## The Cement Road Will Be Built.

STATE HIGHWAY COMMISSION WILL PUT IN ENOUGH TO COMPLETE IT.

As is well understood, the bids recently submitted to the State Highway Commission for the construction of the cement road in Paris and Norway were materially above the amount appropriated by the two towns, so that the prospect of the road being built at present has appeared rather poor. A letter from Chief Engineer Paul D. Sargent of the commission, received by the committee on Saturday, gives the information that the contract for the road has been let, and that the funds of the two towns will be supplemented by state funds sufficient to complete the job. The essential part of this letter is as follows:

At a meeting of the Highway Commission in Houlton last week, I laid before the commission your letter of July 2. The Commission are favorable to undertaking the construction of enough of the road between Norway and South Paris so that it will be possible to do the whole job proposed to be done by the two towns. Yesterday I had Mr. James H. Kerr, who was the low bidder on this work, here at the office and closed contract with him. I presume he will be able to handle this matter well for the two towns to place their funds in the hands of the State Highway Commission, that is to say, you should deposit the funds with the State Treasurer so that we can handle this job just as we would any contract job which we are letting, on estimate and every two weeks. In this way we shall simply use the whole of the towns' funds and put the balance of the cost in out of the bond issue funds.

## Great Chautauque Week This Far.

PROGRAM OF HIGH ATTRACTIONS WHICH WE HAVE LEARNED TO EXPECT.

All but one day of the program of the Community Chautauque has been given, and it is safe to say that the standard of the previous years has been fully maintained and a series of entertainments given, which for attraction as entertainment, as well as for inspiration, it would be difficult to excel.

E. Martin Grove of Pennsylvania College is the superintendent here this year, and is as efficient and pleasant as his predecessors in that position. His assistant is J. E. Endre, and the tent man is L. R. Gobrecht, also college men, and the superintendent of the Junior Chautauque is Miss Mildred Haddell of Ohio Wesleyan University.

Space forbids going into detailed details of the several features presented in the afternoon and evening since Wednesday, and only brief statements regarding each can be made.

To open the series on Wednesday there appeared the Madrigals, a company of three musical young women, including Mrs. May Pike, soprano, and Miss Olga Cappucco, a winsome and charming violinist, and Miss Edith Marshall, a versatile artist who played with equal skill the cello, the xylophone, the lyre and the bells, and who earned a number of curtain calls at each appearance.

Wednesday evening's lecture was by Dr. Alexander Cairns of New Jersey, who announces himself as an Irishman, and leaves no doubt of it when you have perceived his readiness and wit and his brimming good humor which are such well-known racial characteristics. The title of his lecture was "The Goose That Lays the Golden Eggs." It deals chiefly with—well, as Golden Rule Jones once told Brand Whitlock when he was asked him to address a meeting of his workmen, "There's only one subject—Life," and that's what he talked about mostly. Together with the inspiration of it there was mingled a wealth of anecdote, and all through it ran a vein of irrepressible humor, so that as entertainment strictly it was one of the most fascinating things that has ever been presented us. Alexander Cairns can be sure of a big audience if he ever visits us again.

The musical portion of the second day's program on Thursday was given by the Venetian Serenaders, a trio of sons of our own family, who in both the character of their music and their manner of making it, typified the light-hearted Latin. One of them was an artist (the word used advisedly) on the accordion. The other two played guitar, and had good voices for singing. Their music was popular, and took decidedly with the audience.

At the second part of the afternoon's program Miss Maud Willis read "The Fortune Hunters" with such a realistic presentation of the several characters that her hearers were not only not bored but the actual persons in the play as they made their exits and their entrances. It was an artistic and finished piece of work.

Percy Allen was the announced lecturer of the evening, but owing to delays in getting the slides which he was to use through the custom house, he was unable to present them, and a change was made by which there was substituted for him Harold Faber of England, and the other two played guitar, and had good voices for singing. Their music was popular, and took decidedly with the audience.

### Well-Made Sauces for Fish Dishes.

IF FRESH FISH IS USED BE SURE THAT IT IS FRESH.

Fish is not used as a food to the extent that it should be in this country nor to the extent that it is used in other countries. It is cheaper than meat because it requires less labor to produce and market it, and because fish consumes in their growth very little material which is available or useful in human food. Like meat, it is a protein food, and it well cooked it makes a nutritious and palatable dish.

