Selectmen's Report

The Selectmen wish to state that the use of the Excise Tax for road building and maintenance has been most unsatisfactory, since it is impossible to accurately gauge the revenue from that source.

For the year of 1939, the Excise Taxes received by the Town amounted to $5,567 16 and the Selectmen assumed that the year of 1940 should show an income of $5,500 00. Since only about $4,500 00 was paid in taxes over this period, the expenditures show a heavy overdraft that was impossible to foresee.

SCARBOROUGH FIREMEN'S ASSOCIATION

To the Board of Selectmen and Citizens of the Town of Scarborough, Maine:

It is very pleasing to again submit a report of progress in the Fire Department, and that we have again, through organized and directed effort, furnished protection from fire to the citizens of the Town of Scarborough.

We have had several fires this year in different districts at which time various companies responded and operated under the leadership of the Deputy Chief of that district very successfully, especially in the Oak Hill district at the Mickelson fire at which time under the capable direction of Deputy Chief George Douglass the Department received much praise for the wonderful stop and efficient work that they performed.

In purchasing the 500-gallon pumping engine for the Pleasant Hill district the Department has completed part of the program they originally started; however, there is a great deal of equipment that is still necessary to make the Department more efficient, namely, an alarm system, a larger footage of 2½ inch and 1½ inch hose, a new station at Oak Hill with a drying tower and facilities for a central alarm room and quarters for at least one man, water holes in some of the sections of the Town that hydrant service is not available, the eventual purchase of ladder truck, and smaller equipment necessary for better fire protection, also that the Department feels that the maintainence of the buildings should be carried by the Town which would come from their yearly appropriation.

We wish to thank the Selectmen and the Citizens of the Town for the splendid cooperation that has been given in the administration of the Building code and also to thank

the Building Inspector, Mr. Albert Nelson for his efforts in making the building code the success that it has been in the past year.

This year the Prouts Neck Company has officially joined our Department and their apparatus, which they purchased themselves, is now available for the use of the Town and operate under the rules and regulations the same as the other companies, and they have organized a company for both the winter and the summer which insures better protection for that section of the Town.

The support given the Association by the citizens and different organizations throughout the Town has been very much appreciated and we trust that we can continue to render more efficient service in the future.

Respectfully submitted,

ROBERT P. NUTTER, *President*

REPORT OF BUILDING INSPECTOR

To the Citizens of Scarborough:

Your inspector has viewed the many building and repair jobs in the town during the past year and has endeavored to enforce the Building Code in a manner that would be fair and just to all.

147 permits have been issued for the year and the estimated value was as follows:

New building and remodeling	$68,341 00	
Shingling and Repairs	8,067 00	
Total		$76,408 00

I believe that the record of permits issued will be of real service to the Town in regard to the assessments of new construction and that under the Building Code, an improved type of building will result.

Fees received for the permits issued were scaled according to construction costs and amounted to $84 00.

Respectfully submitted,

A. H. NELSON, Building Inspector

WILLIAM M. HOWATT,
Treasurer

Town Clerk's Report

To the Citizens of Scarborough:

I hereby submit to you a condensed report of the Town Clerk's Office for the past year for your approval.

The Annual Town Meeting was held March 4th, 1940. The State Primary was held June 17th, 1940. A Special Town Meeting was held September 7th, 1940 to consider purchase of land for Dunstan Cemetery and Construction of a new sidewalk on Fairfield Road and selling the old school house at Pine Point.

The State Election was held on September 9th, 1940 and the Presidential Election, November 5th, 1940.

The Selective Service Draft for registration of young men between the ages of 21 to 35 was held October 16th, 1940.

There has been collected by Kendall Lucy, Constable, $321 95 for Dog Licenses, also $164 90 by the Town Clerk for Dog Licenses and $29 00 for Victualer's Licenses, this has been turned over to William M. Howatt, Town Treasurer, and shown in his report.

Respectfully submitted,

WILLIAM M. HOWATT,

Town Clerk

Scarborough, Maine, February 10th, 1941.

