative statement to show increase in the number of persons assessed, the amount of the assessment and the revenue derived by reason of the enactment of the law levying a tax of three mills on this class of property, first effective in 1191.

Year	No. assessed	Assessment	Revenue	Rate
<b>1</b> 910	6,200	\$13,919,806	\$379,754	28 mills
1911	41,439	115,481,807	346,445	3 mills
1912	50,564	135,369,314	406,107	3 mills
<b>1</b> 913	57,068	156,969,892	470,909	3 mills
<b>1</b> 914	73,266	195,549,307	589,644	3 mills
<b>1</b> 915	73,062	212,134,901	636,404	3 mills
<b>19</b> 16	73,446	233,766,601	701,300	3 mills
<b>1</b> 916	73,446	233,766,601	701,300	
<b>1</b> 910	6,200	13,919,806	379,754	
	<u></u>			
Increase		219,846,795	321,546	
Increase	e 1084%	1680%	84%	

This table not only proves, but demonstrates, the prudence, the workability and efficiency of this method in Minnesota, whatever may be the result in any other state. A brief analysis shows that the number of persons assessed increased from 6200 in 1910 to 73,446 in 1916; the assessment from \$13,919,806 to \$233,766,601; the revenue from \$379,754 to \$701,300. It will at once be noticed that this table shows a decrease of revenue the first year the law went into effect. But the report shows that this law was approved in April, 1911, and went into effect in May, 1911, less than a month after its passage. The consequence was that the machinery necessary to administer the law was completely lacking, and many towns in the state were not even notified to make returns, and the assessment in the cities was only partial. The second year, it will be observed, the revenue increased over that of 1910, when the rate was 28 mills, from \$379,754 to \$406,107, or \$26,353.

Wisconsin and Massachusetts have adopted for the taxation

of intangible property the income plan. The Massachusetts law provides for an income tax of 6%, which would be equivalent to a level rate of 3 mills upon a 5% income. While the adoption of this law is too recent to furnish evidence of permanent results, there seems to be no reason to doubt its ultimate success. In Wisconsin the income plan has been in operation for several years and is regarded as an accomplished success. A reference to the Wisconsin reports will show the complete workings of the law.

At this point it may be instructive to insert the statistics pertaining to the present assessment of intangible property in this state as bearing upon the probable result under a flat or income rate.

## INTANGIBLE PROPERTY TAXED IN 1916.

	Money at	Railroad	Railroad and	Other Co.
	Interest	Stock	other bonds	Stock
Androscoggin	\$152,270		\$5,000	\$16,000

272 LEGISLATIVE RECORD APPENDIX-FEBRUARY 14, 1917

Number not taxing intangibles, 332

These tables as made by our Board of State Assessors, so obviously suggest their own interpretation, that little if any explanation is needed. It may, however, be permissible to say that the list of 16 cities and towns that are not assessed at all on intangibles, with over 300 other towns in the same category, including a decrease of 110 towns in 20 years, together with the apparent inequality and inadequacy of the assessment in the cities and towns that now pay the bulk of the tax on this class of property, disclose a condition that is intolerable from the standpoint of justice, and warrants the inference that but a fraction of the intangible property actually held in this state is now disclosed. In view of these statistics, the opinion of those who have had great experience upon the question, and accomplished results in the states that have adopted the new plan, it would seem a prudent conclusion that the assessment of intangibles in this state upon a 3 mill basis would soon produce a revenue at least equal to that now received from this class of property. Nor do we think it would be indulging in undue speculation to predict that revenue from this source will be gradually augmented. Accordingly, your committee are of the opinion that the present general property tax plan should be abandoned, and a new plan adopted.

Before proceeding to a statement of the reasons for the preference of one plan over the other, it should be here noted that the purpose and end in view of each plan are to all practical purposes the same and accomplish practically the same results. In other words, the two plans arrive at the same goal by different routes. Having, therefore, briefly presented the reasons for adopting one of the plans open, and furnished statistics, so far as available, showing the practical operation of each plan, we now meet the inquiry as to which plan is to be preferred. The decision of this question depends largely upon the conditions of adaptability.

