NORWAY.

The Baptist Ladies' Aid will meet with Mrs. H. W. Dennison Friday. An all day meeting with covered dish dinner.

The December meeting of the Ladies' Aid of the Baptist church will be held at the home of Mrs. Harry Morton Thursday, Dec. 1, at 2:30 P. M.

A very hot chimney fire at the home of A. J. Dumas on High Street at 10:30 Sunday night was the occasion for a still alarm, but no damage was done.

Mrs. George Cull and Miss Grace Cull of Cumberland Mills and Misses McPherson of Portland were guests Saturday of Mr. and Mrs. Sherman Ordway, coming by auto.

Well, we can soon have the pleasure of bidding good-bye to the snowy and sunless November. Barely does the month give us so much snow, and as far as sunshine goes, it seems as if we have hardly had ten hours of it in four weeks.

The Mt. Pleasant Past Grand Association don't want to forget the covered dish supper at the home of the present Mrs. Park, Tuesday of this week, the 29th. All are present and bring something in a covered dish.

Considering the state of the road, the Paris Manufacturing Co. delivery truck made a good trip Saturday night, with a heavy load of fire hose and equipment and men, when Andrew Eastman drove the long eight miles to West Paris in fifteen minutes. During the war Andrew used to drive an airplane at a speed considerably above this, but the road was a good deal smoother than what he went over Saturday night.

One of the genuine surprise parties of the season was the one given Mr. and Mrs. A. D. Park at their home last Tuesday evening. The occasion was the birthday of Mr. Park, which occurred the day previous. On Tuesday evening the friends and neighbors, carrying their own refreshments, wended their way to the Park home and entered unannounced. The number in all was about twenty. A very enjoyable evening was spent by all. A remembrance of the day, a white tablecloth, was left by the guests for Mrs. Park.

Vegetable Tarts and Pies.

Elizabeth Goose of Boston bestowed a great blessing upon American posterity when she induced her good man, Thomas Fleet, to publish in 1711 "The Mother Goose Melodist," many of which rhymes dated back to a similar publication printed in London two hundred years before. Is it strange that with the passage of time, the use of pastry goes unheeded, when as children we, too, have sung to us over and over the songs of tarts and pies?

The word tart comes from the Latin word *tortus*, because tarts were originally in twisted shapes, and every country seems to have adopted them into their national menu. That they were too common in those early days is shown in these same nursery rhymes, and that tarts seemed to have been relished by royalty and commonalty is worthy of that is evinced in the rhymes, "The Queen of Hearts she made some tarts," and "Little King Boggus he built a fine hall, Floured his pastry-crust that was the wall."

Again this ancient lore speaks of "Five and twenty blackbirds baked in a pie," and, too, there was that child wonder, "Little Jack Horner," who with the same unerring instinct of a water wizard with a willow twig could, by the sole means of his thumb, locate and extricate upon the tip of the same a plum from the Christmas pie.

American tarts and pies are in a class of their own. Pies were very closely allied to pioneer, and the Colonial housewife of early days was forced to concoct fillings out of sweetened vegetables, such as squash, sweet potatoes, and even some were made of vinegar. Yet the children still dot on these tempting tarts, pies and turnovers, for were they not trotted in babyhood on a "Cook horse to Banbury Cross, To see what the old woman was doing, A penny white loaf, a penny white cake, And two-penny apple pie."

The next time you have a few varieties of vegetables left over, or wish a dainty luncheon side dish, try making a tray of vegetable tarts with various fillings, and they will be as fascinating to those from as a tray of French pastries.

While I have worked out these modern recipes in tempting pastries, I will lay all pastry honors to our fore-mothers, who passed on to us the art of pie-making. Proof as to the harmlessness of pie in diet is shown in the fine constitution of our American doughboy, who is certainly a great credit to the heritage of pastry handed down by the Daughters of the American Revolution.

The moral of this discourse is that "The child is father of the man," and men dote on pies.

POTATO TARTS A LA GRATIN.

Line round muffin pans with pastry circles as for other preserve tarts, and fill with the following:
Dice cold boiled potatoes, season with salt and pepper, moisten with white sauce, made of two tablespoonfuls of flour, two tablespoonfuls of lard, one cup of milk, one-half a teaspoonful salt. Mix with this grated cheese. Fill the shells and sprinkle grated cheese on top. Bake a light brown.

BAKED ONION DUMPLINGS.

Parboil medium-sized onions in salted water. Cut half way down in quarters, add salt, butter, and pepper. Place each on a square of blinnet dough or pastry, rolled thin. Bring together opposite corners, twist, and place in a moderate oven to bake the onion tender. Serve with white sauce.

FRESH TOMATO TART SALAD.

With a round cookie cutter make rounds of pastry. Cut an equal number with the doughnut cutter. Prick, sprinkle lightly with grated cheese and bake a light brown. Place a plain shell on a crisp lettuce leaf, add a slice of tomato, not larger, on top. Then pour on a little mayonnaise and place on top the tart shell with a hole in the center. Serve at once.

GREEN TOMATO MINCE PIES.

One peck of green tomatoes, put through a food chopper. Boil, drain and add as much water as juice drained out. Soak and drain again. Add water as before, soak and drain. This time add half as much water, then the following:
3 pounds brown sugar
2 pounds raisins
2 tablespoonful nutmeg
2 tablespoonful cinnamon
2 tablespoonful cloves
2 tablespoonful allspice
2 tablespoonful salt

Boil all together and add one cup of vinegar. Cook till thick as desired. Put in jars and seal.