Report of the Superintendent of Schools

To the Board of Education and Citizens of Scarborough:

In this annual analysis of the public schools of Scarborough, let's test our aims against today's events, look at the progress that we have made, and take a view of the problems ahead.

The Aims of the Scarborough Public Schools

Five years ago in our report of 1936, we stated the aims of our schools in the following brief analysis:

Of course it is clear that the purpose of our schools is primarily to educate our young people to the end that our community of the future may be protected and continue to improve. However, it is evident that especially in these changing times and facing the complex community life for which these young people must be prepared, the public schools cannot do it all.

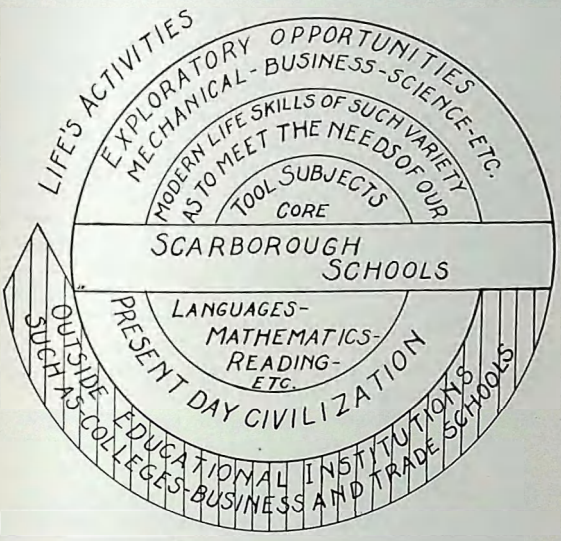
As to the Educational Process

1. Of necessity the beginning of any program of education must be well rooted in the essentials of knowledge necessary in all places and all ages,—reading, use of language, writing, mathematics, etc.

2. It must develop a great number of skills, power of research, weighing of facts, etc.,—in every field which touches modern life.

3. It must provide exploratory opportunity by which the youth may learn his or her own ability, or lack of ability in the various general fields of earning one's living and properly serving the community.

This place of the public school may be seen more clearly in the following diagram.



The world and community conditions under which these aims were written were quite different from those which we face today. However, a moment's thought will confirm that these aims are even more important than they were under the conditions which they were written. We have had in these five years startling evidence that we are preparing our youth to meet "changing times and complex community life."

Over Five Years

Over the years which intervene, your schools have made real progress in the better attainment of these aims.

First, as to accommodations. Good teaching and learn-

ing are possible only under reasonably good teaching conditions. We now have a new grammar building which greatly improved the housing at Oak Hill and a modern rural school building at Pine Point. Also, throughout the system, there has been consistent improvement of buildings and equipment.

The school and class organization has also been improved. Consistently, there has been an increase in the centralization or consolidation. In September, 1935, of the 456 pupils in the Scarborough elementary schools, only 145 or 32 per cent were in the graded school at Oak Hill and only 62 or 14 per cent were in the partially graded school at Dunstan. In other words, 249, or 54 per cent, of these pupils were in ungraded rural schools. In September, 1940, five years later, of the 535 pupils in the elementary schools, 290 or 54 per cent, were in the two graded buildings at Oak Hill and 79 or 14 per cent, were at Dunstan. Thus, in 1940 only 32 per cent of the pupils were in ungraded schools.

This trend has been going on for years. The greater effectiveness and the value of the competitive system have been evident to parents when the older pupils have been transferred from the rural school. The teaching and learning can be better when the child is taught in a grade group rather than as the only pupil in that grade in a rural school.

Many parents have recognized this advantage so clearly that they have been willing to provide their own transportation, so that their children might benefit. Parents are now providing transportation for 62 pupils now at the Oak Hill elementary schools from outside the Oak Hill area.

During the past year this better grouping has been stepped up considerably through the closing of the Broad Turn and the Beech Hill Schools and the closing of the grammar department at the Libby School. This better grouping of elementary school pupils and the problems which it produces are discussed in more detail later in this report.

