HAMMOND, Agricultural Editor Oxford Dem-
ocrat, Paris, Me.

Cutting Out the Grain Bill.
HOW A FORMER SHOE DEALER MADE A
SUCCESS OF FARMING.

Charles H. Gardner, formerly a shoe dealer in
Shawmut, has made a success of farming by
cutting out the grain bill. To be sure, he did buy
eight bushels of cottonseed meal last year, but
to offset that he sold three hundred
bushels of seed corn at a comfortable
margin over market quotations. Throughout the
ten years that he has been farming, he has
been a successful farmer, and to-day has one of
the best equipped and best cultivated farms in
Somerset County.

Mr. Gardner's farm contains 165 acres,
forty of which are in corn. The year
he bought it there were about five
acres in corn, and it cut between
thirty-five and forty tons of hay. Last
year he put forty-five tons of hay into
the barn, 850 bushels of grain into the
crib, sixty tons of silage into the silo
and one thousand bushels of potatoes
into the cellar. Twenty tons of hay and
the potatoes were sold, but with these
exceptions and the seed oats above men-
tioned everything else was fed to the
stock.

Of course, there are a number of factors
behind this remarkable transition, but
first and foremost is thoroughness.
Mr. Gardner was an expert shoe dealer
and a good business man, and he has
applied these qualities to his farming.
He has never permitted to stand idle
when there is an excuse to use it. He
follows a four or five year rotation, and
when his land finally goes back into
grass after the corn crop there is a real
seedbed ready and waiting. Then while
he is trying to raise his hay he does not
do any of the preceding good work by
pasturing the fields. His second and
third crops of hay are what a good many
farmers would brag about from new
seed.

The second big factor that strikes the
observer is the way he handles the barn.
Underneath the big hay stack there
is an unusually spacious basement
containing four hog pens. If any of the
farm made fertility in wasted the amount
is not large. All the straw used in bed-
ding the stock is first run through the
cutter, and along with the dressing,
finds its way into the hog pens. Then
when spring comes there is something to
load the manure spreader with. This
method of manure handling is something
that few farmers do anything except a
flat rack.

Mr. Gardner does not carry an un-
usual amount of stock, partly on account
of the farm labor problem. He finds it
more comfortable and satisfactory to
keep only what he can care for alone.
When necessary, selling any surplus feed
that he may have. At present the live
things inventory as follows: Six cows,
4 heifers, 2 oxen, 1 Jersey bull, 2 work
horses, 1 driving horse, 1 colt, 8 hogs
and 45 hens. The latter, however, are
the special charges of the better half of
the family. The big hay stack is one of
the good things of life here, and its ap-
pearance does not indicate it. On May
19 they loaded down the egg basket with
six and one-half dozen eggs.

As a partial solution for the labor
problem Mr. Gardner has from time to
time accumulated one of the best equip-
ments of machinery in the county.
If not in the state. Not for the sake of
glorifying any fads, either, but from
simple business considerations.

Adding to these a few other things
has an eight-horsepower gas engine,
a grain grinder, corn harrow, ensilage
cutter, grain spreader and binder, manure
spreader and a cream separator. A 75-
ton square silo built into the barn is
largely the product of the big stack of
hay. It cost about \$15.
The thing that Mr. Gardner depends
on to keep the grain bill where it belongs
is a smooth finish, and it is a fact that
the grain is never lost. The grain is har-
rowed, thrashed and ground. For feed-
ing the dairy stock he uses two parts
by measure of the smooth finish and one
part of corn and cob meal and one part
of the smooth finish.

For the pigs there are the
cottonseed mixture and boiled potatoes
during the growing period and cornmeal
at fattening, with skim milk, of course,
as the mainstay. Oats, wheat and corn
with a little beef scrap and green stuff,
supply most of the wants of the poultry,
and feed for the horses is always on hand.

For the current year Mr. Gardner has
fourteen acres in oats, four acres in buck-
wheat, one-half acre in spring wheat and
four acres in sweet corn, four acres in
yellow corn, four and one-half acres in
potatoes and the rest of the meadows in
hay. Of course, there will be besides a
good kitchen garden, and one-quarter of
an acre has also been set aside for an
experimental plot of alfalfa.

Everything about the place has been
carefully planned with a view to
saving labor. Running water in the
house and barn, tools and equipment of
all kinds, and land cleared to make their
use both easy and profitable, all help
explain why Charles H. Gardner is
happy, contented and firmly of the
idea that farming is the best way of
life in the world.—Christopher M. Gallup,
Shawmut, in Tribune Farmer.

One-Sided Foods.

