DESCRIPTION OF COLUMN HEADINGS

COVERAGE COUNTS

Traffic Volumes by County, Town, and Route

FOREWORD

The Department of Transportation, Bureau of Planning, Traffic Section is responsible for the collection of all types of traffic data and maintenance of a statewide traffic data base. The reduction and reporting of traffic volumes is accomplished through two (2) types of count programs:

Continuous Count Program

Traffic volumes are monitored on a continuous, year round basis at thirty (30) permanent recorder sites located on major highways throughout the State. These hourly counts are collected to produce a weekly average day and an average weekday figure along with figures for the monthly average day and monthly average weekday. This information is compiled to develop an Annual Average Daily Traffic (A.A.D.T.) figure for each location. The A.A.D.T. is computed from the average of the weekly average day totals for the year.

48 Hour Data

Between April 1st and November 15th of each year, 48 hour traffic counts (i.e., coverage counts) are gathered to monitor traffic flow and changes in traffic patterns. These counts are generally taken at intersections with major routes and along other significant roadways or in coordination with ongoing projects or special traffic studies for the Department.

The State is divided into three (3) zones:

Zone I - The northern portion of the State which contains the smallest population density.

Zone II - The central portion of the State.

Zone III - The southern portion of the State.

These zones are counted on a five (5) year cycle; Zones II and III are counted twice and Zone I is counted once during the five year period. The 1988 Program included 1,744 counts.

The coverage count program also consists of the "special counts" taken each year to satisfy Departmental needs, local requests, and federal requirements. These counts include annual collection of data for the State's four (4) urbanized areas (BACTS, KACTS, LACTS, PACTS), counts taken along the Interstate System and data collected from the traffic studies conducted throughout the year.

Once the A.A.D.T.'s have been computed for all of the permanent recorder locations, weekly factors for each station are computed by dividing the A.A.D.T. by each average weekly figure. Those stations which exhibit similar traffic patterns are assembled and placed into one of three (3) groups:

Urban - Roadways which carry commuter traffic and exhibit little seasonal change in traffic volumes.

Arterial - Roadways which carry commuter traffic, but are moderately influenced by seasonal traffic.

Recreational - Roadways which are heavily influenced by seasonal traffic.

