He also alludes to the pleasure received in listening to the music performed by our village band, and counts himself fortunate in having timed his visit to so opportune a date that enabled him to see this favored. He alludes in complimentary terms to the musical organization, both in regard to their selections of tunes played that evening and their rendering of them under the skillful leadership of Mr. Emery Mason, the band master and director.

In reference to the Sunday services at the Baptist Church in the morning, he speaks of the sermon of the preacher, Rev. Mr. Barrows, as one of great interest and instructive, and the rendering of the church music by the quartette choir as being in harmony with the sentiment of the hymns and the sacredness of the day. And he concludes his letter with the declaration that he would have been glad to have tarried longer in so charming a place and among such pleasant and hospitable people as he met on that occasion.

She was busy darning, and she looked up at me with a surprised expression. "You see," she explained, "I don't let the parlor and the young 'uns go to bed at all, and I just keep the carpet and the floor in the best of order.
