The August Clean-up Sale

Offers Great Saving Opportunities on all Summer Apparel and Quantities of Seasonable Merchandise

Those who failed to take advantage of the Dollar Day sale, or that failed to get waited on during the rush of the day, can come now with the assurance that decidedly worth while advantages will be presented in all departments at this time and during our August Clean-up.

Summer Coats and Suits

Hardly any that we have left that are priced more than half their value, and for some of them less than half price is asked.

SILK WOOL SERGE and TRICOTINE DRESSES now priced at about half their former prices and for some of them not half price is asked.

CHEVY CHASE DRESSES. Another lot of that popular style dress made of fine wool jersey, assorted sizes and colors, at the special low price of \$4.98 each.

WHITE WASH SKIRTS, all we have left made of surt satin, gabardine and pique marked at just one-half price.

WHITE DRESSES, ladies', misses' and children's white dresses that we have left now at one-half price.

LINGERIE WAISTS, our entire stock at greatly reduced prices, meaning a saving to you of 50c to \$2.00 on a waist and all this season's new goods.

WASH DRESSES, new dresses this season, not all sizes, but a good assortment at not more than half and many of them less than half price. See \$11.25 and \$12.90 white dresses at only \$4.75 each.

MIDDY BLOUSES. All of our cotton and serge blouses go in at quick clean-up prices.

SWEATERS. Our entire stock of popular style sweaters now priced at 1-4 to 1-3 less than their value.

CHILDREN'S GINGHAM DRESSES and ROMPERS are now priced at 1-4 to 1-3 off on balance of our stock.

KIMONA and POLYPRIM APRONS, we have gone through this stock and put lower prices on every one of them. See special Kimona Aprons at 89c and \$1.00 each.

A determined effort to make this sale of great importance by driving prices down to the lowest possible level, not only on seasonable Summer Merchandise, but also on many every day household needs, such as

COTTONS, BEDDING, TOWELS, TABLE DAMASK, ETC.

A Royal Show.

Our Oxford County people, who are in-

terested in the exhibition soon to come

off on the grounds between South Paris

and Norway may be interested in the

show in England. Thomas Reese

has reported the show at Derby, a part

of which is given below.

The annual show of the British Royal

Agricultural Society was held this year

at Derby and it was again successful.

The attendance in the five days of the

show was 118,000, in a thousand less

than the attendance for the four days

when the show was last held at Derby in

1906. The miners' strike accounts for

this falling off in the same season.

One of the most interesting features of

the show was the fact that ten shill-

ings, or at the present rate of exchange

two dollars, was charged for admission

to the show. This was the highest price

double the highest figure ever before

charged. The charge for the second and

third day was also higher than before,

and the fourth day was normal. One

of the most picturesque people attending

the show was the Amir of Katana, Ni-

geria, in turban of white and red and

of embroidered black velvet lined

with rose pink silk, attended by a war-

rior of six similarly habited.

The most important event of the final

day was the announcement of the results

of the milk yields and butter tests for

dairy cattle and goats. The animals

competing were milked at five o'clock

on Wednesday morning and the results

showing the highest yield during the

twenty four hours ending at five o'clock

on Friday evening, with an allowance

of 100 pounds for the loss of time during

the milking. The animals had been in

the milk shed in the morning and their

last milking was at five o'clock.

The prize for cows exceeding 900 pounds live

weight, first prize was awarded to R.

W. B. of Devon, Jersey Cows, weighing

1,043 pounds, who had been 82 days in

milk and gave 8 pounds, 11 ounces of

butter from 90 pounds of milk; Walter

of Devon, Jersey Cows, weighing

977 pounds, who had been 82 days in

milk and gave 8 pounds, 2 ounces, 1-4

ounces of butter from 60.8 pounds of

milk.

The gold, silver, and bronze medals of

the English Jersey Cattle Society for the

three animals of the Jersey breed yield-

ing the highest points in the butter tests

for the 24 hours were awarded respect-

ively to Mr. W. B. of Devon, Mr. E.

W. of Devon, Jersey Cows, and Mr. E.

From Maine to Mississippi and Back.

A TRIP MADE BY A. B. GABRIELSON AND

FAMILY, SOUTH PARIS, AS RELATED

BY MISS HELEN S. GABRIELSON.

It has been suggested that it might be

interesting to the readers of this paper

to have an account of the auto trip of

4000 miles (4,200 miles, to be exact)

which we took recently, going to Hasi-

lunk, Mississippi, and returning.