Wisconsin and Massachusetts have the income plan. An examination of the Massachusetts statute will at once reveal a most difficult and complicated law. After much discussion and an adverse report by the able tax commissioners of 1907, the income tax was finally considered the better plan, particularly in view of the enormous amount of intangible wealth to be found in the Commonwealth. In Wisconsin this method has become an established success. Yet in answer to an inquiry, whether the level rate or income plan should be adopted in Maine, the Wisconsin Tax Commission returns the following answer: "We understand that your law does not contemplate, if indeed it permits, the taxation of income from other sources. If we are correct in this, only the income from intangible securities could be taxed as such, and we should consider it inadvisable to create the necessary income tax machinery for so limited a class of income. If the work were done well the expense may be almost prohibitive, and the necessary machinery out of proportion to the yield which could be expected. Moreover, if any exemptions were allowed as are given elsewhere, owners of moderate amounts of securities could not be reached at all. The exemption would offset the amount of income received from this source. It is not probable that an exemption of less than \$600 would be allowed, and that would cancel the income of \$12,000, assuming a 5% rate. In our opinion a low flat rate would be simpler and better suited to the requirements of your situation. The experience of Maryland, Pennsylvania, Minnesota or Iowa would be more

273

helpful to you in this connection than any data we can furnish as we have no such law in this state. The advantages of a flat rate over an income tax are the greater simplicity in levying and collecting the tax and the greater revenue resulting therefrom if exemptions are to be allowed."

Professor Bullock expressed to your committee the same view and the same reasons above suggested in favor of the level rate for our state. Our cities are not large and our wealth is not concentrated, as in the great commercial states, but more or less distributed throughout many of the thrifty towns and villages of the state. Our people are also used to a tax upon property but not to one imposed upon income. Another important fact to be regarded is the limitation of our power to tax only intangible personal property. There is also room for debate whether the constitutional amendment authorizes an income tax at all; whether the tax must be upon the property and not upon the income of the property. However this may be, for the sake of having every phase of the case presented we have discussed both plans.

Accordingly, from all the information we have been able to obtain and for the reasons above set forth, your committee are of the opinion that a flat rate tax is far better adapted to the conditions in Maine than the income plan, if available.

The next question of importance is that of the rate. We have found no authority which has not made the extremes between 3 and 5 mills, and, as careful an investigation as we have had time to give, fully persuades a majority of your committee that 3 mills is the most practical and satisfactory rate. Massachusetts has the equivalent of this rate; Minnesota has this rate, which has worked with admirable success. Marvland has the same rate, with the addition of the state tax. Rhode Island has 4 mills, which Mr. Bliss informed your committee was due to peculiar local circumstances. An important consideration in determining the rate is the way it will be received by the tax payer and regarded by the public as to its adequacy and fairness. It would seem incredible that any fair-minded man would object to paying 3 mills on the full amount of his intangible property. If he does, then he will

at once fall without the pale of public favor, and be justly regarded as a tax dodger, who is unwilling to bear his share of the public burdens. Self-respect, if not duty, will prompt most men to discard avarice and obey the law. On the other hand, if the rate is placed too high it will be met with the same disposition to secrete and remove this class of property from the reach of assessment that has prevailed under the present law. It is the universal experience of every state in the Union that there is a limit to the rate of taxing intangible property, beyond which the property disappears, and the revenue that a fair rate would otherwise produce is substantially lost.

We come now to the final and most important consideration regarding any act for the taxation of intangible property,the administrative features of the law. First: Where shall the administration be vested, in state or local authority? Second: How shall the required return of this class of property be made, by an itemized list of each piece of intangible property or by a general list of the valuation of each class of property? For example, the separate value of each bond, each share of stock, each note, etc., or the aggregate value of all bonds in one class, all shares of stock in another and all notes in still another, and so on. Regarding the first proposition we find no dissent whatever. It is the universal opinion of all the authorities which have discussed the question, and of all the states which have adopted laws for the taxation of intangible property, that these laws should be administered through some state department. A very general and well-founded complaint against the assessment of real estate and tangible personal property is based upon the assertion that local assessors are guilty of partiality and favoritism in finding and valuing the property of their neighbors, although these kinds of property are quite open to inspection. If local assessors can be charged upon these grounds, regarding the finding and valuation of property that is entirely visible, the discovery and fair valuation of property entirely invisible could hardly be expected at their hands. Accordingly, the administration of this law should be placed in the hands of authorities so far re-

moved from local pressure that neither fear nor favor could have the slightest influence upon the discovery and valuation of intangible property. Your committee, accordingly, are unanimous in the opinion that if a law is passed for the taxation of intangible personal property its administration should be lodged in some state department.