Even though purchased dressed, fish should be carefully cleaned in the house. After cleaning and washing wipe dry with a soft cloth and salt well before cooking. The addition of vinegar or lemon juice during the cooking is highly advisable when it is baked or broiled. Because they contain less of the so-called extractives which give flavor to pork, beef, and mutton, fish are likely to be somewhat insipid. For this reason extra care should be used in the selection of the other food to be served with it. Have it either very highly flavored or so mild in flavor that the flavor of the fish will not be obscured. Sauces of various types are acceptable with fish, especially when it is broiled or baked.

The following sauces are recommended as desirable to serve with fish. The first two recipes were tested in the experimental kitchen of the Department of Agriculture. The others are selected from a bulletin published by the Indiana Agricultural College.

**EGG SAUCE**  
1 cup milk  
1 tablespoon fat  
1-2 teaspoon salt  
1-4 tablespoon cornstarch  
Moisten the cornstarch in a small amount of cold liquid and add to the heated milk. Cook together in a double boiler. Hard cooked egg, chopped fine, is added.

**TOMATO SAUCE**  
1 cup strained tomato  
1 tablespoon fat  
1 slice onion  
Salt and pepper to taste  
1 tablespoon cornstarch  
Put the tomato through a sieve. Moisten the cornstarch and add to the heated and strained tomato. Seal the onion in the sauce, removing it before the sauce is served.

**MUSTARD SAUCE**  
3-4 cup vinegar  
1-4 cup water  
1-2 tablespoon cornstarch  
1 teaspoon ground mustard  
2 teaspoon salt  
1-2 teaspoon fat  
Two tablespoons of finely chopped pickle may be added.

**MAITRE D'HOTEL SAUCE**  
Cream together—  
3 tablespoons butter  
1 tablespoon lemon juice  
1-2 teaspoon salt  
1 tablespoon finely chopped parsley (if desired)  
This sauce resembles soft butter and is to be spread on the hot fish so the fat will be melted.

**CUCUMBER SAUCE**  
1 cucumber, grated  
1-2 cup whipping cream  
3 tablespoons lemon juice or mild vinegar  
1-4 teaspoon salt  
Beat the cream until stiff. Add the acid and salt slowly and then fold in the grated cucumber.

**HORSE RADISH SAUCE**  
3 tablespoons horse radish  
1 tablespoon vinegar  
4 tablespoons heavy cream beaten stiff  
1-4 teaspoon salt  
Mix the first three ingredients and then add the beaten cream.

**Lack of Sugar No Excuse.**

HALF THE BATTLE IN CANNING IS TO HAVE EVERYTHING READY.

Fruits can be successfully canned without sugar, and vegetables require none. So, the wise housekeeper is planning to can as much or more than usual this year. Plenty of canned vegetables reduce grocery and doctor's bills and add pleasing variety to the diet in winter. Fruit canned without sweetening can be sweetened when it is used. Fruit juices, too, can be canned without sugar. In fact, many people prefer to can them unsweetened, maintaining that the individual flavors are thereby best preserved. Part of the canned juices can be made into jelly next winter. Making jelly when the weather is cool rather than when the mercury lingers in the 90's appeals to many housewives as a sane and sensible procedure.

**GETTING READY**  
If one waits until the fruit is half ripe before making any preparation to take care of it, there is loss of time, and the season of that particular product is likely to pass before all the equipment of canning is in readiness.

One of the first steps is to order a canner. If you are planning to use one this summer, a wash boiler or large can with a false bottom will hold the cans and process them efficiently. The work, however, can be done more easily with one of the commercial types of canners. As the stock is usually low when the canning season is under way, it is well to select the kind you want in advance when there is a choice. The steam-pressure type is usually preferred for general canning, but the water seal and water bath are both popular with those who want a canner which costs less money. If jars are needed, a supply should be laid in early. The tops of both the old and new jars should be gone over carefully and all the rough edges smoothed down with a knife. There is no danger then that they will cut the rubber. This is something that can be gotten out of the way before the season opens.

**TEST RUBBERS CAREFULLY**  
One of the make of rubbers which is to be used should be tested. A good rubber—one that will stand up under the heat which long cooking in the can entails—must possess elasticity enough to allow it being folded and pinched without breaking, say causing specialists of the United States Department of Agriculture. Another test is its ability to hold 13 pounds' weight without breaking when this weight is suspended by a hook from the rubber ring.

