HOW TO MAKE APPLE TURNOVERS

Make a very rich "short" pastry. It out and cut into squares about 4 inches wide. Set in the middle of a large paper and cored apple, drop each apple a piece of butter about as big as the end of one's thumb, in the hole with sugar and put around the outside of the fruit. Lay the sugar stick two inches of end and press three cloves into the apple. Lay a slice of lemon on top of all this; then take up the four corners of the pastry, pinch them into a point over the apple and let them bake good, quick oven so that the pastry be well browned.

Small sachets are much in vogue made of bits of silk and ribbon. One wishes to preserve. Bits of ribbon are stuck into sachets and to your favorite school friends and call pleasant memories of school long gone by.

Daughter—Did you ever find out what that papa cut out of the paper?—Yes, I bought another. I read it all through, but I never found anything wrong about it. It's all on the beneficialness of houses.