The skillful feeder of farm animals
has learned that it is necessary to feed
foods that give different elements in the
right proportion to the animals, if the
best results are to be obtained. Men
that have never looked into the matter
of composition of feeds often feed one
sided foods without knowing it. One
such food that is fed extensively in
some parts of the country is corn,
whether green or dry, or in the form of
ensilage. This is especially true during
the dry period in the summer when a
piece of corn has been planted to help
carry the live stock over that period.

The corn plant and the grain of corn
contain too much starch in the whole
form or another to make them anything
but one-sided food. If green corn is
fed during the period spoken of, some-
thing else must be given to balance the
too great proportion of starchy matter.
Clover and alfalfa are among the
plants that are good to feed as a bal-
ance; bran is one of the best in the way
of commercial feeds to make up for
what the corn plant does not possess.
A plant that may be used to do this
is blue grass, but blue grass does not
contain the large proportion of protein that
is to be found in alfalfa; in fact, alfalfa
is the ideal plant to be fed in corn.

Alfalfa is a one-sided feed in the other
direction from that of corn. It cannot
be balanced by feeding bran, but can be
balanced by feeding corn. Timothy hay is a balance
to go along with the alfalfa. One-sided
foods are good if they are properly com-
bined. The great number of these
foods makes it imperative necessary
that the feeder educate himself on the
constituents of the different kinds of
feeds.—A. O. Choate in Country Gentle-
man.

An Old Pear Tree.

Probably the oldest pear tree about
Brazzard's Bridge, Conn., is owned by
Ralph G. Warner, a farmer living one
mile east of the village. The pear scion
was grafted into a short bush more than
125 years ago by Mr. Warner's grand-
father. The tree has been prolific,
yielding up into the hundreds of bushels
of delicious fruit. The old tree bears the
marks of age and hard work for a cen-
tury and a quarter.

Treatment of Grass.

RESULTS OF GENERAL NEGLECT OF THE
CHIEF FARM CROP.

Grass is probably the most abused
and least appreciated of all the farm
crops in this country. The yield of hay
shows the very general and ruinous
neglect that is bestowed upon it. In
grass, meadow as well as pasture, the
country over. The rarest sight on the
farms to-day is a fine grass growth.
Thousands of dairy farmers have mil-
lions of acres of so-called pasture, but
that do not pay the interest on the
money invested in them. They are sour,
muddy, compacted, overweeded and
undergrazed, and the milk that is con-
sidered to come from them is of a very
very little material to convert into meat
and milk. Other thousands of general
farmers own millions of acres of so-called
"meadows" that pan out as badly as do
the neglected pastures. Yields of hay
from these neglected meadows range from
a ton down to almost nothing.
The hay produced is as poor in quality
as in quantity. It can not draw large
feeding value from exhausted soil. It
is poor stuff at best, and the great need
of the farms to-day is better grass culture.
Grass is the great natural fodder of the
most important animals on the farms, and
it is the only crop that can be raised in
the most possible quantity in order to secure
the greatest possible economy in the
production of meat, milk and other
farm products. It is the only crop that
can be raised in the most possible quantity
in order to secure the greatest possible
economy in the production of meat, milk

WORMS

Unsuspected worms are the cause of many little things that go wrong with children. When a child is sick, you rarely think that his sickness is caused by worms, yet worms—either directly or indirectly, are the cause of three quarters of the ill health of children, and sometimes adults, feel out of sorts, are irritable, feel listless and unfresh in the morning; suffer with indigestion, have a variable appetite, foul tongue, offensive breath; hard and full belly, with occasional griping and pains about the navel; eyes heavy and dull; itching of the nose; short, dry cough; grinding of the teeth; slow fever; and often, in children, convulsions—in the majority of cases the cause of all the trouble is worms, though you may not suspect their presence.

DR. TRUE'S ELIXIR

A pure vegetable compound, has been the standard household remedy since 1871. It never fails to expel not only worms but all waste matter, bringing the blood rich and pure, the stomach sweet, the bowels regular and the whole system strong and healthy.

The mother who gives her child Dr. True's Elixir regularly is wise, because it not only increases the appetite and acts as a preventive of coughs, colds, fever and worms, but gives rugged, robust health.

Sold by all Druggists. Price 35c, 50c and \$1.00. Write for free booklet.

CASTORIA For Infants and Children. The Kind You Have Always Bought

THE LAND OF PUZZLEDOM.

