in children's shoes is unusual. Made of odds and ends—fastened together so they will “just hold” and that is all. A few days of play and a little dampness means a trip to the cobblers or a new pair. Why not buy the wearing kind? LITTLE INDIANS is their name. To be sure they cost a few cents more at first, but these few cents are in the shoes and mean to the purchaser double service and much longer wear. Price from \$1.00 to \$2.00, according to size.

**NEWSPAPER HISTORY**

The Rockland Gazette was established in 1846. In 1874 the Courier was established, and consolidated with the Gazette in 1882. The Free Press was established in 1885, and in 1891 changed its name to the Tribune. These papers consolidated March 17, 1897.

The noblest principle in education is to teach how best to live for one's country.—Balch.

“Bunk” Allen, the inventor of pink lemonade, is dead, says an exchange. So are many of the people who drank this circus concoction.

The order reducing the size of United States currency and national bank notes by one-third and completely revolutionizing their designs will be issued by Secretary MacVeagh within a few weeks. The new currency will measure 6 1/2 inches, as compared with 7 1/2 of the present notes. It will require 18 months to make the change complete.

The contract for the new Maine Central R. R. station at Augusta has been let to the Leighton-Mitchell Co. of Boston. Work was begun Monday and the contract calls for the completion of the building and its delivery to the railroad Feb. 1st. The exterior will be tapestry brick and tile, with cement trimmings. The interior will be terrazzo floor, marbled base-boards and dado, with buff caenstone walls.

The depth of 9,780 meters to which the sounding line of a German survey ship is said to have sunk in the Pacific Ocean near the Philippine Islands is some 1,000 meters deeper than the previous deepest sounding. Of the total water surface of the globe, 1,145,000,000 square miles, about one-third stands more than three miles above the bottom of the sea, but until now no part of the great oceans has been discovered deep enough to submerge Mt. Everest. But if there is no mistake about this depth of 9,780 meters (32,088 feet) the world's highest mountain could be sunk there until its highest peak was 3,000 feet below the water's level. The deepest soundings have all been made in the Pacific; 23,250 feet is the record of the Atlantic, in proximity to the West Indian Island of St. Thomas; while the North Sea only averages 300 feet, or about one-tenth the maximum depth of the icy waters of the Arctic Ocean.

### REPUBLICAN NOMINATIONS

For President  
**WILLIAM H. TAFT.**  
of Ohio

For Vice President  
**JAMES S. SHERMAN,**  
of New York

Whom the gods would destroy they first make mad. Col. Roosevelt has returned from his western stumping tour and as there has been observed more and more a manifestation of that country's purpose to remain steadfast to its Republicanism, the anger of the distinguished campaigner has deepened, exhibiting itself in an increasing scale of passionate denunciation of everybody who in any manner dares to believe in anything but the bull moose. The Portland Press editorially reviews this phase of the Colonel's campaign:

There are good many Republicans in this country, several millions of them. And they are growing in number. Being the objects of such abuse as no body of self-respecting citizens has ever before been compelled to undergo, at least in our times. The spirit of tolerance has its limit. At length it will have to give way to indignation. Col. Roosevelt's plan of campaign seems to be one of abuse. From the Atlantic to the Pacific, from the Gulf to the lakes, he has sent the air with screams of angry denunciation. He has applied to the Republicans from the President down, one and all, every epithet which a rather opinionless vocabulary of vituperation could supply. On every stump he has called them thieves, crooks, liars, robbers, fences, receivers of stolen goods, condoners of fraud, and what not. At first it appeared somewhat amusing. The brimstone has been in this country to indulge Col. Roosevelt, make allowances, and give him an unusual degree of license, because of his great popularity and the belief in his sincerity. But he presumes too much upon that. If at first his denunciation was taken in a tolerant and even jocular spirit, it becomes wearisome, vexatious, irritating, and intolerable after a time. Republicans find their stomachs palling on a steady diet of it. They do not like to be called crooks and robbers morning, noon and night. The worm has received all the brimstone it can endure from a rough heel, and it turns at last.

In his speech at Lamar, Missouri, pointing to a man with a Taft banner, Col. Roosevelt said: "I am the man who supports the receiver of stolen goods, stands on a level with the receiver of the stolen goods. He is a dishonest man and unfit to associate with honest men." Again he said that the man who wears a Taft badge "shows that he has a yellow streak somewhere." And again he said: "The Republican national committee is composed of 53 men, most of them shady characters. They ought to boom the market for Taft badges. Coming from any other man, this sort of talk would be called billingsgate. Coming from Col. Roosevelt, does it make any difference? Is it to be dignified by the name of argument? Can it be convincing to any rational man? Is it fair? Is it decent? Will it win support? Where is the boasted square deal? There is a large number of men in this country who intend to vote for President Taft, and who consider themselves up to the average in intelligence, honesty and decency, and who moreover regard Col. Roosevelt's tirades as personal insults. What advantage is there to be gained by daily pouring out insults upon these men?"

In contrast with the hot and vituperative language of our excitable friend it is refreshing to contemplate the calm and gentlemanly poise of the President, the nominee of the Republican party toward whom the pendulum of election, after some wobbling, is now swinging, with a motion that will be increasingly accelerated as the voters perceive how futile a thing for the country's welfare it would be to run after either of the other candidates. When President Taft speaks the thoughtful people of the country know that his utterance is that of a gentleman and a statesman, speaking without passion and never appealing to the unreasoning prejudice of the people. In New York Wednesday the President, after a long conference with a number of committee men upon the progress of the campaign, gave out the following statement:

When I declared a few weeks ago that I felt reasonably sure of my own re-election in November and the success of the Republican party I was regarded by some as entirely over- sanguine and unaware of the situation. Today, however, after a number of indications that the Republican party is still the dominant party and that the expected growth of Democratic strength has failed to materialize my early declaration is shown to be entitled to respect.

