**Surficial Materials**

- **Map Scale:** 1:24,000
- **Contour Interval:** 20 feet
- **True North**
- **Legend:**
  - Quaternary deposits
  - Surficial materials
  - Streams
  - Roads
  - Towns
  - Natural features

**Description:**
This map shows the location and distribution of surficial materials in the Tomah Mountain Quadrangle, Maine. The materials include Quaternary deposits, surficial materials, streams, roads, and natural features. The map is scaled at 1:24,000 and has a contour interval of 20 feet. The true north orientation is used, and the map includes a legend for the various features depicted. The map is part of the Maine Geological Survey's Open File series, specifically Open File No. 01-302. The map was created by M. E. Foley and designed by Robert G. Harrington, State Geologist.
