Here and There.

Among the centennial celebrations

which occur this year is that of the birth

of Jonnie Lind, first operatic singer of

note to appear in the new country of

America. She was born October 8,

1820, in Stockholm. Her career in

America was in 1850, and in this cen-

tenial it is that appearance which counts

so far as America is concerned. The

program which was given on her first

appearance is being reproduced in New

York this year, Frida Hempel taking the

part sung by "the Swedish nightingale"

in a gown worn by that singer. She

was toured by that eccentric showman,

P. T. Barnum, and he received fully as

much glory as did the diva. Being the

first human bird to visit us, she is sur-

rounded by a halo of romance, different

from later singers, and is one of "the

Angels Ever Bright and Fair," of which

she sang; but it seems she was a

"cranky" as any other operatic singer, and

canceled her contract whenever the

fancy seized her; but she says in a let-

ter to a friend, she "parted amicably"

with Barnum.

It seems incubators are to be used

to raise a new kind of baby—that of the

oyster. As everybody knows the oyster

crop grows smaller each year until it has

arrived in the luxury class, and this

effort is being made to increase the size

of the crop. Experiments in raising

oysters by the incubator method have

been conducted in a laboratory in East

Saville, Long Island, for some time by

W. F. Wells, biologist, and he now has

thousands of baby oysters sitting around

on the half shell, and it is thought the

experiment is a success.

Many people think there are no di-

mond mines in the United States, but

there are. There is one in Arkansas,

discovered in 1908, from which five hun-

dred diamonds have been taken. One

of them weighed eighteen and three-

fourths karats. It was sold for one hun-

dred dollars a karat. This sounds rich,

but the owners say it is not. They were

paid. They are now putting in machin-

ery to wash the earth in order to find

out whether they are to lose the saddle

or win the horse.

John and Frances Ebron of Chicago

take the cake as the most married, most

divorced, most quarrelsome and most

forgetful couple on record. They began

getting married and fighting fifteen

years ago. Since that time they have

been divorced twice, married three and

separated ten times. These facts were

THE OXFORD BEARS.

THE DOINGS OF THE WEEK IN ALL SECTIONS OF THE COUNTY.

Paris Hill.

Services at Paris Hill Baptist church every

Sunday evening at 7:30. Thursday evening

prayer meeting at 7:30 o'clock.

Beginning this week Hamlin Memorial

Library will be open in Wednesday after-

noon and evening of each week.

The Paris Hill Library Association

holds its monthly business meeting Wed-

nesday, Oct. 6, at 8 P. M.

"Fair Day" was a big day but the next

community day is to be the biggest yet.

Look for further notice of the Maine

Day, Oct. 12, to be held on the common, com-

munity dinner for fire department, and

"Maine" program in afternoon.

Every one interested in the community

singing for Maine Day is asked to come

to Cummings Hall, Friday evening, Oct.

8th.

All ladies who will help about the

dinner on Oct. 12 are asked to meet at

the school house this Monday evening,

Oct. 4, at 8 o'clock.

Mrs. L. C. Ingraham has closed her

home and returned to Brook-

line, Mass.

Mrs. Melville Brown will close her home

here and start for New Jersey on Tues-

day. Mrs. Emma Hubbard goes with

Mrs. Brown as far as Bridgeport, Conn.

Mrs. Harriette H. Winslow and Miss

Mary Mitchell left here Saturday.

They go to Arlington, Mass. and Miss

Winslow plans to visit her brother in

Buffalo, N. Y.

Mr. and Mrs. William E. Atwood and

two sons came to Paris Hill Saturday

for a week, and are occupying the Brooks

cottage during their stay here.

Grant C. Royal picked a quantity of

fine blueberries on his farm in the Whit-

temore District last Saturday, October

3d.

At a meeting of the directors and the

entertainment committee of the Paris

Hill Country Club, held last Friday, it

was voted to authorize the entertain-

ment committee to construct the piazza

on the club house for which subscrip-

tions were made the past summer. The

work of construction is expected to be

completed this fall.