At the high school level better home room organization has been possible through release of an additional room for high school use. This gave the opportunity for a good start in educational and vocational guidance. It has also made possible better knowledge by the teachers of the needs of the individual pupils as they meet in the smaller groups.

Our teaching staff over the five years has been consistently very satisfactory. We have had a good record of continued service with the value which comes from continuity. When vacancies have occurred, we have been able to secure the services of well prepared teachers. All our teachers have shown conscientious interest in their work and self-improvement through professional study. This has been encouraged by the town's policy of giving salary increases whenever they could be financed.

Our relations with the Gorham Normal School have continued helpful, considerable benefit resulting from the contacts of practice teachers with our schools.

In 1936, the need of a program in health and another in music was stressed. Today we have both operating on a very satisfactory basis. In 1936 we noted the need for greater variety in our high school industrial arts, especially the inclusion of instruction in printing. Today we have a good general shop plan, although the instructor is working under serious handicaps which are noted later in this report.

Thus the progress over the five years in the better achievement of our aims, while not dramatic, has been consistent and the gains made have been put on a sound basis for continuance.

What of the Future?

In this period of uncertainty, change and increasing complexity, it is as difficult for an educator to look ahead as it is for everyone else. However, we know that our aim is sound and that advances which have been made should be maintained and improved upon. Especially as the cost of living is sure to increase, teacher salaries should

be maintained at an adequate level with increases to meet increasing cost of living and to encourage professional improvement.

The most immediate problems center around the further placement of more children in graded schools at Oak Hill and Dunstan and with the relief of the high school from some conditions which seriously hamper the instruction, especially in the industrial arts. It should be noted throughout the country that this phase of high school education is receiving ever more attention as an important part of the preparation of the boys for existing occupational opportunity and, for the present, even for national defense itself.

Trend Towards Consolidation

As indicated earlier, perhaps the most hopeful and most important development now taking place is the increased trend toward centralization or consolidation of pupils at Oak Hill and Dunstan. The advantages to the children involved are clear. However, this concentration accentuates problems of housing and of transportation. The advantages to the children more than offset the difficulties but special attention to these problems is necessary.

Transportation

For the past year, the Board of Education was fortunate in its provision of a necessary school bus. The changes which created the need for transportation were made after the possibility of a capital account for the purchase of a bus had passed. However, the Board obtained, through the use of current school funds, a used bus at such a low cost that it is anticipated it can be turned in for nearly its cost plus the repairs for the year. Thus bus maintenance for the first year will be slight.

For the coming year we should have an adequate new bus of maximum capacity. This will be an economical investment and, unless the trend toward centralization takes a more rapid pace, will probably meet the most pressing needs for the immediate future.

At Oak Hill

The situation at Oak Hill has been greatly relieved for the present by the availability of the new grammar school building. We were fortunate that it was available when it was, as will be seen by the following enrollments.

At Oak Hill in September, 1939, we had a total of 217 pupils. The housing was very difficult. Last September (1940) the enrollment at Oak Hill was 290, an increase of 73 pupils. The grouping for the grammar grades is very satisfactory; for the primary grades, it is much less satisfactory, but so much better than it would have been without the new building that we are quite happy.

The increase at Oak Hill came largely through the closing of the grammar grades at the Libby School, the closing of the Beech Hill School, and the transportation of eighth grade pupils from North Scarborough. The remainder of the increase is due somewhat to the greater number of children in the Oak Hill area and the ever increasing number of children whose parents desire to send them to Oak Hill providing transportation at their own expense.

In September, 1941, we anticipate another increase in enrollment. In order to temporarily provide for this increase, it is planned to take the sub-primary group into a basement room in the grammar building under another teacher. With this change, it is anticipated that the housing next September will be satisfactory.

As we look to the future, the extent of adequate housing at Oak Hill depends somewhat on developments at Dunstan. At such time as new construction is possible at Dunstan, if the town selects the best and most economical plan of erecting a six room unit, some of the present load in all grades, and particularly in the seventh and eighth grades, can be transferred back to Dunstan.