No. 1372—Geographical Headings.
1. Behold a town of Russian Turkistan and leave a jewel.
2. Behold a town of British Burma and leave a city of India.
3. Behold an isthmus near the Malay peninsula and leave uncooked.
4. Behold a cape of Australia and leave to be in debt.
5. Behold a river of Western Australia and leave a pearl.
6. Behold an island in the Malay archipelago and leave a city of India.
7. Behold a town in British India and leave a girl's name.
8. Behold a fortified town of Spain and leave a girl's name.
9. Behold a large river of Europe and leave a stone used for sharpening instruments.

No. 1373—Double Acrostic.
My initials name an English coin. My initials form a word meaning imperial. Primals and finals together name an aromatic herb. Crosswords:
1. To emit. 2. A sound reverberated. 3. A fleet of ships. 4. A girl's name. 5. A small ship's boat.

No. 1374—Charade.
I'm useless till I lose my head. Yet once it's lost my power is fled. I live among a crowd of brothers. Each one exactly like the others.

No. 1375—Riddles.
You'll find me on a wagon; You'll find me in a shoe; You'll find me in a tin can. On some occasions, too, I'm owned by every creature That lives beneath the skies. I'm silent, and I'm noisy. I'm foolish, and I'm wise. I can move the hearts of thousands; I have made a nation quake. My power is rare, but, oh, beware, The mischief I can make!

No. 1376—Flower Puzzle.
I give the horse his speed. For I'm, in fact, his greatest need. But when I'm present danger heed. Give your dish a longer life; I'm taken often where there's strife; You find me when you use your knife. —Youth's Companion.

HOME MAKERS' COLUMN.

Correspondence on topics of interest to the ladies is solicited. Address: Editor, HOME MAKERS' COLUMN, Oxford Democrat, South Paris, Me.

Tested Recipes.

ROLLS.
One pint warm milk, one egg, one teaspoon each of sugar and salt, one-half cup of yeast, two teaspoons of melted butter, flour for sponge batter. Let it rise until light, then add one cup of milk, rise again, shape, and when risen in the pan bake about fifteen minutes in a hot oven.

BISCUITS.
One pint of bread flour, one pinch of salt, dessertspoonful of lard, and mix it with hands in the flour. Take one-half teaspoonful of soda, and one teaspoonful of cream tartar. Stir it all up with milk until it is stiff enough to roll out. Quick! Mix the butter, put it with the milk, and stir quickly into the dry ingredients. Roll out half an inch thick, well-greased griddle. Tear open and spread each half with softened butter. Put half of the cakes on a hot platter. Mash one quart of strawberries, sweeten to taste, drain off the juice, put a large spoonful of berries on each half cake, and put on another layer of cake and berries. Mix the juice with half a cup of cream, and serve turned over the shortcake.

JOINTY CAKE.
One egg, pinch of salt, one-fourth cup of sugar, one cup of sweet milk, one cup of flour, one-half cup of Indian meal, two heaping teaspoonfuls of baking powder.

STRAWBERRY SHORTCAKE.
One pint of flour, one-half teaspoon of salt, one-half teaspoon soda, one teaspoon sugar, one teaspoon cream of tartar, one-fourth cup of butter, and one cup of milk. Melt the butter, put it with the milk, and stir quickly into the dry ingredients. Roll out half an inch thick, cut into rounds, and bake slowly in well-greased griddle. Tear open and spread each half with softened butter. Put half of the cakes on a hot platter. Mash one quart of strawberries, sweeten to taste, drain off the juice, put a large spoonful of berries on each half cake, and put on another layer of cake and berries. Mix the juice with half a cup of cream, and serve turned over the shortcake.

FRENCH TOAST.
Beat one egg in a shallow dish, add a teaspoon of sugar, a pinch of salt, and one cup of milk. Soak six slices of stale bread in the mixture, and pile them lightly on a dish. Serve at once.

DELISH PUDDING.
One pint of milk, two tablespoonfuls of cornstarch, one-half cup of sugar, one teaspoon of salt, whites of three eggs. Beat the whites of the eggs until stiff, mix the milk and sugar, and the cornstarch in cold milk, and stir into the boiling milk. Stir constantly, and when thick, add flavoring, and turn into a shallow plate. Turn upside down, and if moulded in a plate, turn into a round dish. Cut the edge in deep points or scallops, and ornament it with almonds, raisins, and candied cherries or bright jelly. Make a boiled custard with the yolks of the eggs, and pour round the edge.

FISH TURBOT.
Two pounds of halibut or other fish boiled, yolked out of three eggs. Put one pint of milk to boil with one-half cup of butter and one-fourth cup of flour for thickening. Beat yolks of eggs in after the milk is boiling, and if moulded in a plate, turn into a round dish. Cut the edge in deep points or scallops, and ornament it with almonds, raisins, and candied cherries or bright jelly. Make a boiled custard with the yolks of the eggs, and pour round the edge.