The Philaetha Class of the Paris Hill

church will hold a social in the Cum-

mings Hall Friday evening, to which all

are cordially invited. Admission free.

All are asked to bring a plate. All are

asked to also buy copies of the Maine

Day songs from Mrs. Edna Cummings

as they will be released some time dur-

ing the evening to be sung on the 12th

of October, and if any one has games or

songs please come prepared to play

them. We would like a variety this

time besides our usual songs.

The fair held Saturday at the school

house was a great success, and the com-

munity spirit was shown in the exhibi-

tion. It shows just what "a long pull, a

pull, and a pull all together" will do.

All did their part. The boys of the

school were a host in themselves, and

the girls, too, were a help. The girls

bringing the leaves, flowers and pine branches

for the decorations, and entering the

sports. The girls took their part too

with the same spirit as the boys.

Wm. H. Dyer of Jay died at the home

of his son, Hon. F. R. Dyer, here Tues-

day morning, after a brief illness at the

age of 74 years. He was a widower,

and F. R. Dyer is the sole surviving re-

lative. Mr. Dyer has been chief mill-

wright at the paper mill at Riley for

more than twenty years, with the loss

of only a few days' illness. Representa-

tives from the mill and company were

present at the funeral, which was held

from the home of F. R. Dyer Tuesday

morning. Rev. F. P. Dwyer officiating.

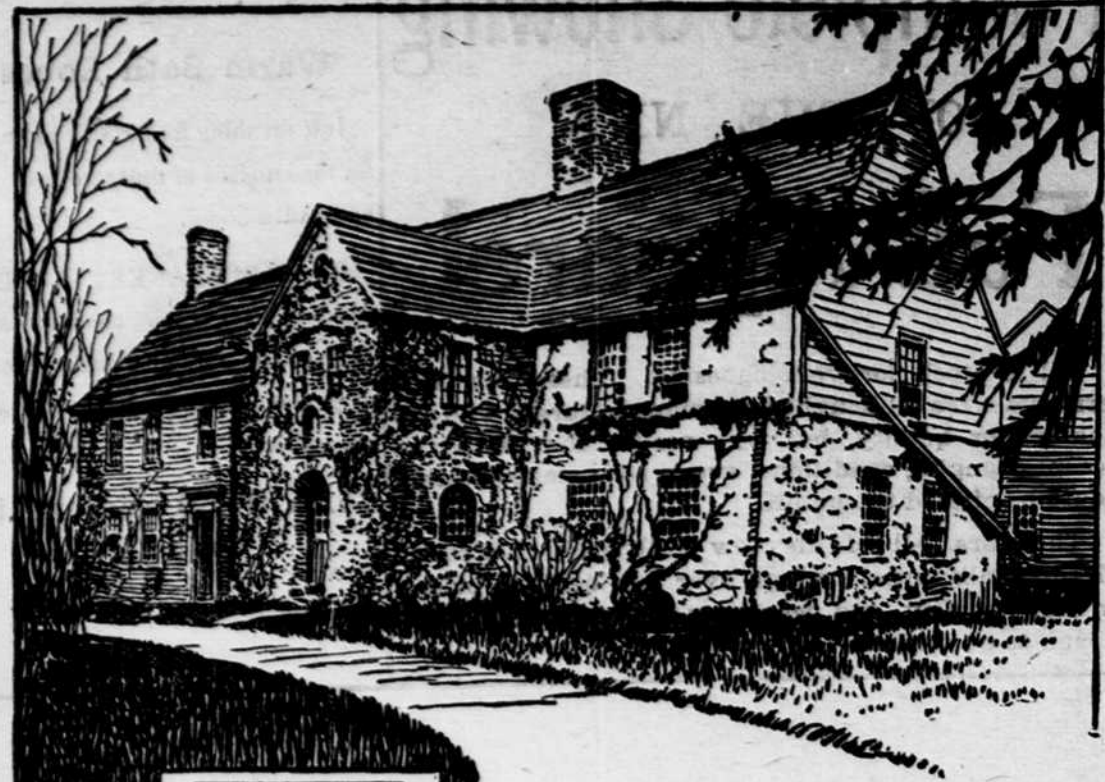

Burial was in the family lot at the vil-

lage cemetery. Mr. Dyer was a mem-

ber of Whitney Lodge of Masons and

Evergreen Chapter, O. E. S. of Canton.