To one pint of this mixture add one cup of chopped apple and the juice and rind of one lemon, grated or ground. Sweeten to taste, fill crust and bake as the usual mince pie.

Evaporated apples may be used, but grind before soaking and do not cook. These pies will not harm children, and are very inexpensive as compared to those made of mince meat.

PLUM TOMATO PRESERVES TURNOVERS.

Make a circle as big as a pancake, or a square equal in area. Fill the center with plum tomato preserve and fold over matching edges, either as a half circle, or a triangle. Prick and bake.

Turnovers are especially ideal as pies for fitting into lunch boxes, and may be made of any sweetened vegetable preserve for school lunches.

KING CABBAGE TARTS.

Use cabbage which has been boiled in salted water and seasoned with salt and pepper to taste. Make a white sauce and pour over, mixing well with the cabbage. Fill round muffin pans lined with pastry circles, sprinkle with cheese over all well thickened and smooth. Season with one teaspoonful of flour and three tablespoonfuls of softened butter, rubbed together, stirring constantly until well thickened and smooth. Season with one teaspoonful of flour and one-half of salt and one-half a teaspoonful of pepper. Fill into the onion pulp one-fourth a cup of flour, and stir until smooth, add one-fourth a teaspoonful of celery seed and one bay leaf, and mix with the thickened oyster liquor. Stir until the whole comes to a boil and the sauce is thick as porridge. Add the chopped oysters and one pint of this cream, let heat through, and serve with oysterettes, saltines or other plain crackers.

Oyster-and-Onion Purse.

Steam one pound of white onions, and when tender stir through a colander. Cook one quart of oysters in their liquor until the shells separate; strain, and chop the oysters in a chopping bowl. Return the liquor to the saucepan, and cook with three tablespoonfuls of flour and three tablespoonfuls of softened butter, rubbed together, stirring constantly until well thickened and smooth. Season with one teaspoonful of flour and one-half of salt and one-half a teaspoonful of pepper. Fill into the onion pulp one-fourth a cup of flour, and stir until smooth, add one-fourth a teaspoonful of celery seed and one bay leaf, and mix with the thickened oyster liquor. Stir until the whole comes to a boil and the sauce is thick as porridge. Add the chopped oysters and one pint of this cream, let heat through, and serve with oysterettes, saltines or other plain crackers.

Brother Jonathan.

Make a mush of yellow cornmeal, and mould in cylindrical moulds, such as baking powder boxes or brown bread moulds. Let stand until next day, and cut into slices. Arrange the slices on a large porcelain plate in a pyramidal form, sprinkling each layer with some sharp, hard cheese, grated, and seasoned with a very little red pepper. Sprinkle buttered crumbs freely over the whole; brown in a hot oven, and serve with vegetable with fat, with sour grape jelly melted and poured over it.

Potato-and-Peanut Sausages.

Mix one cup of roasted and flaked ground peanuts with one cup and one-half of highly seasoned mashed potatoes. Add one beaten egg, and form the mixture into small sausage-shaped rolls, rolling each one in flour. Roll on a hot pan, greased with bacon fat, or bake in a very hot oven, until the outside of the sausages is lightly browned. Fill in the center of a dish, and garnish with curls of toasted bacon, placed on a border of shredded lettuce.

Powdered pumice stone is a useful accessory to the toilet.

A little on the toothbrush with the powder will remove tartar. Use only once in a while. Sausages may destroy the enamel of the teeth.

AMERICAN MUSEUM OF NATURAL HISTORY

THE cornerstone of the home of this wonderful collection in Manhattan Square, New York City, which contains some ten acres of floor space, was laid by President Grant in 1877.

The purpose of this great "curiosity shop" is to procure actual specimens upon which accurate knowledge of the animals, birds, minerals and other wonders of the world are based and exhibit them for the edification of the public.

A few of the displays which attract particular attention, the like of which probably does not exist elsewhere, are: the largest known meteorite, brought from Greenland and weighing 36 tons; an Indian dugout 64½ feet long, made from a single tree; a section of a California tree, 16 feet in diameter and more than 1,900 years old; a life-size model of a 79 foot whale, probably the largest animal that ever lived and which probably weighed 70 tons; mounted specimens of more different kinds of birds than you imagine the world contains; a collection of implements used by prehistoric man, representing a period of approximately 250,000 years; exhibits of fishes, including some so primitive as to be scaleless; an exhibit of snakes that gives you the creeps; an intensely interesting exhibit showing how disease is transmitted by insects, and a library of some 70,000 volumes on natural history, travel and anthropology.

Keeping Books.

Leather-bound books should be kept where the air is not dry, and circulates freely enough to prevent the natural oil of the leather drying out too rapidly.

A Great Heap of Small Stuff.

Grammar being but an introduction to the understanding of authors, if it be made too long or exquisite to the learner, it is a manner mortifying his courage. And by the time he comes to the most sweet and pleasant reading of old authors, the spark of fervent desire of learning is extinct with the burden of grammar like as a little fire is soon quenched with a great heap of small sticks; so that it can never come to the principal logs where it should long burn in a great pleasant fire—Sir Thomas Eliot, "The Governor" (1581).
