There must be some intense fascination about ballooning, beyond the money which it brings to the professional. The enthusiastic young men who make ascensions from the state fair grounds last week were the same who were badly smashed up and almost killed in a fall there last year.

Greenwood.

The drought is ended for a while at least, and although somewhat severe and damaging to the crops in many places, still it was light compared to what they had in Cuba the past season. For seven months there has been a good rain, and a tropical sun sending down his burning rays every day during that length of time. No wonder that many American families who had gone there to live, became discouraged and were glad to get back into the states again.

To say that we live up to the divine commandment to the extent of loving our neighbor as ourselves would be claiming perhaps too much, but yet are so interested in the welfare of our fellow men that we visit his five acre field of sweet corn to see how it is getting along and found it very uneven. A small part of it is in wheat, and a few days ago it was the last of the month, some being hardly more than fairly sown. Hope there will be no frost until it is all harvested.

On the morning of the 8th of September, about the year 1870, occurred the heaviest frost ever seen in the region of the fall. The ground looked as though a snow squall had just passed over it, and many of the apples were frozen on the trees. The corn was cut and shocked at once, but as bad luck would have it, there came a long driving rain, quite similar to the present one, so that much of it rotted instead of drying off, and consequently was well nigh a failure.

The Maine Farmer estimated the damage done by that frost in this state at one million dollars.

The frost cannot be spoken of as wholly in the past, since there is more to be cut when the weather becomes fair. When D. O. Davis sold his farm last spring in Minnesota, he bought a Scotch dog, which he has since taken to his daughter near Oakesville, and as it was somewhat out of repair he has been fixing it up for some time.

He wrote us the other day that while he wishes to return and spend the remainder of his days in his native state, he is not going to do so, so that as yet his mind is unsettled. Mr. Davis says the crops are looking well, but about a month late the same as they are here.

We have all heard of the cholera teapot, but one occurred here recently of a somewhat different form. When the cholera teapot was used, it was found in the field, so a trap was set and soon the occupant was caught and duly disposed of. Thinking he might have a company, he was taken to the house and kept there until he died.

Mr. Miller took his text from Job 15:4. "Thou canst cast off from thee the cold, and the heat shall be as unto thee." Mr. Miller presents his subject in a simple, straightforward manner which carries conviction with it. With his wholeheartedness about the truth, he has won the hearts of his hearers.

West Paris.

A pretty home wedding occurred last Thursday evening at 8:30 o'clock at the house of Mr. and Mrs. E. W. Penley, when their daughter Blanche was united in marriage to Mr. J. B. Smith.

The bride was a beautiful girl, and the groom was a well-to-do young man. The ceremony was performed by Rev. J. B. Smith.

The wedding party was large, and the reception was given at the home of the bride's parents.
