More rain than we don't seem to want.

Mr. Clara Clark, of West Sumner is a guest at Almon Church's.

Harold Briggs has bought a pointer pup of excellent breeding of Grant Royal.

On account of the moving pictures at the hall, there will be no skating rink Tuesday evening.

The Wm. K. Kimball Post, G. A. R., have engaged the South Paris band for Memorial Day exercises.

Mr. and Mrs. Will Cummings have gone to the Rangelys, where they are to be employed this summer.

L. S. Sessions is working in the store of F. W. Wright, taking the place of Irving Barrows, who is ill.

Howard W. Shaw, clarinetist, went to West Paris Friday night to play with the orchestra there for the May ball.

Mr. and Mrs. Albert L. Morse have moved to Lewiston, where Mr. Morse has a position with the Maine Central Railroad.

The Knights of Pythias will work the rank of page on two candidates next Friday evening. After the work there will be a rehearsal of the Knights.

A special train has been secured to take the Knights of Pythias Lodge to Bryant's Pond next Monday evening, May 24th, to visit Fraternal Lodge.

The Maine State Fair will be held at the fair grounds in Bangor, Maine, from September 1st to 10th.

The "Careful Gleaners" of the Methodist Sunday School held their annual picnic at the fair grounds in Bangor, Maine, on Sunday, May 23rd.

Mrs. C. A. Allen went to the Central Maine General Hospital at Lewiston, where she is recovering from an operation on her stomach.

A new wrinkle in night telegraph rates, initiated by the Western Union, has been adopted by the Great North-western.

A letter of fifty words will be sent to the night house at the same price as a day message of ten words.

The many friends of Howard W. Shaw gave him a surprise party Thursday evening at his home on Main Street.

The affair, which was in honor of his birthday, was a complete success, as well as the many presents which were showered upon him.

Dainty refreshments were served and a very pleasant time enjoyed by all.

J. H. Jones reports having seen a new advertising sign on his last trip to Astorokook, Maine, and one that doesn't look particularly pleasing in Maine.

It was the sign of a window of a house in Astorokook, Maine, and it read: "We have the best of everything here, and a place to stay."

Mr. and Mrs. David S. Knapp and son, Frank P. Knapp, the well known cornet player, have moved here from Bangor, where they are occupying Sumner E. Tucker's house on Hillside Avenue.

Frank P. Knapp will be employed by the Paris Manufacturing Co., and will play in the band.

Miss Grace Thayer arrived home Saturday night from a trip to Baltimore, Washington and other places.

Miss George P. Eastman, who has been visiting in Baltimore, returned as far as Portland with her, and remained there to visit relatives for a day or two before coming home.

The Commander in Chief of the G. A. R. recommends that the second Sunday in May of this year be observed as "Mother's Day," and all comrades are requested to wear in the lapels of their coats on that day, a white carnation, or other white flower in honor of their devoted mothers.

L. E. Scraton, the contractor on the water system, arrived here last Monday afternoon, with his foreman and some twelve or fifteen Italian workmen, and has begun on the work of completing the reservoir of the village system, which was completed early in January on account of the unusually early season.

Frank L. Doble and his son, Frank C. Doble, formerly of South Paris, now of Methuen, Mass., were town a few days last week. Frank L. Doble is now in the employ of the Paris Manufacturing Co., and will play in the band.

Work has begun on an addition to Davis Block. A small wing at the rear of the building will be removed, and in its place twenty feet will be added to the full width of the building. The space thus added will be occupied by the Paris Home Bakery, as Mr. Walker's business is increasing so as to make room for a necessary. A large new oven is to be added to the equipment, and machines for doing some of the work, to be run by electricity, will be installed.

At the annual meeting of the Woman's Mission Circle of the Baptist church the following officers were elected:

President - Mrs. L. C. Morton.

Vice-President - Mrs. W. M. Morse.

Secretary - Mrs. W. B. Edwards.

Treasurer - Mrs. G. R. Crockett.

For Home Missions - Mrs. W. B. Edwards.

For Foreign Missions - Mrs. W. B. Edwards.

The monthly meeting of the Mission Circle will meet at the Baptist church next Thursday at 3 o'clock. Subject, Missions in the Philippines.

Some brown-tails do and some don't. A South Paris man told the Democrat a few days since that he had just finished cleaning up his trees, and had carefully examined all the nests, without finding a live caterpillar. They were all dead.

A few minutes later, however, he was met with a basket containing his last gleanings of brown-tails, and in answer to the question whether they seemed to him to be dead, he said they were very much alive. He picked a nest at random from the basket, and a third of the surface of it was covered with live caterpillars.

The last meeting of the season of the Entertainers Club is held with Mrs. Brick on this Monday afternoon. The programme is devoted to light opera, the two operas selected being the Pirates of Penzance and the Red Mill. The full programme is as follows:

PART I. PIRATES OF PENZANCE.

Overture, Mrs. Morton.

First Solo - Mabel and Chorus.

Vocal Solo - "The Song."

First Solo - "The Song."

Professor Tubbs on Halley's Comet.

A few weeks since Professor F. D. Tubbs of Bates College gave his lecture, "Among the Stars," which might almost be termed unique among lectures, in New England, at least, where he did not fail to be present, last Friday evening, he lectured at the same place on Halley's comet, though it would have been a great many years ago that he had attended.

Halley's comet, said Professor Tubbs, has aroused more interest in the public mind than any other comet, and the present interest is justified by the fact that during the last week in May it will appear in the sky, with a head fully as large as the face of the full moon, though not of the same brilliancy, and with a tail sixty times as long as the diameter of the moon's face.

The comet is now 80,000,000 miles distant from the earth, and the two bodies are approaching each other in their respective orbits so that they get nearer together by about forty miles each second.

A comet is no rare phenomenon. Practically one of the year the astronomer may point his telescope at one of them. Halley's comet is of special interest because of the nearness of its approach to the earth, and the fact that it will appear in the sky, with a head fully as large as the face of the full moon, though not of the same brilliancy, and with a tail sixty times as long as the diameter of the moon's face.

The comet is now 80,000,000 miles distant from the earth, and the two bodies are approaching each other in their respective orbits so that they get nearer together by about forty miles each second.
