Significant Sand and Gravel Aquifers

Quadrangle Location

101 MILE 7000 FEET 1 KILOMETER

SCALE 1 : 24,000

CONTOUR INTERVAL 10 FEET

TRUE NORTH

GEOLOGIC AND WELL INFORMATION

- Depth to bedrock, in feet below land surface
- Sand permeable, indicated as minimum depth to bedrock based on boring depth in school
- Precipitation depth below land surface (observed on well, spring, and borehole, in feet)
- Groundwater level indicated (in feet, or seven or eight feet)
- Depth to bedrock, in feet

GROUND-WATER FLOW AND CONTAMINATION

Flowing water and water-saturated soils can contaminate ground water.
