A. W. Walker & Son's,
South Paris, Maine.

**A Reliable Remedy
FOR
CATARRH**

Ely's Cream Balm
is quickly absorbed.
Gives Relief at Once.
It cures, soothes,
heals and protects
the diseased mem-
brane resulting from
colds in the head which
restores the Senses of Taste and Smell. Full size
50 cts. at Druggists or by mail. Liquid
Cream Balm for use in stonions 75 cts.
Ely Brothers, 56 Warren Street, New York.

E. W. CHANDLER,
Builders Finish

I will furnish DOORS and WINDOWS of any
size or style at reasonable prices.

E. W. CHANDLER,
Also Window & Door Frames.

If in want of any kind of Finish for Inside or
Outside work, send in your order. Fine Lam-
ber and Shingles on hand Cheap for Cash.

Planning, Sawing and Job Work.

Matched Pine Sheathing for Sale.

E. W. CHANDLER,
West Sumner, Maine.

For Sale.
My house on Skilling Avenue in South
Paris. Two-story, double-tenement,
twelve rooms, two large, stable, hen
house, fruit trees.

A. F. BARROWS,
South Paris.

Sheathing.
Spruce and fir. For sale by
J. A. KENNEY,
251 1/2 South Paris.

**Shur-On
Eye
Glasses**

Many Persons believe their eyesight good
until the time they wear glasses. They
suddenly realize that in reality have
been wearing defective vision. In time come
headaches, nervousness and other ailments. Prevention is
the best cure. Let us test you.

**OPTOMETRIST,
PARMENTER, Optician.**
Norway, Maine.

A. O. LORD,
15 years expert Watch-
maker with Biglow,
Kenard & Co., Boston.

**All Work
Guaranteed.**

A little out of the way
but it pays to walk.

**GUNS, WATCHES, CLOCKS
AND JEWELRY.**

With Dr. Parmenter, Norway, Maine.

Eastern Steamship Company.
First Class Fare \$1.00.
Turbine Steam Steamer CAMDEN and
Steel Steamer GOVERNOR DINGLEY
leave Franklin Wharf, Portland, week
days at 7 p. m., for Boston.

AMONG THE FARMERS.

"SPREAD THE FLOW."

Correspondence on practical agricultural topics
addressed to H. H. HARRIS, Editor of the
REPUBLICAN, Agricultural Editor, Office Dun-
don, Paris, Me.

Farm Implement Notes.

A matter which deserves more attention
on the farm is that of implements for
various agricultural operations. How often
we see a farmer who is entirely un-
fitted for his purpose? Many a farmer
is using a three-foot cut, one horse mow-
ing machine for his hay when a six-foot
cut, two-horse machine would save him
time and money, even if he had to co-
operate with a neighbor to get the ma-
chine.

Another horse. Again, he is culti-
vating with a wide-shovel cultivator
where a fine-tooth machine should be
used, or he is spreading manure by hand
where his acreage warrants the use of a
manure spreader. On the other hand,
he does not attempt to chop down a
two-foot tree with a hatchet, or splice
the ends of a rope with a splice, or do
these things he would never think of
doing. Oftentimes, however, things just
as suggested above, doing things he is
not best fitted to do.

Farm implements are often wrongly
used in several ways. They may be
utterly unsuited to the work at hand,
or they may be less well suited than
an improved implement of the same
kind. The employees may not be un-
derstanding how to use the imple-
ments may be used when horse or
mechanical power would be more eco-
nomical, or they may be unsuited to
the work at hand.

One great evil is the use of imple-
ments which are old, rusty and antiques,
requiring constant repair or renewal.
Implements thus used are sure to be
lost of time, fertility, crop yield, etc.,
to avoid which the farmer should con-
stantly be on the alert. When he hears
of some new machine, he should at once
make of some sort, he would do well
to take a day off and see it and the kind
of work it does. Let him receive regu-
larly the catalogues of one or two re-
liable implement houses and keep posted
on the latest farm machinery. He
should be certain that his tools meet all
the requirements of his soil and crop
conditions. He should buy carefully,
but not be afraid to spend money when
it is necessary. Some men can be
taught to themselves to a large first cost
which (although they cannot see it)
will mean profits to them in the end.

The Country's Biggest Business.

"The agricultural production of the
country has increased in the last few
years. The record is unexampled in
wealth production, and tells of abun-
dant in quantity. Year by year the
farmer is better and better prepared to
provide the capital and make the ex-
penditures needed to improve his agri-
culture and to educate his children for
farm life and the foregoing of the
world's secretary of agriculture con-
cludes the review of the production of
1909 features of his thirtieth annual re-
port. Most prominent of all years, is
the place to which 1909 is entitled in
agriculture, the secretary declares. The
value of farm products in 1909 was
heavily large that it has become merely
a row of figures. For this year it is
\$3,700,000,000, a gain of \$500,000,000
over 1908. The value of the products
has nearly doubled in ten years. The
report sets forth: "Eleven years of agri-
culture, beginning with a production
of \$4,417,000,000 and ending with \$3,
700,000,000! A sum of \$700,000,000
for the period. It has paid off mor-
gages, has established banks, it has
made better homes, it has helped to
make the farmer a citizen of the world,
and it has provided him with means for
improving his soil and making it more
productive in the future."

