Tremendous Republican Gains Made.

ELECTIONS INDICATE THAT THE OLD PARTY IS COMING BACK.

Almost a landslide to the Republican party, the substance of the election results of last Tuesday, when elections were held in all states of the Union except Maine. The result can be interpreted only as a failure to endorse the present Democratic administration.

In all the states members of the national house of representatives were elected, and in the majority of states the majority of 141 is cut down to less than 30.

A significant and interesting feature of the result is the slump in the Progressive party vote. In Massachusetts, where the Progressive candidate for governor received about one third of last year's vote. In New York the Progressive candidate was a poor second, receiving only a little more than half the vote of Sulzer, candidate on the American and Prohibition tickets. A small and reduced number of members of congress were elected on the Progressive ticket, and in California Hiram Johnson, who was the candidate for vice-president with Roosevelt in 1912, was re-elected governor, but this is the extent of the Progressive accomplishments. The inevitable conclusion is that the party will not again be a considerable factor in the country's politics.

In Massachusetts Governor Walsh, Democrat, was re-elected by a plurality of a little less than 10,000. All other state officers were elected by the Republicans, who also have a majority in both houses of the legislature.

New Hampshire, Vermont, Rhode Island and Connecticut are Republican.

New York gave a decided Republican victory, electing Whitman, the Republican candidate, governor by a plurality of approximately 120,000, and for the first time since 1910 the Republicans will control both branches of the legislature.

Democratic control of the United States Senate will be retained by a very slight change if any in the plurality.

Interesting feature of the result is the election of "Uncle" Joe Cannon by a plurality of about 350,000, and the defeat of the present Democratic congressman in President Wilson's second term.

In Jersey, the Republican candidate having a plurality of about 2000.

Of seven states which voted on the question of granting the vote to women it appears that Montana and Nevada voted in favor, and the others against.

Prohibition was adopted in Arizona, Colorado, Oregon and Washington, and was defeated in Ohio and California. In California an amendment to the constitution adopted at a referendum makes it impossible to have another vote on the question for eight years. The fact that California is a large producer of wine had a strong influence on the result.

Thirteen states now have prohibitory laws.

Differing Points of View.

Writing of Gen. Adna R. Chaffee, who has just died, the Springfield Republican notes this incident:

It will be remembered that the American force which led the war under Gen. Chaffee during the Boxer revolt in China, when the allied armies entered Peking, was the first to enter the city. Gen. Chaffee, who was then commander, acquired international fame, and his name was everywhere.

Gen. Chaffee was a typical American; Field Marshal Waldersee the typical Prussian.

The United States of America illustrated its attitude in its dealings not only with China in connection with the "Boxer" troubles, but with both Spain and Cuba. Germany is showing her attitude by her treatment of the poor, unhappy, unoffending Belgian.

Here and There.

Villa is said to be the hope of Mexico. Which shows that our southern neighbor is reduced nearly to hopelessness.

"Negotiations on for Ending Baseball War," is announced in a newspaper heading. Which is pleasing, but the same heading only to the point of view omitted if such a thing were possible, would bring joy to millions more people.

Twelve men dead from drinking alcohol in liquor stores at a Vermont drug store. Of course it had happened in a prohibition state it would have been widely advertised as illustrating the horror of prohibition.

Vermont is a shining example of a state which has gone back from prohibition to local option. Still the license advocates will fail of their duty if they do not succeed in finding in the incident an argument against prohibition. Until we find out whether the town where the liquor was sold is licentious or not (it is not stated), it will be difficult to guess what the form of the argument will be.

Suppression of the German Socialist organ, Vorwaerts, for military criticism, has been followed after an interval by the resumption of publication under ownership. Some of the conditions are that the paper must not contain any military criticism during the course of the war, and that it must refrain entirely from making derogatory comments on the upper classes.

That is some like allowing a boy to take a gun and go hunting, with the proviso that the look shall be taken off his gun and he shall have no cartridges.

Why shouldn't Vesuvius erupt? It's about the only thing in Europe that hasn't already done so.
