# Deer Isle-Sedgwick Bridge

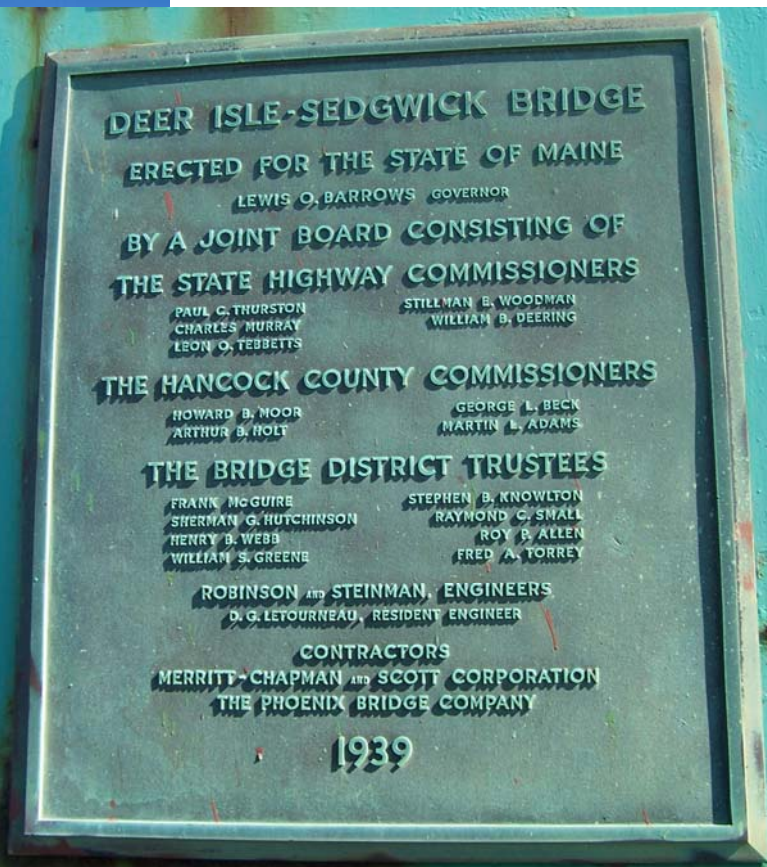

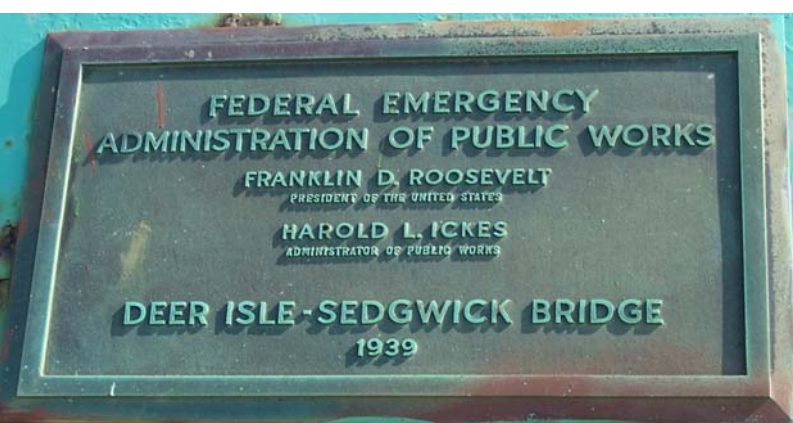

## March 30, 2007 Weekly Highlights

**Left:** Cianbro has begun mobilizing their crews onsite to begin work. Work will begin on the Deer Isle end of the bridge and scaffolding has been placed under the approach on that end. Flaggers will be used to control traffic.

**Below:** A job walk through with Cianbro and the Utility Companies prior to starting work allowed a view of the bridge not usually seen. The plaques below are mounted on the Deer Isle tower (red arrow) but due to the design of the bridge are usually hidden behind the edges of the road deck.