SUNSHINE CAKE.
Whites of seven eggs, the yolks of five, one-fourth teaspoon of cream tartar, one-fourth teaspoon of salt, one cup of flour, sifted five times, one cup of sugar, one cup of butter, one cup of milk, one cup of raisins. Bake forty minutes in a moderate oven. The whites of the eggs want to be beaten a long time.

SOFT FROSTING.
One cup granulated sugar, one-fourth cup of milk, one cup of butter, one cup of flour. Set it over the fire and stir until it boils, then let it boil five minutes without stirring. Place the pan in ice water and beat rapidly until white and light. As it is setting, add one cup of sugar, one cup of milk, and one cup of flour. Smooth with a knife.

HOT CHOCOLATE SAUCE.
One cup of sugar, one-half cup of water, six tablespoonfuls of chocolate, one-third cup of milk, five minutes; when done add one tablespoonful of vanilla.

PIE CRUST.
One cup and one-half of flour, pinch of salt, one tablespoon of lard, enough cold water to mix. Roll it out, spread some lard on, then put flour over that and roll it out.

COOKIES.
Three cups flour, two teaspoonfuls of cream tartar, one of soda, one pinch of salt, one-half cup of shortening rubbed in, one cup of sugar, one-half cup of milk. Stir the dry ingredients with the flour. Roll thin.

FILLING.
One cup raisins, one cup of sugar, one-half cup of water, one teaspoonful of flour, small pieces of butter, four drops of lemon, put on and boil. Put between two cookies.

SOFT GINGERBREAD.
One cup of sugar, one cup molasses, one-half cup of butter, one cup of sour milk, one teaspoonful of soda, one egg, pinch of cinnamon, clove, ginger, two and one-half cups flour, one-half cup of chopped raisins.

FRUIT CAKE.
One and one-half cups of sugar, molasses, butter, one pound of raisins, one cup of molasses, one cup of flour, two and one-half cups of flour, one-half cup of chopped raisins.

PLAIN CAKE.
Two eggs, one cup sugar, good one-fourth cup of butter, one-half cup of sweet milk, one-half teaspoon soda in milk, one and one-half cups of flour with a teaspoonful of cream tartar.

WALNUT FUDGE.
Three cups of sugar, two dessertspoonfuls of cocoa, and two squares of chocolate, one cup of milk, but size of egg, vanilla to flavor, one-half cup of walnut meats. Spread on bottom of pan before pouring in fudge.

MAKING GIRLSWAISTS.
To most busy girls the problem of the making of girls' waists seems never ending. About a year ago I solved it for myself. I made a pattern of a medium and a perfectly plain girls' waists. After carefully cutting, basting, and fitting it, I ripped the seams and cut the original pattern. So that it was exactly like the waist, carefully marking the lines of sewing, the belt line, and the center front and back.

Now as I have time to do it to suit my waists by the fitted pattern and sew them together. For tucked waists I put in the tucks first and then do the cutting.

By carefully noting the sleeve length on the pattern, and the cuff length, too, there is no bother in shirtwaist-making. Try it, and see what a saving of time and material it is.

Extremely smart fancy coats, long and trimmed with fur buttons, are included in the catalogue of waists and coats. The pongee coat must not be forgotten either, as it is most necessary in midsummer. A pongee wrap for the economical woman serves the double purpose of traveling and evening wrap as well as motor coat.

Last summer I kept a wooden coat-hanger exclusively for drying my bathing suit. It was slipped through the shoulders and hung on the line. The suit dried quickly and evenly, and was as fresh as when it was taken to the line with the clothesline.

INITIATING THE CUB.

Starts the New Boys in Some Banks Have to Face.

Now, when a tyro goes to work in a machine shop he is sent to the tool room for a left-handed monkey wrench. A foundry gang will send the new boy in search of "core holes." A printer's devil is sent to the typefounders with a wheelbarrow for a hair space. Humorists in certain Kansas City banks have a revised code, says the Times of that city.

Here are six things the beginner probably will be required to seek at drug stores, in stationery shops, even at the county courthouse, where one trustful youth went the other day to inquire diligently for a "speed ball" to assist him in his work.

The first is the "speed ball," then, and there is the "check stretcher," presumably used to increase the size of checks that do not conform to the filing cases; the "discount board," supposed to be checked in a manner to facilitate the handling of discounted paper; the "clearing house key," in search for which half a day easily may be consumed, and for the red and black lines that lie artistically on the fair pages what could be more appropriate than "striped ink," and lest the ink becomes too thick should not an "ink strainer" be procured?