One minor, but important, problem is proper grading of the grounds around the new grammar school. We have an attractive building well located; but the grounds spoil much of its beauty and detract from the favorable im-

pression the building would make on our many visitors. Of more real importance, it is yet impossible to use the grounds as they should be used for healthful exercise and instruction. It is hoped that the grading can be completed before the beginning of the next school year. A special article has been included in the Town Warrant covering this matter.

At Dunstan

The lack of adequate school housing at Dunstan continues to make it difficult for both teachers and pupils to do their best work.

In September, 1939, we had 70 pupils in this school: 35 in the primary grades and 35 in the grammar grades. Last September (1940) we had 79: 32 in the grammar grades and 47 in the primary. Of the 47 in the primary, 6 are in the sub-primary class. These go in the morning only. In the afternoon, the children in the two rooms go on a different distribution than in the morning; children actually having to take their seats from one room to another and going to another teacher. This is necessary to equalize the teaching load for the better learning by the children, but obviously such a program is far from efficient.

There is no evidence that there will be fewer children there next September. In fact, all evidence points to an increase. It is clear that however much shifting of pupils we may do, there will almost certainly not be enough room in the present class rooms even to give every child a seat.

The time has arrived when the second step in our building program should be started, but, because of the present universal uncertainty and with the scarcity of skilled labor, high labor costs, and high costs of building material, it may be necessary, as a temporary expedient, either to utilize the stage room of the present building, or, find a suitable room elsewhere for the accommodation of a group of pupils in this school. Of course, this would necessitate the employment of at least a part time teacher. I am sure that the Board of Education will provide the

best temporary housing possible and all of us will do the best we can under these conditions.

Nevertheless, I would not be true to the responsibilities of my position if I did not call attention to the fact that this is only a temporary expedient. The situation at Duntan is bad and will be increasingly more so until new, properly equipped housing is provided.

At the High School

The situation at the High School has been most gratifying. The release of one room when the eighth grade was transferred to the Grammar Building, gave some relief and benefit. It has been possible to organize the school into smaller home rooms and some valuable guidance and guidance instruction has been made possible. The additional room also gave some relief in the scheduling of classes.

However, the High School still faces some serious difficulties as we look forward to September, 1941. The fall enrollment of 1940 was 148, the largest that the school has ever been. However, with a small graduating class, and an anticipated entering class of at least 50 pupils in September, 1941, we now anticipate an enrollment of 175 pupils, which is unprecedented and quite beyond the present building and staff. Probably nothing can be done about additional building space, but the staff must be increased.

Thus, it is planned to add a teacher at the High School in September, 1941. With an entering class of 50, it will be necessary to have two divisions in all required subjects, where, in the past, one division usually has been sufficient.

It is hoped by this additional teacher another problem will be somewhat solved which has been giving us some concern. The High School Principal, now teaches five classes and supervises a study period, the normal load for any classroom teacher. This gives him very little time for administration and supervising duties. As the school and staff increase, these duties and responsibilities become greater. It is hoped that it will be possible to lighten his

teaching load, allowing more time for work as principal, as is done in practically all high schools in this area.

Our industrial arts and home economic laboratory are badly crowded and additional space is very necessary for effective teaching and learning. In the Manual Arts room, it is very difficult to carry on a shop program, as equipment is crowded and has to be moved unnecessarily as the course proceeds. At present we see no way of expanding the school to provide the necessary addition. However, the problem, accentuated by the anticipated increase in our enrollment, will not be satisfactorily solved until a building addition is possible. Some relief may be given this most valuable department by the purchase of much needed equipment.

In the High School we have an annoying and costly problem in our gymnasium floor. Again, the wood has rotted to a point where replacement is necessary. The situation is being studied intensively and an earnest attempt will be made to remove the cause before replacing the floor. A special article has been inserted in the Town Warrant regarding this matter.

While it does not seem possible to increase the space at this time, for the Home Economics department, the situation will be much improved if a linoleum covering can be provided for the cooking room. This room has merely a cement floor. In it, in addition to the regular instruction, food is prepared and served for student lunches. The present floor is unsanitary and might be actually unhealthy. It is recommended that the necessary linoleum covering be provided. A special article has been inserted in the Town Warrant covering this matter.