The Republicans necessarily will have a reduced majority over 1908 because of the presence of three tickets in the field, but the Democratic party will suffer also. The combined strength of the third term party will not be enough to change the ultimate result.

Five or six weeks ago it was asserted generally that the Republican party would maintain its hold on the solid South, and that the third term party would secure the solid West, leaving only the Middle West as a debatable ground.

Today, with the election still one month away, the Republican party has routed the Democrats and the

Michigan, Washington, Idaho and Wyoming. Moreover, if the proper kind of a campaign is waged, we will carry Oregon, Kansas and Minnesota, where the third term strength has rapidly waned since the recent tour through that section by the party's candidate.

I am not familiar with the developments in other Western states, although many good reports have come to me at Beverly concerning them, but even with the states already mentioned it can be seen that there is no longer a solid West back of the new party, but more nearly a solid West reunited in support of the Republican ticket.

This strength, added to the indisputable Republican hold on the Eastern States, constitutes in itself a sufficient strength to give success to the party.

It is scarcely necessary for me to point to the necessity of re-establishing a Republican majority in the House of Representatives. If this is done, I feel confident that I will be able to have placed on the statute books the workmen's compensation law which I urged upon the last session, but which was sent to oblivion by the Democratic House.

If the country will give the Republican party a complete victory in its Congress as well as its Presidential ticket, a proper tariff revision will be speedily effected, with knowledge of the facts ascertained by a tariff commission, which will harm no one and remove its present defects.

Our good friend and oft-time mentor, the Opinion, is pained to observe that The Courier-Gazette does not fly into a passion and launch some columns of billingsgate upon those Republicans who have allied themselves with the bull moose movement. Admonishing its readers that they should discuss political questions and candidates dispassionately and keep their tempers well in hand, the San Antonio Express lays down this platform:

Resolved, That we will not get mad at the other fellow, and we hope he will not get mad at us. What we need to accord to one another in this year of political strenuousness is the right to the free expression of honest sentiment. Let none of us abuse the tolerance of the neighbors by becoming intemperate in speech or action. That good old Anglo-Saxon custom of shaking hands before and after the fight has always commended itself to the world as a most excellent thing. The world loves an honest fighter, but it does not admire malice.

We hope there is no malice in the Opinion's intimation that Bullmoosers and Republicans, lately of one happy family, ought to find now their chief delight in calling each other names such as the Democrats of Knox county are fond of applying to one another.

These new please-keep-off-the-grass signs on the Soldiers Memorial lot are models of what such signs ought to be. A neat oval in form done in black and gold and set close to the ground, they serve every purpose of warning and are distinctly ornamental, in pleasing contrast to the huge black and white sign mounted in air upon a big stake. These little examples of good taste in such matters go a considerable way toward giving beauty and character to a city.

The Courier-Gazette has pulled down its Taft and Sherman flag—whether in token of surrender or merely of funk, dependent sayeth not. Going to run up the red Roosevelt colors, neighbor, or the pure white banner of Wilson Democracy?—Opinion.

We are afraid our neighbor, in his great zeal to give his usual in-advance election to the Democratic candidate, is seeing too many things that aren't visible. The Courier-Gazette will fly neither a scarlet nose-wiper nor a white flag of surrender, but will continue to mast-head that emblem of victory under which the Republican party has ever marched—the Star Spangled Banner.

Judge Hurley held both complaints to be defective, as they merely described the saloons as located "on the east side of Main street," without giving the number.—Opinion.

A delicate technicality, my lords and gentlemen. Rumors are such a necessary thing in the community that the greatest care must be exercised lest, where rum is found on a search and seizure process, the man guilty of owning and selling it is found guilty and punished.

### ROCKLAND TAFT CLUB

The preliminary steps are being taken toward the organization of a Taft Club in this city, and the voters will receive due notice of the meeting. Republicans are much interested in the movement, which promises to have a large and active following. A Taft and Sherman banner was flung out Thursday.

### CONFIDENCE IN TAFT

Chairman Hillis Tells Why President's Re-election is Virtually Assured—People Do Not Want Wilson and His Tariff or Roosevelt and Revenge.

Charles D. Hillis is confident that this tide has turned and that Taft's re-election is virtually assured. He said Tuesday:

"There is no longer much talk to the effect that the country is being deeply stirred and materially accelerated by the trend of events. He said Tuesday:

"There is no longer much talk to the effect that the country is being deeply stirred and materially accelerated by the trend of events. He said Tuesday:

"He entered the fight with no other thought or purpose. It is evident from letters written by gentlemen whose authority to speak for him is undisputed that Mr. Roosevelt never expected to do more than figure third in the race. He went into the campaign for revenge, retaliation and reprisal because of the mention in the papers filed in connection with the steel trust suit of his part in the absorption by that corporation of its only real rival. His spectacular performances are all timed and staged in the interest and for the benefit of the free trade candidate of the Democratic party. Conviction on this point has kept pace with the evidence of his waning strength and has brought about solidification of the Republican ranks as an extensive right to the free expression of honest sentiment. Let none of us abuse the tolerance of the neighbors by becoming intemperate in speech or action. That good old Anglo-Saxon custom of shaking hands before and after the fight has always commended itself to the world as a most excellent thing. The world loves an honest fighter, but it does not admire malice.

