

THE OXFORD BEARS.

THE DOINGS OF THE WEEK IN ALL SECTIONS OF THE COUNTY.

Church Hill.

First Baptist Church, Rev. G. W. Hill, pastor. Preaching every Sunday at 10:30 a.m. and 7:30 p.m. Sabbath school every Sunday at 9:30 a.m. Prayer meeting Thursday evening at 7:30 p.m. Social hour every Friday afternoon at 2:30 p.m. All not otherwise connected are cordially invited.

Mrs. Frederic F. Walte of Methuen.

New Jersey, was the guest of her niece, Mrs. Hiram Heald, last week.

Mrs. and Mrs. Richard Webb of Portland.

are guests at the Hubbard House.

A very pleasant and well-attended occasion was the Saturday afternoon tea given by Mrs. Edward T. Brown at the Country Club house last week.

The tea was given next Saturday by Mrs. Lyon and a subscription bridge party is being made up of members and their friends. The bridge will begin at 2 o'clock and continue until 5 o'clock.

The Oxford County fair will be held at the links that was set down for last Friday was postponed until Tuesday morning of this week.

The fair will be held at the links that was set down for last Friday was postponed until Tuesday morning of this week.

Mr. and Mrs. Frank M. Owen, William G. Harlow, Miss Lorraine Harlow and Miss Marian Harlow of Dixfield were week-end guests of relatives here.

Mr. and Mrs. Knickerbocker will preach next Sunday at the Universalist church. This will be the closing sermon of the summer season.

Mrs. Knickerbocker returned to Pennsylvania.

Alfred M. Daniels is building an extension on the west side of his house. It will be used as a dining room and an enlarged piazza and greatly improve the place.

Edward L. Paris, Jr., has been laid up with rheumatism the past week.

George Stettin of Mechanic Falls is visiting his grandparents, Mr. and Mrs. Edward C. Stettin.

Colonel Daniels is on a tramping trip over the Presidential range of the White Mountains, with a party from Bryant's Pond.

Dan Winslow is spending a vacation at Monhegan Island on the Maine coast.

Mrs. F. E. Shorey of Portland is a guest at Henry D. Hammond's.

H. S. Knickerbocker of Reading, Pa., who has been spending a few days at vacation here, left for the return trip Friday night. Thayer Quinby, of Wellsfleet Hills, Mass., accompanied him to Paris Hill.

Mr. and Mrs. L. I. Warren with their grandson, Master Clifford Warren, who have been spending the summer with their daughter, Mrs. C. E. Roy, have returned to their home in Long Beach, Calif. They were accompanied by Mrs. Warren's sister, Mrs. B. E. Keyes of Chesterfield, N. H.

At the services at the Universalist church Sunday the young people's choir of the South Paris Universalist church rendered very acceptable assistance in the singing.

Hon. Harold M. Sewall of Bath was at Paris Hill last Saturday.

Henry D. Hammond wishes to express his heartfelt thanks to all his neighbors far and wide who aided so efficiently in saving his house when his barn burned on Wednesday.

The Baptist Ladies' Aid wish to thank all who contributed to the success of their recent fair.

The State Laboratory of Hygiene has recently made an analysis of the public water supply of this village, returning the same with the following letter:

PARIS HILL WATER CO., PARIS, MAINE.

Gentlemen:—Analysis of the summer sample of water from your public water supply, sent to me on the 15th inst., shows this water to be safe and satisfactory for use for all domestic purposes. There is no evidence of contamination of the water with sewage matter, or with surface wash of any kind. In spite of the excessive rainfall of the past two months, the water is in normal condition for this season of the year, and is free from drinking water.

Very truly yours, H. D. Evans, Director.

During the severe electrical storm of Wednesday afternoon the lightning struck the large farm barn of Henry D. Hammond just east of this village.

The barn contained about a hundred tons of hay and fire immediately broke out through the cupola and spread rapidly through the entire structure. Mr. Hammond succeeded in getting out his three horses but the fire burned with the hay and farming machinery and tools and eight hogs were consumed. Fortunately his cattle were in the pasture at the time. Mr. Strout, who had been after them having been unable to find them and was on his way back to report to Mr. Hammond, saw the barn burning and ran quickly to assist and only by the best of work by a volunteer bucket brigade was the fire saved. Most of the household goods were moved out. The barn was a modern structure a hundred feet long and had within two years been enlarged and greatly modernized so that it was in most excellent condition and considered one of the best farm structures in town. Mr. Hammond's loss will approximate \$5,000, less insurance on the barn of \$1,800, thus leaving a net loss of \$3,200. The loss was a heavy one for the farmer. It is probable that construction of a new barn will be begun as soon as plans can be completed.

