Printed under appropriation 010-04A-5115-512

What is the purpose of the Wood Processor Report?

Each year, the Maine Forest Service collects information from Maine primary wood processors regarding the volume of wood processed in Maine. Information is also collected for volumes imported into Maine or exported from Maine.

This report summarizes, for 2006, the volume of wood harvested in Maine, processed by Maine mills, and imported into or exported from Maine.

Wood flow data is summarized for sawlogs, pulpwood, biomass chips, and imports and exports.

How was this information collected?

In 2006, the Maine Forest Service received wood processor reports from 183 primary processing mills (sawmills, pulp and paper mills), 83 portable sawmills, 48 loggers and brokers who may have exported wood, 20 concentration yards, and from 11 mills that burn some form of wood for energy. Volume information contained in these individual reports is confidential and by law shall not be made public, except that summary reports may be published using aggregated data which does not reveal the activities of an individual person or firm (12 MRSA chapter 805, subchapter 5, "Forest Landowner and Wood Processor Reporting Requirements").

Interpreting Harvest, Export, Import, and Processed by the Maine Forest Products Industry

Maine wood processed

wood that is harvested in Maine and used by a Maine primary processing facility.

Exported from Maine without processing

wood that is harvested in Maine and exported out of state without processing by a Maine mill.

Imported from out of state

wood that is imported from out of state (not harvested in Maine) and processed by a Maine mill.

Total processed by Maine Forest Products Industry

total volume of wood processed in Maine, regardless of origin.

Definitions and Notes

1. Biomass Chips:

produced in the woods by chipping the entire tree, including branches and tops. Usually used as energy fuel, they may also be suitable for sludge composting, playground padding, and mulch.

2. Bole/Stem Pulp Chips:

produced in the woods by chipping the lower portion of the tree. These chips are not free of bark, but are suitable for use in pulp mills.

3. Cords (cfs):

a stack of fuel wood, pulpwood, or other material that measures 4 x 4 x 8 feet, or 128 cubic feet.

4. Construction and Demolition Waste (C and D Waste):

ground up wooden debris left over from construction and demolition that is burned by wood to energy facilities.

5. Hog Fuel:

any woody residue produced from mills, such as sawdust, bark or shavings, and used as energy fuel.

6. Pulpwood:

roundwood that is used for the production of wood pulp. Generally sold as tree length, 16', 8' or 4' lengths.

7. Sawlogs:

a log that meets minimum standards of diameter, length, and defect, intended for sawing into boards or lumber. Includes sawlogs, studwood, pallet logs, boltwood, and veneer logs.

8. Sawmill residues:

clean, pulp-quality chips made from debarked slabs and edgings at sawmills. Used by pulp and paper mills to produce wood pulp.

9. Thousand Board Feet (MBF):

One thousand board feet. One board foot is the amount of wood contained in an unfinished board 1" thick, 12" long, and 12" wide.

Report Highlights

Maine's forest products industry consumed 6.5 million cord equivalents in 2006, up slightly from 2005 consumption. Seventy-seven percent of the supply (5 million cord equivalents) was harvested in Maine, while 23% (1.5 million cord equivalents) was imported from out of state.

Maine landowners harvested 7 million cord equivalents of wood in 2006, up from 6.3 million cord equivalents in 2005. Twenty-eight percent (1.9 million cord equivalents) of the 2006 harvest was exported out of state, up from 2005 (1.4 million cord equivalents).

Maine's pulp and paper producers processed 3.4 million cord equivalents of pulpwood, the same as reported in 2005. Seventy-seven percent of the pulpwood originated from Maine's forests; 23% was imported from out of state.

Pulp and paper producers also processed 1.3 million tons of sawmill residues.

Maine's sawlog production in 2006 was 1 billion board feet, the same as 2005.

During 2006, Maine's forest products industry imported 1.5 million cords, while 2 million cords were exported.

Sawmill residues are clean, pulp-quality wood chips made from slabs and edgings at sawmills. The volume is reported here as an additional input to the pulp and paper mills. Sawmill residues are a by-product of the sawing process, and are not included as additional harvest volumes from Maine's forests.

Pulpwood Notes:

1. Other Softwood is comprised of bole chips of which specific species information was not collected.
2. Aspen volumes are based upon pure loads.
3. Other Hardwood is comprised of all hardwood species except aspen sold in pure loads.

SUMMARY**2006 Wood flow in Maine as reported to the Maine Forest Service**

Product	Harvest, Export, Import, Instate Processing	Total Volume in 2006	Total Volume converted to cords
Sawlogs (in MBF) 1 MBF = 1,000 board feet	a. Maine wood processed	807,062	1,614,123
	b. Exported from Maine without processing	673,995	1,347,990
	c. Total harvested from Maine forests (a+b=c)	1,481,057	2,962,113
	d. Imported from out of state	181,396	362,792
	f. Total processed by Maine Forest Products Industry (a+d=e)	988,458	1,976,915
Pulpwood (in cords)	a. Maine wood processed	2,627,821	2,627,821
	b. Exported from Maine without processing	501,242	501,242
	c. Total harvested from Maine forests (a+b=c)	3,129,063	3,129,063
	d. Imported from out of state	768,348	768,348
	f. Total processed by Maine Forest Products Industry (a+d=e)	3,396,169	3,396,169
Biomass Chips (in green tons)	a. Maine wood processed	1,969,487	787,795
	b. Exported from Maine without processing	362,237	144,895
	c. Total harvested from Maine forests (a+b=c)	2,331,724	932,690
	d. Imported from out of state	818,226	327,291
	f. Total processed by Maine Forest Products Industry (a+d=e)	2,787,713	1,115,085
Totals (in cords)	a. Maine wood processed		5,029,739
	b. Exported from Maine without processing		1,994,127
	c. Total harvested from Maine forests (a+b=c)		7,023,866
	d. Imported from out of state		1,458,431
	f. Total processed by Maine Forest Products Industry (a+d=e)		6,488,170

Note on conversions: For sawlogs: 1 MBF = 2 cords For Biomass Chips: 1 cord = 2.5 green tons

Wood Harvesting Trends (1960-2006)

The Maine Forest Service has been collecting data on volume of wood harvested since the late 1940's. The following three charts illustrate wood harvesting trends over the past 46 years.

The two graphs to the right show the harvest volumes for selected species for sawlogs and pulpwood. These volumes include exported volumes.

Harvest Levels of Selected Species for Sawlogs in Maine (1960 to 2006)

Harvest Levels of Selected Species for Pulpwood in Maine (1960 to 2006)

Wood Harvesting Trends (1960-2006)

The graph to the right shows the volumes for commercially important species.

Import and Export Trends (1990-2006)

The graph to the right shows the volumes of forest products being exported from Maine, imported into Maine, and processed within Maine.

Harvest of Commercially Important Species in Maine (1960 - 2006)

Imports and Exports of Forest Products (1990 - 2006)

Maine Forest Service District Foresters

The Maine Forest Service has 10 District Foresters who provide technical assistance and educational services to landowners, loggers, schools and educational institutions, municipalities and other stakeholders. District Foresters conduct educational workshops, field demonstrations, presentations, and can provide limited one-on-one contact with individual landowners.