HOMEMAHERS' COLUMN.

Correspondence on topics of interest to the ladies is solicited. Address: Editor, *HOMEMAHERS' COLUMN*, Oxford Democrat, South Paris, Me.

Things To Do in Frying Doughnuts.

RESULTS OF A SERIES OF EXPERIMENTS MADE IN EXPERIMENTAL KITCHEN.

If you are fond of doughnuts, but find that those you make at home become soaked with fat while frying, the following suggestions may be of help. They are the result of a series of experiments in the absorption of fat by fried batters and doughs carried on in the Experimental Kitchen of the United States Department of Agriculture.

A rich dough always absorbs more fat in frying than a plainer mixture. Unless you wish your doughnuts to be excessively rich, do not be too lavish with butter, sugar and eggs. The following recipe makes doughnuts which, if properly fried, are not so excessively rich as to be a menace to digestion.

PLAIN DOUGHNUTS.

1 cup sugar
1 tablespoon butter
2 eggs
1 cup milk
5 1/4 cups flour
4 tablespoons baking powder (level measurement)
1 teaspoon salt
1 teaspoon cinnamon
1/2 teaspoon nutmeg

A very soft dough absorbs more fat than a stiffer mixture, was another fact found through these experiments. Too much flour, however, makes a doughnut that is not so light and fluffy as is desirable. The addition of hot rice potatoes to the mixture makes a doughnut that is light and fluffy, but at the same time does not absorb much fat. Doughnuts made by this recipe are delicious when fresh, but also keep well.

POTATO DOUGHNUTS

1 1/2 cups of sugar
2 tablespoons butter
2 eggs
1/2 cup hot rice potatoes
2/3 cup milk
5 1/4 cups flour
4 tablespoons baking powder
1 teaspoon salt
1 teaspoon cinnamon
1/2 teaspoon nutmeg

Fry your doughnuts no longer than necessary. Frying doughnuts in fat that is not hot enough, or rolling and cutting them so that they are too thick to cook through in a short time, or failure on the part of the cook to judge when they are done, or any other cause that keeps them in the fat too long, tends to make them greasy.

Testing the temperature of the fat with a thermometer is the best method of frying doughnuts. Other methods, though sometimes successful, are uncertain. A temperature of 180° C., or 350° F., has been found satisfactory. Doughnuts rolled about 1 1/4 inch thick can usually be fried in 3 minutes at this temperature if they are turned to make them brown evenly; or they may be fried in 1 1/2 minutes if forced under the surface of the fat during frying.

FRYING WITH A BASKET

It was found that the use of some device to force the doughnuts under the surface of the fat was the most satisfactory method of frying. An ordinary wire frying basket with a ball and slightly smaller in diameter than the frying kettle can be used. When the doughnuts first rise to the surface of the fat, lower the empty basket over them and force them under the surface of the fat. Doughnuts fried by this method absorb less fat, brown evenly, and are much less apt to crack than when fried in the fat.

COWPEAS AS SUBSTITUTE FOR MEAT.

Cowpeas have a pleasing flavor as well as a high nutritive value. Dried cowpeas used for cooking should be soaked for 12 hours. As they are apt to ferment they should be kept in a cool place during the soaking period.

CREAM OF COWPEA SOUP

1 tablespoon butter
1 tablespoon flour
2 cups milk
1 teaspoon sugar
1 cup cooked cowpeas (green or dried)
A few drops onion juice
Salt

Melt the butter, add the flour, and cook thoroughly, being careful not to brown it. Add the milk and bring the mixture to the boiling point. Put the peas through a sieve; add peas and seasonings to the milk and reheat. If too thick, add milk or water. Serve as cream soup made by heating buttered bread in the oven until it is brown, and cutting it into small pieces.