The most striking fact in the world's
agriculture, in the opinion of the secre-
tary, is the increase in the value of the
products, which is about \$1,700,000,000.
It nearly equals the value of the clothing
and personal adornments of \$1,600,000,000.
The value of the products in 1909 was
\$3,700,000,000 and in 1908 it was \$3,
200,000,000. The increase is \$500,000,000.
The gold and silver coin and bullion of
the United States are not of greater
value than the products of the farm.

will meet first and third Saturdays during

the remainder of the season every Saturday

Closes a Five Years' Pastorate.

Rev. J. Wallace Chesbro on Sunday

preached the final sermon of his pastora-

te at the South Paris Baptist Church.

From South Paris he goes to the pastora-

te of the Baptist church in Randolph,

VT., beginning his service there next

Sunday.

Mr. Chesbro is a graduate of Brown

University, Providence, R. I., in the

class of 1900. After graduating from

that institution he attended Newton

Theological Seminary for a time. He

held pastorates in Chester, N. H., and

Narrowsburg, Pa., and began his

work at South Paris in 1905, re-

maining here just five years.

The relations between Mr. Chesbro and

the church have always been nearly

ideal. Appreciation of his work has in-

creased with the people during the years,

and much sorrow is felt at his departure.

Mrs. Chesbro has been of much as-

sistance in the work, not only doing

much of the housework, but also being

a help in the choir regularly and

acting as superintendent of the

Junior Endeavor Society.

It was through Mr. Chesbro's efforts

that during the past year a contribu-

tion was secured from Mr. Carnegie, on

condition met by the Baptists here, which

resulted in the installing of the fine new

pipe organ in the South Paris church.

As a citizen Mr. Chesbro has always

been very active in the affairs of the

municipality, the state and the nation,

and has been active in everything tend-

ing to the material, social or moral bet-

terment of the community and he leaves

with the sincere respect and regard of

every one. The departure of the family

is a distinct loss to the place.

The Elm in Market Square.

Recently at South Paris I was asked if

I had any knowledge of the origin of the

elm now in the central part of Market

Square. I was subsequently informed

that the tree was planted by Mr. Z. F.

Thayer, whose death occurred in Aug-

ust, 1883, at Brookline, Mass. My

memory is very clear regarding the fact

and attendant circumstances as told me

by Mr. subsequently. His grandchild-

son, Mrs. L. C. Chapman of Wellesley

Farms, Mass., also has exact memory

regarding the tree as related to her and

her father. In frequent visits to

South Paris in those years. But neither

of us can speak definitely in respect to

the date.

Associated incidents of the planting as

told me are well remembered. My fa-

ther noticed the spot was fitting for a

tree to be planted there, and he was

the owner of the property in the square

and suggested it to business men about

the square, with the proposal that he

beget the tree. The tree was planted

by Mr. Z. F. Thayer, who was then

a young man, and it has since been

the pride of the square. The tree, which

has been growing for many years, is

now a fine specimen of its kind. It is

the pride of the square and is a

valuable landmark. It is a tree of

the elm family and is a fine spec-

imen of its kind. It is a tree of the

elm family and is a fine specimen of

its kind. It is a tree of the elm fam-

ily and is a fine specimen of its kind.

It is a tree of the elm family and is

a fine specimen of its kind. It is a

tree of the elm family and is a fine

specimen of its kind. It is a tree of

the elm family and is a fine specimen

of its kind. It is a tree of the elm

family and is a fine specimen of its

kind. It is a tree of the elm family

and is a fine specimen of its kind. It

is a tree of the elm family and is a

fine specimen of its kind. It is a tree

of the elm family and is a fine spec-

imen of its kind. It is a tree of the

elm family and is a fine specimen of

its kind. It is a tree of the elm fam-

ily and is a fine specimen of its kind.

tor to the South Paris Democrat, has

THE person bringing the largest number of this entire advertisement to Hobbs' Variety Store, Norway, on or before Friday, Dec. 31, 1909, at 3 P. M., will be given a **YEAR'S SUBSCRIPTION** to the **OXFORD DEMOCRAT**. The paper to be sent to some person not already a subscriber. These will also apply on the King Kineo Range.

Automatic Smokeless Device

prevents smoking. There is no possible question about it.

This means greater heat-power, a more rapid diffusion of heat and a sure conversion of all the heat-energy in the oil.

In a cold room, light the heater and in 10 minutes you'll have a glowing heat that carries full content.

Turn the wick up as high as it will go—no smoke—no odor.

In everything that appeals to the provident and the fastidious, the **Perfect Oil Heater**, with its new automatic smokeless device, decisively leads. Finished in Nickel or Japan in various styles.

Every Dealer Everywhere. If Not At Yours, Write for Descriptive Circular to the Nearest Agency of the