In Conclusion

This has been a difficult year in the management of your schools. Problems appear here as everywhere else as a result of national crisis. In addition our immediate problems centering around the erection of new buildings,

the closing of schools and provision for transportation have been heavy.

I wish to express my personal appreciation and the town owes a debt of gratitude to the Board of Education, the teaching staff and the many other town officials and citizens, who have so conscientiously given their best thought and unlimited time to the problems of your schools and community uplift.

Superintendent of Schools

REPORT OF PRINCIPAL OF SCARBOROUGH HIGH SCHOOL

To Superintendent F. H. B. Heald:

I herewith submit my twentieth annual report as principal of Scarborough High School.

The registration of one hundred and forty-eight pupils during the first semester of the present school year surpasses the former high enrollment of one hundred and forty-one in the fall of 1933 and is distributed as follows:

	Boys	Girls	Total
Post-graduates	3	1	4
Seniors	9	8	17
Juniors	17	14	31
Sophomores	26	25	51
Freshmen	22	23	45
	77	71	148

The Senior class at present numbering only sixteen members, will be the smallest class to graduate since 1930. This fact, coupled with an anticipated entering class of between fifty and sixty members in the fall of 1941, means

that our enrollment for next year will show an increase greater than that of any other year in the history of the school, and will make Scarborough High the largest of the so-called Triple C schools in Cumberland County.

Theresa Doyle has been named Valedictorian of the Senior class by virtue of an average of 93.3 per cent and Glenna Storey will be the Salutatorian having earned an average of 91.8 per cent.

Our pre-vocational courses in Home Economics and Manual Arts have unusually large enrollments this year. Fifty per cent of the girls and sixty-four per cent of the boys at present are taking these courses and more would enroll in them had we the facilities for adding a fourth year of study.

The school's greatest achievement in athletics during the past year was the winning of a State Class C Track championship, this being the second time in three years that we have won this honor.

Our extra-curricular activities in Music are progressing very satisfactorily. A chorus of over one hundred members, a glee club of thirty-five and a ten-piece orchestra hold regular weekly practice periods. Members of the glee club and the orchestra will take part in the State Music Festival which will be held in Portland early in May. The sincere thanks of the high school are extended to Mrs. Alfred Swinburne for the gift of a cornet for use in the orchestra. As one of the chief difficulties in building up an orchestra is the scarcity of orchestral instruments and as many of our students are unable for financial reasons to purchase them, similar donations of unused orchestral instruments, either as loans or as gifts, would be greatly appreciated.

A piano was purchased by the school in September. All but sixty dollars of the purchase price has been paid and we are hoping to raise this balance through a minstrel show, "The Naughtical Nautics of Nineteen-41," which will be presented in the Town Hall on Friday evening,

March 7. Over fifty students are taking part in this original and peppy show.

The school has also recently raised and paid eighty-five dollars as part payment of sixty new steel lockers for the use of the members of our athletics teams and physical education classes.

The school's most urgent needs for the next school year are more books for the school library, a new gymnasium floor, and another class-room teacher as recommended in your report.

In conclusion, I extend my sincere thanks to you and the members of the Board of Education for your co-operation and help in the administration of my duties.

Respectfully submitted,

ELWOOD G. BESSEY,
Principal of High School

REPORT OF HEALTH OFFICER

To the Citizens of Scarborough:

At the beginning of the current year the free smallpox vaccination clinic was held during April at the High School building. This clinic being held during April instead of March by special permission of the state to avoid the bad traveling and weather conditions. There was a noticeable increase in the number vaccinated over recent years. The State Health Department is asking that the danger of smallpox be impressed on the public so that the present control of the disease may be continued. Although it is not prevalent at this time in the state it is still a great danger to children and adults in crowded sections because it is such a contagious disease when it gets a start in a community.

The number of communicable diseases this year was much smaller than average in a town of this size. Most of the cases being either chicken pox, measles or whooping cough.