It may be presumed that the purposes to be subserved by enacting a law for the taxation of intangible property is not only to attain a method that is just and equitable towards this class of property but one that will be effectual in giving the largest revenue. It is a matter of common observation that any law which incurs the inherent hostility of the people is difficult of execution. And it will not be denied that a drastic listing bill which requires a property holder to disclose in detail every species of intangible value which he owns will be regarded with disfavor and perhaps evasion. It is therefore desirable to find, if possible, a form of return that will be at the same time effective and not offensive. In our investigation we have found the objection to divulging every species of intangible property, operating as the strongest opposition to the proposed legislation. We think the law can be made workable and effective without this objectionable measure provided the administration of the law is vested in the authority of the State.

Your committee accordingly would suggest that every holder of intangible property should be required to make a general return of such property, classified as money at interest, stock, bonds, and so on, and a valuation of each class. This return should be made under oath upon a proper blank prepared for the purpose and deposited in the state department designated to receive it, and the maker thereof should, if required, be subject to interrogation upon oath as to the truth of his return, and false statements in reference thereto should be regarded as perjury and subject to punishment accordingly.

The propriety of additional inquiry of the tax payer should be left to the discretion of the designated department or official and, as is clearly evident, will operate as a check upon evasion as well as a means of detecting fraud.

It seems hardly necessary to suggest that the returns, when filed, should be kept within the veil of secrecy by the enactment of a strict law with stringent penalties for any disclosure. Few men are favorable, and most men strenuously object, to disclosing their business affairs to their neighbors or to the public. We are therefore of the opinion that a policy of guaranteed secrecy will do much to allay opposition and greatly facilitate the administration of a law, necessarily inquisitorial.

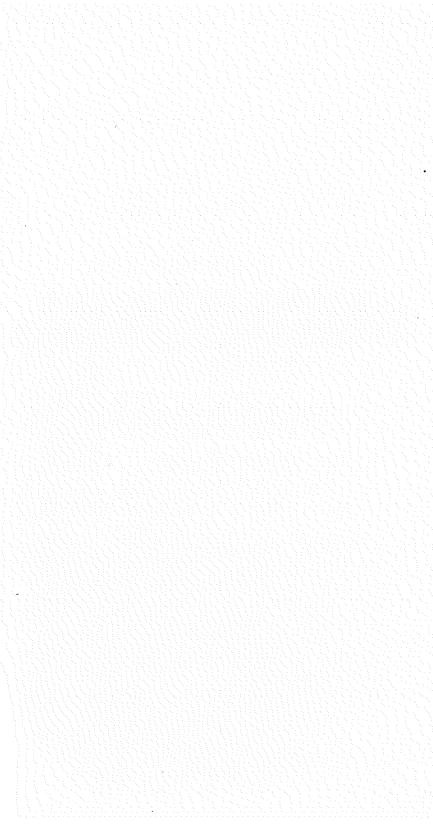

Your committee are unanimous in the conclusion:

(1) That the present method of taxing intangible personal property should be changed.

(2) That the flat rate is better adapted to the conditions in our state than the income tax.

(3) That a rate of 3 mills, or \$3.00 per \$1000, will meet more favor and produce a larger income than a higher rate. (Here it should be said, that Hon. Obadiah Gardner of the

Committee is in favor of leaving the rate to the legislature.) (4) That the administration of the law should be vested in some central power and not left to local assessment.

### LEGISLATIVE RECORD-SENATE, FEBRUARY 15, 1917 279

## SENATE.

Thursday, February 15, 1917. enate called to order by the Presnt.

rayer by Rev. James E. Cochrane of llowell.

ournal of previous session read and woved.

apers from the House disposed of in currence.

### House Bills in First Reading.

I. D. 191. An Act to amend the rter of the Kennebec Log Driving npany, as amended by Chapter 402 the Private and Special Laws of 5.

#### Finally Passed.

Resolve reimbursing the State Le lative printer for over-time work.

Resolve in favor of the 12th C pany, C. A. C. N. G. S. M., on acco of Presidential inauguration.

From the House: Ordered, the S ate concurring, that bill, An Act the enforcement for the lien on jewe clocks and watches, repaired by j elers, Senate Document No. 7, be ta from the files for further considerat by the legislature.

In the House this order was read : passed.

Mr. DAVIES of Cumberla Mr. President, I make the point of or that the legislation which is covered that bill has been passed upon at 1 session of the Legislature and can again be introduced.

The PRESIDENT: The Sena from Cumberland, Senator Davies, the Chair understands, makes 1 point of order, that this docume Senate No. 7, having been fine passed upon by the Legislature, t it cannot be brought forward in 1 manner.

Mr. DAVIES: That is the point, President.

