Now is the time

to get a good trade in a

CARPET

We have got a good line of

all Wool and Cotton and

Wool and you will find our

prices on them low.

OUR GROCERY DEPARTMENT

has got lots of good things in it and

we please you on prices.

CHAS. F. RIDLON,

98 Main St.,

Norway, Maine.

O. G. CURTIS,

IS AGENT FOR THE

Osborne Farm Implements

Mowers,

Reapers,

Corn Harvesters,

Harrows,

and all the leading farming tools.

The Osborne are admitted to

be the leading implements.

The Osborne Spring Tooth

Lever Set Harrow has no equal.

3 Leading Grades of

Superphosphates.

Groceries, Best Brands of

Flour and Western Feed.

You will find me at the Grange

Store on the afternoon of every

Wednesday and Saturday or at my

farm, where implements can be seen,

at any time.

BOARD BULLETIN FOR JULY.

THE PASTURE PROBLEM.

AUGUST, July 14, 1897.

In this bulletin for July we have tried

to get from our correspondents, in ad-

diti to the regular questions, their

ideas in relation to pastures, and their

replies have come very fully. We

feel that there will be found much of

value in the many suggestions which

they contain. The pasture problem is

one of the most important to all

farmers, and as our live stock increases

it will continue to demand their increased

attention.

"The question of stocking in summer

is coming more and more to the front,

and in sections near our larger cities

and villages where land is comparatively

high, the matter deserves careful

attention. Of course it has disadvantages

as well as advantages. Among these

may be mentioned, the increased labor

necessary, and the larger amount of care

required to plan for a successful stocking

of crops which will give a continual

supply of food for the stock. These are

of the most serious questions to be

considered.

On the other side, we have an increased

amount of stock, a larger stock of

trying capacity for the farm, and a larger

amount of farm fertilizer.

These questions, carried along with

the best methods of raising our

pastures, will enable the farmer to carry

his full quota of stock through the summer

months with profit.

From the returns of the town assess-

ment, as far as they have been received

by the state assessors, we learn that

there is a marked increase in 1-year-olds

of 2-year-olds, and a decrease in the

number of cows, large numbers having

been sold to go out of the state within

the last year. We trust this reduction

may soon be stopped by the increase

which the returns on 1-year-olds and 2-

year-olds would indicate may continue

and result in an increase in the number

of cows within the present year.

GOVERNMENT CROP REPORT.

We quote the following from the govern-

ment crop report for June:

"The report of June 1, consolidated

from the returns of the county and

state correspondents of the depart-

ment, making the acreage of winter

wheat at present growing, after allow-

ing for the loss of the wheat of the

area harvested last year, or 89.9 per

cent of the area sold in the fall of 1896.

This is a decrease of 1.1 per cent from

the condition of winter wheat on June 1,

1896. The condition of winter wheat

has fallen since the report of May 1, be-

ing 75.5 per cent against 80.2 on that

date, a decline of 4.7 per cent. The con-

dition on June 1 last year was 77.9.

The percentage of spring wheat area for

the entire country as compared with that

of 1896, has fallen from 100 per cent to

98.9 per cent. The condition of spring

wheat on June 1 last year was 77.9.

A WEE BIT SANG.

When my wife, he was, an I'm like too great.

As a wee bit like that since was great.

As a wee bit like that since was great.

As a wee bit like that since was great.