It is pleasing to note that not a single case of scarlet fever, which has caused so much trouble in the past few years, was reported this year. However there is always the danger of an epidemic and precaution should be taken against this at all times. The School Department is taking care of this in the schools and busses by the preventing of conditions which are a hinderance to the health of the students. The school children are under the careful observance of their teachers, as well as the school nurse, to keep cases of communicable disease out of the schools.

The Scarborough Community Nursing Service is a valuable factor in better health conditions of the town. Her assistance in physical examinations of school age and pre-school age children has been a great aid in overcoming many of the health problems so common in children. This nursing service has become one which the town can ill afford to be without.

The work done by the nurse and its benefits cannot be realized by any reports which are made to the public. The real value can only be realized by an examination of the history of each case cared for. The board of directors has had to make a great many changes in the nursing service to meet the needs of the town and still more are contemplated if the nursing service is continued.

A "well baby" clinic for pre-school age children has been established with clinics at the Oak Hill school building in a specially equipped room. Thorough physical examinations are given by Dr. Sapiro assisted by volunteer workers. This clinic is open to all children from infancy to school age and should be taken advantage of by all parents to help prevent any afflictions which may be discovered by such examinations.

Plans are underway to establish a dental clinic, if funds can be raised, to take care of the many cases of defective teeth found among the school children.

In view of the work and its value to the town, I urge everyone to support the Scarborough Community Nursing Service this year.

Complaints concerning the disposal of garbage and sewerage, as in past years, have been many. Although the beach areas are taken care of during the summer, other sections are a serious problem. In some places garbage has been carelessly disposed of to the great discomfort of many people. In places it has even been thrown beside the road. Hotels in town are finding it difficult to find proper disposal for their garbage too.

Special places should be provided in the town for this special purpose.

In many places sewerage is still a problem causing many complaints which have been quickly remedied, temporarily.

I believe the new building code this year will prove to be a great benefit in eliminating undesirable homes which have caused so much trouble in the past.

I wish to thank the Selectmen, members of the Board

of Education, Nursing Service and all others who have aided in conducting this office the past year.

Respectfully yours,

RALPH B. SARGENT, *Health Officer*

REPORT OF SCHOOL PHYSICIAN

The school examinations this past Fall revealed two disturbing problems—flat feet and bad teeth. Both of these conditions can and should be remedied by parents as soon as possible in order to prevent serious trouble appearing in these children as they grow older.

In many cases flat feet will improve as a child grows, but the majority of cases require immediate care and attention in order to insure an adulthood without the many and painful ailments that result from such feet. It is much easier to correct such a condition in childhood than it is when an individual has reached maturity, at which time surgery may be necessary for correction. Parents who were notified of the presence of this defect in their children should make every effort to have it corrected while the child is still growing.

Defective teeth are fully as injurious to a child as are infected tonsils. The absorption of poisons from such teeth can, and often does, cripple a person for life. This happens much too frequently in spite of the fact that proper care is easily obtained in most cases. There should be some arrangement made in Scarborough whereby dental care could be provided for those who are unable to obtain such care elsewhere. Those who can obtain such care should realize how important it is and make every effort to see that their children receive treatment.

There was quite an improvement in the general appearance of the pupils this year, there was a decrease in the number of bad throats, and pediculi were a rarety. Our outstanding problems now are bad teeth and flat feet.

Respectfully submitted,

H. M. SAPIRO, M.D.

SCARBOROUGH COMMUNITY NURSING SERVICE

To the Board of Selectmen and Citizens of the Town of Scarborough, Maine:

The following is a list of Board members of the Scarborough Community Nursing Service: Mrs. Harold C. Payson, Mr. Joseph R. Knight, Mrs. Richard Grant, Mr. V. T. Shaw, Mrs. Christian J. Anderson, Mrs. Mildred Dow, Mrs. Ralph W. Haskell, Mrs. Amy King, Mrs. Leon Lary, Mrs. G. Clifford Libby, Mrs. Donald Piper, Mrs. Howard Sapiro, Mrs. Lloyd A. Turner, Mrs. Edward Vaill, Mr. F. H. B. Heald, Mr. John Libby, Mr. Fred Skillings, Jr., and Mr. F. Herbert Wentworth. We have had one resignation during the year, namely, that of Mrs. Paul G. Sterling.