### LEGISLATIVE RECORD-SENATE, FEBRUARY 15, 1917 281

Mr. BUTLER of Knox: I want to inire. Mr. President, of the Senator om Cumerland, Senator Davies, if he fers to joint rule 14.

Mr. DAVIES: Mr. President, I am t acquainted with the number of the le, but I have a very distinct recoltion, however, that there is such a le, and if the Senator cares to have  $\theta$  state it I will state it again.

Wr. BUTLER: Mr. President, I just ade the inquiry whether the Senator ied on joint rule 14.

Mr. DAVIES: I have not a copy ofrules here, Mr. President.

The PRESIDENT: The Chair will ite on the point of order, that this I having been referred to the judiry committee and having been actupon by the judiciary comttee and reported back to the gislature, and that report being epted by both branches of the report gislature, and that being ainst the passage of the bill, that der rule 14 that is a final decision on ; bill, and so that the Chair will be ced to sustain the point of order sed by the Senator from Cumberd. Senator Davies.

Vhat is the pleasure of the Senate do with this order?

Ir. DAVIES: Mr. President, I ve that the order be indefinitely tponed.

'he motion was agreed to.

Orders of the Day.

n motion by Mr. Higgins of Pencot, it was

rdered, that 5,000 additional copies the Budget Message and Appendix printed.

n motion by Mr. Butler of Frankit was Ordered, that the use of the Senate Chamber be granted to the committee on labor for a public hearing on Wednesday, February 21, at 2 o'clock in the afternoon.

Mr. BURLEIGH of Aroostook: Mr. President, I shall be obliged to go to Massachusetts to attend a funeral, and wish for leave of absence until Monday night.

Mr. DAVIES of Cumberland: Mr. President, if I may speak from here, I move that the leave of absence be granted the Senator.

Mr. MERRILL of Somerset: Mr. President, the gentleman is out of order.

Mr. DAVIES: The President recognized me from where I was and I thought I had a right to speak. The Chair will excuse me.

The PRESIDENT: The Chair will take cognizance of the gentleman's desire for leave of absence.

Mr. WALKER of Somerset: Mr. President, I move that leave of absence be granted Senator Burleigh.

The motion was agreed to.

The PRESIDENT: The Chair would state that he hopes that those members of the Senate who have bills or resolves on the table upon which no disposition has been made, will make up their minds what they want to do with them, and so clear the records as soon as possible. As long as a bill or resolve is on the table it makes no headway, and sooner or later those things encumber the calendar and impede legislation.

On motion by Mr. Stanley of Oxford, Adjourned. LEGISLATIVE RECORD-HOUSE, FEBRUARY 15, 1917

### HOUSE.

#### Thursday, February 15, 1917.

The House met according to adjournment and was called to order by the Speaker.

Prayer by the Rev. Mr. Anderson of Augusta.

Journal of previous session read and approved.

Papers from the Senate disposed of in concurrence.

From the Senate: An Act authorizing the town of Caribou to acquire property of the Caribou Water, Light and Power Company, and to construct and maintain for itself and for persons and corporations a system of water works within said town.

This bill was read and passed in the House as amended by House Amendment A and then sent to the Senate.

In the Senate, House Amendment A was indefinitely postponed in non-concurrence and the bill was recommitted to the committee on legal affairs.

On motion by Mr. Tuttle of Caribou, the House receded and concurred with the Senate in indefinitely postponing the amendment.

On further motion by the same gentleman, the bill was recommitted in concurrence to the committee on legal affairs.

### Senate Bills on First Reading.

Senate 137. An Act to punish the giving of checks or drafts on any bank or other depository, wherein the person so giving such check or draft shall not have sufficient funds or credit for the payment of the same.

(Title amended by the committee to which it was referred to read "An Act making it unlawful to give checks or drafts on banks where the maker has not sufficient funds or credit to pay the same, and providing a penalty therefor.")

Senate 138 An Act concerning industrial banks, defining the same, and providing for their incorporation, powers, supervision and control.

Senate 140. An Act to extend and of same.

amend the charter of the Fairfield : Skowhegan Railway Company.

From the Senate: Report of committee on judiciary on biil, An . to amend Section 27 of Chapter 54 the Revised Statutes of 1916, relat to applicants for admission to the of this State, reporting "ought not pass."

In the Senate the report of the cc mittee was accepted.

The report was accepted in conc rence.

