Surficial Materials

**Worthley Pond Quadrangle, Maine**

**Digital cartography by:**
Montrose D. Thompson
Susan L. Thompson

**Cartographic design and editing by:**
Robert D. Tucker
Bernard J. Mosko, Jr.

The data shown here may be used for a variety of purposes to include planning, site selection, earth-moving, and site development projects. The data is intended for use with engineering and construction professionals, and planning and design groups. The data is based on current government data and is not intended for topographic mapping. The data may be used for planning and design purposes but cannot be used for navigation. This data is intended for planning and design activities and cannot be used for navigational purposes. The data is not intended for public release or public use.

**SOURCES OF INFORMATION**

Material supplied by: Census of Minerals, U.S. Department of Interior. The depth data is from the Maine Geological Survey, Maine Geological Survey Map Series M-96-97-98. The contour interval is 20 feet, and the scale is 1:24,000. The data is based on current government data and is not intended for topographic mapping. The data may be used for planning and design purposes but cannot be used for navigation. The data is not intended for public release or public use. This data is intended for planning and design activities and cannot be used for navigational purposes. The data is based on current government data and is not intended for topographic mapping. The data is based on current government data and is not intended for topographic mapping. The data is not intended for public release or public use.

**SCALE**
