Preface

Maine Employment Outlook highlights industry and occupational employment projections for the period from 2006 to 2016. The labor market of the future is being shaped by many factors, including technological change and social and demographic trends. Labor market trends in Maine have largely followed a similar course to national trends for many years. These projections generally mirror national projections published by the U.S. Bureau of Labor Statistics for the same period.

Projections Highlights

- Employment opportunities will be concentrated in service-providing industries. Education and health services, retail trade, and leisure and hospitality services are expected to create about three-quarters of all new jobs.
- The occupational structure of employment will shift along with changes in the industrial structure and technology. Many of the fastest growing occupations will be health care related, largely due to rapid growth in the number of middle age and elderly people.
- Technology will continue to impact the structure of employment and how work is done. Computers will increasingly be a part of a wide range of work processes and computer-related occupations will continue to grow faster than average.

Questions about industry trends should be directed to Glenn Mills, Director of Economic Research. Questions about occupational trends should be directed to Merrill Huhtala, Occupational Employment Statistics and Projections Manager. Glenn and Merrill can be reached at 207-623-7900.
