This Text is brought to you for free and open access by the State Documents at Maine State Documents. It has been accepted for inclusion in InforME (Information Resource of Maine) Documents by an authorized administrator of Maine State Documents. For more information, please contact statedocs@maine.gov.
Access to information and online services has never been more immediate with the level of connectivity provided by the new device types being released each year. From smaller tablets to wearable technologies, it becomes more and more challenging for State and Local Governments to keep up with the advances in technology. InforME continues to be a leader in leveraging these new technologies and is able to deliver an ever-evolving, nationally recognized eGovernment portal, Maine.gov.

Established in 1997, InforME is the State of Maine’s primary resource for providing user-friendly eGovernment solutions. With the mission of providing, enhancing, and promoting electronic access to public information and government services, InforME and Maine.gov have become an integral part of the state’s delivery of services to the public.

Now in its 15th year, the Maine.gov portal provides access to a depth of information. With over 300,000 pages of state government content and more than 475 online services offered in partnership with nearly every state agency, over 200 municipalities, and the University of Maine System, InforME is making government more accessible. In 2014, InforME added a new Corporate Fraud Monitoring service, which allows interested parties to monitor business entities for fraudulent filings as well as an attorney registration and continuing education tracking service, MyMaineAccess. Additionally, several existing services were expanded including the Burn Permit Purchase service, which now allows users to purchase a permit in any Maine city, town or township, and the Online Licensing service, which now allows for greater flexibility in the types of information collected from licensees. The Maine State Employees Combined Charitable Appeal (MSECCA) online donation service was repurposed for the University of Maine System to allow them to quickly offer an online contribution service.

During 2015, InforME will address a number of new initiatives including the expansion of transparency and open data services. To meet this goal, we have partnered with Socrata, one of the nation’s leaders in providing data discovery services for opening government data to the public. In 2015 will bring increased mobile usage and new device types. In an effort to keep pace with these technologies, InforME continues to evolve the State of Maine responsive website and application templates. In 2015, several applications, including campground reservations and the hunting and fishing license purchase service will be launched with the latest version of the application template, which responds more adaptively for the device being used. Additionally, key applications will be evaluated using Google Analytics to determine customer usage by device and modified accordingly.

Through its strategic plan and continued guidance, the InforME Board will help the portal prioritize projects that will lead to new online services and access to even more public information in the coming year. I am once again amazed at the work that was accomplished in 2014 and look forward to the opportunities that 2015 has in store. As Chair of the InforME Board, I would like to thank all of the people that contribute to eGovernment success including the InforME Board members, portal staff, participating government employees and online service users.
InforME: Access Anywhere

Providing a strong web presence to connect Maine citizens to their government is more important than ever. InforME has worked in partnership with the State of Maine and municipal agencies to implement more than 450 electronic services and process more than 80 million secure payment transactions since 1999.

In 2014 this public/private partnership continued to produce a high quality web presence that focused on usability and accessibility, enabling Maine Citizens and visitors to access information and conduct business with the State from virtually any location.

Maine.gov Milestones: The State of Maine first adopted the concept for a self-funded eGovernment web portal back in 1999 with the creation of InforME, a unique State initiative, resulting in the development of Maine.gov. Now, 15 years later, InforME and Maine.gov continue to achieve tremendous success providing new information and online services to Maine citizens, through innovative uses of technology.

Maine’s Online Vehicle Registration Renewal service, Rapid Renewal, also celebrated an important milestone in 2014 by processing its 1,000,000th transaction. The e-government service, provided by the Department of the Secretary of State, launched in 2001 with just 10 municipalities piloting the program. Currently in its 13th year, the service has grown to include 187 municipalities, ranging from large cities to small towns.

Innovative Solutions and Enhancements: In 2014, Maine Corporations, Elections and Commissions, a Bureau of the Secretary of State, became just the second state agency in the nation to introduce an Online Corporate Fraud Monitoring service. The new service provides users with the ability to be notified of any filing completed against their business entities.

The innovative service was developed in partnership with the Bureau of the Secretary of State, Elections and Commissions, their business entities.

2014 updates to the State Portal included advancements in technology. The most recent strategic plan spans 2013-2015 and defines the goals of InforME and the strategies to achieve them.

2013-2015 Strategic Plan Goals
1. Promote the benefits of Maine eGovernment services to both citizens and businesses.
2. Continue the long-term financial stability and viability of InforME.
3. Provide continued marketing and education to position InforME as the primary resource for online solutions for State and Local government.
4. Promote innovative collaborative solutions that maximize state and local government’s efficiencies and responsiveness.

Online services can create efficiencies for State and Local government, however, in order to make a significant impact, citizens and businesses need to be made aware of all of the services available on Maine.gov. Based on our 2013 User Needs Analysis survey, we found that citizens wanted more communication with Government and the preferred methods were via email and mobile devices.

