TIPS ON HOW TO RELEASE FISH

By carefully following these simple instructions you can release your fish.

1. Time is of the essence. Play and release the fish as quickly and carefully as possible. An exhausted fish may be too weak to recover.
2. Keep the fish in the water as much as possible. A fish out of water is suffocating and may injure itself on rocks, etc.
3. Be gentle. Keep your fingers away from the gills. Don't squeeze the fish. Small fish may be held gently around the middle. Let the fish swim from your hand upon recovery. Larger fish may be held securely by holding the tail and the bottom jaw area. If a net is used, be sure it is fine meshed to avoid injury to the gills and eyes.
4. Remove the hook with small pliers or use your thumb and forefinger to shake it loose. If the hook cannot be easily removed, cut the leader, the hook will rust out rapidly. If the fish is bleeding profusely or injured in any way, it may not survive.
5. To revive the fish, hold it in a swimming position in the water and move it back and forth gently until it is able to swim away.
6. Lake trout (togue) often have expanded air bladders after being pulled up rapidly from deep water. If the belly appears expanded, gently press your thumb along the stomach near the paired belly fins and move your thumb forward a few times to remove the air from the bladder, then proceed as in #5 above.

Fish Consumption Advisory

Trace amounts of dioxin have been detected in fish tissue in certain sections of the Penobscot, Kennebec and Androscoggin Rivers. The Maine Department of Human Services currently advises that persons planning to eat more than one 8 ounce fish meal per month should consult with the Department as to possible or potential health effects, and that pregnant women not consume fish from those rivers. This advisory is subject to revision or rescission during 1992 and 1993 as new or additional data becomes available. For information regarding any such revisions or rescission, please consult local postings or call the Department of Human Services at 289-3707.

Hydro-Electric Facility Warning

Many rivers have hydro-electric facilities which create a DANGER OF RAPIDLY CHANGING WATER LEVEL without warning. For personal safety reasons, we urge fishing from river bank only in such areas.

WARNING:

Maine has a tough "OUI" (operating under the influence) provision in its boating law. A person is guilty of criminal violation if that person operates or attempts to operate any watercraft: 1) while under the influence of intoxicating liquor or drugs or a combination of liquor and drugs, or; 2) while having 0.08% or more by weight of alcohol in that person's blood. An enforcement officer may require a blood alcohol test when 1) the officer has probable cause; 2) when that person is involved in a watercraft accident