Whatever type of apparatus is used for processing or sterilizing, a number of utensils are needed for properly handling the products. These include five or six good porcelain plates or bowls of some other material that is acid proof, with covers for use in handling and blanching acid fruits, two tablespoons, one set of measuring spoons, one wire basket or several yards of cheesecloth for use in blanching, six wiping cloths, two hand towels, one duplex fork for lifting hot jars, and several sharp peeling knives. Look over your supply and see if you have them in stock.

**Preserve Vegetables for Winter Use.**  
Green string beans must be picked when young. Put a layer three inches deep in a small wooden keg, sprinkle with salt an inch deep, then beans and lay in alternate layers until you have enough. Cover with a board. When wanted for use soak them a night in plenty of water, then cut them and boil in salt water. Carrots, beans, beets, parsnips, and potatoes keep best in dry sand or earth in a cellar. Turnips keep best on a cellar floor. When sprouts come up on potatoes or other stored vegetables they should be carefully cut off. Celery may be kept all winter by setting it in boxes filled with earth. Keep it in cellar. It will grow and whiten in the dark; beets may also be kept in this way. Cabbages set out in earth in a good cellar will keep good and fresh until late in the season. Celery and beets are to be strong and hung in a dry place.

German Official Helpless in the Absence of Orders.

Burgemeister's Case Typical of the Lack of Initiative Resulting From the System of Militarism So Long in Vogue.

The burgemeister of B—am Rhein was a person who looked like a white rat that had been thoroughly soaked and shaved. And he had the faculty, which all Germans have, of congealing his cords and muscles at a moment's notice, and could assume the rigor of an epileptic in the presence of superiors. To watch him slide into your office, unconvulsed, every you, and suddenly straighten himself up in obedience to an unspoken Achtung, was an impressive experience.

The American general's aid, appointed to this particular suburb of Cologne, often wondered why the arrest of every radical person should be considered polite. He distrusted that German salute. It was too much like playing possum.

When the burgemeister came into the ortskommendantur, the aid told him that, in so far as he behaved himself, he would have nothing to fear from the American army, and that in so far as it didn't interfere with the satisfaction of American interests, he was to continue governing the town as usual.

The burgemeister stiffened himself and withdrew.

The aid was pleased. His first official act, he felt, had been kindly, yet firm, just but not harsh. If he had his way, B— would not suffer as northern France had suffered. He was going to show these boches that the Americans weren't there to terrorize, or to Americanize the town, but to liberate it from the tyranny of the armistice.

But he could not see the scene in the burgemeister's office overheard—the holding of cheeks in hands, the striking of chests, the weary and rapid breathing of bewilderment, the groans of despair. And the next morning, when he went to the ortskommendantur, he was met by a request that he grant an audience to his German colleague. It was 10 o'clock, the exact hour of yesterday's meeting.

He granted the request, and in a moment the shaved rat slid in through a slit in the open door and ran his tongue over his pink lips. His little black eyes shone like shoe buttons, and he kept scratching the palms of his hands.

He wanted to know if the Herr Oberleutnant had any orders for him. The Herr Oberleutnant wanted to know why.

"Ach!" cried the burgemeister, "before the American came we had government. Now we had none. How, then, can I run the town of B— as I used to run it? There is no one to tell me what to do. If only the Herr Oberleutnant would express his wishes!"

The aid narrowed his eyes and looked at him in disgust.

"Here the streets cleaned," he said, and turned to his desk.

The face of the burgemeister was radiant. He had found a boss.

In less than thirty minutes a platoon of boches was assembled in the street before the ortskommendantur. Every other man carried a broom at right angles to the arm and the man at his side a shovel. The burgemeister stood on the steps of the building, with a pencil in one hand and a long list in the other, and checked off their names.

Then, "Hup!" said the burgemeister.

Out of the ranks jumped four men, saluted, and faced the platoon.

"Hup!" said the first of the four; and a little squad of brooms and shovels faced to the right and marched off briskly northward.

"Hup!" said the second of the four; and another little squad trotted off to the east.

"Hup!" said the third, and "Hup!" said the fourth, and soon all points of the compass had received their squads. And the voice of the zefreite was heard in the land. Clouds of dust hung over B—am Rhein, shovels clanged, the cobblestones, brooms, and the roadways. The town was being cleaned.

The burgemeister stepped into the burgemeister's office and fished his pencil three times into his right ear. "So-o-o," he said with pride and satisfaction.