In order that our two children might

have the opportunity of seeing as much

of their wonderful country as possible,

we planned to travel south by one route

and back by another.

We were not at all superstitious, for

we left on the thirteenth of June. Never-

theless, the day of departure seemed to

hold a very special significance for us

as we were to spend the first day of our

trip in the city of New Orleans, where

we had a camping outfit with us, con-

sisting of a tent designed to be attached

to the side of the auto, and army cots

that folded into small compact units

which we packed up and covered with

black oilcloth, were attached to the

running board, and looked neat and not

conspicuous.

At New Orleans we made a stop of thirty-

six hours, not only to permit of sight-

seeing but to have the car overhauled

and to make preparation for the long

trip that lay ahead.

Sixty miles west of Boston, at historic

old Brookfield, we spent a day and night

with relatives. The day of departure

from Brookfield was the thirteenth of

June. The day of departure from New

Jersey to Princeton, where we were

camped out for the night, was the

fourteenth of June. The day of depart-

ure from Princeton to New Haven, where

we were to spend a day or so with

friends, was the fifteenth of June. The

day of departure from New Haven to

Stamford, Conn., where we were to

spend a day or so with friends, was

the sixteenth of June. The day of

departure from Stamford to New York

City, where we were to spend a day or

so with friends, was the seventeenth

of June. The day of departure from

New York City to New Orleans, where

we were to spend a day or so with

friends, was the eighteenth of June.

The day of departure from New Orleans

to Hasi-lunk, Mississippi, was the

nineteenth of June. The day of

departure from Hasi-lunk to New

Central Maine Power Company Forges Steadily Forward

CENTRAL MAINE POWER COMPANY is still growing.

Maine industries and Maine homes constantly need more electrical energy and need it in new places. To meet these growing needs of the people we serve, Central Maine Power Company purposes to take the following steps:

1. To build the North Channel Dam at Skowhegan and thus to increase the present output of the Skowhegan plant 33 1-3 per cent, and bring it up to the output for which it was designed.
2. To complete the line from Skowhegan to Guilford and thus give to the homes and industries in the northern part of our territory uninterrupted service.
3. To run extensions to some of the many communities adjacent to our lines which desire Central Maine Power Company service.

The financing of this work and the complete cleaning up of its short time notes will put the Company in a position to take fullest advantage of opportunities as they arise. This financing makes it possible to offer to the people of Maine through the next 25 weeks approximately \$1,000,000 of its 7 per cent. Preferred Stock.

The price of this stock is \$107.50 a share, the yield is 6 1-2 per cent net.

Central Maine Power Co.,

(of which the Oxford Electric Co. is a part)

Augusta, Maine.

J. E. Kingsley Hotel Andrews, South Paris, Representative.

Reduced Prices on I H C Farm Machines

REDUCED prices recently announced by the International Harvester Company of America on its entire line of farm machinery, places us in a position where we can offer corresponding reductions on I H C farm-operating equipment.

We believe our customers will see the wisdom of placing orders now at the reduced prices for such machines as they will need in the near future. The reduced prices, coming at this particular time, enable you to secure planters, cultivators, haying and harvesting machinery at prices that we could not quote earlier in the year.

We know that it is a serious problem for the farmer as to whether he should buy new and modern machinery, either of the same or greater capacity than that which he is now using, or whether he should make another attempt to put in as good repair as he possibly can his old machinery.

To those in doubt, we offer the following suggestion: List all the repairs which you need for old machines, keeping the list for each machine separate, then bring the lists to us. We will give you an estimate of the cost of these repairs, and you can then determine the best course to pursue.

Look at this subject from different angles—

1st. Will the repairs which you may buy now actually put your machines in good order, and will these repaired machines perform their work in a satisfactory manner?

2nd. Will the cost of repairs which may add only a year's additional life to an old machine be justified? If you will need a new machine next season, perhaps the cost of the repairs now will be out of proportion to the service or life which they will add to the machine.

And finally, if you contemplate the purchase of a new farm-operating equipment, we want to impress two important thoughts upon your mind: The quality, efficiency and capacity of the International Harvester lines, and the value to you of I H C Repair Service, which is prompt, dependable and continuous.

just sick

Not quite ready to give up but very near it. The cheapest and best plan when you feel this way is to "give up" for a day or two, stay in the house, keep quiet, eat lightly of simple food and take a mild laxative that will BEACH THE LIVER. You may have a favorite pill or tablet, but don't overlook the fact that NOW you need a prescription to give you RELIEF—A tonic for the vital organs to assure good digestion, pure blood and natural action of the bowels and kidneys. We recommend "L. P." Medicine because it has helped so many. 50 doses for 50 cents. "L. P." Medicine Co., Portland, Me.

