AMERICAN RED CROSS TO GIVE RURAL HELP

The American Red Cross has undertaken the planning of a large scale public health and community welfare program for rural Vermont.

Through the efforts of the Red Cross in establishing health units in rural communities, the program has been made possible.

The program includes the establishment of a Red Cross health unit in each rural community, with the cooperation of the local health department.

The health unit will provide medical care, health education, and other services to the rural population.

The program is designed to improve the health and well-being of rural Vermonters, and to reduce the incidence of disease and disability.

The American Red Cross will be working closely with the Vermont Department of Health and other local health agencies to implement the program.

In addition to providing medical care, the health unit will offer health education programs, including classes on nutrition, hygiene, and disease prevention.

The health unit will also be equipped to provide first aid and emergency care, and to assist in the transportation of sick and injured individuals.

The American Red Cross is committed to improving the health and quality of life of rural Vermonters, and to reducing the burden of disease and disability in the state.

VOLUNTEERS

Volunteers will be needed to staff the health units, and to assist in the implementation of the program.

Volunteers are encouraged to contact their local Red Cross chapter to learn more about the opportunity to serve in this important role.

The American Red Cross is grateful to the Vermont Department of Health and other local health agencies for their support in making this program possible.

The American Red Cross is committed to improving the health and well-being of rural Vermonters, and to reducing the burden of disease and disability in the state.