In 2014, InforME implemented a tiered transaction-fee funding model, which provides price breaks for agencies as service adoption increases. InforME has also begun implementing a hybrid-funding model for services with lower annual transaction volumes. This model uses a time and materials fixed cost contract for the upfront development and a transaction fee based agreement for the ongoing hosting, support and maintenance of that service.

3. Provide continued marketing and education to position InforME as the primary resource for online solutions for State and Local government.

During the strategic planning process in 2013, the InforME Board identified a key goal of positioning InforME as the primary resource for online solutions. The first objective of that goal was to "Decide whether or not to advance InforME as a brand as a means of increasing

InforME Board’s Strategic Plan sets the key goals and direction for InforME to ensure that InforME continues to achieve its mission for serving both government and the public. The most recent strategic plan spans 2013-2015 and defines the goals of InforME and the strategies to achieve them.

Looking Forward to 2015: InforME will continue its dedication to expanding access to state and local government services, by creating one of a kind services, and updating existing legacy applications in an effort to keep pace with advances in technology and encourage participation from citizens and businesses.

The InforME Board’s Strategic Plan sets the key goals and direction for InforME to ensure that InforME continues to achieve its vision for serving both government and the public. The most recent strategic plan spans 2013-2015 and defines the goals of InforME and the strategies to achieve them.

1. Promote benefits of Maine eGovernment services to both citizens and businesses.
2. Continue the long-term financial stability and viability of InforME.
3. Provide continued marketing and education to position InforME as the primary resource for online solutions for State and Local government.
4. Promote innovative collaborative solutions that maximize state and local government’s efficiencies and responsiveness.

All new services are promoted on the Maine.gov home page, agency website, through national press releases, and other relevant marketing venues. In addition to promoting new services, InforME placed an even greater emphasis on promoting existing services in 2014. This was achieved by strengthening our social media presence, issuing quarterly subscriber eNewsletters, generating email marketing campaigns, and sending out monthly direct mail pieces for targeted services.

Innovative Solutions and Enhancements: In 2014, the Department of Professional and Financial Regulation once again partnered with InforME and launched a significant enhancement to the Online Professional Licensing Service. The goal of the enhancement was to simplify the administrative functions of the service. These updates provide boards with more control over the configuration of their individual online licensing applications.

Local government service adoption increased substantially in 2014. Over the past year there were 75 new municipal partnerships across InforME’s suite of municipal services, including 41 new towns and utility districts joining the Maine PayPort debit and credit card processing service, which is now available at 167 different locations. Rapid Renewal, the online vehicle registration renewal service processed over 140,000 vehicle registration renewals in 2014.

Website Redesigns: Based on user trends, InforME made some innovative changes to Maine’s web presence. The State’s high standard for usability ensures that these enhancements work well across the broadest possible range of browsers/versions and are fully accessible on all devices. The 2014 updates to the State Portal included advancements in mobile design, search visibility, wearable technologies and email/text notifications.

InforME also took the opportunity to redesign two of its own resource pages in 2014, updating both the internal Webmaster Resource Center and the public facing InforME website. The Webmaster Resource Center provides tutorials and guidance, hosting information and various tools available to State of Maine Webmasters and Coordinators. The InforME website redesign, launched in the Fall, provides up to date content and information about who InforME is and what services and resources are available to both citizens and businesses.

Enhancements to both sites included new streamlined navigation, updated request forms and implementing a mobile ready responsive design template.

Fifteen years after implementation, Maine.gov continues to be a valuable resource for Mainer and visitors through constant updates and achievements in eGovernment innovation.

Governor Paul R. LePage
Strategic Plan Update

visibility and understanding between InforME, the State of Maine, and Maine.Gov.

After surveying Maine State employees, we found that most individuals had heard of InforME and had some understanding of what InforME does, however there was still some confusion in areas related to funding, partnership and services offered. Therefore, in 2014 we created a quarterly partner e-newsletter, which is now being distributed to all state agencies to promote InforME’s key services and future offerings. In addition, we also redesigned the InforME website to make it easier for partners to learn what value InforME can provide them.

4. Promote innovative collaborative solutions that maximize state and local government’s efficiencies and responsiveness.

In 2014, InforME continued the lengthy process of conducting a review of our more than 450 existing online services in an effort to find ways to increase the efficiency and responsiveness of those that are “underperforming”. As part of this analysis, we were looking for ways to promote or enhance services that are being under utilized. In addition to enhancing existing services, InforME will continue to look for collaborative and innovative solutions across other NIC portals. For example, InforME reached out to Utah for assistance revamping the Maine.gov Media Gallery to integrate with YouTube.

As we approach 2015, InforME has a clear roadmap of the strategies that need to be completed in order to attain these strategic goals, while continuing to deliver effective eGovernment services to the citizens and business of Maine.

