Samuel of patent pills have been distributed about town the past week. The crowd in a certain store at the Brook tried 'em to see if they were any good. They were of a phony character and got there. Of course he was not wound up, but yet he was not far from it, and very graciously accepted the token, feeling that to have the good will of one so well as that of which any man might well feel proud. Mr. Jones tendered his thanks in a card in another column of this paper.

## Wise Saws and Modern Instances.

Statistics compiled for the census of 1890, show that the percentage of deaths from consumption, in the entire country, is 116; from cancer and tumors, 121; total, 111. The percentage for both in the New England States is larger; for consumption being 128; for cancer, etc., 125; total, 113. Modern pathologists aver that consumption is only one form of scrofula of which tubercle is the essential element. The tendency to scrofula diseases is usually heredity, though such diseases may be acquired through the action of various exciting causes, all of which may be classed together as "causes of debility."

Mr. M. I. Stevens, of Northport, Wisc. Co., Me., was the victim of a remarkably insidious type of constitutional tuberculosis, originating from external excess. In the late spring or early summer of 1893 he began to suffer from pain in his left foot, attended with swelling and slight tenderness, resembling rheumatism. Despite skillful medical treatment he grew worse; and, in the following winter, a suppurating abscess appeared upon his left temple. He finally sought relief at the Massachusetts General Hospital, undergoing an examination by the board of surgeons of that institution April 7, 1899.

They pronounced his disease to be constitutional tuberculosis, stating that amputation of the affected foot and the opening of all existing abscesses and of others as they should, from time to time, appear, were necessary for the prolongation of his life and afforded some hope for permanent recovery. Almost proferring death to such mutilation, Mr. Stevens returned home and put himself in the hands of a local physician who recommended a course of remedies more known as Rodolfs' New Medical Discovery and Rodolfs' Cream Emulsion.

Thanks to their use, Mr. Stevens escaped the surgeon's knife and is now in good health with two good legs, abscesses all healed, and, to all appearance, the tubercular taint eradicated from his system. Letters, with stamps enclosed, relating to his case, will be promptly answered by him. His post-office address is Belfast, Me., Box 611.

Rodolfs' New Medical Discovery and New Cream Emulsion embrace the latest and best discoveries of modern science for the treatment and cure of Consumption, Scrofula, Tuberculosis, Cancer, Rheumatism and their predisposing causes. Try them and they will do you good.

Gossipy Bits of News Regarding Residents and Visitors—Occurrences Trivial and important but None the Less of Great Interest.

The co-operative paving cutters have resumed work at the quarry near the cemetery.

W. W. Conant is home from Freeport, where he has been working. Mr. Conant is nursing a sore hand, the result of an injury at Freeport.

The quarry owned by J. S. McDonald near east side of Old Harbor Pond has been leased, blacksmith-shop erected and operations commenced by a crew of paving cutters. They will work on the co-operative plan.

Roller skating and dancing at the Opera House, Saturday night, attracted quite a large number. Manager Shields intends to continue these skating carnivals through the summer. Music is furnished by the band.

Saturday the selection started out on their annual tour in search of valuation, but it will be hard for them to find much increase over that of last year and the same old rate of taxation must remain.

In the mail which arrived Tuesday night there was not a letter or postal card, in fact the only occupant of the bag was THE COURIER-GAZETTE. This is rather a strange happening, when we consider the large amount of mail matter that is daily handled by our post-office officials.

R. B. Fillmore, the blind book agent, is in Vinalhaven this week soliciting orders for the "Story of the New World," "Treasury of Song" and other books. He is also agent for The Maine Home Journal and is offering that popular magazine and a line of premium books that should be appreciated.

Lane & Libby have made some changes in the interior of their store which adds them greatly in the improvement of their large business. The second floor has been refurnished, with rooms for clothing, carpets, wall paper, etc. Most of their business in these lines has heretofore been transacted on the first floor.

The concert and ball at the Opera House Wednesday night was a very enjoyable affair. The music was furnished by Atkins' Orchestra, eight pieces. Those who were not there missed a musical treat. There is no doubt but what if this orchestra should visit us again they would attract a large audience.

The room over Lyford & Ginn's, where the library is to be temporarily located, is being fixed up very nicely. This will be a more convenient place than the present location, better entrance, etc., and it is hoped that some such plan cannot be had that would be a permanent location. The library will be removed this week.

## The Nicest and Most Natural

The finest, purest, strongest and best flavors for cakes, puddings, pastry, etc., are Dr. Price's Delicious Flavoring Extracts. In this age of adulteration, consumers owe it to themselves to patronize manufacturers who have an established reputation for placing in the market pure articles. Dr. Price's Extracts for purity have the endorsements of the leading chemists of this country. They are used by the United States Government. The best hotels and restaurants use them. The largest and finest grocers sell them, and they are destined to take the place of all other Flavoring Extracts.

## A STOMACH LIKE AN INDIAN.

Why the Indians Never Have Dyspepsia, Yet are Careless Eaters.

No one could accuse an Indian of over-carefulness in eating. He ate what nature gave him—berries from the bush, apples from the tree, game from his bow. He ate plenty of it, ate it as he was full, and he was never sick. It was not very well cooked sometimes, and so often ate fast.

When hunting or fighting a day would often pass without anything being eaten at all. Yet he never had dyspepsia. He never "dieted."

We hear too much about "dieting" these days.

A man must eat pie, or cabbage, or cake, or bones, or this and that.

He must eat very much and he must do it very slow. He must never drink when he eats. He must eat slowly. He must eat slowly.

And so it goes.

This is all very good advice. But it would worry a man to death to remember it all.

Why can't we live like the Indians? Because we have such weak stomachs. But how did the Indians possess such perfect stomachs?—digested by taking that medicine of his, Sagwa, whenever he felt there was anything wrong with him.

That Sagwa we have now employed in the treatment of the Indian remedy for dyspepsia, KICKAPOO SAGWA, you know, would not know what a weak stomach or dyspepsia was.

Thanks to the efforts of the Kickapoo Medicine Company, Indian roots and other Kickapoo Indian remedies are obtainable of any druggist, and their genuine quality value is beyond comparison.

Kickapoo Indian Sagwa.

"Now good digestion wait on appetite and health on both."

To assure both the above ends, good wholesome, palatable food is demanded. It is next to impossible to present a sufficient variety of appetizing food of fare for our meals without liberal allowance of purity and other food in which shortening is required. How to make crisp, healthy, digestible pastry has been the task of the past has been a difficult one.

Always tickle, never uniform, most unwholesome—lard has always been the lard of the cook and the scourge of "good digestion."

Now good digestion wait on appetite and health on both.

comes now into popular favor as the new shortening—better than even the best of lard with none of lard's objectionable qualities. And

COTTOLINE comes attended by both "APPETITE AND HEALTH."
