—During the recent pleasant harvest weather, nearly all the crops have been secured in good order. Grain is good and of an increased quantity from last year. The potato crop is large, although some complaint is heard of the rot. Little fruit is raised in the County, and this year less than usual. On the whole, farming is the best paying business that has been done.

R. G. Durgin, Treas.

Blackhill.
—I have to report still another accident which occurred at Col. Williams' quarry on Saturday last, very similar to the one which happened at B. O. Cutter's copper mine some two months ago. Three men were drilling out the tamping in a hole, the charge in which for some reason had failed, and although they kept water in the hole during the operation in some way the powder became ignited and an explosion was the consequence, whereby the face of one of the men was so badly burned that the recovery of his eyesight is somewhat doubtful. The other men escaped with a slight scorching. It is indeed surprising in view of so many and oft repeated accidents and injuries resulting from the effects of powder that any one should be so careless and so heedless as to attempt to drill out a charge that had failed, and from my experience I am convinced that it never should be practiced and in no case allowed.

—Mr. Isham Pert, whose leg was so badly broken at Capt. Chase's quarry, as reported in the American last week, died at his boarding house, near the quarry, on Sunday morning, and will be buried in our cemetery to-day. This place, assisted by Miss Eva Gould of Bangor, Miss Ewer who by her ladylike deportment and winning graces, has won the confidence and esteem of her numerous customers, retires from the business in which she has been so very successful, with the kind wishes of all her acquaintances.

—A company has recently been organized in Bangor for the purpose of working the copper mines in this town. Capital stock, \$200,000.