Resolved, That we will not get mad at the other fellow, and we hope he will not get mad at us. What we need to accord to one another in this year of political strenuousness is the right to the free expression of honest sentiment. Let none of us abuse the tolerance of the neighbors by becoming intemperate in speech or action. That good old Anglo-Saxon custom of shaking hands before and after the fight has always commended itself to the world as a most excellent thing. The world loves an honest fighter, but it does not admire malice.

We hope there is no malice in the Opinion's intimation that Bullmoosers and Republicans, lately of one happy family, ought to find now their chief delight in calling each other names such as the Democrats of Knox county are fond of applying to one another.

These new please-keep-off-the-grass signs on the Soldiers Memorial lot are models of what such signs ought to be. A neat oval in form done in black and gold and set close to the ground, they serve every purpose of warning and are distinctly ornamental, in pleasing contrast to the huge black and white sign mounted in air upon a big stake. These little examples of good taste in such matters go a considerable way toward giving beauty and character to a city.

The Courier-Gazette has pulled down its Taft and Sherman flag—whether in token of surrender or merely of funk, dependent sayeth not. Going to run up the red Roosevelt colors, neighbor, or the pure white banner of Wilson Democracy?—Opinion.

We are afraid our neighbor, in his great zeal to give his usual in-advance election to the Democratic candidate, is seeing too many things that aren't visible. The Courier-Gazette will fly neither a scarlet nose-wiper nor a white flag of surrender, but will continue to mast-head that emblem of victory under which the Republican party has ever marched—the Star Spangled Banner.

Judge Hurley held both complaints to be defective, as they merely described the saloons as located "on the east side of Main street," without giving the number.—Opinion.

A delicate technicality, my lords and gentlemen. Rumors are such a necessary thing in the community that the greatest care must be exercised lest, where rum is found on a search and seizure process, the man guilty of owning and selling it is found guilty and punished.

### ROCKLAND TAFT CLUB

The preliminary steps are being taken toward the organization of a Taft Club in this city, and the voters will receive due notice of the meeting. Republicans are much interested in the movement, which promises to have a large and active following. A Taft and Sherman banner was flung out Thursday.

and the high character of their Chief Executive. And because of it, because of the conviction that prosperity and development along these lines—material and ideal—the best subserved by it the people of the country are turning to President Taft in such numbers as to give promise of his re-election in November, an outcome in which I have the deepest abiding personal faith."

## Made My Life Worth Living

"I feel it my duty to tell others what Chamberlain's Tablets have done for me," writes Mrs. L. Dunlap, of Oak Grove, Mich. "I have suffered with pains in my back and under my shoulder blade for a number of years, also with a poor appetite and constipation. I tried all of the remedies that I heard of, and a number of doctors, but got no relief. Finally a friend told me to try Chamberlain's Stomach and Liver Tablets. I got a bottle of them and they soon helped my stomach; by their gentle action my bowels became more regular. Today I feel like praising them to all who suffer as I did, for they have cured me and made my life worth living."

dence has lately been remodelled and  
is now one of the finest in the city.

Charles Chapin, formerly of this  
city, and now of the editorial staff  
of the Boston Transcript, has been  
playing with the Transcript team in  
the Boston newspaper league. His  
batting in the game last Monday  
with the Globe team received special  
mention.

A blow-pipe burst on the steamer  
Monhegan Wednesday afternoon, and  
the engine room was filled with es-  
caping steam. Frank Keeffe, one of  
the firemen was badly scalded and  
Capt. Stanley landed at Booth-

days and Fridays, both ways.

In a recent issue of The Courier-  
Gazette Gilbert H. Payson of Camden  
his row-boat, which somebody had  
stolen from the moorings near the  
Hall cottage at Ginn's Point. Evi-  
dently the culprit saw the advertise-  
ment—anyway.

Payson, Mr. Post of Spruce  
Head did, for he returned to Mr.  
Hall the boat, which he had found  
adrift off Metinic, abandoned by its  
abductor.

A caller at The Courier-Gazette  
office yesterday was one of its long-  
time friends, F. W. Payson of Camden.

"I don't know how we could  
keep house without your paper," he  
said. "I subscribed to it during the  
Fremont campaign and my name has  
been on your list ever since. The  
paper seems like one of the family."

I guess I'm about your oldest sub-  
scriber—I'm 84 years old. The paper  
is not only an oldest subscriber  
but he is a model one, for he paid  
his subscription in advance to  
August, 1914.

Deputy Sheriffs Sprague and Co-  
burn made large seizures Tuesday  
night at the saloons of William  
Grant and Frank Freeman, on com-  
plaints of County Attorney Howard.

Both respondents were discharged,  
and the trial judge's decision, on the  
ground that warrants did not contain  
the numbers of the places of busi-  
ness which they occupied. County  
Attorney Howard said the warrants  
specific information was not required,  
and is seldom furnished in the war-  
rants on which many respondents  
have previously been held. Thursday  
Grant and Freeman were held for the  
grand jury in the sum of \$200 each  
on nuisance complaints.

"The Fortune Hunter," at Rock-  
land Theatre Wednesday night de-  
lighted an audience which should  
have been about three times as large.  
Starring in this fascinating comedy  
are John Meehan and Miss Marion  
Johnquest, who once before captured  
a Rockland audience in "The Man on  
the Box."

The cast of "The Fortune Hunter"  
was so well balanced that there was  
not a moment in the whole play when  
interest or appreciation waned. Man-  
ager Rosenberg should secure a return  
engagement and the theatre-going  
people should pack the house.

