O L D C O N C O R D, MASS., is rich in historical and literary associations. It has many points of interest for the observing automobile tourist. And you will find it convenient there to replenish your supply of Socony gasoline. Socony stations are located at frequent intervals along the roads of eastern Massachusetts—and in western Connecticut and northern New York State! Socony is the quality motor fuel. The methods used in refining it are the result of a comprehensive experience, extending from the infancy of the industry to the present day. New processes have been developed from time to time in well-equipped research laboratories. Every known method is used to produce the cleanest, most powerful gasoline that can be made.

Socony is first and foremost a dependable gasoline. Its low boiling point insures easy starting, complete combustion and full power and mileage of the entire time wherever you buy it. Begin using Socony regularly—for all-year economy.

Quickly Raided by a Female Gouge-Killing Antelope.

The lady who was bitten by a gurge-Killing Antelope was Mrs. Mary C. Smith, 34 years old, of 1410 W. Superior Ave., Chicago. She was walking with her dog, a chihuahua, when she was attacked by the antelope. She received a severe wound on the arm, but was not seriously injured.

Look at the roads for twenty miles around on a Sunday.

There isn't any "country" any more. The automobile has brought the most remote settlement almost as close to the center of things as the next county was in the old days.

To hear some tire dealers talk you might think that nobody knew anything about tires except the fellow from Broadway.

That's not the basis we go on.

We give every man credit for knowing what he is spending his money on, whether he drives up here in his small car from ten miles out in the country or is passing through from the capital in his limousine.

That's one thing we like about U. S. Tires.

They make no distinction between the small car owner and the owner of the biggest car in the country.

It's all the same to them.

So long as a man owns an automobile he is a small car owner no matter how large or small he's entitled to the very best tire they can give.

Quality has always been the outstanding feature of U. S. Tires. There's no limit on the U. S. guarantee. All U. S. Tires are guaranteed for the life of the car.

IV

We have given a lot of thought to this tire proposition.

There's some advantage in being the representatives of the oldest and largest rubber concern in the world.

Drop in the next time you're down this way and let us tell you some interesting facts about tires.
Goodyear Tires for Small Cars Are Popular Because Economical

There is nothing but disappointment in buying cheaply made tires that are announced as wonderful bargains at a few dollars each and then fail after brief terms of service.

Get exceptional mileage at exceedingly low cost in Goodyear Tires, of the 30 x 3, 30 x 3½ and 31 x 4-inch sizes, built of Goodyear-selected materials and with Goodyear skill and care. Due to their precise manufacture in the world’s largest tire factory devoted to their quality, their life is most economically produced and therefore most economically employed.

If you own a Ford, Chevrolet, Dort, Maxwell or other car taking these sizes, go to your nearest Service Station for Goodyear Tires; ride farther and fare better.

Goodyear (30 x 3) $235

Goodyear Heavy Touring Tires cost no more than the price you are asked to pay for tubes of large size—tubes which cost the manufacturer far more than the tires themselves.

If you feel suspicious of these prices, go to our nearest Service Station. We will show you the Goodyear Tires and the Goodyear Tubing with which they are made.