Mr. and Mrs. Francis Wilson and friends of Norway called on some of his old neighbors Sunday.

Mr. and Mrs. J. L. Barrett and Wendell were in town on Sunday.

Mr. Gould was through here last week buying stock.

Freemont Field has sold three cows to Paris from Lewis.

Edson Merrill and son from Manchester, N. H., are guests of Mr. and Mrs. W. L. Barlow.

Mr. and Mrs. Elmer Cummings are entertaining friends from New York.

Milton Plantation.

E. C. Gammon has moved to Bryant Pond.

Mrs. D. C. Estes passed away Sunday morning, August 20th.

C. S. Buck visited New York and Waterville on business Wednesday.

Mrs. Sarah Buck celebrated her 70th birthday recently.

Mrs. Brown passed away Tuesday, Aug. 23d.

Farmers have about all finished hay.

Miss Marjorie Verrill is in town for a few days.

A. O. Woodman of Mechanic Falls called on friends here last Sunday.

Wilson's Mills.

Mrs. Bertha Wilson is visiting her daughter, Mrs. C. C. Linell.

A. A. Adams, who was operated on for appendicitis, is again in the hospital and is expected to be discharged on the 10th.

Miss Margarette Hollis of Canton is in town.

Rodney McCollister was in Mexico Wednesday.

Lillian Ellis is spending a few days with her grandparents, Mr. and Mrs. J. E. Harris, in West Paris.

Mr. and Mrs. Alton R. Allen of Berlin, N. H., were week-end guests of Mr. and Mrs. G. Albert Ellis.

Waterford.

Miss Hazel Miller has gone to the Summit Spring House to work.

Misses Edna and Edith Skinner have gone to Froun's Neck to work.

Miss Lillian Skinner has gone to South Paris to work.

Mr. and Mrs. J. C. Harvey and Mr. and Mrs. A. F. Davis took a trip to Twin Mountain, N. H., in the Davis auto, Saturday, coming home Sunday.

Mrs. F. A. Ripley and five children have been making her mother and father, Mr. and Mrs. F. A. Damon, and her sister, Mrs. L. E. Abbott, a visit of a week.

Bethel.

Rev. Charles Berry supplied the Congregational pulpit Sunday. Rev. Berry holds a pastorate in Brooklyn, N. Y.

Monday Mrs. and Mrs. Wesley Woodbury started upon their return trip to Portland, Me., having visited their sisters, Mrs. J. U. Farrington and Mrs. F. S. Chandler. Ethel Bunting accompanied them as far as her home in Yarmouth.

Mrs. Raymond Ferguson of Auburn spent the week-end with her grandparents.

Wednesday afternoon a very heavy shower of rain, lightning and thunder visited Bethel.

Dr. George B. Farnsworth of Cleveland, Ohio, was in Bethel Wednesday morning. He is stopping at Christmas Cove with his wife and daughter.

Miss Sanford spent a few days at Bethel's Island with Dr. Gehring and family.

Wednesday Evelyn Chandler returned to Norway.

Thursday evening there was an enthusiastic Republican rally at Odeon Hall, which was filled to listen to Congressman McGee of New York, and F. W. Hackley of Portland. Conditions were favorable and the speaker was well received.

Mr. and Mrs. Frank M. Owen, William G. Harlow, Miss Lorraine Harlow and Miss Marian Harlow of Dixfield were week-end guests of relatives here.

Mrs. Knickerbocker will preach next Sunday at the Universalist church. This will be the closing sermon of the summer season.

Mrs. Knickerbocker returned to Pennsylvania.

Alfred M. Daniels is building an extension on the west side of his house. It will be used as a dining room and an enlarged piazza and greatly improve the place.

South Paris, Maine.

"Teach Them To Shoot"

Remington-UMC
22 Caliber Rifles

THE American father today has pretty much forgotten the old notion that his boys should be taught to shoot. It is a good thing that the Remington-UMC rifle is so easy to use. It is a good thing that the Remington-UMC rifle is so easy to use. It is a good thing that the Remington-UMC rifle is so easy to use.

Good Livestock Pays

It makes farming permanent.
It returns highest price for farm crops.
It furnishes market for waste feed.
It reduces bulk of marketable crops.
It distributes labor throughout the year.
It means cleaner farms.
It means income steady.

