"PETER PAN" PROVES MOST SUCCESSFUL.

REVIVAL OF AMATEUR PRODUC-TION DRAWS TWO ENTHU-SIASTIC AUDIENCES.

Parts Well Filled And A Fine Sum Will Be Turned Into The Church

Fund.

Perhaps the most successful and carefully planned amateur theatrical entertainment ever seen at Chebeague was given last Friday and Saturday evenings, when "Peter Pan" was presented by a cast of young summer vis-itors. The company was practically the same as gave the playette last season, but this year's production was much improved by the addition of sev-eral dances and the accompaniment of the songs, Miss Alice Perkins playing the plano, Lightly Solled and Curly, executed a pleasing heel and toe dance, Hook did the hornpipe and Peter added the shadow-dance. Great credit is due to Mr. Walter Rogers of Dorchester, who had the coaching of the cast in charge, and to Mr. Ralph Raymond of New York, who assisted in arranging the wellexecuted stage effects.

The principal roles were admirably held, Peter Pan and Wendy showing much improvement in their acting. However, all the parts were well taken and to every member of the company Mr. Bert W. Mss. is regist is due much credit for the success of the playette. The younger members of the audience seemed especially interested in Hook, the ferrocious pirate chief and his band of wicked followers. Lieutenant Smee was extremely clever his gostures and carriage. Much amusement was also afforded by the antics of Nana, the canine nurse, and the extremely natural acting of little Michael. The singing of several solos be-

tween the acts by Miss Isabel West and Mrs. Ralph Raymond of New York, made the intermissions pleasant, while Mr. A. C. Robbins assisted between the scenes with several and Arthur L. Furfey of Brookline, are phonograph selections. The affair spending a short outing at Chebeague proved most successful financially, the hall being crowded both evenings. Several large parties from one of the neighboring islands were present at

the final production. The committee in charge of the entertainment are very grateful to Mr. Charles Hamilton for the use of Hill Crest Hall; to Mr. Alfred E. Hamil-

After his business venture Ring Neptune turned to the amusements of the amphitheatre. The arena was enclosed by the circular walls of a choral island and deep down upon the sloping shores were gathered the mermaids and mermen of the submarine aristocracy. The gladiators were ferocious sword fish whose 8 foot weapons crashed and grated as the fight progressed. Suddenly a messenger rode furiously up to the royal box reining back his foaming horsemackerel." Greeting, O King, from your illustrious Queen." cried he. "She bids me say your majesty forgets 'The pen is mightler than the Sword.' " "True," cried Neptune, "Especially pens bought from Wm. W. Roberts Co. of Portland. Let the fight be stopped."

FATE AND A NAME.

How Misfortune Has Dogged Royal Persons Named "John."

It is interesting and somewhat curious to note the persistence with which misfortune has dogged the name of "John" when borne by royal persons, although no ill omen seems to attach to it in the case of ordinary citizens.

For instance, King John of England has always been regarded, whether altogether justly or not, as a most famous prince. John of France was taken captive by the Black Prince, and John Baliol of Scotland was most thoroughly despised by his countrymen on account of his fawning attitude toward the English. Robert III. of Scotland changed his name from John, but this did not save him from his destiny. He himself was a cripple and died of a broken heart, the most tragic fate having overtaken all most dear to him.

John I. of Bohemia was blind. The Pope John I. was imprisoned by the King of the Goths, and Pope John X. was driven from Rome by the Duke of Tuscany. Pope John XI. was imprisoned by his brother, and is supposed to have been poisoned, a fate similar to that of Pope John XIV. Pope John XV. was forced to flee from Rome, and died of fever in Tuscany. John XVI., dubbed the "antipope," after a troubled career, was brutally tortured and consigned to a

K. Murakami and Paul K. Hisada of Boston, Mass., who conduct a large up-to-date retail store of Japanese fine arts at 324 Boyston street, have been registered here since Wednes-day last. This is their first visit to this part of the Pine Tree State coast, and they are delighted with the sur-roundings. On their arrival they joined H. Yatsuhashi of Brookline, of the firm Yamanaka and Co., whole-sale dealers in Japanese goods at 93 Summer St., Boston. These Japanese young men have been residing in America for only a few months.

Mrs. E. H. Potter and children, Stuart, Rosamond and Marjorie of Brookline, arrived the early part of last week for their vacation, and will be guests at Oakhurst Island for a fev weeks.

Mr. A. H. Southard of Cliff Island was here on Thursday evening, mak-ing the trip in his motor launch. He was accompanied by Mr. Frank Web-ster of Newton, who, with his wife, are to be registered here the latter part of August.

Friday with forty barrels of shad, which were caught off Sea Wall beach. The store of Watson Bros., at the steamboat landing always has a fresh stock of groceries and provisions and s an up-to-date firm for the cottagers here to trade with.

Carr G. Horn of Horn's Mills, N. H., is being entertained at the home of R. S. Watson, he having arrived Wednesday of last week.

Abner J. Harris reports the grocery business better than ever this season, and with the large number of summer people Cundy Harbor is be-coming more popular. Everything in Mr. Harris' large stock in trade is of the best.