The large scow which is being  
built by Cobb, Butler & Co. for the  
Roy H. Beattie Co. of Fall River,  
Mass., will probably be launched in the  
middle of October, and could make  
the slide much sooner if the contrac-  
tors were not obliged to wait for  
some fixtures which the owners have  
ordered. The scow is 108 feet long,  
40 feet wide and draws 10 feet. It  
is to be equipped with an A frame  
derrick, the boom of which will be 22  
inches in diameter and 80 feet long.  
It will have a lifting capacity of 30  
tons. The scow will be used to light-  
en stone, and will have a deck-car-  
rying capacity of 600 tons. Some little  
excitement was caused in the yard  
the other day when the workmen found  
the name "Bull Moose" inscribed in  
chalk lettering on the sides of the  
scow. Mr. Butler says that the name  
has been selected by bids with some  
emphasis that it is not "Bull Moose."

Alongside the scow the frames are  
being erected for a sea-going tow-  
boat of about 400 tons, to be owned  
by the Atlantic Fertilizer & Oil Co.,  
and used in connection with the  
menhaden industry. Its dimensions will  
be: Length, 142 feet; beam, 26 feet;  
hold, 15 feet. The machinery will be  
installed by the Portland Company.  
The towboat will probably go over-  
board in January.

After MacFarland had been ar-  
rested and while he was in jail, he  
showed great desire to visit his home  
in East Orange to get some "clothes"  
from a dress case. His repeated  
applications for this liberty aroused  
the suspicions of Prosecutor Mott,  
who ordered a new search made of  
the house. Eventually a locked  
closet was discovered, and when  
opened it was found to contain a  
dress suit case. In the case were  
many letters from the Philadelphia  
paranor. They were so vulgar that  
they were sent to the jury without  
being read in open court. By them  
MacFarland was convicted. If he had  
never asked so anxiously about the  
dress suit case, it is not likely the  
truth of his relations with the Phila-  
delphia girl and the reason for his  
desire to get rid of his wife would  
ever have been known.

was finally shut off and repairs made,  
but the live wires had the place  
pretty much to themselves for a time.

### MacFarland SECOND TRIAL

Decision Which Made the Original  
Verdict Void Was Based On a  
Technicality.

In our Tuesday issue it was an-  
nounced that the re-trial of Allison  
MacFarland at Newark, N. J., would  
begin Oct. 14. A Newark newspaper  
received by Mr. and Mrs. G. A.  
Crockett, parents of MacFarland's  
dead wife, contains the following re-  
view of the case, with speculative  
comment:

It is probable that the trial will  
take place before Judge Mann, of  
the Common Pleas Court, sitting in  
Oyer and Terminer, and the testi-  
mony of the State will be much the  
same as on the first trial which oc-  
curred almost a year ago. Prosecu-  
tor Mott returned to his duties last  
week, having been somewhat de-  
layed by the illness and death of his  
father-in-law, John H. Hines. The  
counsel for the prisoner is Frank M.  
McDermitt.

MacFarland was convicted of wife  
poisoning, murder in the first degree,  
and, having been indicted by the  
September Grand Jury. He was con-  
victed by the petit jury, Chief Justice  
Gummere conducting the trial. The  
case was appealed to the Court of  
Errors and Appeals, and at the June  
term (last) the court decided that  
there had been an error in the trial,  
and the verdict against MacFarland  
was set aside, necessitating a new  
trial. The majority of the Appellate  
Court (Chief Justice Gummere not  
sitting, of course) held that while let-  
ters sent by MacFarland's paramour,  
a Philadelphia woman, had been  
properly introduced as testimony, the  
trial judge had erred in permit-  
ting their use as evidence that the  
prisoner, MacFarland, had in fact said  
he would soon get rid of his wife by  
poisoning her.

The majority opinion was  
written by Justice Garrison, of the  
Supreme Court. Justice Swayze, of  
the Supreme Court, wrote a dissent-  
ing opinion, holding that the con-  
viction was correct, and Justices  
Bergen, Parker and Voorhees and Lay  
Judge Vredenburg concurred with  
him. The margin was very narrow.

The decision hinged entirely upon  
the question whether the grand jury  
decided against MacFarland because  
the letters written by "Bunny," the  
Philadelphia woman with whom he  
was passionately in love, had in-  
dicated that MacFarland had written  
to her of his desire to get rid of his  
wife. The dissenting judges said that  
they could not see why the mental  
processes of the jury should be in-  
quired into. They had heard the evi-  
dence and had reached a verdict in view  
of all the facts, and the trial judge's  
instructions to the jurors could not al-  
ter that fact.

In brief, the decision making the  
verdict void was based upon a tech-  
nicality as to the way the mental  
processes of the jury should be in-  
quired into. The jury was presented,  
and yet both the major-  
ity and minority of the court  
agreed that the evidence was admis-  
sible. If the court alters the method  
of introducing the evidence, it is  
instructing the jury on request—  
to charge that the letters from  
"Bunny" to the prisoner should not  
be taken as showing conclusively  
that the evidence had been written to  
"Bunny" that he would get rid of his  
wife, the same evidence would  
probably convict the prisoner, if the  
same jury took the same view of the  
case.