I am now submitting my first annual report as Community Nurse for the period beginning Feb. 1, 1940, and ending Jan. 31, 1941. Because of an enforced two months' leave of absence, some of the activities which I am reporting were rendered by my very able substitute, Mrs. Marjorie Christian.

There seems now to be a beginning of understanding of the place of the Nursing Service in the community. More people are becoming acquainted with it, and are learning how to use it. Many do not yet know that the nurse has an office in the High School, that she has a telephone connection, and that she may be reached there during her office hours; that her duties consist of the care of the sick, the instruction of others in the family in her care, and keeping well people well, through health visiting to people of all ages; and that those who receive nursing care, pay for the service according to their ability, while all health visiting is free.

There is some nursing equipment available for loan in

case of illness, and there are layettes in reserve in case of need. Cod liver oil is being distributed to needy cases. It has been made available by Mr. Shaw through the courtesy of the South Portland Kiwanis Club.

Two new services have been inaugurated during the year; namely, a home delivery service, which signifies nursing care at confinement, and a Well Baby and Well Child Clinic with medical supervision. This clinic, which is held on the 4th Wednesday at 11 a.m. at the new Oak Hill Grammar School, is for the regular medical supervision of babies, and children of preschool age. The service includes weighing and measuring, a thorough physical examination, adjustment in feeding, and advice in care and feeding by doctor and nurse. Free health literature is available. A new feature is the administration, at the parents' request, of vaccination and toxiod for a small fee. We are greatly indebted to Dr. Howard M. Sapiro in making this special service possible. So far the attendance has been disappointing, but transportation seems to be the big problem. It seems advisable to hold the clinic in one central place, and this makes transportation a necessity. In the winter, even those who live within walking distance find it impossible to attend. I think the small number of home deliveries to date may be accounted for in a large measure by the preponderance of hospital cases.

Following is a list of outstanding activities. I have made plans for 13 tonsil operations; arranged 15 eye corrections, including eye operations for two children; made plans for dental care for 3 people; conducted a Preschool Clinic, a Vaccination Clinic which was provided by the Town, and 8 Well Baby and Well Child Clinics; and provided speakers for a Civic League meeting and a High School Assembly. Recognition should be given to the South Portland Ki-

wanis Club, the Scarborough Red Cross, and Dr. Otis Douphinett, a member of our Medical Advisory Board, for making the above physical corrections possible. We are also grateful to members of the Board who have furnished transportation at various times.

Following is a summary of visits:

Non-communicable disease	380
Crippled children	1
Communicable disease	64
Expectant mothers	76
Home confinements	3
Mothers of new-born babies	81
Well Baby supervision	236
Well Child supervision (Preschool)	126
School Health	408
Adult Health	77
Cases not home or not found	92
Persons not taken under care	29
Total	1,573

In addition, I made 1,113 inspections of school children and assisted the school physician in his annual inspections and examinations of school children. So that the children may have a more thorough examination every 2 years, inspections are done the alternate years. I, also, rechecked the eyes of those pupils whom the teachers found to have defective vision. As a result of these examinations and inspections, I have compiled the following statistics for your consideration. We find that 8% of the grammar school pupils have defective vision, 3% defective hearing, 20% defective teeth, 4% defective throats, 4% defective skin, 13% defective posture, and 11% orthopedic defects, the later consisting mainly of flat feet. In comparison, the defects as found in the High School are: 12% defective vision, 2½% defective hearing, 27% defective teeth, 15%

defective skin, 13% defective posture, and 18% orthopedic defects.

The citizens of Scarborough are indeed fortunate in being accessible to the clinics in Portland, in addition to the availability of doctors and hospitals. In this connection, a plan has been formulated by our Board for a dental program, as a step toward providing dental care for school children.

The service can prove itself only as demands are put upon it. We, therefore, invite you, the citizens of Scarborough, to use it as your own.

Respectfully submitted,