In spite of the much rainy weather recently the guests have been very busy with whist parties, motor-boat cruises, dances, and many other diversions which add to their summer pleasures. during the past week. Miss Sarah P. Coop of Boston is the guest of Mrs. W. H. Prescott, and will remain on the island during August. Miss Ellen Holton of Winchester arrived on Monday to be the guest of Mrs. H. E. Wellington at the Christy

cottage for a two weeks' stay. Mr. Sidney T. Callowhill has opened a tent on the point which he bought last season with his cottage, "The Log Cabin," from Mr. C. B. Shepard. The tent is located in a beautiful spot, commanding a beautiful view of Portland, and is used as a studio. Mr. Callowhill may be found here every Monday, Wednesday and Friday after-noon, between two and four o'clock, and would be glad to meet all who care to examine his work. Several of his paintings have been placed on view in the parlors of the Rockmere House.

Canadian Indians as Soldiers.

John I. of Constantinople was polsoned; John II. was killed while hunting wild boar, and John III. was dethroned, his eyes put out, and he was left to die in prison. John I. of Castile was killed by a fall from his horse.

This is not by any means a complete list of the unlucky Johns, but it serves to show the fatality which seems to cling about the name in so far as royalty is concerned .- Chicago Record-Herald.

Mt. Washington's Summit House.

Portland people will read with interest the announcement that a new hotel is to be immediately erected on the summit of Mount Washington, to take the place of the building which was destroyed by fire last week. To put up a large structure on the mountain top is not a simple piece of work by any means, yet, thanks to the railroad, it is much easier to-day than was a similar undertaking when houses were first erected there. Then all the materials were transported on the backs of horses or were carried up the meet, the contact rods of one are remountain slopes by men. Rail-less Tramways.

A short description is given in the Practical Engineer of a number of "rail-less tramways," now in operation in different parts of Germany, for the conveyance of both passengers and goods. The cars consist of dirigible vehicles, propelled by electric motors, which receive their current from an overhead conductor, supported on trolley poles. The cars have sufficient freedom of movement to enable them to turn aside about 12 feet in either direction from their wires. When two cars, traveling in opposite directions, moved from the wires, and replaced scribed in these columns. ly.

Life on Mars.

Not only do the observations we have scanned lead us to the conclusion that Mars at this moment is inhabited. but they land us at the further one that these denizens are of an order whose acquaintance was worth the making. Whether we ever shall come to converse with them in any more instant way is a question upon which science at present has no data to decide. More important to us is the fact that they exist, made all the more interesting by their precedence of us in the path of evolution. Their presence certainly ousts us from any unique or self-centred position in the solar system, but so with the world did the Copernican system the Ptolemaic, and the world survived this deposing change. So may man. To all who have a cosmoplanetary breadth of view it cannot but be pregnant to contemplte extra-mundane life and to realize that we have warrant for believing that such life now inhabits the planet Mars .- Prof. Loweil in the Century.

Canada's Average Wages. A correspondent chides the Ga-

zette for saying that in Britain the income tax' was only paid by the well-to-do, and then he points out that the import falls on all who have an income of £160 or over. A man with such an income may not, perhaps, be classed with the well-to-do; but he is not in the hard-up class, either in Great Britain or Canada. Even here, where wages are generally higher than in European countries, the man with a steady \$800 a year would be counted fairly well fixed by the mass

ment statistics show, have average earnings of about \$400 a year .- Mon-

treal Gazette.

How natural that the mere mention of this month brings to every woman's mind the thought of "Clearance Sales."

For years it has been our custom during August to make a final sweeping price reduction, so thorough as to effect the complete removal of every vestige of Summer goods.

It is not good business to carry over merchandise from one season to the next; furthermore, we can not spare the space -even now there are new Fall goods waiting for shelf and counter room.

Millinery, Coats, Suits, Waists, Shirt Waist Suits, Beautiful Laces and Embroideries, Fancy Collars and Ties---everything with a suspicion of Summer about it must go.

Come and carry away an armful at the price of a handful.

The most curious postcard even produced, according to a leading philatelist, was one which the Japanese government put out in 1873.

In describing, he says it is "really a sheet of paper folded as four pages of a narrow book. On the front page is a border inclosing an impressed stamp for the postage rate and space for the address.

On the second page are printed in native characters only minute direc tions for use. On the third page are ruled a number of vertical lines be tween which the sender has to write his communication, and the fourth page was a blank." They remained use until 1875 .- Philadelphia in Press.

By ELLIS O. JONES. "I understand you have what is called 'the problem of the unem-ployed.' What might that be?" asked the Man from Mars.

"That is a very serious problem," answered the Professor of Political Economy. "Now and then, we are unable to find work for a large number of our people."

The Unemployed.

"I don't see any problem in that," said the Man from Mars. "Where I came from, no one wants to work any more than one has to and, if there were no work to be done, it would merely indicate that we were in a highly prosperous condition. However, I must say that your country does not appear to me to have reached that stage of perfection where any considerable number of people could profitably remain idle. That is to say, I see a lot of matters in an unfinished and imperfect condition upon which haman labor could well be applied with profit to the community." "You are right," said the Professor of Political Economy. "But don't you see that, under our system of individ-

ual initiative, we have parceled out the control of our jobs to the wise and stable men of the community and of course they could not be expected to provide work unless they could make a profit out of it?"

"Oh, that's different," said the Man from Mars. "You say the people make this arrangement and then you say it doesn't work well. Why do the people not change it?"

"That would be unconstitutional and an abrogation of a long line of judicial decisions."

"Are constitutions and judicial decisions of more importance than popular decisions?" asked the Man from Mars, not for the purpose of starting an argument, but to get information. "Yes and no," answered the Professor.