The alleged murder occurred on the  
night of Oct. 17, 1911. MacFarland  
had a wife, a son and an infant child  
living in East Orange. He was in the  
employ of the Crocker-Wheeler Elec-  
tric Company, of Amherst. He had  
been long intimate with a single  
woman in Philadelphia and she had  
urged him to get a divorce and marry  
her. She was known as "Bunny" in  
Philadelphia, and it was known that  
she was in New York, which were filled  
with foulness. He went to the photo-  
graphic department of Crocker &  
Wheeler, and there took a quantity  
of cyanide of potassium, a deadly  
poison. He brought it home and put  
it in a bottle which had contained a  
bromide preparation used for head-  
aches by his wife, and left it on a  
table in a dark house. Then he took  
his 9-year-old son to New York, leav-  
ing his wife with his infant child,  
in the house alone. During the night  
she took the poison and died. The  
baby cried at her feet most of the  
night. The morning MacFarland  
returned, found his wife dead, called  
a doctor and it was supposed to be  
a case of suicide. Then it was dis-  
covered that his wife had been mad-  
dly unhappy by the husband's relations  
with the "Bunny" woman, it was  
charged, and that MacFarland had  
put the poison in the bromide bottle,  
placing it where his wife would be  
liable to take it if she had a headache  
or was nervous. The defense was  
that she had committed deliberate  
suicide.

After MacFarland had been ar-  
rested and while he was in jail, he  
showed great desire to visit his home  
in East Orange to get some "clothes"  
from a dress case. His repeated  
applications for this liberty aroused  
the suspicions of Prosecutor Mott,  
who ordered a new search made of  
the house. Eventually a locked  
closet was discovered, and when  
opened it was found to contain a  
dress suit case. In the case were  
many letters from the Philadelphia  
paranor. They were so vulgar that  
they were sent to the jury without  
being read in open court. By them  
MacFarland was convicted. If he had  
never asked so anxiously about the  
dress suit case, it is not likely the  
truth of his relations with the Phila-  
delphia girl and the reason for his  
desire to get rid of his wife would  
ever have been known.

### ROCKLAND THEATRE

It is certainly a great bill which  
the management offers its patrons for  
the balance of the week, and yester-  
day's audiences evidenced the hearti-  
est satisfaction with every feature.

John Le Clair, a famous old timer,  
who played in Rockland 42 years ago  
with Howe & Cushing's circus, is on  
the bill, but audiences have applauded  
a lot worse jugglers than John Le  
Clair, and as a matter of fact he is  
one of the cleverest men in his  
specialty that the stage has ever had,  
and is easily the best juggler that  
the local vaudeville stage has intro-  
duced to a Rockland audience.

The other feature on the bill is  
Lloyd and Zarina, who appear in a  
capital dancing act, with some fine  
back dancing, a graceful Spanish  
dance and a whirlwind waltz that sets  
the audience applauding furiously,  
and their contribution certainly  
proved one of the best of the kind  
introduced here for some time.

The bill for next week is Thomas  
and Ward, variety entertainers, and  
the Cycling Zanoras.

The First Circle Supper of the Season  
Will Be Served in the Evening.

## FARMERS AND PHONES

It Is No Longer Necessary to Hitch Up "Old Dobbin" and Drive to Town Over Bad Roads.

The August crop report of the Agricultural Department, with its forecast of record breaking gains for 1912, is interesting reading alike to the farmer and the city man, so essential to general prosperity are satisfactory returns from the soil.

The pessimist is disheartened with the gain of 191,000,000 bushels of corn, 16,000,000 bushels of spring and winter wheat and 390,000,000 bushels of oats, totaling almost 600,000,000 bushels in three crops with rye and barley not considered; and it is still necessary, in order to get some idea of the total, to add 20,000,000 tons of hay.

This is a billion dollar year for a billion dollar country and there is a fair chance that our 1912 crops will exceed \$10,000,000,000 for the first time in history.

What has brought about this increase? Are the rains wetter and the sunshiny brighter than in former days? Not so—they are just the same, but the present day farmer has learned well his lesson. "Make hay while the sun shines." The explanation of the increase is intensive farming, the application of science to the tilling of the soil, and economy in the use of methods and time.

The modern farmer no longer hitches up old Dobbin and drives over bad roads to town, thus needlessly wasting time and energy. He has learned that he can send his voice on his errands over the wire highway. The rural telephone has come to be the progressive farmer's partner. It enables him to accomplish more in one day than his father could have done in two or even three. This partner of his brings to him the weather forecasts and market quotations. He no longer works in the dark. The partnership between the American farmer and the rural telephone, is contributing to bring husbandry up to the same point of efficient organization as any of the so-called big businesses.

An official of the Western Electric Company, the manufacturer of the seven million rural telephones states that within the last five years they have sold over a half million telephones for the farmers, and the demand shows no signs of abating, as practically all of the country folks who have not already done so are realizing the ability of taking into their business a partner—a rural telephone.

## THE REAL THING.

"What's doing in the way of amusements?" asked the newcomer of the old inhabitants of Hades.

"Baseball game every afternoon," answers the old inhabitant.

"Baseball? You don't mean it! That's great! I was a fan from 'way back on earth. On the square, do you have baseball every day?"

"Sure thing."

"By ginner! This place suits me. Baseball! Say, this can't be hell, then?"

"Yes, it is. The home team always loses."

Queues and Hair Supply.

Consul General Anderson, stationed at Hongkong, has recently taken pains to correct the widespread impression that the growing tendency on the part of Chinamen to dispense with their queues will have the effect of making queues when cut are never sold, but are always preserved for burial with the owner. Mr. Anderson says that this is an absolute rule throughout South China, as well as in all other parts of the country from which he has been able to secure information on the subject.

## New Violins and Old.

A contest took place in Paris which seems to vindicate the contention that modern violins are as good in tone as those of ancient make. A number of violins were played in a dark room, and at the end a vote was taken from the musical audience present, with the result, says a Paris correspondent, that the finest violin was judged to be a Belgian instrument dated 1912; the second was a French 1911 violin, and not until the third came a Stradivarius, valued at more than \$23,000.

