July 9, 1970

WARDEN SUPERVISOR DAVID PRIEST, LINCOLN CENTER, DIV. G.

During May and most of June, we had 26 deer and 16 moose killed by various means, mostly on the highways. A terrible waste of fine game animals. A little more caution and a little less speed would have saved much of this valuable wildlife.

Fishing over much of our division has been pretty good all spring.

At last reports, there had been about 45 bear killed in the Patten area. Quite a few reports of bear being seen. I have yet to see my first young grouse of the season, and I have seen very few old ones.

WARDEN SUPERVISOR WALLACE BARRON, DIVISION J.: Black flies seem to have wintered well.

WARDEN NORMAN HARRIMAN, ROCKWOOD, DIVISION J.: Lake fishing remains slow; hatches of flying ants and pollen have covered the water.

WARDEN SUPERVISOR GEORGE D. NASH, JACKMAN, DIVISION K.:

Trout fishing was good in the Pittston District. About noon, Warden Michael O'Connell apprehended one man with 33 trout; in the afternoon, another man with 10 trout; and in the evening, he and Warden Carter apprehended a party of three with 37. The back roads are in pretty good shape now except for dust. Very few fishermen in the back country. Seeing a lot of deer and moose now and they seem to be in very good shape.

Something new all the time. Warden O'Connell and I checked a party at a back pond recently using a manufactured fish chum. It's a porous, bricklike substance in a coarse cloth bag and dissolves very slowly when in the water. It's made by a national meat packing firm. Possibly it works. Even though they received a warning about using it, they were apprehended later with too many trout.

WARDEN MICHAEL O'CONNELL, ROCKWOOD, DIV. K.: Fishing activity quite heavy although not many fish are being caught. I checked a fisherman yesterday coming off Brassua Stream, eight trout, 3½ to 5½" long.

WARDEN GEORGE CHASE, ST. AURELIE, DIV. K.: Watched a large cow moose swim across Baker Lake. I am seeing almost as many moose as deer in my district; also, a lot of small foxes are showing up.
