Planting Specifications

- All plant material shall be inspected and approved by Landscape Architect in nursery or by photographs submitted of the proposed material prior to purchase. Plant material shall be inspected once received on-site for compliance with specifications.
- All plant material shall be healthy and full-branching, true to form and specified size, free of disease, pests and physical damage.
- Specified plant material may be substituted by the use of alternate, similar plant material, with approval from the Landscape Architect.
- The location of all trees and shrubs shall be staked and approved by the Landscape Architect prior to planting.
- Spring planting season shall be from ground thaw to June 15.
- All plant material shall be guaranteed for a period of one year after the date of substantial completion. All dead and non-vigorous material shall be replaced, without cost to the Owner, with a similar species, and these replacement plants shall be guaranteed for one year from the date of acceptance by the Landscape Architect.
- Planting soil shall be 2/3 topsoil, free of debris and stones over 1" in diameter, and 1/3 peat moss. The pH shall be between 5.5 - 7.0. Ground limestone shall be added to the planting soil to achieve specified pH.
- Fertilizer shall be applied when planting pits are 2/3 full of planting soil with a 5-10-10 fertilizer. After planting, slow release fertilizer, minimum 5 year, shall be applied using a 4 oz. packet system at rates recommended by the manufacturer.
- Mulch shall be 100% fine shredded pine bark, 3" deep for all trees and shrubs, 4" for day lilies.
- Wood stakes shall be 2" x 2" square, painted dark green. All wire and hardware shall be galvanized steel. Hose shall be 3/4" diameter, color: black.
- Tree wrap shall be Osnyburg Cloth, 4 7/8" wide, unbleached, or approved equal.
- All non-biodegradable ball wrapping shall be removed from root ball.
- Trunks of all deciduous trees shall be sprayed with fungicide, Zineb, or approved equal, according to manufacturer's recommendations.
- Seed shall be installed over 6" compacted planting soil, graded to create finish grades as specified.