HOPPING JOHN

Soak one quart of dried cowpeas overnight in water enough to cover. Cook until they are tender with one-half pound of salt pork sliced thin; add more water if necessary, and several slices of onion toward the close of the cooking process. Cook a pint of rice in three pints of water, mix the two, season with two tablespoons of butter and two teaspoons of salt. A beef bone may be used instead of the salt pork, but in that case the salt must be doubled and four tablespoons of butter may be added.

BAKED COWPEAS AND CHEESE

1 tablespoon butter
1/2 teaspoon finely chopped onion
1 tablespoon finely chopped sweet green pepper
2 cups cooked cowpeas
1/2 cup grated cheese

Press the peas through a sieve to remove the skins, and mix with the cheese. Cook the onion and pepper in the butter, being careful not to brown, and add them to the peas and cheese. Form the mixture into a roll, place on a buttered earthenware dish and cook in a moderate oven until brown, basting occasionally with butter and water. Serve hot or cold as a substitute for meat.

Prolonging the Life of Silk Garments.

With both wool and cotton high in price, silk is being used increasingly for both outer and under garments. Unless given careful treatment, the lifetime of a garment made from silk is shorter than one made from either wool or cotton.

The following suggestions for its care are made in a recent bulletin issued by the United States Department of Agriculture on the selection and care of clothing.

Silk garments should be brushed carefully with a piece of velvet or a very soft brush. Silk may be out or mended by too vigorous brushing. Spots may be removed in much the same way as from woolen garments. Silk garments may be dry-cleaned as to be used in a very careful to use gasoline or other inflammable fluids out of doors where there can be no risk of explosion; or it may be advisable to send them to a professional cleaner. Soda made of neutral white soap or soap chips and cold or lukewarm water should be used for washable silk garments. While silk shirts and waist waists in such and, rinsed in water of the same temperature, wrapped in a bath towel to absorb the extra moisture, and then pressed with a warm iron, will not turn yellow for a long time. Avoid exposure to strong light while drying, and really hot iron, for both tend to turn white silk yellow.

Silk must be pressed carefully; in fact, iron should be used on it as little as possible during either making or wear.

The dressing in new silk socks and stockings tends to break the threads; they should be washed out before they are worn.

Wrinkles may sometimes be removed from a silk dress by hanging it over a bathtub filled with water hot enough to steam; then dry it where nothing will touch it.

The more properly and regularly all refuse of the household is harmlessly disposed of the better for the healthfulness and comfort of the home.

JUNIOR RED CROSS

WORKING AT HOME

Production of Sound American Citizenship the First Aim, Says Dr. Farrand.

On the badge of every member of the Junior Red Cross are the words "I Serve." That tells the story of the school children's branch of the American Red Cross and its efforts to bring happiness to children throughout the world.

Realizing that the time never was so propitious as right now for teaching the highest ideals of citizenship, the entire present program of the Junior Red Cross has been framed under the very inclusive phrase, "Training for Citizenship Through Service."

Since the Junior Red Cross is the agency through which the American Red Cross reaches the schoolboys and the schoolgirls, all its activities are designed to come within the regular school program, and without creating new courses or increasing the number of studies to lend its aid in vitalizing the work of the schools.

"The thing that is needed," says Dr. Livingston Farrand, Chairman of the American Red Cross Central Committee, "is not a perpetuation of the Junior Red Cross, but the training and breeding of sound American citizenship inspired by the true, fundamental ideals of sound democracy. One of the great conceptions in making the Red Cross a contributor to better citizenship in our American democracy is the realization that after all the sole hope of any nation is with the children of the country."

The plan of organization of the Junior Red Cross makes the school—public, parochial and private—the unit, not the individual pupils. Mutual service, helpful community work such as clean-up campaigns, care of the sick, promotion of health regulations, participation in civic and patriotic movements—all these creative agencies designed to translate into life and action the regular school program are parts of the machinery which the Junior Red Cross places at the disposal of the school authorities.