Current and Future eGovernment Services

Current Fee Services

Interactive applications with full online transactions of agency business, that have launched since the portal began.

Department of Agriculture, Conservation and Forestry
Dog Licensing $7 per altered dog, $12 per unaltered dog. Jun-03

“Each year, we look to improve our website and online services in order to ensure that we are providing an accessible, convenient way for citizens and business to interact and conduct business with their government. In 2014 Maine’s dedication to deliver a high quality online resource was recognized by multiple outside sources, supporting our belief that we are as committed as we have ever been.”

Greg McNeal
Chief Technology Officer
Office of Information Technology
New Services and Updates

**Burn Permit Purchase:** Offers the ability for users to purchase a Maine State Burn Permit statewide. $7 per permit. January 2014

**MyBoardAccess:** An attorney directory and personalized CLE reporting application created for the Board of Overseers of the Bar which was re-developed to coincide with the launch of their website redesign. No Fee. January 2014

**Corporate Fraud Monitoring:** This service automatically checks for new filings processed against a business entity on a daily basis. $35 per entity monitored. February 2014

**MyMaine Connection Electronic Noticing:** The online service was expanded to allow clients to opt into electronic noticing and to view notices online. No Fee. February 2014

**Online Regulatory Licensing:** Significant enhancements were completed which allow for additional Departments within the State to join the online service. Various Fees. May 2014

**University of Maine Combined Charitable Appeal Application:** The existing MSECCA application for State of Maine employees was leveraged to quickly offer UMS a similar application at a low cost. No Fee. November 2014

**Sprinkler Licensing Application:** The existing application was entirely rewritten with enhancements that allow new fire sprinkler licenses to be purchased as well as renewals for existing licenses. $10 per permit. December 2014

**Medical Marijuana Certifications:** Allows licensed Maine physicians to issue a medical marijuana certificate to patients. No Fee. December 2014

Future Services

InforME consistently seeks new opportunities for delivering online services to the citizens and businesses of Maine. InforME is currently working on several of the projects listed below, while others represent new opportunities that InforME believes would add value to the existing suite of Maine.gov online services.

The successful launch of the enhanced UCC service can be attributed to the Department’s long-standing partnership with InforME and the relationships that have formed over the years. From the business user at CBC to the project manager at InforME, and everyone in-between, constant communication, weekly conference calls and impromptu meetings kept everyone’s eye on the prize. This model will serve us well as we begin phase two of the project and also start planning for the rewrite of the corporate software code.”

• InforME, August 2014

Current and Future eGovernment Services

Maine Websites Receive Two VEMA Awards
Maine’s official state web portal, www.maine.gov, and Maine’s online one stop business portal, www.maine.gov/businessanswers, were each honored with an award that recognizes achievement in creativity, innovation and communication.

The VEMA Awards were created to inspire talented individuals and companies striving to further evolve the visual arts and digital communications industry and to strengthen its collective artistic community. In 2014, only 11 public and private entities were recognized in the website category, the State of Maine received two of them.

University of Maine Website Receives Silver Communicator Award of Distinction
The University of Maine’s official Web portal, www.maine.edu, has been honored as a top education website receiving an award that recognizes achievements in the fields of both creativity and communications. The website received a Silver Communicator Award of Distinction from the International Academy of Visual Arts. The Communicator Awards are an annual competition honoring the best in advertising, corporate communications, public relations and identity work for print, video, interactive and audio. The awards are judged and overseen by the International Academy of the Visual Arts (IAVA), a 600+ member organization of leading professionals from various disciplines of the visual arts dedicated to embracing progress and the evolving nature of traditional and interactive media.

MyMaine Connection Online Service Recognized With National Digital Government Achievement Award
The Center for Digital Government recognized the State of Maine with a Digital Government Achievement Award in the government-to-citizen category for the My Maine Connection Service (www.maine.gov/mymaineconnection). The online service is sponsored by the Department of Health and Human Services.

"Working with InforME in the redesign process, we knew we were going to be happy with the finished product. It’s always nice to see outside recognition that reinforces our perspective on excellence. We look forward to growing our partnership with InforME in the future.”

Richard Thompson
Chief Information Officer
University of Maine System
January
The Board did not vote on any items at the January Board meeting.

February
The Board approved the following in February:
- Department of Marine Resources, duplicate the online licensing service
- Department of Public Safety, Fire Marshal’s Office, updated Schedule A

March
The Board meeting for March was cancelled.

“Rapid Renewal began in 2001 with just 10 municipalities as pilots for the program. Thirteen years later the service has grown to 187 municipalities, large and small, and processes approximately 115,000 registrations a year. Rapid Renewal has proven itself to be the hallmark of making government services easy for Maine people.”