The Heavens in His Blindness.

An Indian went hunting one day for deer. After tramping through the woods for some hours he came across a herd and managed to kill one. He shouldered it and started for market, which was some five miles away. Now of course, the longer he walked the heavier the deer got, and by the time he reached the deer market he was about all in. He hung the deer on the scales and stood looking at it with wonder. Finally he said to the man: "Ugh! Let him hang a while."

## YOUNG WIFE SAVED FROM HOSPITAL

Tells How Sick She Was And What Saved Her From An Operation.

Upper Sandusky, Ohio.—"Three years ago I was married and went to house-keeping. I was not feeling well and could hardly drag myself along. I had such tired feelings, my back ached, my sides ached, I had bladder trouble awfully bad, and I could not eat or sleep. I had headaches, too, and became almost a nervous wreck. My doctor told me to go to a hospital. I did not like that idea very well, so, when I saw your advertisement in a paper, I wrote to you for advice, and have done as you told me. I have taken Lydia E. Pinkham's Vegetable Compound and Liver Pills, and now I have my health.

"If sick and ailing women would only know enough to take your medicine, they would get relief."—Mrs. BESS H. SPANBERG, Route 6, Box 18, Upper Sandusky, Ohio.

If you have mysterious pains, irregularity, backache, extreme nervousness, inflammation, ulceration or displacement, don't wait too long, but try Lydia E. Pinkham's Vegetable Compound.

For thirty years Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has been the standard remedy for female ills, and such unquestionable testimony as the above proves the value of this famous remedy and should give every one confidence.

Deafness Cannot Be Cured by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflammation of the mucous membrane of the Eustachian Tube. When this tube is inflamed, it is swollen and the hearing is lost. It is a dangerous condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surface.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circular, free.

## KNOX SUPREME COURT

The case of Abbie Carleton vs. the Rockland, Thomaston & Camden Street Railway which was on trial when we last went to press, was withdrawn from the jury after all the testimony was out, and was sent to the law court on report. The order of the court is as follows: "Questions of law having arisen in the case of sufficient importance, in the opinion of the presiding justice, to warrant it, and the parties agreeing thereto, the case is reported to the Law court for that court to determine upon so much of the evidence as is legally admissible, all questions of law and fact. If the court finds the plaintiff is entitled to recover, it is to assess the damages. By agreement of the defendant is to bear the expense of reporting the case to the Law court."

The case, Albert E. Whipple vs. W. C. Norwood, which was assigned for trial, was continued by reason of the unavoidable absence of a material witness for plaintiff, who sent word that he is in so delicate health that he cannot leave home at this time, and should disregard a summons if one was served on him. Payson for plaintiff, Montgomery and Emery for defendant.

Aetha Butler vs. Annie M. Williams. The parties are residents of Appleton. The plaintiff asked damages in the sum of \$500 on account of injuries received by plaintiff when dogs, alleged to belong to defendant, frightened her horse, as a result of which she was thrown from her carriage and was severely bitten by one of the dogs. The defendant, who is the wife of Dr. E. L. Williams, testified that the dogs were not her property and that she was not liable for the injuries set forth in the writ. The jury thought differently and returned a verdict for Mrs. Butler in the sum of \$750. Montgomery and Emery for plaintiff; Staples for defendant.

Arguments in the Kennedy will case are being made as this paper goes to press. The suit is brought by William M. Kennedy of Rockland, appellant from the decree of the judge of probate, which admitted to probate the will of his brother, the late Capt. Peter Kennedy, who was drowned a year ago while fishing a mile or so from his cottage at Holiday Beach. On the day that his first wife was divorced from him, Jan. 11, 1902, Capt. Kennedy bequeathed nearly his entire estate to Miss Grace D. Adams of Thomaston, who was then a bookkeeper in his local office, and to whom he was subsequently married.

The will is contested on the ground that Capt. Kennedy was unduly influenced by Miss Adams, to such an extent that in making his will he carried out her wishes rather than his own, and that relatives with whom he was on good terms, and to whom he was well disposed, received no remembrance in that will. In defense it was claimed that the will was duly made and executed and that Capt. Kennedy was of sound mind and in accordance with a belief that his property would be better cared for in the hands of Miss Adams.

Littlefield for the proponent; Johnson for the contestant.

Thursday night the attorneys laid aside the cares of court and journeyed to Crescent Beach, where a banquet was given, complimentary to Judge Arno W. King. Covers were laid for 75. Speeches were dispensed with, but the lawyers unloaded a fund of good stories, and found that in Judge King they had their match at yarn-spinning. The hour at the dinner table was the court session.

The criminal docket will be taken up this Friday afternoon.

The following additional divorces have been decreed:

Among the divorces just decreed in Waldo county was the following in which a Knox county woman was libellant:

## Union Fair a Hummer

Fine Exhibits, Large Crowds and Good Races—Track Record Broken Thursday—Along the Midway.

Good exhibits, particularly in the cattle department; good races in every class, and good crowds to enjoy it all, summarize the principal reasons why the North Knox fair at Union is again scoring a success. The weather also comes in for a vote of thanks, although Wednesday's lowering skies put somewhat of a damper on those patrons who were obliged to make their decision in the early morning.

The fair this year extends through four days, following the example of other Maine fairs, and with an exception, the weather has been just what the fair needs. The trustees are hoping that the attendance will justify their new departure. Another experiment, less popular with the general public, but in line with the policy adopted by other fairs, was the raising of the admission price to 40 cents. Better premiums and better attractions will be the result, and the attendance cannot suffer materially. The Union fair comes but once a year, and is the principal recreation that many persons get. They are not likely to let 15 cents stand in the way of a whole day's enjoyment.