Graded study courses giving practical methods of civic training, supplemented by pamphlets and helpful suggestions, are supplied to the local schools by the Junior Red Cross. An elaborate plan for promoting an interchange of correspondence between children in different sections of the United States as well as with children in foreign lands is being devised and will take a prominent place in the established classroom program.

In promoting the general cause of child welfare, Red Cross courses in home hygiene and care of the sick, first aid, and dieting may be established in all Junior Red Cross Auxiliaries.

The ideals and the objective of the Junior Red Cross are embodied in the pledge of service which the pupil takes when he signs the membership roll and pins on his coat the Junior's badge. The pledge which binds together service and citizenship reads:

"We will seek in all ways to live up to the ideals of the Junior Red Cross and devote ourselves to its service."

"We will strive never to bring discredit to this, our country, by any unworthy act."

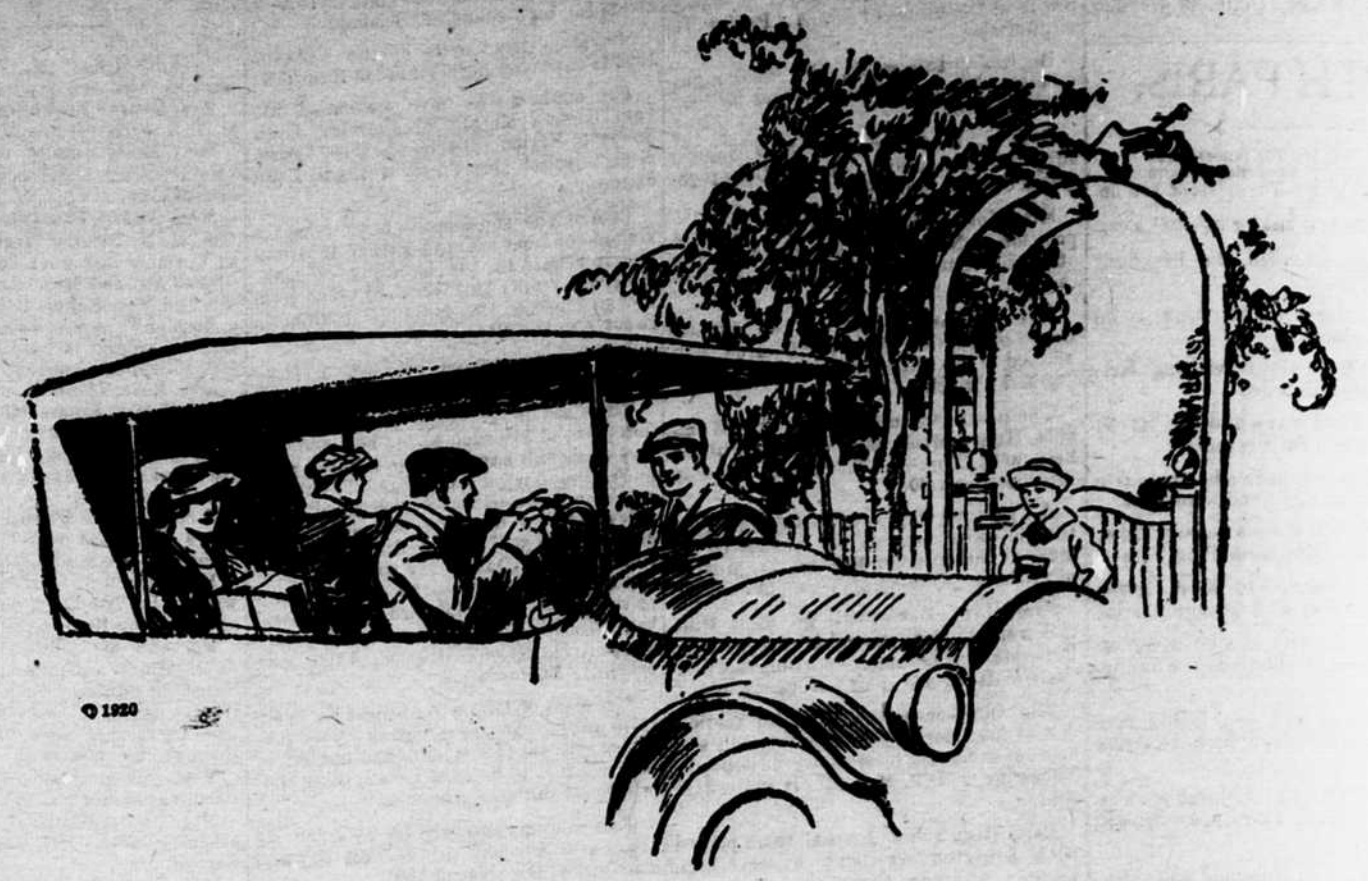

"We will reverse and obey our country's laws and do our best to inspire a like reverence and obedience in those about us."

"We will endeavor in all these ways, as good citizens, to transmit America greater, better and more beautiful than she was transmitted to us."

At the foundation of this school program of the Junior Red Cross is a great love for America's children.

Biddy's Logic.

Misses (after absence)—It's no use, Bridget, you've worn one of my new skirts and you can't get out of it. Bridget—Begorry, mum, if that's so O'D be wearin' it this mornin', wouldn't it?—Boston Transcript.

Nobody thinks anything now of going away on a trip

THE railroads were partly responsible. But it wasn't until the automobile reached its present state of development that the old barriers against travel were finally broken down.

More people own automobiles today than ever thought of owning a horse and buggy in the old days.

That's because the cost of motoring has been brought within reach of the average citizen's pocketbook.

We look upon it as part of our job to keep it there. If it weren't for the trade of the man with the medium priced car there wouldn't be

much in this tire business for us.

The less a man has to spend on motoring, the more important it is that his tires should be of first quality.

Any tire is not good enough for the small car owner. He wants a tire that will give him just as much for his money in the small size as the big car man gets for his money in the large size.

In thinking over what kind of tires we would represent in this community we tried to put ourselves in the place of the car owner. And we believe we hit it exactly when we selected U. S. Tires.