The following bills and petiti were presented, and, on recommen tion of the committee on reference bills, were referred to the follow committees:

### Commerce.

By Mr. Fletcher of Kennebunkpe Petition of Percy N. H. Lombard, 29 others, of Old Orchard, in favo an act to amend Section 38 of Chay 40 of the Revised Statutes of 1916, re tive to Old Home Week; also petit of John H. McSweeney, and 23 oth cf Old Orchard, in favor of same.

By Mr. Buzzell of Belfast: Peti of Francis Longley and 110 oth in favor of same; also petitior Chauncey M. Allen and 25 other, favor of same.

By Mr. Williams of Auburn: monstrance of Rev. A. D. Paul and others against the passage of Hc Document No. 44, relative to Sun hunting.

By Mr. Fletcher of Kennebunkp Remonstrance of G. H. Gray of Ker bunkport and 38 others against pass of same.

282

By Mr. Cummings of Hebron: ionstrance of F. A. Heidner and 18 to that committee for correction. thers against same.

By Mr. Emerson of Lewiston: Reionstrance of George H. Hamlin and our others of Lewiston against same.

By Mr. Farrington of Augusta: Reionstrance of Byron Cummings and 22 thers of Bethel against same.

By Mr. Russell of Farmington: Reionstrance of Charles E. Brooks and 1 others against same.

By Mr. Harman of Stonington: Reionstrance of D. W. Kimball and 39 thers of Sedgwick and Brooklin gainst same.

By Mr. Alden of Gorham: Remontrance of Henry H. Crane of Gorham nd 31 others against same.

Sea and Shore Fisheries.

By Mr. Boman of Vinalhaven: An act relating to fish wardens: (1,000 opies ordered printed.)

By the same gentleman: Petition f B. L. Lawry and others in favor of ine-inch lobster law.

By Mr. Harman of Stonington: Petiion of L. D. Newman and 22 others sking that no change be made in the resent general lobster law or shipping obsters out of the state.

#### State Sanatoriums.

By Mr. Barnes of Houlton: Petition f E. H. Jackson and 140 others, resients of Aroostook County, in favor of he passage of a resolve for the estabshment of the Northern Maine Sanaorium; also petition of Henry H. Putam and 19 others, residents of Washngton County, in favor of same.

#### Orders.

On motion by Mr. Brewster of Portand, it was

Ordered, that House bills Nos. 249 nd 250 be recalled from the House ommittee on bills in the third readng.

Re- fairs wish to have them recommitted

On motion by Mr. Goldthwait of Biddeford, it was

Ordered, that the use of the hall of of Representatives the House be granted to the committee on sea and shore fisheries for a public hearing on the afternoon and evening of February 27, 1917.

On motion by Mr. Brewster of Portland, it was voted that House bills Nos. 249 and 250 be recommitted to the committee on legal affairs.

On motion by Mr. Phillips of Southwest Harbor, it was

Ordered, the Senate concurring, that the petition of L. W. Joyce, and 38 others, for the repeal of Chapter 85 of the Private and Special Laws of 1915, relating to fishing, also petition of Frank A. Babbidge and 16 others in favor of same, which were referred to the committee on inland fisheries and game be recalled from that committee.

On motion by Mr. Cates of Vassalboro, it was

Ordered, that 2,000 copies of the governor's budget message be printed for the use of the members of the House.

On motion by Mr. Dearth of Dexter, it was

Ordered, the Senate concurring, that bill, entitled An act for the enforcement of liens on jewelry, clocks and watches, repaired by jewelers, Senate Doc. No. 7, be taken from the files for further consideration by the legislature.

DEARTH: Mr. Ι Mr. Speaker, would suggest that the message be sent to the Senate.

#### **Reports of Committees.**

Mr. Nicholas from the committee on appropriations and financial affairs, re-Mr. BREWSTER: Mr. Speaker, this ported "ought to pass" in new draft rder requests the House to recall two under title of "Resolve in favor of the ills from the committee on bills in recording and other officers of the he third reading on account of the fact House of Representatives of the 77th hat there were certain errors discov- Legislature for services at the organ-red, and the committee on legal af- ization of the 78th Legislature," on re-

tunat Belleau, H. M. Rogers, F. H. Leonard, James H. Muldoon, Roger D. Sleeper, R. C. Frank, E. S. Austin, N. S. Gray, Estate of J. B. Potter, F. K. Jack and P. H. Fitzgerald.

Mr. Chaplin of Bridgeton from the committee on legal affairs, reported "ought to pass" in a new draft under same title on bill, An act to provide compensation for town clerks for issuance and recording of burial permits.