Ask the new boy.

Chicken All Right.
A Camden lawyer walked into a restaurant the other day prepared to order himself a chicken dinner. He looked at the waitress and said: "How's chicken?" "I'm all right," she answered cheerily. "How's yourself?" Philadelphia Times.

Idleness is the sepulcher of a living man.—Holland.

A LEADING CALIFORNIA DRUGGIST.
PASADENA, CAL., March 9, 1911.
Foley & Co., Gentlemen:—We have sold and recommended Foley Kidney Pills for many years. We believe it to be one of the most efficient expectorants on the market. Containing no opiates or narcotics it can be given freely to children. Enough of the remedy can be taken to relieve a cold, as it has no nauseating results, and does not interfere with digestion. Yours very truly, C. L. Parsons, Sec. and Treas.

Get the original Foley Honey and Tar Compound in the yellow package. A. E. Shurtliff Co., South Paris; S. E. Newell & Co., Paris.

Salesman—You'll find these good wearing shoes.
Customer—Rather loud, ain't they?
Salesman—Yes, sir. But that keeps the feet from going to sleep.

Do you use an atomizer in treating Nasal Catarrh? If so you will appreciate Ely's Liquid Cream Balm, the quickest and surest remedy for this disease. In all curative properties it is identical with the solid Cream Balm which is so famous and so successful in overcoming Catarrh, Hay Fever and Cold in the head. There is relief in the first dash of spray upon the nostrils. It is an air-spraying tube, or mailed by Ely Bros., 50 Warren Street, New York.

She—I'm afraid, Tom, dear, you will find me a mine of faults.
He—Darling, I will be the sweetest labor of my life to correct them.
She (flaring up)—Indeed, you shan't!

There is one medicine that every family should be provided with, and especially during the summer months: Ely's Liquid Cream Balm. It is a cure for all the ailments of the head and throat. It is almost certain to be needed. It costs but a quarter. Can you afford to be without it? For sale by all dealers.

"We got forty-eight wedding presents," "You're lucky."
"We are not. Every one came from friends who are engaged to be married."

MIDDLE AGED AND ELDERLY PEOPLE
Use Foley Kidney Pills for quick and permanent results in all cases of kidney and bladder troubles, and for painful urination, backache, rheumatism, and all ailments of the urinary system. It is almost certain to be needed. It costs but a quarter. Can you afford to be without it? For sale by all dealers.

"I cannot live without you," he declared.
"Don't say that!" she replied. "I shall not marry you, but I will ask father to give you a job."

The uniform success that has attended the use of Chamberlain's Cough, Cholera and Diarrhoea Remedy has made it a favorite everywhere. It can always be depended upon. For sale by all dealers.

Johnny—Papa, would you be glad if I saved a dollar for you?
Papa—Certainly, my son.
Johnny—Well, I saved it for you, all right. You said if I brought a first-class report from my teacher this week you would give me a dollar, and I didn't pay.

POLEY'S KIDNEY REMEDY.
Is particularly recommended for chronic cases of kidney and bladder trouble. It tends to regulate and control the kidney and bladder action, and is a strengthening and bracing. A. E. Shurtliff Co., South Paris; S. E. Newell & Co., Paris.

"We are but pawns in the game of life," said the serious woman.
"Indeed," he replied. "Alas, Cayenne, but those of us who wear hobble skirts look more like crabs than pawns."

It is worse than useless to take any medicines internally for muscular or chronic rheumatism. All that is needed is a free application of Chamberlain's Liniment. For sale by all dealers.

"I am going to ask your father for your hand."
"Oh, that will be lovely."
"You are glad?"
"Delighted! I will call and bring you flowers every day until you are able to be out again. I have never seen the inside of a hospital!"

Foley Kidney Pills contain just the ingredients necessary to regulate and strengthen the action of the kidneys and bladder. Try them yourself. A. E. Shurtliff Co., South Paris; S. E. Newell & Co., Paris.

"Your business college for young ladies seems to be all right."
"It is all right."
"Do you give the girls a good practical business training?"
"In reply to that question I can only say that 60 per cent of our graduates marry their employers the first year."

Whooping cough is not dangerous when properly treated. It is a free application of Chamberlain's Cough Remedy. It has been used with many evidences of this disease with perfect success. For sale by all dealers.

Bread and jam

and bread and sugar are old-fashioned delicacies that children love. It makes them fat and keeps them well and hearty.

William Tell Flour

Bread made from William Tell Flour is extra fine and extra nutritious.

Milled from selected Ohio Red Winter Wheat—by our own special process—it is richest in bread-making qualities.