The midway this year was better than most, and it was not too far from the judge's stand. You didn't have to buy the pop-corn, and you didn't have to visit the tent where the dancing girls were performing their audacious stunts. The crowd seemed to be a little larger in front of the dancers' tent, but that was probably because it was the center of the field rather than the center of attraction.

The poodle dogs were there, three booths full of them, and they caught the female fancy, as they do everywhere. "Dugan," exhibited as a side-saddle rider, was in the ring in captivity, and "got by" with it.

Gambling scenes in the sense that the words are generally meant, were conspicuously absent. You tossed rings at the coins, and you tossed baseballs at the babies, but neither enticed you nor impoverished you, you had your untidy taken, but only shock that it was to your vanity. Odd how the photographers cannot make us look as well as we know we look.

The fruit and vegetable exhibit reflected the unsatisfactory season that is pretty generally reported from all parts of the state.

The principle apple exhibit was that of Fred A. Gleason of Union, whose fine orchard now numbers 1500 trees, none more than 25 years old. This year he set 150 trees. Mr. Gleason is a member of the Maine Apple Raisers' association, and is a firm believer in the advantages of spraying, and his exhibit furnished a good object lesson. He employed a man to spray trees without blot or blemish, while the same brand of apples taken from unsprayed trees showed the damaging effect of the collared aphid and the scale.

Mr. Gleason's trees were three sprayed, first in the dormant stage, secondly, before the blossoms opened, and thirdly, after the petals fell. The trees have now two years ago.

Mr. Gleason uses varied methods of fertilization. In one he pastures sheep, another he cultivates, and where the latter method cannot be followed he uses a fertilizer. He is a firm believer in the advantages of spraying, and his exhibit furnished a good object lesson. He employed a man to spray trees without blot or blemish, while the same brand of apples taken from unsprayed trees showed the damaging effect of the collared aphid and the scale.

There is more potash in our soil than we think for," said Mr. Gleason to The Courier-Gazette reporter. "The idea is to make it as available as possible by cultivation."

The 18 varieties of apples which he raises embrace only such fall stock as he finds necessary for his own use. His exhibit at the present fair includes Kings, Baldwins, Porters, and Northern Spys. \$3.00 per barrel, and his crop averaged \$2.48 per barrel, net.

Another fine and large apple exhibit is made at this fair by Frank Lefebvre of Union.

A very pleasing display of cut flowers was made by Mrs. Merle Messer. It included pansies, asters, phlox, sweet peas and hydrangeas, most temptingly arranged.

Mrs. Messer also had on exhibition a large collection of lepidoptera and other insects, in other words, butterflies and bugs.

The cattle exhibit is the largest ever made at this fair, and aside from the large state fairs has probably no equal in Maine this season.

Willard Sherman and son Albert showed 13 pairs of thoroughbred white-faced Hereford steers, and Charles Burgess of Union showed a herd of thoroughbred Jerseys. Llewellyn Mank of Warren had a herd of grade Jerseys. F. S. Burgess of Union was the leading exhibitor of horses and colts. Everett Clarry of Union had a large exhibit of geese and turkeys, while the Knox Spring Poultry Farm of Thomaston and Mr. Mank of Warren had fancy stock on the grounds.

To accommodate the crowds which always want to see the horse races the grandstand this year was extended 25 feet at each end, giving a large capacity. Music is furnished by Morris's band of Jefferson. The track marshal is Urban A. Trask.

The event of Wednesday's card was the 3-minute class, and Fred Burket's prediction that the winner would have to go faster than 2.30 was amply justified. The race, though in straight heats, was well contested, and the best time was 2.234. First money went to Hattie P., owned by J. W. Metcalf of Augusta. The collision between Eola Patchen and Tammany Girl, g. m., W. E. Haskell, Union, 1 1 1.

Baby Lawrence, chg. Marion E. Newman, Manset, 2 3 2.

Miss Gamage, blk. m., W. J. Gamage, Portland, 2 3 3.

Teddie P., bg. Frank Pelletier, Waterville, 4 4 4.

Time, 2:23, 2:20, and 2:21.

Frank Milner in the last heat led to an exhibition of ill feeling on the part of the drivers.

The 2:22 class was won in straight heats by a local mare—Tammany Girl, owned by W. E. Haskell of Union, and driven by that well known and gentlemanly jockey, Mr. Perry. The Wednesday summaries:

**3-Minute Class**  
Hattie P., bg. J. W. Metcalf, 1 1 1.  
Prugusta, Belfast, 2 3 2.  
Link Braden, br. s., W. G. Preston, Belfast, 2 3 2.

Teddie P., bg. Frank Pelletier, Waterville, 4 4 4.  
Time, 2:23, 2:20, and 2:21.

**Thursday's Races**  
Another large crowd saw some fine sport on the track Thursday afternoon. The card called for only two events, but a special in the 2:28 class was thrown in for good measure. The regular 2:28 trot was a crack-jack, and kept the crowd guessing until the horses came under the wire in the final heat.

Merced C., owned by J. W. Metcalf of Augusta, lowered the track record from 2:18 1/2 to 2:15 1/2, and the performance got a great hand, as did also Mr. St. John when he drove the Moxie motor car around the track in 1m. 39s.

The trotting summaries follow:  
**2:35 Class**  
Hattie P., br. m., J. W. Metcalf, Augusta, 1 1 1.  
Eola Patchen, F. E. Southard, Norridgewock, 2 3 2.