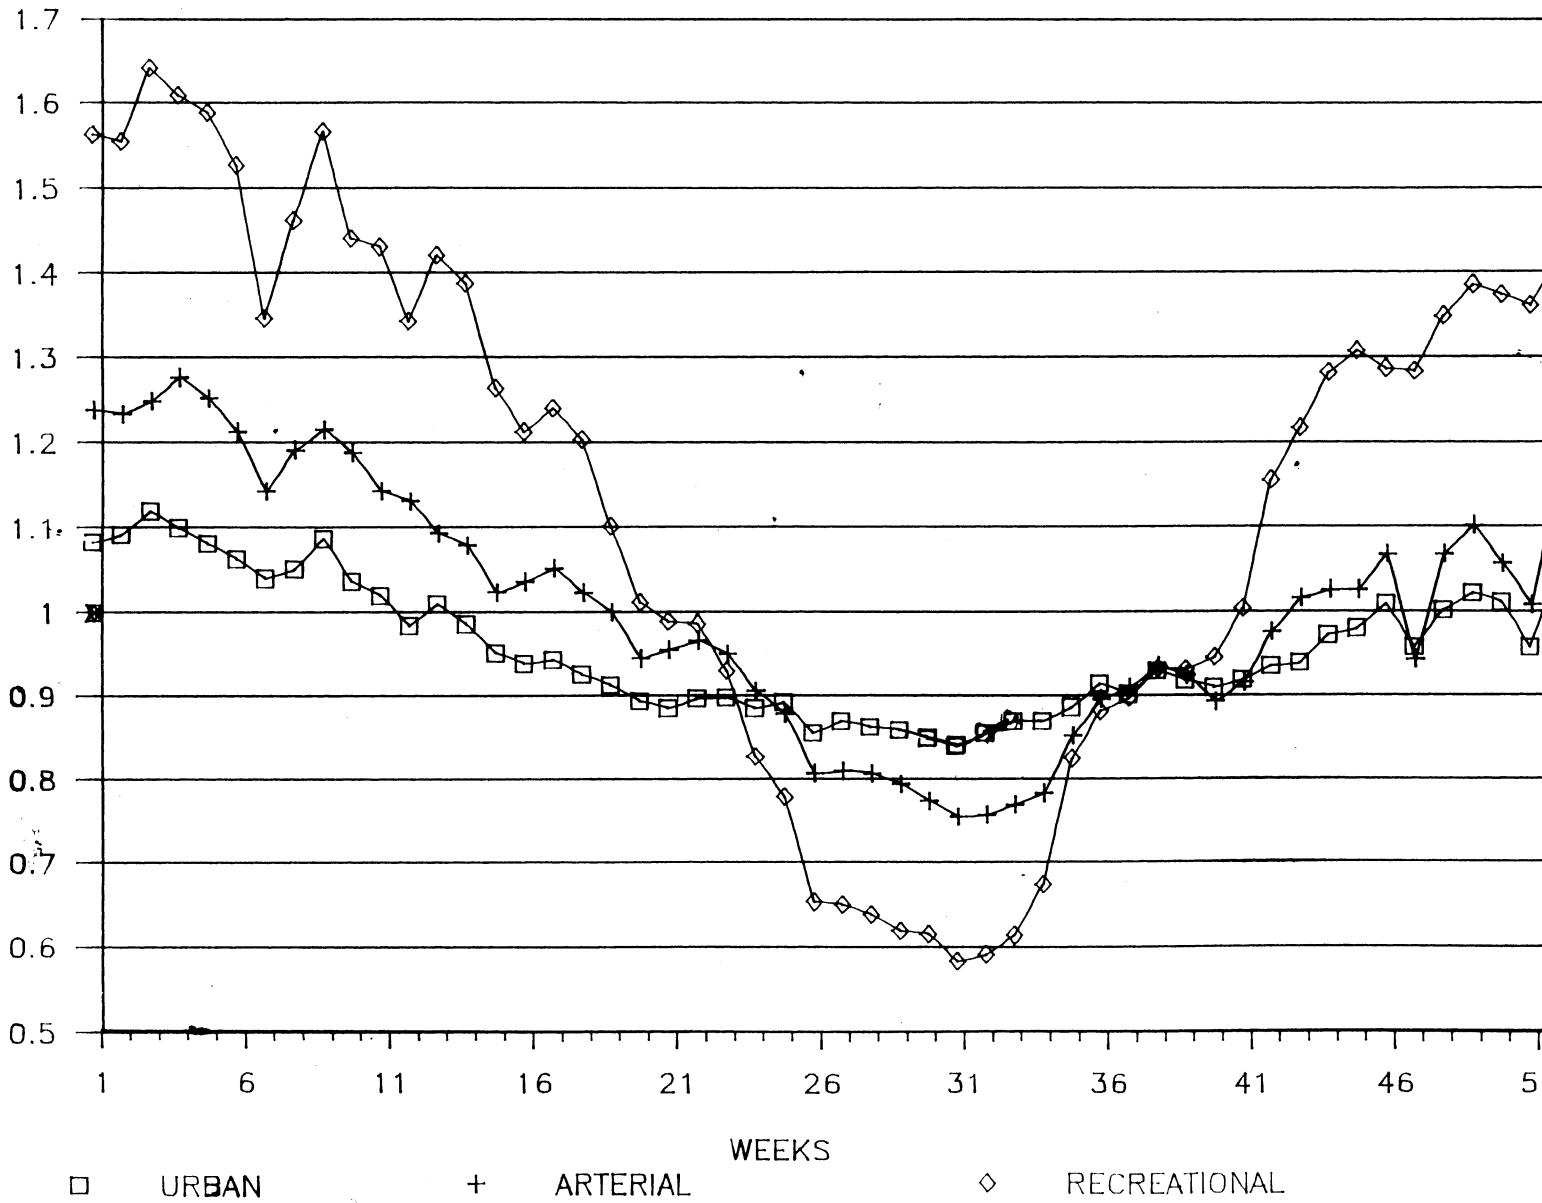

Within each of the three groups, a factor for each week is computed by averaging the weekly factors from each station within the group.

The 1988 Weekly Group Mean Factors were developed by averaging the Weekly Group Mean Factors for 1985, 1986, and 1987. The following pages show the graph of the 1988 Weekly Group Mean Factors and a list of the factors.

The 48 hour raw data may now be grouped and assigned a factor to produce an A.A.D.T. The A.A.D.T.'s computed utilizing data from the permanent recorders are compared to the prior year's data to develop growth factors for expanding traffic in uncounted zones. The updated A.A.D.T.'s are entered into the Transportation Integrated Network Information System (TINIS) to be used by various Departmental employees.

DESCRIPTION OF COLUMN HEADINGS

The following is a description of the column headings and abbreviations used for the Coverage Count Section:

Town - The town in which the count was taken.

Route - The U.S. or State Route or roadway on which the count was taken.

----X indicates a Routed Highway.

----A indicates a U.S. Alternate Route.

----C indicates a Business Route.

A----, B----, or C---- indicates a Ramp.

indicates a Non-Routed Roadway.

For Interstate Counts:

----X indicates Northbound or Eastbound.

----S indicates Southbound.

----W indicates Westbound.

Location - A description of where the count was taken.

SR indicates a State Route.

TL indicates a Town Line.

IR indicates an Inventory Road.

CUL indicates a Compact Urban Line.

Type - The purpose for taking the count.

B indicates a B.A.C.T.S. Count.

K indicates a K.A.C.T.S. Count.

L indicates a L.A.C.T.S. Count.

P indicates a P.A.C.T.S. Count.

A blank space indicates a Coverage Count.

Group - The factor group assigned to each location.

I indicates an Urban Group.

II indicates an Arterial Group.

III indicates a Recreational Group.

AR# indicates a Permanent Recorder Location.

1988 AADT - The "Annual Average Daily Traffic" volume at each location.
