Director

DLI BULLETIN NO. 217

SEP 18 1952

FOREWORD

The Revised Statutes of Maine 1944, Chapter 25, Section 2 direct the Department of Labor and Industry to "collect, assort, and arrange statistical details relating to industrial pursuits in the State; including the names of firms, companies, or corporations, where located, the kind of goods produced or manufactured."

We herewith present the Directory of Maine Manufacturers, 1952 edition. The cooperation of manufacturers who completed forms and otherwise assisted in the preparation of this booklet is deeply appreciated.

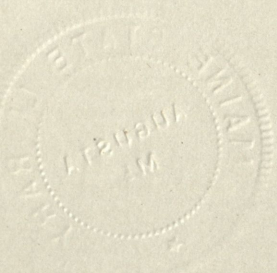

Your suggestions, recommendations, and if necessary, your corrections are earnestly solicited.

MARION E. MARTIN,
Commissioner
June 1, 1952

TECHNICAL NOTES

Directory Entries

Entries are based principally upon information furnished by Maine manufacturers on a reporting schedule entitled "Product and Employment Report." With the exception of a few scattered cases where Department inspectors in the field have (in the absence of a properly filed report) supplied the facts presented herein, all data were obtained from these reports.

An establishment is defined as a single physical location where industrial operations are performed; it is, therefore, a place of business rather than a legal entity or company which may have units in many locations. This policy of showing separate locations was not practical in a few instances where Maine companies have extensive woods or logging operations which change location frequently.

Some active establishments are not included because (1) the report mentioned above has not been filed, (2) field inspectors have been unable to obtain basic information and (3) the establishment may not be considered manufacturing as defined by the Standard Industrial Classification system.

Accuracy of the report determines the authenticity of our entries. An inadequate description of products and operations is one of the most frequent causes of error in this booklet. If civil division is omitted from the space on the report provided for such information, geographic location has been assigned on the basis of mailing address.

Employment is that reported as an average or representative for the calendar year. Executives are excluded from employment figures; all other employees are included.

Arrangement

Principal divisions of this booklet are county; subdivisions, minor civil divisions. Establishments are listed under these headings in alphabetical order. In some cases a mailing address as well as plant location are shown. An index to counties, minor civil divisions and manufacturers by type of industry are provided. The index by type of industry is arranged in accordance with the Standard Industrial Classification system, which was prepared by the Bureau of the Budget, Executive Office of the President and is the system in most common usage today.

1950 population figures are shown immediately below each county or minor civil division heading. This information was furnished by the U. S. Department of Commerce, Bureau of the Census.

HOWARD LARRABEE,
Research Director.

TECHNICAL NOTES

February 1944

During the past few years of the war, the Government has been making considerable progress in the field of technical research. This progress has been made possible by the fact that the Government has been able to obtain the services of many of the best technical minds in the country. These men have been working on a variety of problems, and their work has been of great value to the Government.

One of the most important areas of research has been in the field of electronics. This is an area in which the Government has made considerable progress. The work in this field has been of great value to the Government, and it is hoped that it will continue to be of great value in the future.

Another area of research in which the Government has made considerable progress is in the field of mechanical engineering. This is an area in which the Government has made considerable progress, and it is hoped that it will continue to be of great value in the future.

The work in this field has been of great value to the Government, and it is hoped that it will continue to be of great value in the future. The work in this field has been of great value to the Government, and it is hoped that it will continue to be of great value in the future.

The work in this field has been of great value to the Government, and it is hoped that it will continue to be of great value in the future. The work in this field has been of great value to the Government, and it is hoped that it will continue to be of great value in the future.

The work in this field has been of great value to the Government, and it is hoped that it will continue to be of great value in the future. The work in this field has been of great value to the Government, and it is hoped that it will continue to be of great value in the future.

The work in this field has been of great value to the Government, and it is hoped that it will continue to be of great value in the future. The work in this field has been of great value to the Government, and it is hoped that it will continue to be of great value in the future.

The work in this field has been of great value to the Government, and it is hoped that it will continue to be of great value in the future. The work in this field has been of great value to the Government, and it is hoped that it will continue to be of great value in the future.

LEONARD L. FARR

Research Director

Abbreviations Used —

BKPWKR — Bingham's Kennebec Purchase, West of the Kennebec River.

BPP — Bingham's Penobscot Purchase.

MD — Middle Division.

NBKP — North of Bingham's Kennebec Purchase.

PLT — Plantation.

R — Range.

TWP — Township.

WBKP — West of Bingham's Kennebec Purchase.

WELS — West of the Easterly Line of the State.

Note: Only those minor civil divisions from which manufacturing establishments reported are included here.