FOR SALE

A. L. MORSE, South Paris.

HOMEMAKERS' COLUMN.

Correspondence on topics of interest to the ladies is solicited. Address: **HOMEMAKERS' COLUMN**, Oxford Democrat, South Paris, Me.

Breakfast, Luncheon and Dinner.
Fruit may be served at every breakfast, but do not serve acid fruits, like oranges and grapes, when a cereal is served.
Serve plain foods, simply cooked.
Serve home-cooked, coarse cereals with eggs.
Serve baked potatoes with creamed fish.
Serve creamed potatoes with smoked fish and lamb chops.
Serve nuts and dates, or figs, with cereal, in place of meat.
Do not serve elaborate made dishes for breakfast.

Use left-overs for luncheon.
Serve a soup with waffles or griddle cakes. It will be luxurious in some families, for the waffles are even better than at breakfast.
Or serve a made meat dish, a salad, and a dessert.
Serve macaroni with egg, meat, fish, or shell fish salad. Also with the more delicate vegetable salads, as tomato, asparagus or celery.
Serve a boiled salad dressing with vegetable salads.
Serve French dressing with all green salads.
Serve plain lemon with all fat fish, as salmon, herring, mackerel, or a green salad with French dressing.
Serve a rich butter sauce or Hollandaise with the white fish, like halibut, haddock and smelts.
Tomatoes may be served with fish in place of lemon.

For dinner serve a clear soup, meat, potatoes, or a starchy vegetable, like rice or hominy, a green vegetable and dessert. Or meat, potatoes, or a substitute, a salad and dessert. Or a cream soup, a made dish of meat and potatoes, and dessert.
With roast meat, serve potatoes mashed, or roasted in the pan with the meat.
With broiled meats, serve baked potatoes.

Meat and Fish Comparison.

Meat is the general term applied to the parts of animals used for food. It includes the muscular flesh, sinews, fat, heart, liver, stomach, sweetbreads, brain and tongue. Meat is one of the nitrogenous foods and is made up of four elements, nitrogen, carbon, hydrogen and oxygen, combined with some mineral matter and a large percentage of water. Fish is similar to meat in composition and belongs to the nitrogenous class of foods. The strength-giving substances are the same as in meat, albumin, myosin and fibrin. They are made up of the four elements, nitrogen, hydrogen, oxygen, and carbon. The cooking temperature is the same as for meat and eggs, 160° F. to 180° F. Fish, on account of its abundance, cheapness and wholesomeness is invaluable as an article of food. It is less nutritious and less stimulating than meat, because it contains less solid matter and more water. As it contains little fat it is easily digested, the white varieties particularly, and having a large proportion of nitrogenous material, it is especially useful to those upon whom there are demands for nervous energy. The idea that fish has special value as a brain food is erroneous. The latest authorities state that there is no evidence to prove that fish is any richer than meat in phosphorus.

Fish is not only nutritious and wholesome as food, but it affords variety so essential in any dietary.

To Boil a Breast of Veal.

Put from two to three pounds of the thick part of the breast of veal in salt and water for fifteen minutes and then wash in clear water. Pour over enough hot water to cover the meat in the saucepan; let come to the boil, skim, and then add six peppercorns and a half teaspoonful of salt. Let simmer gently one hour and a half. Remove the judicious management of the heat, for if allowed to boil hard, the meat will be tough and indigestible. Mix a tablespoonful of flour with a little water and a teaspoonful of gravy from the veal, putting a pinch of salt and a dash of pepper in the flour before mixing. Put the meat on a hot platter. Then pour the thickening into the saucepan. Stir and boil ten minutes to cook the flour; add a teaspoonful of chopped parsley and pour over the meat. Serve with plain boiled potatoes, mashed white turnips, and red currant jelly. This dish will be equal to a boiled fowl and far more economical.

To Fry Bacon.

Use a thick, or what is called a well-seasoned, frying pan. Put the slices of bacon in the cold pan and set over a low fire until cool, pour off the fat and set aside, not mixing it with other frying fats, for it is best kept separate for cooking eggs and frying slices of Graham bread. Put some of the slices of bacon back into the pan to crisp, for those who like it that way, and toss about.

Buttermilk Lemonade, Whey Punch.

