Left \$128.50 in the Money Drawer.

BUT TOOK MAXIMUM SMALL ARTICLES FROM VARIOUS SMALL MILLS.

Last Wednesday night the grain mill of Alton C. Maxon on Skilling's Avenue, South Paris, was entered by parties who forced the back window of the office. Some of the articles taken were a pair of wrenches and small tools, and perhaps other small articles, were taken. The burglars went through some of the drawers in the office, but found nothing of value in them. A silver cup which was in the window, to be presented by the Park & Pollard Co. at the poultry show, was taken.

The interesting feature of the bur- glary, and the one that would cause gasping of teeth on the part of the burglar, is that they knew it was Wed- nesday night was the first time since he has been in business there that Mr. Max- on has failed to take his money home.

A little change of the safe, but the bulk of the money he takes with him. Sometimes he has forgotten it and gone back after starting for home, but this was the first time he had forgotten it. Something coming up that required his attention as he was preparing to leave was the cause of the oversight.

Consequently in the cash drawer there was a small sum of \$128.50, which could have been very easily ap- propriated by the burglar, but he had not intended to draw to take it.

General indications seemed to be that the marauders were after automobile stuff. Just outside the office stood Mr. Maxon's Grant car. They went through the pockets on this, and if they could have found the switch key, (which was in the immediate vicinity), might pos- sibly have had the car.

The mill stands beside the railroad tracks, with one side being the main track and the main track, while doing their shunting in this part of the yard, discovered the open window in the office, and later picked up, beside the main track and nearly opposite the win- dow, two "jimmies." These are pro- nounced by the officers to be
