

THE PRESS.

FRIDAY MORNING, MAY 25.

We do not read anonymous letters and communications. The name and address of the writer in all cases indispensable, not necessary for publication but as a guarantee of good faith.

We cannot undertake to return or preserve communications that are not used.

It begins to look as though the Methodists would have to adopt the Australian system of voting.

The Bangor Whig is still engaged in correcting alleged misrepresentations of the Press, sandwiching in here and there a "stinging rebuke." There is a monotony about the performance which must make the Whig rather tedious to its readers, but they have been brought up to bear a great deal in that line.

In reply to the point raised by the Biddeford Journal, the Kennebec Journal says for Mr. Burleigh that he has not a dollar in the Kennebec Journal property; and that, if he did own anything in it, it would be no argument against nominating and electing him Governor since the contract for the printing is in the hands of the Legislature, and the printing accounts are audited by the Legislative committee, or by a committee of the Governor's Council.

The Belfast Age's editor has returned from the Democratic State convention in a very unhappy frame of mind. He crossed to see to relieve himself by hurling darts. On the temperance question he hits the party very well. "The discussion of the license plank," he declares, "has not a few who seek election through the aid of the saloon."

He is quite as intolerant of prohibitionists as the Republican or even third party men, while a larger number are more policy men, who are sincerely opposed to the law, but fear that the agitating its repeal will injure its prospects of office. Thus the Age's conclusion as to its party, is: that what prohibitionists there are in it are hypocrites; and that what license men there are in it are cowards. As most, if not all, the Democrats are either prohibitionists or friends of license, the conclusion is inevitable that the Age considers its party made up of hypocrites and cowards.

CURRENT COMMENT.

WEST READING MANY TIMES.

There never was a more logical speech on protection than that of the Hon. Joseph Saturday. It should be read and re-read by everyone who can secure a copy of it.

FIRST CLOTH MILL ON THE PENOBSCOT.

Oldtown Lumbermen Exchange the Pickle for the Spindle.

Eleven Scots from Galashiels, and what they have Done.

Honesty, Pluck and Perseverance Rewarded in Maine.

(Correspondence of the Press.)

THE OLDTOWN OF MAY 1888.

The Oldtown of May 1888 was famous for its saw-mills and its lumbermen. The Penobscot, flowing around many islands, offered unrivaled facilities for mills and for storing and handling logs. Establishments like the great Veazie mills made Oldtown a busy place and gave it prosperity and a reputation. But the lumber business on the Penobscot has attained its highest development; and the business men who are interested in the welfare of Eastern Maine are looking to new industries, especially to textile manufacturing, to keep at home the young men of the Penobscot town.

For several years General Charles Hamlin and his associates in the Bowdoin Water Power company and the Oldtown Woollen mill have been laboring to establish the first textile factory on the Penobscot river; the reward of their labors will be the Oldtown Woollen Mill, which will be running this fall.

This new mill is to occupy the privilege formerly occupied by the great block of mills known as the Veazie mills, which, before they were burned about a dozen years ago, were among the largest and finest mills on the Penobscot. They were seven hundred feet in length, and four miles of long lumber, with nearly as much short lumber, passed through them annually. The buildings like the great Veazie mills made Oldtown a busy place and gave it prosperity and a reputation. But the lumber business on the Penobscot has attained its highest development; and the business men who are interested in the welfare of Eastern Maine are looking to new industries, especially to textile manufacturing, to keep at home the young men of the Penobscot town.

shawls and Scotch tweeds that have won a famous place in the market, and at Skowhegan Anderson has become noted for popular styles and low prices. At Sargentville D. R. Campbell has just built a new twelve-spindle mill, making the third mill now running in that town, which is said to be the best woolen mill now standing in Maine. In fact, of every one of these dozen Scotch something might be told of the success which he has accomplished in some particular line. They all take great pride in their business; their highest ambitions have been to make it successful and they have succeeded.

In the course of his work to make the construction of the Oldtown mill certain, General Hamlin has given considerable attention to the business of woolen manufacturing generally. "It is very different from cotton manufacturing," he says. "There is not, I think, a woolen mill in Maine, except Mr. Linn's, that makes a yard of goods except on order. Mr. Linn makes shawls a specialty, and they have such a reputation that they go to him for shawls. The woolen manufacturers work on orders which they receive from the merchants who handle the goods. Much depends on these merchants. They not only handle the goods, but they have no doubt, could show you goods in their mill to-day that will not go to the market for a year. Linn, too, who has become famous for the designs of his shawls, could no doubt show you the shawls of the future, that will not be in style until next year. They are always ahead of the styles, but never behind them, they may be certain."

Besides owning their own mills, these Scotch manufacturers hold stock in other mills. Thus among the directors of the Oldtown mill are William Dobson and A. Linn, as well as A. P. Libby, of New York, J. L. Smith of Oldtown, and General Hamlin and J. S. Wright of Bangor. The late Governor Bodwell was also one of the board. Messrs. Hamlin, Wheelwright and Smith are also directors in the Bowdoin Water Power company, which furnishes water power privileges to the woolen mill company at a moderate rental.

BURIALS ALIVE. A Gentleman Cries Out of His Coffin and Dances at a Ball. Burials alive are more common in hot countries, where the burial takes place within twenty-four hours after death, than they are here, where one gets as a rule a week's grace. In Spain the body is frequently removed to the undertaker's shop a few hours after death. In one of the largest of these establishments in Madrid, some years ago, an extraordinary night was witnessed. A gentleman was brought in this "casket" one afternoon and placed in the room set apart for that branch of business. The proprietor lived over his premises, and on this special day he danced with the wife of the house. He danced with the wife of the undertaker, and he danced with the undertaker's daughter, and seemed to be thoroughly enjoying himself. The undertaker thought he knew his face, but didn't like to ride and ask him to dance. He was by and by, however, departed, and the strange gentleman was the only one left. "What a queer fellow, what for you?" said the host at last. "No, thank you," replied the gentleman. "I'm staying in a house." "What house?" "The house," claimed the undertaker, "who are you, sir?" "I don't know," replied the gentleman. "I'm the corpse that was brought in this afternoon."

Domestic Department.

French Satines at 35c per yard

10 pieces Fancy Gingham, at 12 1-2c

100 Embroidered Chambray Robes at \$3.00 each

200 pieces Cocheo Prints at 7c

Linen Department.

25 6-4 Tapestry Covers at \$1.50 each