Buttermilk lemonade can be made by adding to each glass of buttermilk two tablespoonfuls of lemon juice and one or more tablespoonfuls of sugar. The whey from cheese making may be utilized in a beverage as well as buttermilk.

WHEY LEMONADE AND PUNCH

1 quart whey
6 tablespoonful sugar
Juice of 2 lemons
Slices of lemon or a little grated or sliced rind, nutmeg, or cinnamon
Milk, chili, and serve as a beverage.
Variations: Double the quantity of lemon juice and of sugar, and add other fruit juices and a little fruit cut in small pieces. This transforms whey lemonade into whey punch. Set the punch away to chill and ripe; serve with crushed ice if desired. Rhubarb, pineapple, grape, currant, and cherry juices, and themselves well to whey punch. A sprig of freshly crushed mint is sometimes added. Nutmeg or cinnamon will overcome any characteristic whey flavor. Whey punch may be frozen if desired.

Juicy Pies Without Soggy Crust.

A berry pie with an edible undercrust has always been a problem to the housekeeper, however expert she may be in her pastry cooking. Specialists in the United States Department of Agriculture say that the secret of turning out a juicy pie with a crisp undercrust, lies in baking the undercrust first until it is barely browned. If overbaked, it will be too dark brown when the filling is added; if underbaked, it will be doughy. The crust should also be thoroughly pricked with a fork to prevent blistering. In the case of very juicy fruits such as dewberries, the fruit should be cooked first and part of the juice removed before the thickening and sugar are added. After the fruit is put in the shell and the edges mashed, the top crust is added and carefully tucked in, the pie is baked in the ordinary way.

Delicious Homemade Fruit Pastes.

Fruit pastes are made from the edible portion of fruit which after cooking has been passed through a sieve and cooked again until the excess water is driven off. Only a small amount of sugar is required. A combination of different kinds of fruit pulp makes a delightfully flavored paste, but peaches alone make a delicious one. Coarsely fruit can also be used to make paste. When the pulp is boiled down until very thick, pour it in 1-2 inch layers on marble or glass slabs or on a platter. Place where there is a strong circulation of air and allow the paste to dry for two or three days. When it is sufficiently dry, cut it into sugar and place again in the draft. Paste may be packed in tin boxes, glass jars, or paraffin-coated containers.

Foamy Sauce.

Beat one egg and one cup of sugar together. Add a pinch of butter the size of an egg to one-third a cup of scalded milk. Pour this over the beaten egg and sugar and beat until it foams. Flavor it with vanilla.

A TWICE-TOLD TALE
—
One of Interest to Our Readers.

Good news bears repeating, and when it is confirmed after a long lapse of time, even if we hesitated to believe it at first hearing, we feel secure in accepting the truth now. The following experience of a South Paris man is confirmed after four years.

Charles R. Dunham, 19 Pleasant Street, South Paris, says: "I have suffered very much from cystitis. The kidney secretions were painful in passage and deposited a heavy sediment. Resulting my kidneys and bladder were congested, I got Doan's Kidney Pills at the Howard Drug Company, after reading of them. Doan's relieved the congestion, inflammation and regulated and strengthened my kidneys. I have used Doan's Kidney Pills off and on ever since as needed and find I can always depend on them for relief." (Statement given June 6, 1916.) On September 6, 1920, Mr. Dunham added: "Since I used Doan's Kidney Pills I have had no further trouble from my kidneys; in fact, my kidneys have been acting healthy and normally. My general health picked up wonderfully, recommended this remedy at the time my cure was made, and what I said then I confirm to-day." Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Dunham had. **Worcester-Milburn Co., Mfrs., Buffalo, N. Y.**

HILLS

Registered and
Optometrist Optician

Eyes examined, glasses fitted, adjusted and repaired. Thirty-four years fitting glasses in Norway. We can duplicate your broken lens no matter who fitted you. Everything optical. No fancy prices. Toric lenses cost but few cents extra. Did you ever stop to think that a first class Optician, Optometrist, or Oculist will not have to travel from town to town, house to house, fitting glasses? Take no chances on your eyes. See me about your eyes—it's the wise thing to do. No drops or dangerous drugs used in the examination of the eye. Office Hours: 9:30 to 12:30—1:30 to 5 P. M. Monday and Saturday evenings. Other hours by appointment. Office phone 120-2; Residence phone 207-3.

185 Main Street,
Opera House Block, Norway, Maine.
Look for the "Clock in the steeple."