Who Wants an Imitation?

WOULD you call on your local merchant and ask him for "imitation" sugar, or raisins, or coffee? Would you ask him to sell you a pair of shoes made of something "just as good" as leather? Or a suit of clothes "made for" a man, whether or not it fits you?

Get the Genuine International Repairs

When you need repairs for your IHC Farm Equipment, buy the genuine repairs. See that this trade-mark appears on each piece.

Genuine IHC repairs are made from the original patterns—all others are copied from copies. Genuine IHC repairs are made of the same material, have the same finish, fit as accurately, and wear just as long as similar parts purchased with the original implement or machine.

We are the Authorized IHC Dealers

There is one certain and infallible way to secure genuine IHC repairs—buy them from us. And remember that International service, rendered by us, can only be 100 per cent right when International machines are equipped with genuine International repairs.

Losing pay

on account of colds and disorders that could be avoided. Loss of time and money are lost because of needless ill. Whenever you are out in wet weather, or have headaches, or are at all susceptible to a good dose of "L.F." Atwood's Medicine taken immediately, will safeguard your health and prevent serious illness from developing. Don't wait until you begin to notice bad effects but use it whenever there is the slightest symptom of trouble. It can't do any harm, and will aid your digestion at all times.

After a short time you will be pleasantly surprised with your general condition. With your stomach, liver and other organs working properly all the time, you will take a greater interest in your work, your blood will be purer, and you will be less tired at night after a hard day's work.

The man who advises you to invest to develop Maine water power is surely advising you for your own best interests.

He is advising you for the State's best interests—and thus in the long run, for his own best interests.

He knows, and you know, that the future of Maine is bound up with the development of Maine power.

He may know of plenty of Western and Southern power companies that are bidding high for Maine's investment money. Yet he knows that your future and Maine's future will be brighter and that in the long run you will be richer through an investment in Maine power.

The premier Maine Power investment is Central Maine Power Company 7 per cent. Preferred Stock. The price is \$107.50 a share—the yield is 6 1/2 per cent. net. Will not this investment in Maine prosperity pay you better in the long run than some investment to build the South or West?