Time, 2:23 1/2, 2:23 1/2, 2:25 1/2.

**Fair Facts**  
It is not often that the management of a fair has an aeroplane on the grounds without advertising the fact, but such was the case at Union this week. The aeroplane is the one that caused a mild riot last year because of its inability to fly. It had been stored in the loft of the exhibition hall until a few weeks ago, when the officers had it removed to the hayloft of a nearby barn. "That's the highest it has ever been," remarked President Thurston, Wednesday.

A friend of the North Knox Society lent to this year's competitions by offering \$25 in prizes, which were divided as follows: To driver of fastest heat in horse races, \$10; best exhibit of sprayed fruit, \$5; best Jersey cow, \$5; best Jersey heifer, two or three years old, \$5.

The pony race to be given away by the Waldo County Herald was exhibited "twice heats Wednesday."

An automobile laden with Topham fair souvenirs was on the grounds Wednesday. The popular Sacadaga county fair will get many patrons from Knox county.

The races are being handled by H. H. Lee, the well known turf writer, who knows about every horse and horseman in the state, and how both should be handled in a race. The Wednesday judges were C. A. Simmons and Earle Ludwick. The winners were Dr. C. F. French, E. A. Wentworth and Dr. J. W. Wilde. H. L. Grinnell officiated in his usual capacity as clerk.

Wednesday the Moxie auto, L. St. John at the wheel, gave an exhibition mile in 1m. 34s, which was a speedy circuit considering the character of the track, and the bulky nature of the auto. At the Bangor carnival Mr. St. John won a handsome silver cup in the hill-climbing contest and at Waterville he made a mile in 1:34. Mr. St. John is the prince of good fellows, and this bouquet is not thrown merely because The Courier-Gazette reporter was privileged to ride home from Union with him Wednesday. This trip was made in one hour, included in which was the dodging of innumerable teams and the investigation of a tire.

The Moxie car took nobody's dust.

**ALBERT H. FLANDERS**  
The death, under peculiarly and circumstances, of Albert H. Flanders was noted in our Tuesday issue. The deceased was a victim of an unfortunate malady which was undoubtedly the cause of his demise. The body was found on Juniper Hill Sunday evening. Mr. Flanders was extremely fond of hunting and fishing, and it was while engaged in the former vocation that death overtook him. The deceased was born in this city 28 years ago, a son of Mark E. and Debra A. (Dickey) Flanders. His last employment was a concrete layer for Fales & Simmons. The young man was fond of his home and had many traits for which he was greatly liked. He is survived by his father, two sisters, Mrs. Charles Mitchell of East Otisfield, and Miss Mildred Flanders of Rockland and one brother, Mervyn Flanders of Rockland. Funeral services were held Wednesday afternoon, Rev. Mr. Edger officiating. There were many floral offerings. The pall-bearers were Maynard Gray, Walter Jones, Fred M. Blackington and Fred Wilson.

**CARD OF THANKS**  
The relatives of the late Albert H. Flanders wish to return heartfelt thanks to the friends and neighbors who sent flowers for the funeral and in so many other ways showed kindness and sympathy.

FOR THE THIN AND SCRAWNY

Samose Will Make You Plump and Rosy, Says C. H. Pendleton.

If you are getting thin you are sick, although you may not know it. If you are losing weight steadily, there is something wrong that needs looking after. If you have always been thin it doesn't follow that you are sick, but you may not be healthy. You cannot be strong if you are thin. Then try to be healthy and plump, it is not difficult if you know how.

The only way to increase the weight and gain health and flesh is by using Samose, the standard flesh-forming food and tissue builder. It mingles with the food you eat and is assimilated so that all the flesh-forming and tissue building elements of the food are retained in the system. This explains the great value of Samose.

C. H. Pendleton sells every package on a genuine guarantee to refund the money if it does not do all that is claimed for it.

LOST OR DISMANTLED

More Than 2000 Vessels Wrecked Throughout the World in 1911.

More than 2000 vessels were wrecked throughout the world in 1911. Of these, according to Lloyd's register, 888 were ships of over 100 tons each. The comparisons of losses for the last two years is as follows:

1911—Number of vessels, 888; gross tonnage, 884,843, of which 427 vessels of 619,752 tons were steamers and 461 of 265,091 tons were sailing vessels.

1910—The wreckage of vessels of over 100 tons each aggregated 947,600 tons of which 667,440 tons represented steamers.

In addition, in 1911, vessels of over 100 tons each, aggregating 255,517 tons, were broken up by hand and dismantled, as against 356,154 tons so destroyed in 1910.

Of steamers and sailing vessels removed from the merchant fleets of the world in 1911, about 29 per cent of the sailing vessels were got rid of by dismantling. Of such tonnage 34 per cent represented British vessels. One-quarter of all the vessels destroyed were abandoned, foundering, or reported missing at sea, and the rest were stranded.

The engineers' calculation as to the sufficiency of the water supply in the Panama Canal have been amply vindicated by the figures just reported from the isthmus. The great lake of Gatun, which is being created by the dam, at that point, during the week of Sept. 2 to 9, accumulated just 5,240,000,000 feet of water. During the period the water level of the lake rose three feet. Every time a ship is locked through the canal, five and a half million cubic feet of water must pass and when the lake is full it will afford enough water to fill the locks 150 times daily, which is at least twice as fast as the ships can pass.

When the surface of the lake reaches its maximum height of 87 feet above the sea level, with the water just flowing over the crest of the dam, it will contain the enormous amount of 102,250,000,000 cubic feet of water.