THE NORWAY NATIONAL BANK
NORWAY (ESTAB. 1872) MAINE

Hoing and Haying

will come together this year sure and you will need good machinery to do the work. We have got just what you need.

A Riding Cultivator

is a great labor saver. We have got the best there is made.

I. H. C. Mowing Machines, Rakes and Tedders

in stock. The place where you can get your repairs.

A. W. WALKER & SON,
SOUTH PARIS, MAINE.

EQUIPMENT COUNTS

We own and operate more Typewriters, Burroughs Adding Machines and Edison Dictating Machines than all other business colleges and shorthand schools in Maine combined.

The Shaw Business College

PORTLAND BANGOR AUGUSTA

State of Maine.

At a Probate Court held at Bangor on the 15th day of August, A. D. 1916.

PRactical HEALTH HINT.

Water For the Baby.
Infants suffer from not having enough water to drink. Babies are thirsty and frequently cry from the discomfort due to thirst. In proportion to its weight an average infant during the first year of life requires a little more than six times as much water as an adult. During the time when the child is upon an entire fluid diet the addition of much water other than that supplied by the food is unnecessary. The food (breast milk) of all young mammals consists of from 80 to 90 per cent of water. This is needed for the solution of certain parts of the food, such as the sugar and some of the proteins, and for the suspension of the other proteins and the emulsified fat. All the food is thus dissolved and minutely divided so as to be the more readily absorbed upon by the feeble digestive organs of the infant.

An Optimist's Essay.
A pessimist is a son of the man who died before there was any such thing as electricity.

The Gold Dust Was There.
North America has counted as a gold producing continent only since the late forties. But it might well have done so for about 200 years. According to the legend of the discovery of gold in California, the first gold was found in 1793 by the privateer Captain Shelvocke found in certain California valleys a rich black mud which, as you turn it fresh up to the sun, appears as if intermingled with gold dust. Though we were a little prejudiced, he added, "against the thought that it could be possible that this metal should be so promiscuously and universally mingled with common earth, yet we endeavored to cleanse and wash the gold. It did not appear like gold. In order to be further satisfied I brought away some of it, which we lost in our confusion in China."

The Number Nine.
There were nine earths according to medieval cosmology, nine heavens, nine rivers of hell and nine orders of angels. The number being perfect since it represented divinity was often used to signify a great quantity, as in the phrases, "A nine days' wonder," "A cat has nine lives" and "Nine tailors make a man." In Scotland a distemperer was cured by washing her in nine surts. To see nine magpies was considered extremely good luck. Nine children in a black woolen thread served as a charm in the case of a sprain. It was also believed and still is by some that if a servant girl finds nine green peas in one pod and lays them on the window sill the first man that enters will be her true love. Nine grains of wheat laid on a four leaved clover enable one, it is said, to see the fairies.

Felling a Fair.
A story used to be told at Cairo of Sir Richard Francis Burton, one of his sojourns in Egypt. The great naturalist was seated in the shade on the veranda at Shepheard's hotel when the inevitable snake charmer came to him and produced from his bag a lively specimen of the horned asp—*asp*—*asp*. The professor gazed and, nothing daunted, stooped and plucked the horns from the head of the reptile wriggling at his feet, remarking to a bystander that the man would probably think twice before trying to palm off upon any one else a harmless snake as a cerastes by the aid of a couple of fish bones. With anybody else the charmer would probably have succeeded. He had tried it on the wrong man.

Speed of Bullets.
The rate of fall of the bullet from the line of projection is fixed by laws of gravity, hence the more rapidly the bullet is made to pass from the rifle to the target the faster will be this curve or "trajectory," the less accurate the estimation of distance required and the less the chance of error through an inaccurate estimate of distance.

HE KIDNAPED HARDLY WALK.
Deranged children cause rheumatism, aches, pains, soreness, stiffness. Ambrose Gary, Sulphur, Okla., writes: "I was bothered by kidney trouble for a long time. I had been told that I had a kidney stone. I had been told that I had a kidney stone. I had been told that I had a kidney stone."

THE RATE OF FALL OF THE BULLET.
The rate of fall of the bullet from the line of projection is fixed by laws of gravity, hence the more rapidly the bullet is made to pass from the rifle to the target the faster will be this curve or "trajectory," the less accurate the estimation of distance required and the less the chance of error through an inaccurate estimate of distance.

The rate of fall of the bullet from the line of projection is fixed by laws of gravity, hence the more rapidly the bullet is made to pass from the rifle to the target the faster will be this curve or "trajectory," the less accurate the estimation of distance required and the less the chance of error through an inaccurate estimate of distance.
